[29] The Commission notes that cash flows may be particularly useful in assessing the relative performance of foreign and U.S. issuers since, unlike the other statements, this information is not dependent on the differing accounting rules followed in preparing the balance sheet and income statements. Further, the Commission also notes that the International Accounting Standards Committee issued an exposure draft dated July, 1991 that would require a cash flow statement. The existing IASC standard calls for a statement of changes in financial position on either a funds or cash flow basis.

[30] In December 1989, FASB issued SFAS 103 which amends SFAS 96 to defer the effective date of that statement to fiscal years beginning after December 15, 1991. The effective date was later deferred until fiscal years beginning after December 15, 1992 in recognition of the imminent adoption of a revised accounting standard.

Rule 9–03.7 to require disclosure in the balance sheet of the net unamortized deferred loan origination fees and costs.

A majority of commentators opposed the proposal. The principal reasons cited for opposition were (1) That the balance sheet disclosure exceeds the requirements of GAAP since SFAS 91 addresses only the accounting and not the financial statement display of loan origination fees and (2) that the separate information would not necessarily be relevant or useful to financial statement users and the amount of such deferred loans and fees would be included in unearned income which is required by S–X, Rule 9–03.7, to be separately disclosed if material.

The Commission finds merit in certain of these arguments. The amended rules do not include the requirement for separate disclosure of net unamortized deferred loan fees and costs.

VI. Accounting and Reporting by Insurance Companies

In December 1987 the FASB issued SFAS 97, Accounting and Reporting by Insurance Enterprises for Certain Long Duration Contracts and for Realized Gains and Losses from the Sale of Investments. Article 7 of S–X governs the form and content of financial statements of insurance enterprises.

A. Realized Gains and Losses

SFAS 97 requires that, consistent with all other industries, net realized investment gains and losses be included in the determination of income from operations rather than being presented below operating earnings and shown net of applicable income taxes in the income statement. Consistent with this standard, the Commission is amending Rule 7–04 of Regulation S–X to present net realized gains and losses on a pretax basis in the computation of income or loss from continuing operations. A majority of commentators objected to separate income statement line item presentation. Some objected to the proposed requirement that separate line item presentation would be required regardless of size.

The requirement to disclose net realized gains and losses "regardless of size" is consistent with the language for the similar requirement for bank holding companies at Rule 9–04.13 of S–X. The net amount of realized gains and losses, together with other required information concerning investing activities, provides meaningful information to financial statement users.[31] The utility of the information is not diminished because the amounts of gains versus losses happen to offset in a particular period and therefore the net amount becomes small in relation to some other measure of performance. Consequently, the amendment is being adopted as proposed.

B. Gains and Losses Allocable to Policyholders and Separate Accounts

It is the Commission's understanding that there is diversity in practice among insurance companies with respect to inclusion of investment income and realized gains and losses allocable to policyholders and separate accounts together with other investment income and realized gains and losses reported in the financial statements.[32] The Commission is amending its rules to require disclosure of an insurance enterprise's policies with respect to the manner in which the financial statements report or include investment income and realized gains and losses allocable to separate accounts and policyholders together with disclosure of the amounts of such allocable investment income and realized gains and losses included in the financial statements. This amendment is being adopted to enable users of financial statements to identify income, gains, and losses that accrue to the benefit of shareholders as compared to the benefit of policyholders and separate accounts and to facilitate comparability of financial statements.

Certain commentators objected to the proposal on the basis that this is only one area in which there is diversity in practice among insurance companies and suggested that this should be referred to the private sector for deliberation. While Commission policy supports having the private sector consider the establishment of standards, the Commission cannot ignore dealing with divergent accounting practices when they are identified. Further, the Commission has been encouraged by the favorable response from registrants in the insurance industry to go forward with this amendment. Therefore, this amendment, as modified to clarify the disclosure to be provided, is being adopted.

C. Other Consideration

SFAS 97 addresses accounting for other consideration earned by insurance enterprises, including administrative and surrender charges on investment contracts such as universal life policies. The proposing release included a proposal to amend Rule 7–04 to include a new revenue caption, "Other Consideration."

Respondents to this proposal were evenly divided with supportive commentators suggesting that a different descriptive title be adopted. Opponents generally observed that the disclosure would not be meaningful or necessary and exceeds the requirements of GAAP. It was also observed that if this "other consideration" is not otherwise separately disclosed but is included in "other income" it, nevertheless, would be required to be presented separately pursuant to the requirements of S–X, Rule 7–04.3 (Rule 7–04.4 as amended), if it exceeds five percent of total revenue.

The Commission is persuaded by these comments that these sources of revenue may be included in "other income" with separate disclosure left to the discretion of registrants subject to the requirement for separate disclosure where such amounts exceed five percent of total revenue. Therefore, the proposed amendment is not being adopted.

VII. Oil and Gas Disclosure Requirements

The Commission is deleting Rule 4–10(k) of S–X which requires supplemental disclosures of oil and gas producing activities which are substantially similar to disclosure requirements which are contained in SFAS 69, Disclosures about Oil and Gas Producing Activities. This rule is no longer necessary because the transition period for the application of comparable rules under SFAS 69 has expire.[33] As a

---

[31] S–X, Rule 7–04.3 (as amended), and, previously, Rule 7–04.12 contain a requirement that the caption for realized gains or losses must be referenced to a footnote that provides an analysis of realized and unrealized gains and losses for each period for which an income statement is provided.

[32] A separate account is defined in section 2(a)(37) of the Investment Company Act of 1940, 15 U.S.C. 80a–2(a)(37), and in paragraphs 53 and 54 of SFAS 60, Accounting and Reporting by Insurance Enterprises. Although the assets of a separate account are the legal assets of the insurance company, the investment income and realized gains and losses from such assets accrue to the benefit of the separate account. Some insurance companies report the investment income and realized gains and losses on separate account assets together with the general operating accounts of the insurance enterprise and include the allocation of the separate account benefits with other insurance claims accruals. Other companies "net" the allocation against the investment income and realized gains and losses resulting in exclusion of separate account activities from the income statement of the insurance company.

[33] When SFAS 69 was adopted in 1982, it was made effective for years beginning on or after December 15, 1982 with earlier application encouraged but not required. The Commission's rules were amended in 1983 to indicate that the requirements of Rule 4–10(k) would not apply to fiscal years beginning on or after December 15, 1982, thus ensuring that supplemental disclosure requirements under Rule 4–10(k) would phase out as SFAS 69 requirements phased in.

result of the deletion of Rule 4–10(k), Rule 4–10(i)(4) (which currently refers to Rule 4–10(k)(6)) is also being amended to incorporate directly the language previously referenced. This is a change from the proposal to cross reference to certain related provisions of SFAS 69, which certain commentators argued could have the unintended effect of changing the method of applying the full cost ceiling test.[34]

Rule 4–10(i)(4) as presently being amended includes the current requirement to consider the tax effects of differences in bases of unproved properties, referred to in subparagraph (D) of existing Rule 4–10(i)(4). The provisions of subparagraph (D) were inadvertently omitted from the proposed rule printed in the Federal Register.

VIII. Other Technical Amendments

The Commission is adopting other technical amendments in response to public comment that certain other rules are no longer operative due to actions taken by the FASB. These amended rules include:

A. Rule 3–21 of Regulation S–X captioned, Special Provisions as to Financial Statements of Companies Engaged in Marketing Computer Software. This rule is supplemented by a note indicating that its requirements shall not apply to financial statements that reflect the adoption of a FASB pronouncement that provides guidance in this area. This rule is being deleted since SFAS 86, Accounting for the Costs of Computer Software to be Sold, Leased or Otherwise Marketed, is applicable to fiscal years beginning after December 15, 1985.

B. Rule 4–08(j) of Regulation S–X captioned, Leased assets and lease commitments of regulated enterprises subject to the rate-making process. This rule requires expanded lease-related disclosures in the financial statements of certain rate regulated registrants that are not required to follow the provisions of SFAS 13, Accounting for Leases. Consistent with the provisions of SFAS 71, Accounting for the Effects of Certain Types of Regulation, rate regulated registrants are no longer exempt from the provisions of SFAS 13. Therefore, the rule is being deleted since it is no longer necessary.

[34] One commentator indicated that a literal application of SFAS 60 would effectively eliminate use of the so-called "short-cut" method of calculating income taxes, presently permitted under Topic 12–D–1 of the staff accounting bulletin series.

Certain Findings

Section 23(a)(2) of the Securities Exchange Act ("the Act") [35] requires the Commission, in adopting rules under the Act, to consider the anti-competitive effect of such rules, if any, and to balance any impact against the regulatory benefits gained in terms of furthering the purpose of the Act. The Commission has considered the amendments and additions to Regulation S–X, Forms 10–K, X–17A–5, 20–F, Schedules 13E–3 and 13E–4, and Rule 14a–3, in light of the standard cited in Section 23(a)(2) and believes that adoption of these changes will not impose any burden on competition not necessary or appropriate in furtherance of the Act.

Regulatory Flexibility Act Certification

Pursuant to section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), the Chairman of the Commission previously certified that the proposed amendments will not have a significant impact on a substantial number of small entities. No comments were received on this certification.

List of Subjects in 17 CFR Parts 210, 240, 249, 259 and 274

Accounting, Reporting and Recordkeeping Requirements, Securities, Utilities, Investment Companies.

Text of Amended Rules

In accordance with the foregoing, title 17, chapter II, of the Code of Federal Regulations is amended as follows:

PART 210—FORM AND CONTENT OF AND REQUIREMENTS FOR FINANCIAL STATEMENTS, SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935, INVESTMENT COMPANY ACT OF 1940, AND ENERGY POLICY AND CONSERVATION ACT OF 1975

1. The authority citation for part 210 continues to read as follows:

Authority: 15 U.S.C. 77f, 77g, 77h, 77j, 77s, 77aa(25), 77aa(26), 78*l*, 78m, 78n, 78o, 78w(a), 79e(a) (b), 79n, 79t, 80a–8, 80a–20, 80a–29, 80a–30, 80a–37, unless otherwise noted.

§ 210.3–01 [Amended]

2. The first paragraph of the introductory note preceding § 210.3–01 is amended by revising the phrase "changes in financial position" to read "cash flows".

[35] 15 U.S.C. 78w(a)(2).

§§ 210.3–02, 210.3–03, 210.3–09 and 210.3–12 [Amended]

3. By amending the following sections to revise the phrase "changes in financial position" to read "cash flows".

§ 210.3–02 (a) and (b)
§ 210.3–03(b)(2) (2 places)
§ 210.3–09(c)
§ 210.3–12(a)

4. By amending § 210.3–18 to redesignate paragraph (a)(3) as (a)(4) and by adding new paragraph (a)(3) and by revising paragraph (b) to read as follows:

§ 210.3–18 Special provisions as to registered management investment companies and companies required to be registered as management investment companies.

(a) * * *

(3) An audited statement of cash flows for the most recent fiscal year if necessary to comply with generally accepted accounting principles. (Further references in this rule to the requirement for such statement are likewise applicable only to the extent that they are consistent with the requirements of generally accepted accounting principles.)

* * * * *

(b) If the filing is made within 60 days after the end of the registrant's fiscal year and audited financial statements for the most recent fiscal year are not available, the balance sheet or statement of assets and liabilities may be as of the end of the preceding fiscal year and the filing shall include an additional balance sheet or statement of assets and liabilities as of an interim date within 245 days of the date of filing. In addition, the statements of operations and cash flows (if required by generally accepted accounting principles) shall be provided for the preceding fiscal year and the statement of changes in net assets shall be provided for the two preceding fiscal years and each of the statements shall be provided for the interim period between the end of the preceding fiscal year and the date of the most recent balance sheet or statement of assets and liabilities being filed. Financial statements for the corresponding period of the preceding fiscal year need not be provided.

* * * * *

§ 210.3–18 [Amended]

5. By amending § 210.3–18(c) to revise the phrase "statements of operations and changes in net assets" to read "statements of operations, cash flows, and changes in net assets".

§ 210.3–19 [Amended]

6. By amending § 210.3–19 (a)(2) and (d) to revise the phrase "changes in financial position" to read "cash flows".

§ 210.3–21 [Removed]

7. By removing § 210.3–21.

8. By amending § 210.4–08 to add paragraph (h)(3) to read as follows:

§ 210.4–08 General notes to financial statements.

* * * * *

(h) * * *

(3) Paragraphs (h) (1) and (2) of this section shall be applied in the following manner to financial statements which reflect the adoption of Statement of Financial Accounting Standards 109, Accounting for Income Taxes.

(i) The disclosures required by paragraph (h)(1)(ii) of this section and by the parenthetical instruction at the end of paragraph (h)(1) of this section and by the introductory sentence of paragraph (h)(2) of this section shall not apply.

(ii) The instructional note between paragraphs (h) (1) and (2) of this section and the balance of the requirements of paragraphs (h) (1) and (2) of this section shall continue to apply.

9. By removing and reserving paragraph (j) of § 210.4–08.

10. By amending § 210.4–08(k)(1) to revise the phrase "changes in financial position" to read "cash flows".

11. By revising paragraph (i)(4)(i) of § 210.4–10 to read as follows:

§ 210.4–10 Financial accounting and reporting for oil and gas producing activities pursuant to the Federal securities laws and the Energy Policy and Conservation Act of 1975.

* * * * *

(i) *Application of the full cost method of accounting.*

* * * * *

(4) *Limitation on capitalized costs.* (i) For each cost center, capitalized costs, less accumulated amortization and related deferred income taxes, shall not exceed an amount (the cost center ceiling) equal to the sum of:

(A) The present value of estimated future net revenues computed by applying current prices of oil and gas reserves (with consideration of price changes only to the extent provided by contractual arrangements) to estimated future production of proved oil and gas reserves as of the date of the latest balance sheet presented, less estimated future expenditures (based on current costs) to be incurred in developing and producing the proved reserves computed using a discount factor of ten percent and assuming continuation of existing economic conditions; plus

(B) the cost of properties not being amortized pursuant to paragraph (i)(3)(ii) of this section; plus

(C) the lower of cost or estimated fair value of unproven properties included in the costs being amortized; less

(D) income tax effects related to differences between the book and tax basis of the properties referred to in paragraphs (i)(4)(i)(B) and (C) of this section.

* * * * *

12. By amending paragraph (j) of § 210.4–10 to revise in the first sentence the phrase "income tax allocation by the deferred method" to read "income tax allocation by a method which complies with generally accepted accounting principles", and removing the second sentence of the paragraph.

13. By removing paragraph (k) of § 210.4–10.

14. By amending § 210.7–04 by removing paragraph 12 and by redesignating paragraphs 3 through 11 as paragraphs 4 through 12 and by adding paragraph 3 to read as follows:

§ 210.7–04 Income statements.

* * * * *

3. *Realized investment gains and losses.* Disclose the following amounts:

(a) Net realized investment gains and losses, which shall be shown separately regardless of size.

(b) Indicate in a footnote the registrant's policy with respect to whether investment income and realized gains and losses allocable to policyholders and separate accounts are included in the investment income and realized gain and loss amounts reported in the income statement. If the income statement includes investment income and realized gains and losses allocable to policyholders and separate accounts, indicate the amounts of such allocable investment income and realized gains and losses and the manner in which the insurance enterprise's obligation with respect to allocation of such investment income and realized gains and losses is otherwise accounted for in the financial statements.

(c) The method followed in determining the cost of investments sold (e.g., "average cost," "first-in, first-out," or "identified certificate") shall be disclosed.

(d) For each period for which an income statement is filed, include in a note an analysis of realized and unrealized investment gains and losses on fixed maturities and equity securities. For each period, state separately for fixed maturities [see § 210.7–03.1(a)] and for equity securities [see § 210.7–03.1(b)] the following amounts:

(1) Realized investment gains and losses, and

(2) The change during the period in the difference between value and cost.

The change in the difference between value and cost shall be given for both categories of investments even though they may be shown on the related balance sheet on a basis other than value.

* * * * *

15. By amending § 210.7–04 by revising newly redesignated paragraphs 11 and 12 to read as follows:

§ 210.7–04 Income statements.

* * * * *

11. *Equity in earnings of unconsolidated subsidiaries and 50% or less owned persons.* State, parenthetically or in a note, the amount of dividends received from such persons. If justified by the circumstances, this item may be presented in a different position and a different manner. (See § 210.4–01(a).)

12. *Income or loss from continuing operations.*

* * * * *

16. By revising § 210.10–01(a)(4) to read as follows:

§ 210.10–01 Interim financial statements.

(a) * * *

(4) The statement of cash flows may be abbreviated starting with a single figure of net cash flows from operating activities and showing cash changes from investing and financing activities individually only when they exceed 10% of the average of net cash flows from operating activities for the most recent three years. Notwithstanding this test, § 210.4–02 applies and *de minimis* amounts therefore need not be shown separately.

* * * * *

17. By amending § 210.10–01(c) (3) and (4) to revise the phrase "changes in financial position" to read "cash flows".

§ 210.12–04 [Amended]

18. By amending § 210.12–04(a) to revise the phrase "changes in financial position" to read "cash flows".

§ 210.12–16 [Amended]

19. By amending § 210.12–16 to revise the "Segment" heading under column H of the schedule to read "Benefits, claims, losses, and settlement expenses (caption 5)" and to revise footnote 4 to the schedule to read, "The total of columns I and J should agree with the amount shown for income-statement caption 7".

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

20. The authority citation for part 240 continues to read as follows:

Authority: 15 U.S.C. 77c, 77d, 77g, 77j, 77s, 77eee, 77ggg, 77nnn, 77sss, 77ttt, 78c, 78d, 78i, 78j, 78*l*, 78m, 78n, 78o, 78p, 78s, 78w, 78x, 78*ll*(d), 79q, 79t, 80a–20, 80a–23, 80a–29, 80a–37, 80b–3, 80b–4, and 80b–11, unless otherwise noted.

§§ 240.13e–100, 240.13e–101, 240.14a–3 and 240.17a–5 [Amended]

21. By amending the following sections by revising the phrase "changes in financial position" to read "cash flows".

§ 240.13e–100 Item 14(a)(2)
§ 240.13e–101 Item 7(a)(2)
§ 240.14a–3(b)(1)
§ 240.17a–5(g)(1)

§ 240.17a–5 [Amended]

22. By amending § 240.17a–5 by revising the phrase "Changes in Financial Position" to read "Cash Flows".

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

23. The authority citation for part 249 continues to read as follows:

Authority: 15 U.S.C. 78a, *et seq.*, unless otherwise noted;

24. By amending Form 20–F (referenced in § 249.220f) Item 17(c) to redesignate paragraph (2) as paragraph (3) and Item 18(c) to redesignate paragraphs (2) and (3) as paragraphs (3) and (4) and by adding new Items 17(c)(2) and 18(c)(2) both to read as follows:

§ 249.220f Form 20–F, registration of securities of foreign private issuers pursuant to section 12(b) or (g) and annual and transition reports pursuant to sections 13 and 15(d).

Form 20–F

* * * * *

(c) * * *

(2) If financial statements are prepared under a comprehensive body of accounting principles that does not include a requirement for a statement of changes in financial position or a statement of cash or funds flow, the basic financial statements shall include a statement of cash flows which meets the requirements of U.S. generally accepted accounting principles. If the financial statements are prepared under a comprehensive body of accounting principles that includes a requirement for a statement of cash or funds flow that differs from the requirements under U.S. generally accepted accounting principles, cash flow information that is substantially similar to the requirements under U.S. generally accepted accounting principles may be presented in a separate statement of cash flows or in a footnote.

§ 249.310 [Amended]

25. By amending Form 10–K (referenced in § 249.310) Item 8(a)(2) to revise the phrase "changes in financial condition" to read "cash flows".

PART 259—FORMS PRESCRIBED UNDER THE PUBLIC UTILITY HOLDING COMPANY ACT OF 1935

26. The authority citation for part 259 is revised to read as follows:

Authority: 15 U.S.C. 79e, 79f, 79g, 79j, 79*l*, 79m, 79n, 79q, 79t.

§ 259.5s [Amended]

27. By amending Form U5S (referenced in § 259.5s) ITEM 9 to revise the phrase "changes in financial position" to read "cash flows".

PART 274—FORMS PRESCRIBED UNDER THE INVESTMENT COMPANY ACT OF 1940

28. The authority citation for part 274 continues to read, in part, as follows:

Authority: The Investment Company Act of 1940, 15 U.S.C. 80a–1, *et seq.*, unless otherwise noted:

* * * * *

29. By amending Form N–4 (referenced in § 274.11c) to revise Item 23(a)(iii) and add new Item 23(a)(iv) to read as follows:

§ 274.11c Form N–4, registration statement of separate accounts organized as unit investment trusts.

Form N–4

* * * * *

Item 23. Financial Statements

(a) * * *

(iii) An audited statement of cash flows for the most recent fiscal year if necessary to comply with generally accepted accounting principles.

(iv) Audited statements of changes in net assets conforming to the requirements of Rule 6–09 of Regulation S–X [17 CFR 210.6–09] for the two most recent fiscal years.

* * * * *

Dated: September 24, 1992.
By the Commission.

BILLING CODE 8010–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 5

Delegations of Authority and Organization; Office of Orphan Products Development

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the regulations for delegations of authority relating to general redelegations of authority from the Commissioner of Food and Drugs to add the Director, Office of Orphan Products Development, to those FDA officials already authorized to establish research, investigation, and testing programs and health information and health promotion programs, which relate to assigned functions, and to approve grants for these same areas.

EFFECTIVE DATE: October 1, 1992.

FOR FURTHER INFORMATION CONTACT: Ellen Rawlings, Division of Management Systems and Policy (HFA–340), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4976.

SUPPLEMENTARY INFORMATION: FDA is amending the regulations in § 5.25 *Research, investigation, and testing programs and health information and health promotion programs* (21 CFR 5.25) to add the Director, Office of Orphan Products Development, to those FDA officials already authorized to approve grants for research, investigation, and testing programs and health information and health promotion programs under sections 301, 307, 311, 1701, 1702, 1703, and 1704 of the Public Health Service Act. Redelegation of this authority will aid the Office of Orphan Products Development, in carrying out its responsibilities more efficiently. Accordingly, FDA is adding § 5.25(a)(7) as set forth below.

Further redelegation of the authority delegated is not authorized. Authority delegated to a position by title may be exercised by a person officially designated to serve in such position in an acting capacity or on a temporary basis.

List of Subjects in 21 CFR Part 5

Authority delegations (Government agencies), Imports, Organization and functions (Government agencies).

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 5 is amended as follows:

PART 5—DELEGATIONS OF AUTHORITY AND ORGANIZATION

1. The authority citation for 21 CFR part 5 continues to read as follows:

Authority: 5 U.S.C. 504, 552, App. 2; 7 U.S.C. 138a, 2271; 15 U.S.C. 638, 1261–1282, 3701–3711a; secs. 2–12 of the Fair Packaging and

Labeling Act (15 U.S.C. 1451–1461); 21 U.S.C. 41–50, 61–63, 141–149, 467f, 679(b), 801–886, 1031–1309; secs. 201–903 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321–394); 35 U.S.C. 156; secs. 301, 302, 303, 307, 310, 311, 351, 352, 361, 362, 1701–1706, 2101 of the Public Health Service Act (42 U.S.C. 241, 242, 242a, 242l, 242n, 243, 262, 263, 264, 265, 300u–300u–5, 300aa–1); 42 U.S.C. 1395y, 3246b, 4332, 4831(a), 10007–10008; E.O. 11490, 11921, and 12591.

2. Section 5.25 is amended by adding new paragraph (a)(7) to read as follows:

§ 5.25 Research, investigation, and testing programs and health information and health promotion programs.

BILLING CODE 4160–01–F

---

21 CFR Part 310

[Docket No. 89N–0525]

Status of Certain Over-the-Counter Drug Category II and III Active Ingredients; Technical Amendment

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; technical amendment.

SUMMARY: The Food and Drug Administration (FDA) is amending the regulations regarding the status of certain over-the-counter (OTC) drug Category II and III active ingredients. This final rule makes a nonsubstantive correction to the final regulations that were published in the **Federal Register** of November 7, 1990 (55 FR 46914). That final rule listed the name of an active ingredient incorrectly. This document corrects that error and provides clarification of the final rule for certain OTC drug products.

EFFECTIVE DATE: October 1, 1992.

FOR FURTHER INFORMATION CONTACT: William E. Gilbertson, Center for Drug Evaluation and Research (HFD–810), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8000.

SUPPLEMENTARY INFORMATION: This document amends the final rule concerning drug products containing certain active ingredients offered OTC for certain uses in 21 CFR part 310 (as set forth in the **Federal Register** of November 7, 1990 (55 FR 46914)). That final rule listed an active ingredient incorrectly. This final rule corrects that error in the regulations. As noted above, this amendment institutes a change that is nonsubstantive in nature. Because the amendment is not controversial and because, when effective, it provides clarification of a final rule for OTC drug products, FDA finds that the usual notice and comment procedures and delayed effective date are unnecessary.

List of Subjects in 21 CFR Part 310

Administrative practice and procedure, Drugs, Labeling, Medical devices, Reporting and recordkeeping requirements.

Therefore under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 310 is amended as follows:

PART 310—NEW DRUGS

1. The authority citation for 21 CFR part 310 continues to read as follows:

Authority: Secs. 201, 301, 501, 502, 503, 505, 506, 507, 512–516, 520, 601(a), 701, 704, 705, 706 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 331, 351, 352, 353, 355, 356, 357, 360b–360f, 360j, 361(a), 371, 374, 375, 376); secs. 215, 301, 302(a), 351, 354–360F of the Public Health Service Act (42 U.S.C. 216, 241, 242(a), 262, 263b–263n).

§ 310.545 [Amended]

2. Section 310.545 *Drug products containing certain active ingredients offered over-the-counter (OTC) for certain uses* is amended in paragraph (a)(3) by removing the entry "Carboxymethylcellulose" and adding in its place the entry "Carboxymethylcellulose sodium".

Dated: September 23, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

[FR Doc. 92–23848 Filed 9–30–92; 8:45 am]

BILLING CODE 4160–01–F

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 917

Kentucky Regulatory Program; Definitions; Exemption for Coal Extraction Incidental to Extraction of Other Minerals; Coal Exploration; Kentucky Bond Pool; Backfilling and Grading; and Postmining Land Use

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule; approval of amendment.

SUMMARY: OSM is announcing the approval, with exceptions, of a proposed program amendment to the Kentucky regulatory program (hereinafter referred to as the Kentucky program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment consists of proposed modifications to a number of Kentucky rules in various subject areas for the purpose of maintaining consistency with revised Federal requirements, clarifying ambiguities, improving operational efficiency and implementing the additional flexibility afforded by Federal regulatory revisions.

EFFECTIVE DATE: October 1, 1992.

FOR FURTHER INFORMATION CONTACT: William J. Kovacic, Director, Lexington Field Office, Office of Surface Mining Reclamation and Enforcement, 2675 Regency Road, Lexington, Kentucky 40503, Telephone (606) 233–2896.

SUPPLEMENTARY INFORMATION:

I. Background on the Kentucky Program.
II. Submission of Amendment.
III. Director's Findings.
IV. Summary and Disposition of Comments.
V. Director's Decision.
VI. Procedural Determinations.

I. Background on the Kentucky Program

On May 18, 1982, the Secretary of the Interior conditionally approved the Kentucky program. Information pertinent to the general background and revisions to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval can be found in the May 18, 1982, **Federal Register** (47 FR 21404–21435). Subsequent actions concerning the conditions of approval and proposed amendments are identified at 30 CFR 917.11, 917.13, 917.15, 917.16, and 917.17.

II. Submission of Amendments

By letter dated June 28, 1991 (Administrative Record Number KY–1059), Kentucky submitted a proposed program amendment modifying 19 regulations and incorporating two Technical Reclamation Memorandum (No. 19 and No. 20).

OSM announced receipt of the proposed amendment in the July 22, 1991, **Federal Register** (56 FR 33398), and in the same notice, opened the public comment period and provided opportunity for a public hearing on the adequacy of the proposed amendment. The comment period closed on August 21, 1991.

By letter dated November 11, 1991 (Administrative Record Number KY–1079, Kentucky resubmitted that portion

of the June 28, 1991, submission dealing with general permitting provisions at 405 KAR 8:010. OSM has separated the November 11, 1991, resubmission from Kentucky's original amendment dated June 28, 1991, and will process the resubmittal separately in a future **Federal Register** notice.

By letter dated December 31, 1991 (Administrative Record Number KY–1095), Kentucky submitted a proposed program amendment which revises the manner in which definitions of terms are reflected in Kentucky's regulatory program. The amendment deletes 405 KAR 7:020 which currently contains most of the definitions relevant to Kentucky's program, and adds new definition sections at the beginning of each Chapter of the Kentucky regulations, as follows: 405 KAR 7:001 definitions for 405 KAR chapter 7, 405 KAR 8:001 definitions for 405 KAR chapter 8, 405 KAR 10:001 definitions for 405 KAR chapter 10, 405 KAR 12:001 definitions for 405 KAR chapter 12, 405 KAR 16:001 definitions for 405 KAR chapter 16, 405 KAR 18:001 definitions for 405 KAR chapter 18, 405 KAR 20:001 definitions for 405 KAR chapter 20, and 405 KAR 24:001 definitions for 405 KAR chapter 24. The proposed amendment includes those changes to terms or additions of new terms that were part of the proposed program amendment (Administrative Record Number KY–1059) submitted on June 28, 1991. In addition, the proposed amendment deletes the definitions of several terms which are not used within Kentucky's program, and modifies several definitions by replacing the current definitions in the Kentucky Administrative Regulations with reference to definitions in Kentucky's Revised Statute.

OSM announced receipt of the December 31, 1991, submission in the January 30, 1992, **Federal Register** (57 FR 3601), and in the same notice, opened the public comment period and provided opportunity for a public hearing on the adequacy of the proposed amendment. The comment period closed period closed on March 2, 1992.

By letter dated April 1, 1992 (Administrative Record Number KY–1124), Kentucky submitted modifications to the December 31, 1991, submission discussed above. The modifications represent changes to specific definitions made as a result of Kentucky's formal promulgation process under Kentucky's Revised Statute chapter 13A.

OSM announced receipt of the April 1, 1992, resubmission in the May 21, 1992, future **Federal Register** (57 FR 21637), and in the same notice, reopened the public comment period and provided opportunity for a public hearing on the adequacy of the proposed amendment. The comment period closed on June 5, 1992.

By letter dated January 22, 1992 (Administrative Record Number KY–1107), Kentucky submitted a proposed program amendment which modified 13 of the 19 regulations included in the State's June 28, 1991 submission. This resubmission incorporated changes made to the proposed regulations during the State promulgation process. Also included in the resubmission were two publications entitled "Kentucky Agricultural Statistics 1989–1990" and "Kentucky Agricultural Statistics 1990–1991", which were incorporated by reference in 405 KAR 16:200.

OSM announced receipt of the January 22, 1992, submission in the April 13, 1992, **Federal Register** (57 FR 12775) and in the same notice, reopened the comment period and provided opportunity for a public hearing on the adequacy of the proposed amendment. The comment period closed on May 13, 1992. The sections of the Kentucky Administration Regulations (KAR) included in the January 22, 1992, resubmission are: 405 KAR 7:015 Documents incorporated by reference; 405 KAR 7:030 Applicability; 405 KAR 7:035 Exemption for coal extraction incidental to extraction of other minerals; 405 KAR 7:080 Small Operator Assistance; 405 KAR 8:020 Coal exploration; 405 KAR 10:200 Kentucky bond pool; 405 KAR 16:190 and 405 KAR 18:190 Backfilling and grading; 405 KAR 16:200 and 405 KAR 18:200 Revegetation; 405 KAR 16:210 and 405 KAR 18:220 Postmining land use capability; and 405 KAR 20:010 Coal Exploration.

By letter dated March 13, 1992 (Administrative Record Number KY–1119), Kentucky resubmitted that portion of the June 28, 1991, submission dealing with fish and wildlife resources regulations at 405 KAR 8:030, 8:040, 16:180 and 18:180. OSM has separated the March 13, 1992, resubmittal from Kentucky's original amendment dated June 28, 1991, and will process the resubmittal separately in a future **Federal Register** notice.

The January 22, 1992, submittal included reference to 405 KAR 7:080 which deals with Kentucky's Small Operator Assistance Program. Kentucky had previously resubmitted that regulation on December 5, 1991 (Administrative Record Number KY–1085). The December 5, 1991, resubmittal was open for public review and comment on December 31, 1991 (56 FR 67558). The public comment period closed on January 15, 1992, and a final rule was published on April 15, 1992 (57 FR 13043), approving the amendment to 405 KAR 7:080. As approved on April 15, 1992, the rules in 405 KAR 7:080, submitted on December 5, 1991, are identical to the rules in the January 22, 1992, resubmission. Therefore, no further discussion of 405 KAR 7:080 is required. In addition, 405 KAR 16:200 and 405 KAR 18:200, which deal with revegetation, are being separated from Kentucky's January 22, 1992, resubmission, along with the two publications regarding Kentucky's agricultural statistics referred to above, and will be considered separately by OSM in a future **Federal Register** notice.

III. Director's Findings

Set forth below, pursuant to SMCRA and the Federal regulations at 30 CFR 732.15 and 732.17 are the Director's findings concerning the proposed amendment to the Kentucky program.

Revisions not specifically discussed below concern nonsubstantive wording changes, or revised cross-references and paragraph notations to reflect organizational changes resulting from this amendment.

A. Revisions to Kentucky's Regulations that are Substantively Identical to the Corresponding Federal Regulations

State regulations (405 KAR)	Subject	Federal counterpart (30 CFR)
7:030 sec. 3(1)(d).	Applicability	700.11(a)(4).
7:035 sec. 1.	Incidental Coal Extraction.	702.5 (Except for definition of terms).
7:035 sec. 2.	Incidental Coal Extraction.	702.11.
7:035 sec. 3.	Incidental Coal Extraction.	702.12.
7:035 sec. 4.	Incidental Coal Extraction.	702.13.
7:035 sec. 5.	Incidental Coal Extraction.	702.14.
7:035 sec. 6.	Incidental Coal Extraction.	702.15.
7:035 sec. 7.	Incidental Coal Extraction.	702.16.
7:035 sec. 8.	Incidental Coal Extraction.	702.17.
7:035 sec. 9.	Incidental Coal Extraction.	702.18.
8:020 sec. 1(2)(c).	Coal Exploration	772.11(b)(3).
8:020 sec. 4.	Coal Exploration	772.14.
16:210 sec. 1 (1) thru (1)(b).	Postmining Land Use Capability.	816.133(a).
18.220 sec. 1 (1) thru (1)(b).	Postmining Land Use Capability.	817.133(a).
20:010 sec. 4.	Coal Exploration	772.14(a).

Because the above proposed revisions are identical in meaning to the corresponding Federal regulations, the Director finds that the proposed rules are no less effective than the Federal rules.

B. Revisions to Kentucky's Regulations that are not Substantively Identical to the Corresponding Federal Regulations

1. 405 KAR 7:021 Repeal of 405 KAR 7:020

Kentucky proposes to add 7:021 section 1 which repeals 7:020—Definitions and abbreviations, that defines certain terms used in 405 KAR chapters 7–24. As explained by Kentucky in the Necessity and Function section of 7:021, "405 KAR 7:020 is no longer necessary because a new administrative regulation is being promulgated in each chapter of 405 KAR chapter 7–24 that will contain the definitions for the chapter". The new administrative regulations being added by Kentucky to replace 7:020 are:

405 KAR 7:001—Definitions of terms used in chapter 7
405 KAR 8:001—Definitions of terms used in chapter 8
405 KAR 10:001—Definitions of terms used in chapter 10
405 KAR 12:001—Definitions of terms used in chapter 12
405 KAR 16:001—Definitions of terms used in chapter 16
405 KAR 18:001—Definitions of terms used in chapter 18
405 KAR 20:001—Definitions of terms used in chapter 20
405 KAR 24:001—Definitions of terms used in chapter 24

To the extent that Kentucky's proposal simply involves relocating existing definitions from 405 KAR 7:020 or other regulations to the appropriate new administrative regulation listed above, the Director finds that the proposal is not inconsistent with the requirements of SMCRA and the Federal regulations.

In addition to relocating definitions, Kentucky proposes to add new definitions; revise, modify or delete existing definitions; and delete certain existing definitions and replace them with a reference to previously approved definitions in Kentucky's Revised Statutes (KRS). These additional proposals are discussed below.

(a) Proposed new definitions. (1) Kentucky proposes to add at 405 KAR 7:001, definitions for "cumulative measurement period", "cumulative production", "cumulative revenue", "mining area", and "other mineral". "Other mineral" is also defined in 405 KAR 8:001. A portion of the definition of "cumulative measurement period", concerning criteria for determining the beginning of the period, is contained in 405 KAR 7:035 section 1. As noted in Finding "A" above, this portion of the rule is substantively identical to the Federal rule at 30 CFR 702.5. Each of these terms is used in proposed 405 KAR 7:035 which deals with the exemption for coal extraction incidental to the extraction of other minerals. The Director has determined that these definitions for "cumulative production", "cumulative revenue", "mining area", and "other mineral" are substantively identical to the Federal definitions at 30 CFR 702.5, and are, therefore, no less effective than the Federal counterparts.

(2) Kentucky proposes to add at 405 KAR 7:001 a definition of the term "knowingly". As proposed, the term means that a person knew or had reason to know in authorizing, ordering, or carrying out an act or omission that the act or omission constituted a violation of SMCRA, KRS chapter 350, 405 KAR chapters 7 through 24, or a permit condition, or that the act or omission constituted a failure or refusal to comply with an order issued pursuant to SMCRA, KRS chapter 350, or 405 KAR Chapters 7 through 24. The Director finds that the proposed definition is substantively identical to, and no less effective than, the Federal definition at 30 CFR 846.5.

(3) Kentucky proposes to add at 405 KAR 7:001 a definition of "small operator", as used in the Small Operator Assistance Program (SOAP) regulations at 405 KAR 7:080, to mean an operator whose combined actual and attributed production of coal does not exceed 300,000 tons during any period of twelve (12) consecutive months. While there is no specific Federal definition of small operator, the proposal is consistent with the eligibility criteria for participation in Kentucky's SOAP as approved by the Director on April 15, 1992 (57 FR 13043), and with the Federal eligibility requirements contained in the Federal rule at 30 CFR 795.6.

(4) Kentucky proposes to delete the definition of "willful violation", formerly at 405 KAR 7:020, and add a new definition of "willfully and willful violation" at 405 KAR 7:001, 8:001 and 10:001. As proposed, the term means that a person acted either intentionally, voluntarily, or consciously, and with intentional disregard or plain indifference to legal requirements, in authorizing, ordering, or carrying out an act or omission that constituted a violation of SMCRA, KRS chapter 350, 405 KAR chapters 7 through 24, or a permit condition, or that constituted a failure or refusal to comply with an order issued pursuant to SMCRA, KRS chapter 350, or 405 KAR chapters 7 through 24. The Federal regulations provide separate definitions for "willfully" at 30 CFR 846.5, and "willful violation" at 30 CFR 701.5 and 843.5. Unlike the Federal definition of "willful violation", Kentucky's proposed combined definition does not stipulate that the person who committed the act or omission must have intended the result that actually occurs. However, since Kentucky's proposed definition includes all intentional acts and omissions, it will necessarily include all acts and omissions specified in the Federal definitions. Because Kentucky's proposed combined definition will result in sanctions and penalties no less stringent that those resulting from the separate Federal definitions, the Director finds that the proposal is no less effective than the Federal regulations.

(5) Kentucky proposes to replace the definition of the term "fish and wildlife habitat" found at 405 KAR 7:020, with a definition of the term "fish and wildlife land use" which is being added at 405 KAR 16:001 and 18:001. As proposed, "fish and wildlife land use", as used in 405 KAR 16:210 and in similar situations when referring to a premining or postmining land use, means land dedicated wholly or partially to the production, protection, or management of fish or wildlife. Areas considered as having the fish and wildlife land use are typically characterized by a diversity of habitats in which use by wildlife is the dominant characteristic, whether actively managed or not. The Federal definition, set forth at 30 CFR 701.5 as part of the definition of "land use", provides that "fish and wildlife habitat" means "(L) and dedicated wholly or partially to the production, protection, or management of species of fish or wildlife". While Kentucky's proposed definition is similar to the Federal definition, the Federal definition contains no provisions allowing a fish and wildlife land use without active management. However, this language is consistent with the preamble to the revised Federal definition, which states that "OSM agrees that the management activities practiced on the land normally are an accurate reflection of the land's use. In general, as the intensity of the management increases, the land use becomes more well defined. However, in some instances, a specific use can be identified without active management" (48 FR 39893, September 1, 1983). Therefore, the Director finds that the proposed definition is not inconsistent

with the requirements of SMCRA and the Federal regulations.

(6) Kentucky proposes to add a definition of "ground cover" at 405 KAR 8:001, 16:001 and 18:001. As proposed, the term means the area of ground covered by the combined aerial parts of vegetation and litter produced and distributed naturally and seasonally on site, expressed as a percentage of the total area of measurement. The Director has determined that the proposed definition is substantively identical to and, therefore, no less effective than, the Federal definition at 30 CFR 701.5.

(7) Kentucky proposes to add a definition of "growing season" at 405 KAR 8:001, 16:001, 18:001 and 24:001. As proposed, growing season means the period during a one (1)-year cycle, from the last killing frost in the spring to the first killing frost in the fall, in which climatic conditions are favorable for plant growth. Kentucky identifies this period as normally extending from mid-April to mid-October. While there is no direct Federal counterpart, the Director finds that the definition adds clarity to Kentucky's program and will not render that program inconsistent with the requirements of SMCRA and the Federal regulations.

(8) Kentucky proposes to add a definition of "higher or better uses" at 405 KAR 16:001 and 18:001. As proposed, the term means postmining land uses that have a higher economic value or nonmonetary benefit to the landowner or the community than the premining land uses. The proposed definition is substantively identical to the Federal definition at 30 CFR 701.5. Therefore, the Director finds the proposal no less effective than its Federal counterpart.

(9) Kentucky proposes to add a definition of the term "valuable environmental resources" at 405 KAR 16:001 and 18:001. As proposed, the term means:

(a) Listed or proposed endangered or threatened species of plants or animals or their critical habitats listed by the Secretary of the Interior under the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et seq.), or those species or habitats protected by similar state statutes; and

(b) Habitats of unusually high value for fish and wildlife, as determined by the cabinet in consultation with state and Federal agencies with responsibilities for fish and wildlife.

The defined term, for which there is no Federal definition, is used in 405 KAR chapters 16 and 18. Both of those regulation chapters are the subject of a separate proposed program amendment which is currently under review by OSM. Therefore, the Director is deferring final action on the proposed definition pending action by OSM on the proposed changes to 405 KAR chapters 16 and 18.

(10) Kentucky proposes to add definitions of the acronyms "RAM" and "TRM", to mean Reclamation Advisory Memorandum and Technical Reclamation Memorandum, respectively. "RAM" is proposed to be added to 405 KAR 16:001, 18:001, 20:001 and 24:001. "TRM" is proposed to be added to 405 KAR 8:001, 16:001 and 18:001. While there are no Federal counterparts, the Director finds that the proposals will not render Kentucky's program inconsistent with the requirements of SMCRA and the Federal regulations.

(b) Proposed revisions, modifications and deletions. (1) Kentucky proposes to revise the definitions of "forestland" contained in 405 KAR 8:001, 16:001 and 18:001, "industrial/commercial lands" contained in 405 KAR 16:001, 18:001 and 20:001, "pastureland" contained in 405 KAR 8:001, 16:001 and 18:001, "cropland" contained in 405 KAR 8:001, 10:001, 16:001, 18:001 and 20:001, and "residential land" contained in 405 KAR 8:001, 16:001, 18:001 and 20:001, by deleting reference to land used for support facilities and other facilities which directly relate to specific land use. The reference proposed for deletion is not part of the Federal definitions of these specific land uses as set forth in 30 CFR 701.5. The Director finds that the proposed deletions will not render Kentucky's program inconsistent with the requirements of SMCRA and the Federal regulations since the definitions, after the deletions, are substantively identical to their Federal counterparts.

In addition, Kentucky proposes to further revise the definition of "Industrial/commercial land" by deleting reference to commercial agricultural activities including pasturing, grazing, and watering of livestock, and the cropping, cultivation and harvesting of plants for sale or resale. Kentucky made this proposal in response to a 30 CFR part 732 notice from OSM dated February 8, 1990 (Administrative Record Number KY-967). In that notice, OSM found that the inclusion of commercial agricultural activities in the definition of "industrial/commercial land" renders the definition less effective than the Federal rules and less stringent than SMCRA. Therefore, the Director finds that the proposed definition is now no less effective than its Federal counterpart as set forth at 30 CFR 701.5.

(2) Kentucky proposes to revise the definition of "land use" at 405 KAR 7:001, 8:001, 10:001, 16:001, 18:001 and 20:001, by including reference to land used for support facilities that are an integral part of the specific land use. This addition is consistent with the Federal definition of "land use" set forth at 30 CFR 701.5. In addition, Kentucky proposes to add to the definition a statement that "(I)n some instances, a specific use can be identified without active management". While this statement is not part of the Federal definition, the language is consistent with the preamble to the Federal definition, which states that "OSM agrees that the management activities practiced on the land normally are an accurate reflection of the land's use. In general, as the intensity of the management increases, the land use becomes more well defined. However, in some instances, a specific use can be identified without active management" (48 FR 39893, September 1, 1983). Therefore, the Director finds that the proposed definition is no less effective than its Federal counterpart.

(3) Kentucky proposes to revise the definition of the term "incidental boundary revision" at 405 KAR 8:001 by deleting references to limitations to be applied in determining whether or not extensions for new areas will be considered incidental boundary revisions, and the reference to limitations on cumulative acreage added by successive revisions. These limitations being proposed for deletion by Kentucky are included in a separate proposed amendment (Administrative Record Number KY-1123) dealing with 405 KAR 8:010, General Provisions for Permits. That amendment is currently under review by OSM. There is no Federal definition of the term. With the understanding that limitations on incidental boundary revisions are the subject of another pending program amendment, the Director has determined that the proposed deletions will not render Kentucky's program inconsistent with the requirements of SMCRA and the Federal regulations.

(4) Kentucky proposes to revise the definition of "previously mined area" at 405 KAR 8:001, 16:001 and 18:001 by adding reference to coal mining operations conducted prior to August 3, 1977, where the land has not been reclaimed, and where there is no continuing responsibility to reclaim to the standards set by Kentucky's program. The Director has determined that the new language proposed to be added does not change the meaning of the term "previously mined area", but rather provides more specificity to the definition. In addition, the proposed language brings Kentucky's definition of

"previously mined area" into compliance with Judge Flannery's decision of February 12, 1990. *National Wildlife Federation* v. *Lujan 733* F. Supp. *419, 438* (D.D.C. 1990). In that decision, Judge Flannery ruled that a "previously mined area" must be an area mined before August 3, 1977, the effective date of SMCRA, and not reclaimed to the standards of SMCRA. Therefore, the Director finds that the proposal is no less effective than its Federal counterpart at 30 CFR 701.5.

(5) Kentucky proposes to revise the definition of "public park" at 405 KAR 8:001 and 24:001 by emphasizing that the subject area has been designated primarily for public recreational use. As revised, the definition is substantively identical to the Federal definition at 30 CFR 761.5. Therefore, the Director finds that the proposal is no less effective than its Federal counterpart.

(6) Kentucky proposes to revise the definition of "substantially disturb" at 405 KAR 8:001 and 20:001, for purposes of coal exploration, by changing the coal production threshold from "more than 250 tons" to "more than 25 tons". The Federal definition, at 30 CFR 701.5, retains the larger threshold. The proposed revision in consistent with OSM's earlier approval of Kentucky legislation that changed the tonnage limitation in connection with coal exploration as set forth in 405 KAR 8:020 (56 FR 4721, February 6, 1991). Therefore, the Director finds that the proposal is no less effective than the Federal definition.

(7) Kentucky proposes to delete the definitions of "date of primacy", "federal land program", "grazingland", "half-shrub", and "recurrence interval"; as well as the definitions of the following acronyms, "ac"—acre, "l"—liter, "mg"—milligram, "NPDES"—National Pollution Discharge Elimination System, and "USDI"—United States Department of the Interior. Kentucky proposes to delete these definitions and abbreviations, since the specific terms and acronyms are not used within Kentucky's regulations. Among the terms, only "grazingland", "half-shrub" and "recurrence interval" are defined in the Federal regulations, all at 30 CFR 701.5. However, grazingland is not an alternative post-mining land use in Kentucky; shrubs, rather than half-shrubs, are used in Kentucky to measure stocking success; and "recurrence interval", referring to the frequency of a precipitation event, is merely a descriptive term not necessary because the terms for precipitation events, such as "10 year, 24 hour" or "100 year, 24 hour", already describe the event's frequency. The Director finds that the proposed deletions will not render Kentucky's rules inconsistent with the requirements of SMCRA and the Federal regulations.

(c) Definitions replaced by reference to Kentucky Revised Statute. (1) Kentucky proposes to replace the definitions of eleven terms contained in Kentucky's Administrative Regulations (KAR) with references to the definitions of those terms as set forth in Kentucky Revised Statute (KRS) 350.010 and 350.450(4)(c).

—The regulatory definitions of "cabinet", "operator", "reclamation", "secretary", and "surface coal mining and reclamation operations" at 405 KAR 7:001, 8:001, 10:001, 12:001, 16:001, 18:001, 20:001 and 24:001, are substantively identical to the statutory definitions. ("Secretary" is not defined in 405 KAR 16:001 and 18:001). Therefore, the Director finds that the proposal to replace the regulatory definitions with references to the definitions contained in the KRS will not render Kentucky's program inconsistent with the requirements of SMCRA and the Federal regulations.

—The regulatory definition of "operations" refers to surface coal mining and reclamation operations (Emphasis added), while Kentucky's statutory definition refers only to surface coal mining operations. A reading of the definition itself, reveals that it references only activities directly related to the extraction of coal and not to any reclamation activities. There is no Federal definition of "operations". The Director finds that the references to the statutory definition of "operations" at 405 KAR 7:001, 8:001, 10:001, 12:001, 16:001, 18:001, 20:001 and 24:001, relating only to coal extraction activities and not to reclamation activities, will not render Kentucky's program inconsistent with the requirements of SMCRA and the Federal regulations.

—The definition of "surface coal mining operations" at KRS 350.010(1) was approved by the Director on February 6, 1991 (56 FR 4721). At that time, the Director noted that the regulatory definition was inconsistent with the amended statutory language and the statutory language was controlling. Thus, the proposal to replace the regulatory definition at 405 KAR 7:001, 8:001, 10:001, 12:001, 16:001, 18:001, 20:001 and 24:001 with a reference to the statutory definition is consistent with the prior approval. Therefore, the Director finds that the proposal will not render Kentucky's program inconsistent with the requirements of SMCRA and the Federal regulations.

—The statutory definition of "overburden", in addition to containing the language of the regulatory definition, expands its coverage to include the material after removal from its natural state in the process of surface coal mining. This additional data provides specificity without changing the meaning of the term. Therefore, the Director finds that the proposal to reference the statutory definition of "overburden" at 405 KAR 7:001, 8:001, 16:001, 18:001, 20:001 and 24:001 will not render Kentucky's program inconsistent with the requirements of SMCRA and the Federal regulations.

—The definition of "person" currently set forth at 405 KAR 7:020 contains a reference to governmental agencies, units or instrumentalities and publicly owned utilities or corporations of governmental units. The Federal definition at 30 CFR 700.5 contains the same reference. Kentucky's statutory definition does not contain such reference. By letter dated July 20, 1992 (Administrative Record Number KY-1169), Kentucky stated that they propose to revise the statutory definition in a program amendment to be submitted to OSM in the near future, by adding a reference to KRS 446.010(26) which provides that the term "person" may extend and be applied to the "bodies-politic". Therefore, the Director is deferring action on the proposal to replace the current regulatory definition of "person" with a reference to the statutory definition until the proposed program amendment discussed above, is submitted and approved by OSM.

—The regulatory definition of "approximate original contour" contains references to other sections of Kentucky's regulations dealing with requirements for impoundments, postmining rehabilitation of impoundments, and postmining land use. This is consistent with the Federal definition at 30 CFR 701.5. Kentucky's statutory definition does not contain similar references. By letter dated July 20, 1992 (Administrative Record Number KY-1169), Kentucky responded to an inquiry dated April 1, 1992, from OSM (Administrative Record Number KY-1122) regarding the failure to include the references in the statutory definition. Kentucky pointed out that the statutory definition is consistent with the definition contained in

section 701 of SMCRA, and contains a reference to KRS 350.455 which is the counterpart to section 515(b)(8) of SMCRA, regarding permanent impoundments. Kentucky stated that inclusion of the references in the statutory definition would be redundant, as it is in the current Federal definition, since the specific requirements by their own terms apply to impoundments, and need not be included in the definition in order to preserve their applicability. The Director finds that the proposal to reference the statutory definition of "approximate original contour", as clarified by Kentucky, will not render the program inconsistent with the requirements of SMCRA and the Federal regulations.

—Kentucky proposes to add at 405 KAR 8:001, the term "small operator", as the term is used in 405 KAR 8:030 and 8:040 sections 3(5). The proposal consists of a reference to the definition found at KRS 350.450(4)(c). Kentucky's rules at 405 KAR 8:030 and 8:040 section 3(5) currently contain the same reference to the statutory definition. In a separate program amendment currently under review by OSM, Kentucky is proposing to delete the references contained in section 8:030 and 8:040. The Director finds that the proposed addition at 405 KAR 8:001, while duplicative of the information at 8:030 and 8:040 will not render Kentucky's program inconsistent with the requirements of SMCRA and the Federal regulations.

2. 405 KAR 7:030 Applicability

a. Kentucky proposes to transfer from section 3(1) to section 3(2) the provision which allows the cabinet to make a written determination, based on a request from any person who intends to extract coal, whether the operation is exempt from title 405 chapters 7 through 24. In addition, Kentucky proposes to revise this provision and section 3(3) by limiting these provisions to extraction of coal pursuant to section 3(1)(a), (b) and (c), thereby excluding 3(1)(d) dealing with the extraction of coal incidental to extraction of other minerals. However, the incidental coal extraction exemption is subject to the provisions of 405 KAR 7:035. Therefore, the Director finds that the proposals are not inconsistent with the federal exemption provisions set forth at 30 CFR 700.11.

b. Kentucky proposes to revise section 3(1) (a) and (b) by (a) restricting the exemption for landowners who extract coal for his or her own noncommercial use to fifty (50) tons or less within twelve (12) successive calendar months, and (b) modifying the exemption for extraction of or the intent to extract coal by any person within twelve (12) successive calendar months to twenty-five tons or less rather than the current 250 tons or less. The Federal regulations at 30 CFR 700.11 (a)(1) and (2), in providing exemptions from chapter VII, place no limitation on the amount of coal extracted by a landowner for his or her own noncommercial use, and place a maximum limitation of 250 tons for a person conducting a surface coal mining and reclamation operation. This change is consistent with the legislation approved by OSM on February 6, 1991 (56 FR 4721). Therefore, the Director finds the proposals no less effective than 30 CFR 700.11(a) (1) and (2).

3. 405 KAR 8:020 Coal Exploration

a. Kentucky proposes to revise sections 1, 1(1), 2 and 2(1) by modifying the production levels from 250 tons or less to 25 tons or less for which a written notice of intent to explore is required; and from more than 250 tons to more than 25 tons for which application and written approval of the cabinet is required. The Federal regulations at 30 CFR 772.11(a) and 772.12(a) provide for a production threshold of 250 tons, similar to that provided for in the State rules before this proposed revision. The proposed rules do not expand the Federal limitations and are consistent with OSM's earlier approval of Kentucky legislation that changed the tonnage limitation (56 FR 4721). Therefore, the Director finds the proposals to be no less effective than the Federal counterparts.

b. Kentucky proposes to revise section 2(2)(g) to require the submission of justification for the necessity to remove more than 25 tons of coal during exploration, rather than the current threshold of 250 tons. The Federal rule at 30 CFR 772.12(b)(7) requires a statement of why extraction of more than 250 tons of coal is necessary for exploration. Since the proposed rule does not expand the Federal limitations and is consistent with an earlier approval, the Director finds the proposal to be no less effective than the Federal counterpart.

4. 405 KAR 16:210/18:220 Postmining Land Use Capability

a. Kentucky proposes to revise section 2 by deleting paragraphs (1), (2) and (3) which deal with postmining land uses for lands which were previously unmined, previously mined, or improperly managed. In lieu thereof, Kentucky proposes to add paragraphs (1), (2), (3), (4), (5) and (6) which provide as follows:

(1) For lands not previously mined, the postmining land use shall be compared to those uses which the land previously supported. This rule, while similar to the Federal rule at 30 CFR 816.133(b), fails to provide that a postmining land use must be compared to premined land which was properly managed, as set forth in the cited Federal rule. In the preamble to the Federal rule, a commenter objected to the phrase "and has been properly managed." OSM rejected the comment because "[t]he Act's legislative history makes clear that Congress did not intend for the postmining land use of land which had been improperly managed to be limited to its most recent premining use. Congress intended for the postmining use of land to be based on its 'potential utility' for a number of uses before mining, not some low use which may have resulted from mismanagement. (S. Rept. 95–128, 95th Cong., 1st Sess. 76–77 (1977))." 44 FR 14902, 15243 (March 13, 1979). Kentucky's rule allows for the possibility of land being returned to a condition that is below its potential, which is not what Congress intended. Thus, to the extent that the proposed rule fails to require a comparison to a premining land use that was properly managed, the Director finds the amendment less effective than the Federal rules, and he is requiring Kentucky to amend its program accordingly.

The proposal further provides that premining land use shall be based on prevalent or dominant use, vegetative types, and features present at that area. It also provides that more than one land use can exist within a proposed permit boundary. There are no Federal counterparts for these provisions. A commenter to the Federal rule believed that 816.133 "tended to de-emphasize the multiple use concept of land restoration." *Id.* OSM responded to the comment by stating that multiple land uses are not prohibited by SMCRA or the regulations. Congress also recognized "that the postmining condition be consistent with the surrounding landscape." *Id.* at 15242. Thus, these Kentucky provisions are not inconsistent with the postmining land use provisions of 30 CFR 816/817.133.

(2) For lands previously mined, and not reclaimed in compliance with appropriate State regulations, the postmining land use shall be judged based on the use that existed prior to any mining or, if that is not possible because of the previously mined condition, the postmining land use shall be judged on the basis of the highest and best use that can be achieved which is comparable with surrounding areas and does not require the disturbance of

areas previously unaffected by mining. This proposed language is substantively identical to that found in the corresponding Federal rule at 30 CFR 816/817.133(b). Therefore, the Director finds the proposal to be no less effective than the Federal counterpart.

(3) Prime farmland historically used for cropland, and not exempted by 405 KAR 8:050 section 5, shall have a cropland postmining land use. There is no direct Federal counterpart. However, the definition of prime farmland at 30 CFR 701.5 defines such term as those lands that "have historically been used for cropland." Kentucky's proposed postmining land use for prime farmland is consistent with this definition and can be approved.

(4) "Undeveloped land or no current use or land management", shall not be designated a postmining land use. If such land category was the premining land use, and it is consistent with sections 2(2) and 3, forestland may be the designated postmining land use without compliance with procedures and criteria for an alternative postmining land use where trees were dominant on the land prior to mining. For all other cases, the area may be designated as fish and wildlife for the postmining land use without compliance with the procedures and criteria for an alternative postmining land use. While there is no direct Federal counterpart, under the conditions found in Kentucky, undeveloped land will always revert naturally to either woodland or fish and wildlife habitat. Since the required findings and approval criteria for designation of an alternative postmining land use all relate to the feasibility, legality and environmental impacts of the proposed use, there is little reason to apply these requirements when the land has no current or historical use and the proposed postmining use is the one which would eventually be achieved anyway through the natural process of ecological succession.

Under these conditions, there is effectively no real change in land use, and, as explained in the preamble to the definition of "land use" in 30 CFR 701.5 (44 FR 14933, March 13, 1979), alternative land use approval criteria and procedures do not apply. In addition, revegetation success standards for forestland or fish and wildlife habitat would be no less stringent than those for undeveloped land. Therefore, the Director finds that the proposed rule is not inconsistent with SMCRA and the Federal regulations.

(5) For permits issued after the effective date of this amendment, portions of the area affected by surface operations and facilities with slopes greater than twenty (20) percent (11.3 degrees) shall not be designated as cropland, including hay production. There is no direct Federal counterpart. However, as provided for at 30 CFR 816/817.133(c)(1), there must be a reasonable likelihood for achieving the proposed use; and, pursuant to 30 CFR 816/817.133(c)(3)(i) the proposed use must not be impractical or unreasonable. Inasmuch as the cropland designation for land with slopes greater than twenty percent would be neither practical nor have a reasonable likelihood of success, the Director finds that the proposal is not inconsistent with the general provisions of 30 CFR 816/817.133.

(6) Steep slope operations with variance from approximate original contour shall comply with the requirements of 405 KAR 20:060 section 3(2), and mountaintop removal operations shall comply with 405 KAR 8:050 section 4(3). The requirements of 20:060 section 3(2) and 8:050 section 4(3), set forth the criteria for postmining land uses. Therefore, the Director finds that the proposal is not inconsistent with SMCRA and the Federal regulations.

b. Kentucky proposes to revise section 4 to provide that higher or better alternative postmining land uses may be approved if (1) there is a reasonable likelihood that the land use will be achieved, (2) the use will not be impractical or unreasonable, (3) the landowner or land management agency having jurisdiction had been consulted, (4) the proposed use will not present an actual or probable hazard to public health or safety or threat of water pollution or diminution of water availability, (5) the proposed use will not involve unreasonable delays in implementation, and (6) the proposed use will not cause or contribute to violation of federal, state, or local law. As revised, section 4 is substantively identical to the Federal rule at 30 CFR 816/817.133(c). Therefore, the Director finds the proposed rule to be no less effective than the Federal counterpart.

In revising section 4, Kentucky deleted old subparagraphs (1)(b) and (1)(c) and paragraphs (2), (3), (4), (5), (6), (7), (8) and (9) (a), (b) and (c). There are no direct Federal counterparts for these deletions and, since section 4 as revised is substantively identical to the corresponding Federal rule, as discussed above, the Director finds that these deletions will not render Kentucky's rules inconsistent with the requirements of SMCRA and the Federal regulations.

5. 405 KAR 20:010 Coal Exploration

Kentucky proposes to revise section 2 by decreasing the coal production threshold from more than 250 tons to more than 25 tons consistent with OSM's earlier approval of Kentucky legislation that changed the tonnage limitation (56 FR 4721, February 6, 1991). Thus, the Director finds the proposal to be no less effective than SMCRA and the Federal regulations at 30 CFR 815.13.

C. Revisions to Kentucky's Regulations with no Corresponding Federal Regulations

1. 405 KAR 7:015 Documents Incorporated by Reference

a. Kentucky proposes to revise section 2 by deleting the reference to Technical Reclamation Memorandum (TRM) #9, "Revegetation Standards for Success", dated February 1, 1983, which will be replaced by TRM #19, "Field Sampling Techniques for Determining Ground Cover, Productivity, and Stocking Success of Reclaimed Surface Mined Lands", dated June 28, 1991. TRM #19 is currently being reviewed by OSM as part of a separate Kentucky program amendment (Administrative Record Number KY–1107) as that amendment deals with Kentucky's revegetation regulations at 405 KAR 16:200 and 18:200. Therefore, the Director is deferring action on the revision to 405 KAR 7:015 section 2 pending final action on the amendment to 16:200 and 18:200.

b. Kentucky proposes to revise section 4 by deleting, in section 4(6) and 4(7), the reference to publications entitled "Environmental Criteria for Electric Transmission Lines" and "Protection of Bald and Golden Eagles from Powerlines", neither of which is referred to in the corresponding Federal regulations. The Director finds that the proposed deletions will not render Kentucky's program less effective than the Federal regulations.

2. 405 KAR 7:030 Applicability

Kentucky proposes to revise section 3 by adding subsection (4) which provides a cross-reference to 405 KAR 7:035 for exemptions granted under 405 KAR 7:030 section 3(1)(d) regarding the extraction of coal incidental to the extraction of other minerals. While there is no direct Federal counterpart, the Director finds that this proposal provides clarity to the Kentucky rules that incidental coal extraction operations must meet the requirements of 405 KAR 7:035 and is consistent with the Federal regulations.

3. 405 KAR 8:020 Coal Exploration

Kentucky proposes to revise section 2(4)(c)5 by decreasing the production threshold from 250 tons of coal to 25 tons where the cabinet must find that the coal removal is justified, before

approving an application for coal exploration operations. There is no direct Federal counterpart for this proposal. However, 30 CFR 772.12(b)(7) requires an applicant to explain why coal extraction over 250 tons is justified. Thus, it is logical that the cabinet find such justification before approval of a permit. Therefore, the Director finds that it is not inconsistent with the Federal requirements for decisions on applications for coal exploration as set forth at 30 CFR 772.12(b)(7) and 772.12(d).

4. 405 KAR 10:200 Kentucky Bond Pool

a. Kentucky proposes to add a new section 2 which incorporates by reference two forms currently required to be filed by bond pool applicants. The proposal also identifies the location where copies of the forms may be obtained or reviewed. While there is no direct Federal counterpart, the proposal adds clarity and specificity to the bond pool application process, and the Director finds that the proposal will not render Kentucky's program inconsistent with the requirements of SMCRA and the Federal regulations.

b. Kentucky proposes to revise section 4(2) and section 9(4)(a) by deleting reference to the incorporation of the bond pool application form. However, the addition of the particular reference at sections 4(2) and 9(4)(a) was never formally submitted to OSM for consideration as a program amendment. Therefore, there is no necessity for the Director to act on the proposed deletion. In addition, the subject references, if formally added to the Kentucky program would be redundant in view of the addition of the new section 2 discussed in Finding C.4.a. above.

c. Kentucky proposes to revise section 4(4) by adding a provision for the payment of the bond pool application fee by cash, as well as by certified or cashier check or money order as currently set forth in that section. While there is no direct Federal counterpart, the Director finds that the proposal will not render the State program inconsistent with the requirements of SMCRA and the Federal regulations.

d. Kentucky proposes to revise section 5(3) to change references from "violation or cessation order", to "notice of noncompliance and order for remedial measures or an order for cessation and immediate compliance", and additional references from "violation" or "cessation order" to "notice" or "order", respectively. These changes are being made in order to be consistent with the terminology at 405 KAR 12:020. While there is no direct Federal counterpart, the Director finds that the proposal provides clarity to Kentucky's rules and is not inconsistent with the requirements of SMCRA and the Federal regulations.

e. Kentucky proposes to revise section 6(1) by adding reference to "members" of the bond pool to the current reference to bond pool applicants. In addition, Kentucky is adding specific reference to summaries or analyses for which the applicants or members request confidentiality. While there is no direct Federal counterpart, the Director finds that the proposal adds clarity and specificity to Kentucky's program, and is not inconsistent with the requirements of SMCRA and the Federal regulations.

f. Kentucky proposes to revise sections 6(2), 7(1) and 7(2) which deal with determination of financial standing and reclamation compliance records, by expanding coverage of those sections to current members. The sections currently cover bond pool applicants only. While there is no direct Federal counterparts, the proposals add clarity to Kentucky's bond pool rules by emphasizing that the specific provisions apply to members as well as applicants. Therefore, the Director finds the proposals to be not inconsistent with SMCRA and the Federal regulations.

g. Kentucky proposes to revise sections 7(1)(d) and 7(2)(d) by deleting the term "willful" from the discussion of pattern of violations, in determining an applicant or member's reclamation compliance record. While there is no direct Federal counterpart, the Director finds that the proposed deletion will not render Kentucky's program inconsistent with the requirements of SMCRA and the Federal regulations.

h. Kentucky proposes to revise sections 7(1)(e) and 7(1)(f) to change references from "cessation orders and failure-to-abate cessation orders" to "orders for cessation and immediate compliance", in order to be consistent with terminology at 405 KAR 12:020. While there is no direct Federal counterpart, the Director finds that the proposal provides clarity to Kentucky's rules and is not inconsistent with the requirements of SMCRA and the Federal regulations.

i. Kentucky proposes to revise sections 7(1)(j) and 7(2)(i) to provide that in making determinations in regard to reclamation compliance records, the bond pool commission may take into account not only the performance of the applicant or member, but that of each person who owns or controls, is owned or controlled by, or is under common ownership and control with the applicant or member. While there is no direct Federal counterpart, the proposal gives the commission additional sources of information which may be used in order to more accurately evaluate the qualifications of an applicant or member, and is consistent with Federal rules dealing with the issue of ownership and control. The Director finds that the proposal will not render Kentucky's program inconsistent with the requirements of SMCRA and the Federal regulations.

j. Kentucky proposes to revise section 7(2)(e) to change references from "cessation order(s)" to "orders for cessation and immediate compliance" and "order", to be consistent with the terminology at 405 KAR 12:020. While there is no direct Federal counterpart, the Director finds that the proposal provides clarity to Kentucky's rules and is not inconsistent with the requirements of SMCRA and the Federal regulations.

5. 405 KAR 16:210/18:220 Postmining Land Use Capability

Kentucky proposes to revise section 3, dealing with historical land use, by deleting reference to the determination of minimum acceptable postmining land use capability. There is no direct Federal counterpart to Kentucky's historical land use rule, and the Director finds that the proposed deletion will not render Kentucky's program inconsistent with the requirements of SMCRA and the Federal regulations.

6. 405 KAR 20:010 Coal Exploration

Kentucky proposes to revise section 3 by adding a provision that whenever section 3 refers to performance standards in 405 KAR chapter 16 which cross-reference general permitting requirements in 405 KAR chapter 8, those permitting requirements shall only apply to the extent set forth in 405 KAR 8:020 and 20:010. There is no direct Federal counterpart for this proposal. However, the Director finds that the proposal, which may exclude general permitting requirements for coal exploration activities, is not inconsistent with the requirements of SMCRA and the Federal regulations because the permitting requirements for coal exploration are specifically required by 405 KAR 8:020 and 20:010.

IV. Summary and Disposition of Comment

Public Comments

The public comment periods and opportunities to request a public hearing were announced as follows: (1) For the submission dated June 28, 1991 (Administrative Record Number KY-1059), in the July 22, 1991, **Federal Register** (56 FR 33398); (2) For the submission dated December 31, 1991 (Administrative Record Number KY-

1095), in the January 30, 1992, Federal Register (57 FR 3601); (3) For the submission dated January 22, 1992 (Administrative Record Number KY-1107), in the April 13, 1992, Federal Register (57 FR 12775); and (4) For the submission dated April 1, 1992 (Administrative Record Number KY-1124), in the May 21, 1992, Federal Register (57 FR 21637). The public comment periods closed on August 21, 1991, March 2, 1992, May 13, 1992, and June 5, 1992, respectively. No one requested an opportunity to testify at the scheduled public hearings so no hearings were held.

Kentucky Resources Council Comments

The Kentucky Resources Council (KRC) filed comments, regarding the specific regulations covered by this final rule, on August 22, 1991 (Administrative Record Number KY-1074), April 14, 1992 (Administrative Record Number KY-1129), and May 19, 1992 (Administrative Record Number KY-1153). Following is a discussion of those comments.

General

KRC objected to the manner in which OSM's Lexington Field Office reviews and comments upon State program changes. KRC objected to what it perceives as pre-approval by the field office in advance of the public comment period. However, the field office is not approving the changes but, as an integral part of OSM, it is reviewing the submission in order to assist the Director in his final decision. The Director finds nothing inappropriate in the current procedures for processing State program amendments and wishes to stress that the field offices are not approving program amendments, either formally or informally. The Director finds no basis for changing current procedures for processing State program amendments.

Definitions

KRC raised concerns regarding specific definitions in Kentucky's program. Those concerns are summarized as follows:

—KRC feels that the definition of "approximate original contour (AOC)" is inconsistent with 30 CFR 701.5 to the extent that it fails to include a reference to the elimination of coal refuse piles. A review of Kentucky's approved statutory and regulatory definitions of AOC discloses that neither contains such reference. In a letter dated July 20, 1992 (Administrative Record Number KY-1169), Kentucky pointed out that in its initial submittal to OSM for approval of its permanent program, OSM questioned the definition of AOC. At that time, Kentucky responded that "the Ky. definition of AOC is not less stringent than the federal definition simply because the elimination of coal refuse piles is not explicitly mentioned in the Ky. definition. The Act's definition of AOC, like the Ky. regulatory definition, does not contain a specific reference to removal of coal refuse piles. Nonetheless, OSM obviously interprets the language of the Act to require removal of coal refuse piles as necessary to achieve AOC, or otherwise the specific reference to coal refuse piles in the federal regulations would be unauthorized. Thus the Ky. regulations should properly be construed as requiring removal of coal refuse piles (as opposed to properly constructed coal refuse disposal areas, which cannot be eliminated) as necessary to achieve AOC". As a result of that clarification, OSM approved the definition (45 FR 69947, October 22, 1980). The Director feels that no facts have been presented to cause OSM to reverse that approval.

—KRC requested clarification of the definition of "forest land". KRC felt it was not clear whether all lands that support forest cover would be treated as forest land, or if unmanaged (i.e., non-commercial) forests would be treated as undeveloped land. In its Statement of Consideration (Administrative Record Number KY-1107), prepared in response to public comments, Kentucky pointed out that "(I)f an area is in forest, just because it is not being managed does not mean that it can be treated as undeveloped land. * * *, if the land is *used* for the long term production of wood, it is forest land whether it is managed or not". The Director believes that the clarification provided by Kentucky should resolve KRC's concerns and no further action is required. In any event, as noted in Finding B.1.(b)(1), the state's definition of "forest land", as proposed, is substantively identical to the Federal definition.

—KRC expressed its concern over the deletion of the word "live" from the definition of ground cover. The term was apparently used in an earlier draft of the definition. However, the proposed definition, as submitted to OSM for approval, never contained the term, nor does the Federal definition. It would appear that no further action is required. As noted in Finding B.1.(a)(6), the Kentucky definition of "ground cover", as proposed, is substantively identical to the Federal definition.

—KRC feels that Kentucky should be required to explain its proposed deletion of the definition of "half-shrub" since the Federal regulations still contain such a definition. However, the term is not used in either the Federal regulations or in Kentucky's program. Therefore, there is no need for Kentucky to retain the definition.

—KRC correctly pointed out that the definition of "higher or better uses", as originally proposed by Kentucky, referred to "premining land use", rather than "premining land uses" as expressed in the Federal definition. Kentucky corrected this discrepancy in its December 31, 1991, resubmission.

—KRC pointed out that the definition of "historically used for cropland" was omitted from Kentucky's submittal dated December 31, 1991. However, the definition, which was inadvertently omitted from the December 31, 1991, submission, was reflected in the April 1, 1992, submission, and, in fact, was never proposed for deletion from Kentucky's regulations.

—In connection with the definition of "knowingly", KRC pointed out an apparent inconsistency in 405 KAR 7:090 section 11(4) as to whether the cabinet must consider all enforcement orders. However, 7:090 section 11(4) is not part of the program amendments under review. Therefore, no action is being taken regarding this comment.

—KRC questioned the use of the term "functions" in the definition of "land use". KRC felt that the use of the term invites further designation of land for postmining land uses that are minimum management and minimum utility land uses. KRC stated that the use of the term, as well as the deletion of the phrase "rather than the vegetation or cover of the land", indicated that Kentucky intends to approve as land uses the mere establishment of vegetation and cover. KRC also filed its comments with Kentucky on this matter, and the Commonwealth responded that "(T)he cabinet agrees with the thrust of the comment that land use establishment is more than mere establishment of vegetation. The performance standards on postmining land use capability remain applicable and no change in this definition is necessary". The Director agrees that no change is needed based on the clarification provided by Kentucky.

—KRC has requested clarification of the definition of "fish and wildlife land use". The Director has reviewed the

definition, as proposed, including the question of active management, as discussed in Finding B.1.(a)(5), and has determined that it is not inconsistent with the requirements of SMCRA and the Federal regulations.

—KRC expressed its opinion that the definition of "previously mined area" appears to conform to the decision of the District Court in *National Wildlife Federation v. Lujan*, Civ. Nos. 87–2051, 1814, 2788 (D.D.C. February 12, 1990).

—KRC questioned the use of the statutory definition of "operator" because it lacks a reference to removal of coal from refuse piles, and because the definition of "surface coal mining operations" no longer contains a reference to removal of coal from refuse piles. However, as noted in Finding B.1.(c), the previously approved statutory definition is substantively identical to the regulatory definition, in Kentucky's currently approved program.

—KRC pointed out that the statutory definition of "overburden" is different than the Federal definition. As discussed in the Director's Findings section at B.1.(c) herein, the Director noted the difference but determined that it does not render Kentucky's program inconsistent with the requirements of SMCRA and the Federal regulations.

—KRC noted that the statutory definition of "person" failed to include agencies as persons. As pointed out in the Director's Findings section herein, Kentucky has acknowledged the discrepancy and the Director is deferring final action on the definition.

—KRC expressed concern with the use of the statutory definition of "reclamation" since it failed to require restoration as one of the activities constituting reclamation. The regulatory definition which is being replaced, does refer to restoration of affected areas. The statutory definition does, however, require the "reconditioning of the area affected by surface coal mining operations." To "recondition" an area, according to Webster's Third New International Dictionary (1981), means "to *restore*" the area "to a good condition". (Emphasis added). Because the terms "reconditioning" and "restoration" are synonymous, the word "restoration" is not needed in the definition.

—KRC expressed its opinion that the statutory definition of "surface coal mining operations" is unclear with respect to the regulation of the aquatic operations associated with coal dredging from rivers and streams. However, this definition was previously reviewed and approved by the Director (56 FR 4721, February 6, 1991).

—KRC expressed concern regarding the merging of the two Federal definitions of "willfully" and "willful violation" into one definition in Kentucky's program. KRC feels that this merger appears to unduly restrict the instances in which civil penalty points for a willful violation will be assessed. Also, the KRC was concerned that the definition fails to include violations of the Secretary's regulations as actionable. As pointed out by Kentucky in its Statement of Consideration dated September 13, 1991, "[T]he definition encompasses violations of SMCRA and thereby encompasses violations of the federal regulations, and encompasses all enforcement orders and notices". As discussed in the Director's Findings section of this notice at B.1.(a)(4), the Director has considered these concerns and determined that Kentucky's proposed combined definition will result in sanctions and penalties no less stringent than those resulting from the separate Federal definitions.

—KRC expressed its opinion that the definition of "valuable environmental resources" being added at 405 KAR 16:001 and 18:001 is less effective in protecting environmental resources than is the federal regulation. As discussed in Finding B.1.(a)(9) herein, the Director is deferring final action on the proposed definition of "valuable environmental resources" pending final action on Kentucky's proposed changes to 405 KAR chapters 16 and 18. Therefore, KRC comments will be addressed at that time.

—KRC stated its opinion that OSM must obtain clarification from Kentucky, by way of legal opinion, that the proposed changes, in revising Kentucky's regulations to conform to the drafting requirements of KRS chapter 13A, do not curtail Kentucky's regulatory jurisdiction over surface coal mining operations, and do not diminish Kentucky's ability to implement the approved program. However, KRC has failed to cite any specific instances where Kentucky's jurisdiction or ability to implement the approved program have been jeopardized. OSM has reviewed Kentucky's submission in detail and finds no basis for seeking further clarification from Kentucky other than any already sought and obtained regarding specific definitions.

405 KAR 7:030

KRC stated that 405 KAR 7:030 section 3(2) fails to provide for public notice and comment consistent with 30 CFR 702.11(d), and further, that a cross-reference to 405 KAR 7:035 section 2(4) should be provided. It is not necessary for Kentucky to repeat in 405 KAR 7:030 section 3(2), the general requirements of public notice and comments of 30 CFR 700.11(c) for incidental coal extraction operations, when Kentucky has already provided for public notice and comment that is substantively identical to 30 CFR 702.11(d) at 405 KAR 7:035 section 2(4). In addition, Kentucky has made it clear in 405 KAR 7:030 section 3 (1)(c) and (4), through cross referencing, that incidental coal extraction operations must meet all the requirements of 405 KAR 7:035, which includes public comment. Therefore, the Director has determined that no change to the Kentucky regulations are required.

405 KAR 7:035

KRC indicated that 405 KAR 7:035 section 5(1)(b), which refers to coal produced from one or more seams, could be misconstrued to suggest that each seam could be considered separately in computing tonnage. Kentucky considered KRC's concerns and, in its Statement of Consideration (Administrative Record Number KY–1107), Kentucky stated that "Section 5(1)(a) is clear that tonnages are computed based on coal extracted from the 'mining area'. If a mining area has more than one coal seam, then all the tonnage from the different seams must be treated as a single unit". The Director has determined that 405 KAR 7:035 section 5(1)(b), as clarified by Kentucky in its Statement of Consideration, is substantively identical to 30 CFR 702.14(a)(2) and, therefore, no changes will be required.

Finally, the KRC expressed concern that the language of 405 KAR 7:035 section 8(2) would create ambiguity where Kentucky used the phrase "does meet the criteria for exemption", as opposed to the Federal rule at 30 CFR 702.17(b) which states that the mining area in question "should continue to be exempt". In response to KRC's concerns, Kentucky revised the language of the rule in the January 22, 1992, resubmissions to read "did meet and will continue to meet the criteria for exemption". In a letter to OSM dated May 11, 1992, KRC expressed its satisfaction with the revised language.

Kentucky Coal Association Comments

By letter dated August 29, 1991 (Administrative Record Number KY–1084), to the Kentucky Department for Surface Mining, the Kentucky Coal Association (KCA) filed comments

regarding the proposed program amendments submitted by Kentucky on June 28, 1991. The following discussion regarding KCA's comments relates only to those provisions of the June 28, 1991, submission covered by this final rule.

KCA felt that all documents incorporated by reference should be listed in one central place, instead of being scattered throughout Kentucky's regulations. Kentucky's choice in placing its incorporations by reference within each particular section is reasonable. This allows someone, when reading a certain section, to know if that section contains any documents that are incorporated by reference.

KCA stated that the definition of "growing season" should be distinguished from the definition of "seeding season". However, no basis for this position was given. Therefore, absent a showing that there is a need for distinguishing between the terms, no action is required.

KCA stated that the cabinet should be obligated to respond within five (5) working days to the written notice of intention to explore filed pursuant to 405 KAR 8:020 section 1(1). Kentucky's regulation does not provide for any time frame within which to respond to a written notice. This is consistent with the Federal rule at 30 CFR 772.11. Therefore, Kentucky's rule is no less effective than the Federal rule. KCA also pointed out that Federal regulations require a written notice of intention to explore when less than 250 tons of coal is involved. However, Kentucky's threshold of less than 25 tons is consistent with OSM's earlier approval of Kentucky legislation that changed the tonnage limitation (56 FR 4721, February 6, 1991). Therefore, no change to Kentucky's rules are required.

KCA requested that the operator be afforded the flexibility, by regulation and without being issued a violation, to revise the exploration map and his plan, which are required by 405 KAR 8:020 section 1(2)(c), after site work has begun. There is nothing in the Kentucky program to preclude revisions, if necessary. However, the Federal regulations at 30 CFR 772.11(b)(3) require such information at the time of permitting. As stated earlier, 405 KAR 8:020 section 1(2)(c) is substantively identical to 772.11(b)(3).

KCA requested revision to, and clarification of, 405 KAR 20:010 sections 3(3)(b) and 3(9), relating to new roads and removal of facilities and equipment in the exploration area. However, no revisions to these rules have been proposed by Kentucky. Therefore, they are not part of the amendment on which comments have been requested.

Agency Comments

Pursuant to section 503(b) of SMCRA and the implementing regulations of 30 CFR 732.17(h)(11)(i), comments were solicited from various government agencies with an actual or potential interest in the Kentucky program. The Kentucky Heritage Council, the Soil Conservation Service, Tennessee Valley Authority, Bureau of Land Management, Mine Safety and Health Administration and the U.S. Forest Service generally considered the amendment to be acceptable or submitted an acknowledgement with no comment.

In a letter dated May 5, 1992 (Administrative Record Number KY-1149), the U.S. Bureau of Mines (BOM) raised a question regarding the definition of "coal exploration". In particular, BOM pointed out that the phrase "or may cause any appreciable effect upon the land, * * * appears to leave open to speculation what "appreciable effect" may or may not constitute. However, the subject definition is not being revised by Kentucky in the amendments subject to this notice, and is a part of Kentucky's approved program. Therefore, the Director feels that no revisions are necessary at this time.

V. Director's Decision

Based on the above findings, the Director is approving the program amendment as submitted by Kentucky on June 28, 1991, and as modified and resubmitted on December 31, 1991, January 22, 1992, and April 1, 1992, with the exception of the issues discussed in Finding B.4.a.(1) above. In addition, the Director is deferring final action on the definitions of the terms "person" and "valuable environmental resources", and on the deletion of the reference to TRM #9, "Revegetation Standards for Success" in 405 KAR 7:015 section 2(2).

The Federal regulations at 30 CFR 917 codifying decisions concerning the Kentucky program are being amended to implement this decision. The Director is approving these proposed rules with the understanding that they be promulgated in a form identical to that submitted to OSM and reviewed by the public. Any differences between these rules and the State's final promulgated rules will be processed as a separate amendment subject to public review at a later date. This final rule is being made effective immediately to expedite the State program amendment process and to encourage the State to conform its program with the Federal standards without delay. Consistency of State and Federal standards is required by SMCRA.

Environmental Protection Agency (EPA) Concurrence

Under 30 CFR 732.17(h)(11)(ii), the Director is required to obtain the written concurrence of the Administrator of the Environmental Protection Agency (EPA) with respect to any provisions of a State program amendment that relate to air or water quality standards promulgated under the authority of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or the Clean Air Act (42 U.S.C. 7401 *et. seq.*). The Director has determined that this amendment contains no provisions in these categories and that EPA's concurrence is not required.

Effect of Director's Decision

Section 503 of SMCRA provides that a State may not exercise jurisdiction under SMCRA unless the State program is approved by the Secretary. Similarly, 30 CFR 732.17(a) requires that any alteration of an approved State program be submitted to OSM for review as a program amendment. Thus, any changes to the State program are not enforceable until approved by OSM. The Federal regulations at 30 CFR 732.17(g) prohibit any unilateral changes to approved State programs. In his oversight of the Kentucky program, the Director will recognize only the statutes, regulations and other materials approved by him, together with any consistent implementing policies, directives and other materials, and will require the enforcement by Kentucky of only such provisions.

VI. Procedural Determinations

Executive Order No. 12291

On July 12, 1984, the Office of Management and Budget (OMB) granted OSM an exemption from sections 3, 4, 7 and 8 of Executive Order 12291 for actions related to approval or conditional approval of State regulatory programs, actions and program amendments. Therefore, preparation of a regulatory impact analysis is not necessary and OMB regulatory review is not required.

Executive Order 12778

The Department of the Interior has conducted the reviews required by section 2 of Executive Order 12778 and has determined that, to the extent allowed by law, this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments since each such program is drafted and promulgated by a specific State, not by

OSM. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and 30 CFR 730.11, 732.15 and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the requirements of 30 CFR parts 730, 731, and 732 have been met.

National Environmental Policy Act

No environmental impact statement is required for this rule since section 702(d) of SMCRA [30 U.S.C. 1292(d)] provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(C) of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C).

Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under the Paperwork Reduction Act, 44 U.S.C. 3507 *et seq.*

Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal which is the subject of this rule is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Hence, this rule will ensure that existing requirements previously promulgated by OSM will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulation.

List of Subjects in 30 CFR Part 917

Intergovernmental relations, Surface mining, Underground mining.

Dated: August 28, 1992.

Jeffrey D. Jarrett,

Acting Assistant Director, Eastern Support Center.

For the reasons set forth in the preamble, title 30, chapter VII, subchapter T of the Code of Federal Regulations is amended as set forth below:

PART 917—KENTUCKY

1. The authority citation for part 917 continues to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

2. 30 CFR 917.15, is amended by adding a new paragraph (ll) to read as follows:

§ 917.15 Approval of regulatory program amendments.

* * * * *

(ll) The following amendments submitted to OSM on June 28, 1991, and resubmitted on December 31, 1991, January 22, 1992, and April 1, 1992, are approved effective October 1, 1992 with the exceptions identified herein. In addition, the proposed revision to 405 KAR 7:015 section 2 is being deferred. The amendments consist of the following modifications to the Kentucky program:

Revisions of the following provisions of the Kentucky Administrative Regulations (KAR):

7:001 section 1
Definitions for 405 KAR chapter 7 (except that final action on the definition of "person" is deferred)

7:015 section 4 (6) & (7)
Documents incorporated by reference; Documents referred to within these regulations

7:021 section 1
Repeal of 405 KAR 7:020 (except for the repeal of the regulatory definition of "person")

7:030 section 3 (1), (2), (3) and (4)
Applicability; Exemptions

7:035 section 1
Exemption for coal extraction incidental to the extraction of other minerals; Measurement and reporting period

7:035 section 2
Exemption for coal extraction incidental to the extraction of other minerals; Application requirements and procedures

7:035 section 3
Exemption for coal extraction incidental to the extraction of other minerals; Contents of application for exemption

7:035 section 4
Exemption for coal extraction incidental to the extraction of other minerals; Public availability of information

7:035 section 5
Exemption for coal extraction incidental to the extraction of other minerals; Requirements for exemption

7:035 section 6
Exemption for coal extraction incidental to the extraction of other minerals; Conditions of exemption and right of inspection and entry

7:035 section 7
Exemption for coal extraction incidental to the extraction of other minerals; Stockpiling of minerals

7:035 section 8
Exemption for coal extraction incidental to the extraction of other minerals; Revocation and enforcement

7:035 section 9
Exemption for coal extraction incidental to the extraction of other minerals; Reporting requirements

8:001 section 1
Definitions for 405 KAR chapter 8 (except that final action on the definition of "person" is deferred)

8:020 section 1,1(1) & 1(2)(c)
Coal exploration; Exploration in an area not designated unsuitable for mining and removing twenty-five tons or less of coal

8:020 section 2, 2(1), 2(2)(g) & 4(c)(5)
Coal exploration; Exploration removing more than twenty-five tons of coal and exploration in an area designated unsuitable for mining, regardless of tonnage

8:020 section 4
Coal exploration; commercial use or sale

10:001 section 1
Definitions for 405 KAR chapter 10 (except that final action on the definition of "person" is deferred)

10:200 section 1
Kentucky bond pool; Deletion of definitions

10:200 section 2
Kentucky bond pool; Forms

10:200 section 4(4)
Kentucky bond pool; Application for membership

10:200 section 5(3)
Kentucky bond pool; Review of Application

10:200 section 6 (1) & (2)
Kentucky bond pool; Determination of financial standing

10:200 section 7(1), (1)(d), (1)(e), (1)(f) & (1)(j)
Kentucky bond pool; Determination of reclamation compliance record

10:200 section 7(2), 7(2)(d), 7(2)(e) & 7(2)(i)
Kentucky bond pool; Determination of reclamation compliance record

12:001 section 1
Definitions for 405 KAR chapter 12 (except that final action on the definition of "person" is deferred)

16:001 section 1
Definitions for 405 KAR chapter 16 (except that final action on the definitions of "person" and "valuable environmental resources"

are deferred)
16:190 section 7(2)
Backfilling and grading; Deletion of definitions
16:210 section 1(1)
Postmining land use capability; General
16:210 section 2
Postmining land use capability; Premining and postmining land use (except to the extent that section 2(1) fails to provide that lands not previously mined were properly managed)
16:210 section 3
Postmining land use capability; Historic land use
16:210 section 4
Postmining land use capability; Alternative postmining land use
18:001 section 1
Definitions for 405 KAR chapter 18 (except that final action on the definitions of "person" and "valuable environmental resources" are deferred)
18:190 section 5(2)
Backfilling and grading; Deletion of definitions
18:220 section 1(1)
Postmining land use capability; General
18:220 section 2
Postmining land use capability; Premining and postmining land use (except to the extent that section 2(1) fails to provide that lands not previously mined were properly managed)
18:220 section 3
Postmining land use capability; Historic land use
18:220 section 4
Postmining land use capability; Alternative postmining land use
20:001 section 1
Definitions for 405 KAR chapter 20 (except that final action on the definition of "person" is deferred)
20:010 section 2
Coal exploration; Required documents
20:010 section 3
Coal exploration; Performance standards for coal exploration
20:010 section 4
Coal exploration; Requirements for a permit
24:001 section 1
Definitions for 405 KAR chapter 24 (except that final action on the definition of "person" is deferred)

2. In § 917.16, paragraph (g) is added to read as follows:

§ 917.16 Required program amendments.

* * * * *

(g) By April 1, 1993, Kentucky shall submit proposed revisions to its regulations at 405 KAR 16:210/18:220 Section 2(1) to provide that in determining premining uses of land not previously mined, the land must have been properly managed.

[FR Doc. 92-23844 Filed 9-30-92; 8:45 am]
BILLING CODE 4310-05-M

LIBRARY OF CONGRESS

Copyright Office

37 CFR Part 202

[Docket No. RM 91-5A]

Registration of Claims to Copyright; Architectural Works

AGENCY: Copyright Office, Library of Congress.

ACTION: Final regulation.

SUMMARY: The Copyright Office of the Library of Congress is issuing final regulations governing the registration and deposit of architectural works. The Judicial Improvements Act of 1990 amended the Copyright Act of 1976 and established "architectural works" as a new category of copyrightable subject matter. These new regulations establish the registration procedures for this new category of authorship, and determine the nature of the required deposit for registration and mandatory deposit.

EFFECTIVE DATE: October 1, 1992.

FOR FURTHER INFORMATION CONTACT: Dorothy Schrader, (202) 707-8380.

SUPPLEMENTARY INFORMATION: On December 1, 1990, the President signed into law the Judicial Improvements Act of 1990, Public Law 101-650, which contained provisions modifying portions of the federal copyright law, the Copyright Act of 1976. One of the most significant amendments established "architectural works" as copyrightable subject matter. The amendment defined "architectural work" as "the design of a building as embodied in any tangible medium of expression, including a building, architectural plans, or drawings. The work includes the overall form as well as the arrangement and composition of spaces and elements in the design, but does not include individual standard features."

The issue of protecting architectural works became a prominent copyright concern as a result of United States adherence to the Berne Convention, which was effective on March 1, 1989. Article 2(1) of the Berne Convention requires member countries to provide copyright for "works of architecture," that is, for the original design of buildings. The U.S. copyright law before December 1990 provided protection for "diagrams, models, and technical drawings, including architectural plans" as a species of protected "pictorial, graphic, and sculptural work." However, no federal copyright protection was provided for original designs of buildings. In 1989, the Copyright Office conducted a study of issues relating to works of architecture and concluded that the U.S. law was deficient in its protection of architectural works. The amendment passed in December of 1990 cures that deficiency.

The Copyright Office published instructions regarding registration procedures in Circular 41. On September 24, 1991, the Copyright Office published proposed regulations embodying the written registration practices which were in place and proposing some unique deposit provisions. (56 FR 48137).

1. Proposed Regulation

The proposed regulation on architectural works covered issues unique to this new category of authorship. Issues addressed in the proposed regulation included subject matter of protection and exclusions thereto; the application form; the concept of publication; the relationship with technical drawings; and deposit procedures.

In defining subject matter of protection, the proposed regulations drew upon the statute and legislative history. The term "building" was defined as habitable structures, and structures used by human beings. Stipulated as exclusions from protection were structures other than buildings; individual standard features of buildings; and building designs published or constructed before December 1, 1990.

The Office's proposed regulation designated Form VA as the appropriate form for registering building designs, and information concerning construction of the building, if any, was required to be disclosed at the title line of the application. Where dual copyright claims existed in the technical drawings and the architectural work depicted in the drawings, the claims were required to be registered separately.

On the issue of publication, the proposed regulation took the position that publication of the architectural plans also published the architectural work embodied in the plans. The definition provided in the proposed regulation was based on the definition of publication in the statute, and further provided that construction was not publication.

According to the proposed regulation, deposit for copyright registration would consist of drawings or plans, and, if the building has been constructed, photographs. The proposed regulation also specified certain preferences regarding the archival quality of the deposit. This archival preference also applied to published architectural works subject to mandatory deposit for the benefit of the Library of Congress under section 407 of the Copyright Act.

2. Comment Letters

Only three persons or entities submitted comment letters on the proposed regulation. They were Professor William Fryer of the University of Baltimore School of Law; the American Institute of Architects; and Committee 304 (Pictorial, Graphic, Sculptural and Choreographic Works) of the Patent, Trademark, and Copyright Section of the American Bar Association. This latter Comment apparently presents the views in summary form of 12 of the 36 members of the Committee. These comments are summarized as follows:

Comment Number 1: Professor Fryer asserts that the proposed regulation does not fully implement the Berne Convention due to its limitation to habitable structures and structures used by human beings. Professor Fryer notes: "There is no generally accepted Berne practice that removes 'inhabitable structures' from protection or requires that a structure be 'used by human beings' to be protected. These limitations remove from protection a wide range of structures that are architectural works."

Comment Number 2: The American Institute of Architects (AIA) requested two modifications in the proposed regulation. First, it argued for adoption of a new form specifically tailored to registering architectural works. Second, it asserted that the definition of publication was confusing, and asked that it be made clear that the filing of plans with public agencies did not constitute publication.

Comment Number 3: Twelve members of ABA Committee 304 expressed views on a wide range of issues. Some suggestions were made by one person. Divided opinions were expressed on some points. Some members criticized the proposed definition of a building on the following grounds:

(a) It was unclear whether the phrase "that are used by human beings" modified the term "habitable structures."

(b) The definition might wrongfully include tents and mobile homes.

(c) The list of examples should include museums.

(d) The definition should be expanded to cover creative designs, such as bird houses, dog houses, and zoo enclosures.

The exclusion for "certain functional structures" was criticized as indefinite and ambiguous. The Committee asserted "bridges" should not be excluded. Furthermore, the regulation should make clear that the exclusion for unregistrable matter does not affect the separate pictorial, graphic, or sculptural work that might be attached to the building.

The Committee asked why publication of the blueprints also published the architectural work, but publication of the architectural work would not necessarily publish the blueprints. They urged that the definition be modified to make it clear that distribution of plans to the limited number of people who are necessarily involved in the construction project did not publish the architectural work.

3. Final Regulations

a. Subject Matter of Protection

The primary criticism of the proposed regulation was that it took an overly restrictive view of the subject matter of protection. The standards proposed by the Copyright Office were largely based on the legislative history, which excludes structures other than buildings.

Protection for architectural works was originally proposed to cover "a building or other three-dimensional structure * * *". The hearings on the legislative proposal to recognize copyright in architectural works debated this broader proposal. Commentators are clearly correct in their assertions that proponents of protection in the legislative hearings offered broad visions of what should be protected.

On the other hand, state highway commissions objected that overbroad protection could result in higher construction costs in the nation's highway system. The House Subcommittee responded to these objections by deleting the reference to "three-dimensional structure" from the legislation. The House Subcommittee explained its action in the following words:

> The Subcommittee made a second amendment in the definition of architectural work: the deletion of the phrase "or three-dimensional structure." This phrase was included in H.R. 3990 to cover cases where architectural works (sic: are) embodied in innovative structures that defy easy classification. Unfortunately, the phrase also could be interpreted as covering interstate highway bridges, cloverleafs, canals, dams, and pedestrian walkways. The Subcommittee examined protection for these works, some of which form important elements of this nation's transportation system, and determined that copyright protection is not necessary to stimulate creativity or prohibit unauthorized reproduction.
>
> The sole purpose of legislating at this time is to place the United States unequivocally in compliance with its Berne Convention obligations. Protection for bridges and related nonhabitable three-dimensional structures is not required by the Berne Convention. Accordingly, the question of copyright protection for these works can be deferred to another day. As a consequence, the phrase "or other three-dimensional structures" was deleted from the definition of architectural work and from all other places in the bill.
>
> This deletion, though, raises more sharply the question of what is meant by the term "building." Obviously, the term encompassed habitable structures such as houses and office buildings. It also covers structures that are used, but not inhabited, by human beings, such as churches, pergolas, gazebos, and garden pavilions.
>
> (H.R. Rep. No. 735, 101st Cong. 2d Sess. 19-20 (1990)).

The Copyright Office agrees with the conclusions of the House Subcommittee that protection limited to buildings satisfies our Berne Convention obligations. In the legislative deliberations concerning whether to join the Berne Convention, international experts took the position that the sufficiency of U.S. law in respect to all Berne obligations was a matter for the United States to determine. (*See* discussion of W.I.P.O. Roundtable in Geneva, in H.R. Rep. No. 609, 100th Cong. 2d Sess. 36 (1988)). The study on architectural works conducted by the Copyright Office, moreover, confirms the many differences in approach among Berne member states in addressing protection of architectural works. Our study confirms an absence of uniform standards of protection for architectural works under the Berne Convention.

After careful reconsideration the Copyright Office finds the proposed regulation accurately implemented the policies expressed by legislative history However, in order to provide further clarification on the important matter of subject matter of protection, the Copyright Office has adopted a number of changes. With respect to the definition of "building," four changes are made in the final regulations. First, a provision is added that the term "building" applies to structures "that are intended to be both permanent and stationary." Second, a clarification is provided that the listing of examples in §202.11(b)(2) is not all inclusive. Third, the suggestion of the ABA Committee 304 that "museums" be added is adopted. Fourth, we have clarified that

the term "humanly" qualifies the phrase "habitable structures."

Three modifications have been made to works excluded in §202.11(d). First, reference to "certain functional structures" in §202.11(d)(1) is deleted and in its place is substituted "structures other then buildings." Second, the list of examples of structures other than buildings is expanded to specify the exclusion of "tents, recreational vehicles, mobile homes, and boats." Third, in the exclusion for standard features, the Copyright Office has added: "standard configuration of spaces."

The Copyright Office believes Congress intended to limit protection of architectural works to humanly habitable structures or other similar structures used by human beings. The Office has no doubt that this subject matter qualification is consistent with the Berne Convention obligations, based upon its June 1988 Report "Copyright in Works of Architecture."

b. Registration Limited to Single Work

The proposed regulation made no proposal regarding the one registration per work rule. The Copyright Office intended to apply the established principle found in 37 CFR 202.3 (b)(7). Since the proposed regulation has been pending, however, a number of applicants have attempted to register groups of architectural works on a single application form. The Copyright Office finds that accepting such group registrations would lead to confusion over the nature of copyrightable authorship that is being registered. For this reason, the Copyright Office limits registration to a single work. To avoid any uncertainty, the Office adds a specific provision confirming that a single application may cover only a single architectural work. Additionally, the Copyright Office also clarifies the concept of a single work in the case of tract housing at 37 CFR 202.11 (c)(2).

c. Publication

The proposed regulation based its definition of publication on the Copyright Act. The definition drew upon two statutory provisions: the definition of "publication" in section 101 of the Copyright Act, and the definition of "architectural work" which provides that the building design may be embodied in architectural plans or drawings.

The American Institute of Architects ("AIA") criticized the proposed definition on the grounds that it implied that limited distribution of plans to public agencies and subcontractors for purpose of construction constituted publication. The AIA believed this impression was created by the second sentence of the definition ("(t)he offering to distribute copies to a group of persons for purposes of further distribution or public display also constitutes publication"), which is taken nearly verbatim from the Copyright Act's definition of "publication." AIA contended that the majority of cases hold that filing plans with public agencies and limited distribution to subcontractors does not constitute publication.

The AIA position appears consistent with the majority line of the cases on this issue. The Copyright Office had and has no intention of mandating that filing plans with public agencies generally constitutes publication.

The Copyright Office is hesitant, however, to establish a judgmental policy on the extent of distribution necessary to constitute publication. For years, applicants registered architectural plans with the Copyright Office. Many of these applicants have chosen to designate their plans as published on the basis of public filing dates, and/or distribution to subcontractors. The Copyright Office has a natural reluctance to establish a policy that inflexibly mandates a public filing can never be considered a publication of the work.

As an alternative, the Copyright Office has chosen to delete the second sentence of the proposed definition of publication, even though the language is taken nearly verbatim from 17 U.S.C. 101. The purpose of the definition of publication in the regulations of the Copyright Office is to clarify matters that are capable of definitive policies. The applicant has special knowledge about the extent to which a set of plans has been distributed. The Copyright Office prefers a flexible policy, which allows the claimant to consider his or her work has been published on the basis of public filings. The Office does not, of course, take the position that a public filing always or generally constitutes publication of the work.

d. Application Forms

The American Institute of Architects endorsed the establishment of a separate registration form dedicated exclusively to registering architectural works.

The Copyright Office gave careful consideration to the proposal for a unique form. While the Copyright Office does not foreclose the possibility of creating such a form in the future, currently annual registrations of architectural works run to about 2,000. Moreover, the Examining Division has not experienced any undue difficulty in dealing with registration on Form VA. Due to the relatively low number of registrations and the lack of recurring problems, the Copyright Office has decided not to adopt a new form at this time. The Office will continue to monitor its experience with the use of Form VA to register architectural works.

4. Regulatory Flexibility Act

With respect to the Regulatory Flexibility Act, the Copyright Office takes the position that this Act does not apply to Copyright Office rulemaking. The Copyright Office is a department of the Library of Congress, which is part of the legislative branch. Neither the Library of Congress nor the Copyright Office is an "agency" within the meaning of the Administrative Procedure Act of June 11, 1946, as amended (5 U.S.C. 55 et seq and 5 U.S.C. 701 et seq). The Regulatory Flexibility Act consequently does not apply to the Copyright Office since that Act affects only those entities of the Federal Government that are agencies as defined in the Administrative Procedure Act.[1]

Alternatively, if it is later determined by a court of competent jurisdiction that the Copyright Office is an "agency" subject to the Regulatory Flexibility Act, the Register of Copyrights has determined and hereby certifies that this regulation will have no significant impact on small business.

List of Subjects in 37 CFR Part 202

Copyright, Copyright registration, Architectural works.

Final Rules

In consideration of the foregoing, 37 CFR part 202 is amended in the manner set forth below.

PART 202—[AMENDED]

1. The authority citation for part 202 continues to read as follows:

Authority: 17 U.S.C 702; §§202.19, 202.20 and 202.21 are also issued under 17 U.S.C. 407 and 408.

2. New § 202.11 is added to read as follows:

---

[1]The Copyright Office was not subject to the Administrative Procedure Act before 1978, and it is now subject to it only in areas specified by section 701(d) of the Copyright Act of 1976 (i.e. "all actions taken by the Register of Copyrights under this title (17), except with respect to the making of copies of copyright deposits) (17 U.S.C. 706(b)). The Copyright Act does not make the Office an "agency" as defined in the Administrative Procedure Act. For example, personnel actions taken by the Office are not subject to APA-FOIA requirements.

community affected by a release or threatened release at a facility listed on the NPL or proposed for listing under the National Contingency Plan (NCP) and where a response action has begun.

Where there are competing applicants, the Agency will continue to evaluate them as provided under § 35.4035.

B. Procurement (§ 35.4066)

In response to concerns over potential Conflict of Interest (COI), EPA believes that any person involved in writing up the specifications should be considered ineligible to compete for either the Technical Advisor or the Grant Administrator position. This action is consistent with OMB Circular A–110. However, this ineligibility does not apply to a person, firm involved in preparation of the TAG application.

In response to continued public comments and as recommended by the Administrator's Superfund Management Review (SMR), the procurement procedures contained in the TAG Program have been streamlined. One of the most often cited criticisms of the procurement process was that grant recipients were required to follow standard Federal procurement procedures rather than TAG-specific requirements more appropriate for the TAG Program's unique circumstances. In direct response to these comments, EPA developed streamlined procedures to encourage public participation in the TAG Program.

The new procurement procedures contained in today's regulation are simplified, while continuing to allow for adequate control over procurements under the grant. These procedures have been divided by dollar value: $1,000 or less, over $1,000 and less than $25,000, $25,000 to $50,000, and over $50,000. For procurements falling into the category of over $50,000, the grantee must follow the procurement rules in 40 CFR part 33.

In response to comments concerning the complexity of the TAG procurement process and to simplify procurement requirements, recipients will not have to go through the process of certifying or not certifying their procurement systems. Instead, we are providing the rules with which all recipients must comply.

C. Administrative Cap (§ 35.4085)

After several years of experience and careful review and consideration of public comments, the Agency has concluded that establishing a cap on administrative services costs at 20 percent, which is equivalent to the 20 percent matching funds requirement, allows local groups applying for TAGs to fulfill the 20 percent matching funds requirement with an "in-kind" administrative services match or with cash matching funds, and at the same time ensures that grant funds will be used primarily to obtain technical assistance and disseminate information.

A recurrent comment has been that recipient groups find the administration of the TAG difficult. This was also one of the major perceptions of the TAG Program to come out of the Superfund Management Review report. Reinstating the administrative services cap, raising it to 20 percent, and allowing the grant recipients to hire an individual(s) specifically for the purpose of administering the grant will alleviate the administrative difficulty for most groups. § 35.4085(d) has been revised to contain language on the administrative cap. It has been the Agency's stated policy that an acceptable range for administrative costs is between 10–20% of the total project costs. This change codifies that policy.

EPA will continue to encourage the use of volunteer services to manage the grant, but in cases where this is not feasible, grantees now have the option of hiring a grant administrator.

The Agency believes that the language formerly contained in § 35.4085(d) of the amended Interim Final Rule is covered adequately in § 35.4085(b), and the regulation has been revised accordingly. Section 35.4085(b) also contains language formerly found in § 35.4090(a).

D. Waivers to the $50,000 Grant Limit (§ 35.4090(a))

Commentors stated that Superfund sites are often complex and generate large quantities of technical information. At sites such as these, the $50,000 grant was often inadequate and commentors believe waivers to the $50,000 limit should be allowed in circumstances other than just in the case of application(s) for multiple sites.

EPA agrees. Due to unusually complex circumstances, large volumes of technical information are generated at some Superfund sites. TAG recipients may request that all or part of this information be interpreted for the affected community by the Technical Advisor. Therefore, it is reasonable to expect that more time will be required by the Technical Advisor to review documents associated with a complicated site than for an "average" Superfund site and that additional funds may be necessary.

The rule therefore provides for waivers at sites that are unusually complex. EPA has developed criteria by which to identify sites where additional funding may be required. The Agency has based these criteria on Program experience and believes they provide a reasonable basis for making a decision.

These criteria also will be applicable at mega-sites, which are, by definition, extraordinarily large and complex. To date, there has been very little in the way of actual TAG experience at mega-sites.

In determining whether a site is sufficiently complex to warrant additional funding, the Agency will consider whether three or more of the following are present:

1. An RI/FS costing in excess of $2 million;
2. Treatability studies or evaluation of new and innovative technologies are required at a site, as specified in the Record of Decision;
3. Reopening of the Record of Decision;
4. The site health assessment results in an epidemiological study;
5. Designation of one or more additional operable units after award of the TAG;
6. A post—TAG award legislative or regulatory change results in the generation of new site documentation or information;
7. A cleanup extending beyond eight years from initiation of the RI/FS through completion of construction;
8. Significant public concern, where large groups of people at a site require many meetings, copies, etc.;
9. Any other factor that, in the judgment of Regional officials, indicates that the site is unusually complex.

EPA also will consider the recipient's past performance, including determining whether administrative requirements have been met satisfactorily and that costs incurred under the previous award are allowable and reasonable.

The regulation published today has been changed accordingly and § 35.4090 has been revised to include in paragraph (a) language formerly contained in § 35.4085(b). A new paragraph has been added (§ 35.4090(a)(2)) to address unusually complex sites.

E. Waivers to the 20 percent Match (§ 35.4090 (b) through (d))

A commentor believes that waivers should be available to local groups through the entire Superfund cleanup process.

The Agency continues to believe that the purpose of these grant funds is to provide technical assistance that will aid community involvement in the study and decision-making processes leading to selection of site cleanup methods. Although citizen involvement can and

should continue during design and remedial action, once the Record of Decision has been signed, the decision has been made on how the cleanup for that operable unit will occur. The statute, CERCLA section 117(e), prohibits EPA from granting waivers to the required 20 percent match once the Record of Decision has been issued.

F. Other Issues

Definitions (§ 35.4010)

EPA is broadening the definition of the term "affected" individuals to include the phrase "whose health is or may be endangered by release of hazardous substances at the facility, or whose economic interests are directly threatened or harmed." The addition of new language incorporates the possibility that health effects of hazardous substances may arise from different sources, including, but not limited to contaminated air, soil and water sources.

A definition of waiver has been added to clarify these requirements. Deviations and waivers are distinct processes and should not be construed to refer to the same thing. EPA can grant waivers or excuse recipients from following certain anticipated regulatory or administrative requirements if:

1. The authority to issue a waiver is provided in the regulation itself, and

2. The Agency believes sufficient justification exists to approve such action.

The authority to issue a waiver is found at the Award Official level. Deviations, or exemptions from certain provisions of existing regulations, may be necessary in some unforeseen instances. The Director, Grants Administration Division, has been delegated the authority to approve deviations. The Agency does not have the authority to deviate from statutory or executive order requirements.

In addition, EPA feels clarification of several other definitions is necessary (i.e., application, award official, contract, contractor, grant agreement, operable unit, start of response action).

Cost Principles (§ 35.4013)

The TAG Program is like any other Federal grant, in that certain established requirements must be followed to ensure the proper administration of grant funds. The Cost Principle requirements, contained in OMB Circular A-122, state that all costs must be "reasonable, allowable and allocable" under the Program. Therefore, this section has been added, stating the applicability of these requirements.

Services in Lieu of Cash (§ 35.4015)

A commentor recommended that EPA eliminate from the final rule the States' ability to hire Technical Advisors and provide those services to a recipient group in lieu of a grant to the group.

EPA believes that the current regulation does not present a problem. Under § 35.4015(d)(2) such services will be provided by the State only with the agreement of the recipient group. Such assistance by the State can save time and expense for the group and in no way is intended to limit the access of affected individuals to independent expertise.

In addition, the title of § 35.4015 has been changed to "State Administration of the Program" to reflect its subject more accurately.

Incorporation (§ 35.4020 (b) and (c))

One commentor agrees with EPA's decision not to require groups to re-incorporate. However, the commentor disagrees with, and sees no justification for, EPA applying this provision only to incorporated groups that have a history of substantial involvement at the site. The commentor felt that there may be many other groups who are qualified and should receive grants even though they do not have a substantial history of involvement with the site.

In response to the comment that there are other groups who are qualified and should receive grants even though they do not have a substantial history of involvement with the site, EPA agrees and may award a TAG to such qualified groups, provided that they are incorporated. Moreover, what is at issue here is the requirement to reincorporate to receive a grant, not the ability to receive a grant.

Ineligible Applicants (§ 35.4030)

A commentor asserted that § 35.4030(b) does not prevent "front groups" from applying to the TAG Program.

In response to this comment, EPA has modified § 35.4030 (a) and (b) to identify PRP "front groups" early in the process. The interim final rule essentially treats all ineligible entities identically. The Agency's experience with the TAG Program demonstrates, however, that PRP involvement in the receipt of a grant raises unique problems not raised by the involvement of other ineligible entities. This follows from the fact that the TAG Program's purpose is to enable groups of individuals to obtain independent technical advice. Under Superfund a PRP, by definition, is potentially subject to liability for all response costs at a site; this would appear to give a PRP a financial interest in the cost of the remedy selected. EPA believes that there is inherent tension between this and the purpose of the TAG Program, providing objective, disinterested information. This makes it appropriate to distinguish between PRPs and other ineligible entities with regard to participation in, and support provided to, a TAG recipient.

In considering whether a group is impermissibly linked to a PRP so as to be ineligible for a grant, EPA must consider, among other things, the extent of PRP participation in the group and whether, and the extent to which, the PRP established or sustained the group. Thus, for example, where a PRP paid any person for participating in a group or for providing services which contributed to establishing and sustaining the group, the group would be ineligible; such a person would necessarily have been participating in the group because of a connection to a PRP rather than as an affected individual. Under 40 CFR 35.4030(a)(1), a group with such a member would therefore be ineligible for a grant. However, the mere fact that a group member was employed by a PRP would clearly not preclude eligibility. A recipient group might not be precluded from including even an executive or director of a PRP. However, where a group included an individual owning a significant or controlling interest in a PRP, there might be an eligibility problem unless it could be determined that such a member could, in fact, participate in the group in the capacity of an "affected individual" as distinct from its capacity as a PRP.

A related issue is the extent to which a group can receive support from an ineligible entity. Because of the special problems raised by PRP involvement with a group, the acceptance of any assistance (e.g., cash or goods) with conditions attached which might, in the judgment of the award official, limit the group's ability to represent the interest of affected individuals, or of any donation of services by a PRP would render a group ineligible. The standard for other ineligible entities, whether governments or other institutions, is whether the group has been "established or presently sustained" by an ineligible entity. The regulation has been modified to clarify that this applies where a group is established or sustained by any ineligible entity, whether or not that entity is governmental. It has also been modified to clarify that the prohibition against participation of an ineligible entity continues even after a group is awarded a grant. Finally, the regulation

uses the term "sustained" rather than "supported" to clarify that any support must be substantial.

A second issue is the extent to which a recipient group must have an identity separate and distinct from that of an ineligible group. EPA believes that where a second group has its origins in an ineligible group, special care is necessary to ensure a separate identity. The separation must be both formal (with separate incorporation, officers, finances, and membership) and substantive. A new group is not substantially identical to an older, ineligible group where there is a reasonable basis for asserting that the two have separate and distinct identities.

Evaluation Criteria (§ 35.4035)

EPA has established certain criteria by which to evaluate TAG applicants. This section now includes instructions for both sole and multiple applicants. EPA is not changing any criteria, only revising the evaluation method. EPA believes certain of these criteria to be essential and that any group scoring zero on one or more of these should be disqualified. Thus, an applicant group must score above zero on criteria 2 (representation of affected community), 3 (services to be performed by the Technical Advisor), and 4 (communication plan). In addition, the applicant must meet either criterion 1 and/or 5. The Agency believes this evaluation method will assist the Regions in identifying qualified applicants.

Since publication of the Amendments to the interim final rule (December 1, 1989), the required EPA grant form has changed from EPA Form 5700–33 to SF–424, and the regulation has been changed to reflect this.

Notification Process (§ 35.4040)

According to standard TAG application procedures, the first step for the community group is to submit a Letter of Intent (LOI) indicating the intention of applying for a TAG award. The LOI serves to document the number of interested groups and aids in tracking the applicants through the process. However, it has occasionally been the case that an applicant group has submitted an application without having submitted an LOI. In this instance, EPA believes that the group's application should fulfill the LOI requirement, thus initiating the 30–day notification process. However, EPA will not begin processing the application until the end of the 30-day period in order to notify other potentially interested groups. The Agency today is revising § 35.4040 (b)(2) to emphasize the importance of public outreach by making the public notice a requirement of the TAG Program.

Application Process (§ 35.4045)

Commentors raised concerns with the application process, stating that it is complex and cumbersome, both in terms of time and procedures. According to one commentor, the level of detail required in the Scope of Work and Budget application portions (Section IV) is unnecessary. To assist in streamlining the process, a recommendation was made to simplify the application forms and the Citizen's Guidance Manual. To address the application complexity issue, a commentor recommended that grants be awarded with the condition that the recipient submit a general scope of work and explanation of how the grant funds will be spent with the application. The detailed scope of work and budget would then be submitted after receiving the grant and hiring a Technical Advisor.

In response to this and similar comments relating to the complexity of the program, EPA has made an effort to simplify the entire application process. The regulation has been amended to delete the detailed requirements related to application submittal formerly contained in § 35.4045(a). Also deleted was paragraph (c) of the same section, concerning instructions for filing an application, instructions which, EPA believes are adequately explained in guidance. EPA has streamlined the application process, revised the Superfund Technical Assistance Grant (TAG) Handbook, and routinely holds workshops on TAG for community groups. Therefore, EPA believes the application process is much less cumbersome than when the comments were received.

Grant Availability (§ 35.4050)

A commentor stated that EPA should accept TAG applications from the time a site is proposed for or listed on the NPL. EPA agrees with this comment and will accept applications any time after the site has been listed. However, in § 35.4050, EPA states that grants will not be awarded before the start of the response action. Until such time as a response action is scheduled or underway, there are no site activities generating information for interpretation.

Ineligible Activities (§ 35.4055 (a) through (h))

A commentor stated that travel to site-related meetings held by EPA outside the site community should be an eligible activity.

After considering the comment and the intent of § 35.4055, EPA does not believe this change in the regulation is merited because TAG funds should be spent primarily in the interpretation and dissemination of technical data related to a site. EPA believes that the primary purpose of the grant is to assist affected individuals in obtaining technical assistance and not to fund ancillary activities of the grant recipient such as travel expenditures, which detract from or inhibit the recipient's ability to pay for skilled Technical Advisors.

Many requests have been made by community groups stating that EPA should allow TAG funds to be used to cover the costs of epidemiological or health studies, such as blood or urine testing. However, while EPA recognizes the public concern over issues such as these, such testing is prohibited under § 35.4055(h) of the regulation. This section has been renumbered and clarifying language added to the regulation to reflect EPA's belief that the intent of CERCLA section 117(e) is to use TAG funds for the interpretation of data and not the generation of new data.

It has been requested that TAG funds be allowed to pay for Health and Safety Training for the Technical Advisor (TA). This training is required for site access, access that would then be used to promote the TA's understanding of and access to the Superfund site, and, ultimately, assist in the interpretation of data for the community group. Superfund sites are inherently complex and involve special health and safety issues. Specialized training relating specifically to Superfund sites is not training that a TA, under normal circumstances, could be expected to have previously obtained. Therefore, EPA believes that the costs of Health and Safety training for a TA, if required specifically to allow access to the Superfund site, should be considered as an eligible activity and has changed the regulation to make this cost allowable under the TAG award.

Contract Review (§ 35.4067)

A commentor recommended that at the end of the procurement section, to ensure EPA review is completed in a timely fashion, EPA should add the statement "EPA will respond with written comments to the recipient within 14 days of receiving the contract, or notify the recipient in writing within 14 days that the contract has been approved." Another commentor stated that in many cases, EPA Regions have used the procedure of reviewing proposed contracts to demand the review of other things the commentor

feels to be inappropriate (i.e., conflict of interest and grantee's procurement process). Again, this commentor recommends a two-week review period and that EPA state specific objections to the proposed contracts, in writing, with specific reference to regulations being violated.

EPA recognizes and understands the merit of the comment and believes the purpose of EPA review of documents is intended to protect the grantees. In addition, EPA will make every effort to review contracts in a timely manner. However, in regard to establishing a time limit for review of applications by EPA, the Agency believes that this should remain as guidance and should not be included in the regulation.

Based on TAG Program experience since promulgation of the amended interim final rule, the Agency today is requiring that each applicant provide EPA with the opportunity to review the contract before it is awarded or amended only for contracts over $1,000.

Please note that this section, formerly § 35.4095, has been moved for clarity and renumbered as § 35.4087.

Pre-Award Costs (§ 35.4075)

A commentor stated that EPA should allow the costs of preparing the grant application.

EPA disagrees. The cost of applying for a grant is a pre-award cost and is not allowable for funding under any EPA grant program.

Audits (§ 35.4105)

Because TAGs are cost recoverable, the records retention period for the Superfund Program is ten years from the termination or the end of contract.

Previously, single audit requirements only applied to State and local governments. With the promulgation of OMB Circular A–133, the single audit requirements now apply to TAG recipients as well, and paragraph (c) has been added.

Contractor Liability

A commentor expressed concern over the liability of contractors. The statement was made that "Contractors to TAG Grantees are being required by some EPA Regions to accept an unreasonable risk of liability. The way the program is currently set up, it prevents firms from protecting themselves, it is unfair to small businesses. EPA's own Superfund contractors are protected from suits and many times indemnified against suits by 3rd parties, and the TAG budget is insufficient to handle issues with liability." Section 119 of CERCLA provides EPA with discretionary authority to indemnify persons engaged in CERCLA response activities. Consultants hired by recipients of TAGs are not within the definition of those who can be indemnified by EPA. Therefore, EPA does not believe that indemnification is available.

Consistency

Commentors asserted that inconsistencies exist between Regional Offices in the grant decision-making process and in their review of proposed technical assistance contracts. Commentors recommended centralizing the program in EPA Headquarters, with a few personnel devoted to TAGs on a full-time basis.

EPA disagrees. EPA recognizes the diversity and uniqueness of individual Superfund sites and believes that centralizing the management of the program not only would reduce its accessibility by groups seeking information and assistance but also would reduce EPA's flexibility in addressing unique site features and situations.

Technical Assistance Grant Implementation

A commentor indicated that EPA needs to increase public outreach to citizens affected by Superfund sites. It provided two recommendations to facilitate the implementation of the TAG Program:

(1) Development of guidance for affected individuals on hiring Technical Advisors, liability issues, record keeping, audit procedures, etc.;

(2) development of materials by the Regional EPA Offices to address regional variations in TAG implementation.

EPA recognizes the importance of public outreach and has adopted a decentralized structure to retain maximum contact with communities affected by Superfund sites. EPA has developed guidance materials such as those recommended by the commentor. The Superfund Technical Assistance Grants (TAG) Handbook serves as guidance for community groups. EPA has held training and issued guidance for Regional staff in an attempt to ensure consistency, while still allowing for unique site features, in the implementation of the TAG Program.

Corrections and Clarifications

Minor changes were made to the regulation to correct errors in the amended interim final rule and/or to clarify language in the regulation.

III. Existing Grants

TAG recipients receiving a TAG under previous regulations may request having their grant administered under the final regulation. Groups wishing to do so must seek amendments to their grant from the Award Official. However, any funds spent prior to this final rule are subject to the previous regulation. Amendments to current grants will apply only to future work.

IV. Regulatory Analysis

A. Regulatory Impact Analysis

Executive Order No. 12291 requires that regulations be classified as "major" or "non-major" for purposes of review by the Office of Management and Budget (OMB). According to Executive Order No. 12291, "major" rules are regulations that are likely to result in:

1. An annual adverse (cost) effect on the economy of $100 million or more; or

2. A major increase in costs or prices for consumers, individual industries, Federal, State, or local government, or geographical regions; or

3. Significant adverse effects on the competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The final rule for the TAG Program is a "non-major" rule. The final rule will have no significant annual adverse effect on the economy of $100 million or more; or a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets.

B. Regulatory Flexibility Analysis

The Regulatory Flexibility Act of 1980 requires that Agencies evaluate the effects of a rule for three types of small entities:

1. Small businesses (as defined in the Small Business Administration regulations);

2. Small organizations (independently owned, nondominant in their field, non-profit); and

3. Small government jurisdictions (serving communities of less than 5,000 people).

EPA has consistently considered the interests of small entities in designing and implementing the TAG Program and continues to encourage their participation.

Since today's rule is not expected to have a significant impact on small

entities, EPA certifies that no Regulatory Flexibility Analysis is necessary.

C. Paperwork Reduction Act

The information collection requirements contained in this rule have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act, U.S.C. 3501 *et seq.* and have been assigned OMB control number 2030–0020 for activities involving the grant application process.

Public reporting burden for this collection of information is estimated to average 8 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Send comments regarding the burden estimate or any other aspect of the collection of information, including suggestions for reducing this burden to the Chief, Information Policy Branch, PM–223Y, U.S. Environmental Protection Agency, 401 M Street, SW., Washington DC, 20460, and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC, 20503, marked "Attention Desk Officer for EPA."

List of Subjects in 40 CFR Part 35

Air pollution control, Grant programs environmental protection, Hazardous waste, Indians, Intergovernmental relations, Pesticides and pests, Reporting and recordkeeping requirements, Superfund, Waste treatment and disposal, Water pollution control, Water supply.

Dated: September 7, 1992.

F. Henry Habicht II

Acting Administrator.

For the reasons set out in the preamble, title 40, chapter I of the Code of Federal Regulations is amended by revising part 35, subpart M (§§ 35.4000 through 35.4130) to read as follows:

PART 35—STATE AND LOCAL ASSISTANCE

* * * * *

Subpart M—Grants for Technical Assistance

Sec.

35.4000 Authority.
35.4005 Purpose and availability of referenced material.

Subpart M—Grants for Technical Assistance

Authority: 42 U.S.C. 9617(e); sec. 9(g), E.O. 12580, 52 FR 2923, 3 CFR, 1987 Comp. P. 193.

§ 35.4000 Authority.

This subpart is issued under section 117(e) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended, 42 U.S.C. 9617(e).

§ 35.4005 Purpose and availability of referenced material.

(a) This subpart codifies policies and procedures for Technical Assistance Grants (TAGs) awarded by EPA to groups of individuals. This subpart establishes the procedures for accepting and evaluating applications, and for awarding and managing TAGs. These provisions supplement the EPA general assistance regulations 40 CFR part 30 and 40 CFR part 33 and are applicable to all applicants/recipients of TAGs.

(b) Any reference to documents made in this subpart necessary to apply for a TAG (i.e., OMB Circulars and EPA forms SF-424, 269, 270) are available through EPA Headquarters and Regional Offices listed in 40 CFR 1.7.

§ 35.4010 Definitions.

As used in this subpart, the following words and terms shall have the meaning set forth below:

Affected means subject to an actual or potential health, economic or environmental threat arising from a release or a threatened release at a facility listed on the National Priorities List (NPL) or proposed for listing under the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) where a response action under CERCLA has begun. Examples of affected parties include individuals who live in areas adjacent to NPL facilities whose health is or may be endangered by releases of hazardous substances at the facility, or whose economic interests are directly threatened or harmed.

Applicant means any group of individuals that files an application for a TAG.

Application means a completed formal written request for a TAG that is submitted to a State or the EPA on EPA form SF–424, Application for Federal Assistance (Non-construction Programs).

Award means the TAG agreement signed by both EPA and the recipient.

Award Official means the EPA official delegated the authority to sign grant agreements.

Budget means the financial plan for the spending of all Federal and matching funds (including in-kind contributions) for a TAG project as proposed by the applicant, and negotiated with and approved by the Award Official.

Budget period means the length of time specified in a grant agreement during which the recipient may spend or obligate Federal funds. The budget period may not exceed three (3) years. A TAG project period may be comprised of several budget periods.

Cash contribution means actual non-Federal dollars, or Federal dollars if expressly authorized by statute to do so, that a recipient spends for goods and services and real or personal property used to satisfy the matching funds requirement.

Contract means a written agreement between the recipient and another party (other than a public agency) for services or supplies necessary to complete the TAG project. Contracts include contracts and subcontracts for personal and professional services or supplies necessary to complete the TAG project, and agreements with consultants, and purchase orders.

Contractor means any party (e.g., Technical Advisor) to whom a recipient awards a contract.

EPA means the Environmental Protection Agency. Where a State administers the TAG Program, the term "EPA" may mean a State agency.

Federal facility means a facility that is owned or operated by a department, agency, or instrumentality of the United States.

Grant agreement means the legal document that transfers money, or anything of value, to a recipient to accomplish the purpose of the TAG project. It specifies budget and project periods, the Federal budget share of eligible project costs, a description of

the work to be accomplished, and any terms and conditions.

In-kind contribution means the value of a non-cash contribution used to meet a recipient's matching funds requirement in accordance with 40 CFR 30.307(b). An in-kind contribution may consist of charges for equipment or the value of goods and services necessary to and directly benefiting the EPA-funded project.

Matching funds means the portion of allowable project costs that a recipient contributes toward completing the TAG project using non-Federal funds or Federal funds if expressly authorized by statute. The match may include in-kind as well as cash contributions.

Operable unit means a discrete action that comprises an incremental step toward comprehensively addressing site problems.

Potentially Responsible Party (PRP) means any individual(s) or company(ies) (such as owners, operators, transporters or generators) potentially responsible under sections 106 or 107 of CERCLA for the contamination problems at a Superfund site.

Recipient means any group of individuals that has been awarded a TAG.

Recipient's project manager means the person legally authorized to obligate the organization to the terms and conditions of EPA's regulations and the grant agreement, and designated by the recipient to serve as its principal contact with EPA.

Response action means all activities undertaken to address the problems created by hazardous substances at a National Priorities List site.

Start of response action means the point in time when there is a guarantee or set-aside of funding either by EPA, other Federal agencies, States, or PRPs in order to begin response activities at a site.

Waiver means excusing recipients from following certain anticipated regulatory or administrative requirements if; the authority to issue a waiver is provided in the regulation itself; and the Agency believes sufficient justification exists to approve such action. The Award Official has the authority to issue a waiver. Deviation means an exemption from certain provisions of existing regulations, which may be necessary in some unforeseen instances. The Director, Grants Administration Division, is authorized under 40 CFR 30.1001(b) to approve deviations from the requirements of regulations (except for those that implement statutory or executive order requirements) when such situations warrant special consideration.

§ 35.4013 Cost principles.

(a) Recipients and non-profit contractors must comply with the cost principles in OMB Circular A-122.

(b) Profit-making contractors and subcontractors must comply with the cost principles in the Federal Acquisition Regulation (48 CFR part 31).

§ 35.4015 State administration of the program.

(a) Effective October 1, 1992, the Agency will accept applications for and award TAGs in consultation with the States.

(b) The TAG Program will be available at an NPL site where a State response action is scheduled to begin or is underway and a CERCLA-funded cooperative or other written agreement exists between the Agency and the State.

(c) States wishing to administer the TAG Program must inform the appropriate EPA Regional administrator. If a State elects to administer the program, it must do so in conformity with this subpart. Where States administer the program, EPA will have an oversight role.

(d) A State that chooses to administer the TAG Program will receive technical assistance funds plus administrative costs from the Agency under a cooperative agreement. A State will receive $10,000 for administrative costs for the first TAG. For each subsequent TAG, the State will receive an amount equal to eight (8) percent of the TAG. Using the criteria established under this subpart, the State may select a qualified recipient and provide assistance in either of two ways:

(1) A State will pass through technical assistance funds to a recipient group by way of a subgrant, and reimburse the recipient group for its expenditures as provided at § 35.4080. A State that elects this option is also responsible for monitoring the subgrant to ensure that recipients comply with its terms and with 40 CFR parts 30 and 33; or

(2) If a recipient group agrees, a State will use TAG funds to obtain the services of a Technical Advisor and provide those services to a grant recipient in lieu of cash. The recipient group may work closely with the State in advertising, reviewing bids and recommending a Technical Advisor, and managing the Technical Advisor. The State will make the final selection of the technical advisor. A State that elects this option becomes directly responsible for awarding the technical assistance contracts, submitting financial and progress reports, and for disbursing all TAG funds in compliance with applicable EPA regulations and requirements.

§ 35.4020 Responsibility requirements.

(a) An applicant must meet the minimum administrative and management capability requirements 40 CFR 30.301. Thus each applicant must demonstrate that it has established reliable procedures or has plans for establishing reliable procedures for record-keeping and financial accountability related to the management of the TAG. These procedures must be in effect before the recipient incurs any costs. If EPA concludes that the applicant is not capable of meeting the responsibility requirements, the application will be rejected.

(b) Each recipient of a TAG must be incorporated as a non-profit organization for the purpose of addressing the Superfund site for which the grant is provided in order to receive a grant, except as provided in paragraph (c) of this section. At the time of award, a recipient must either be incorporated or must demonstrate to EPA that the group has filed the necessary documents for incorporation with the appropriate State agency. No later than the time of the first request for reimbursement for costs incurred, a recipient must submit proof to EPA that the group has been incorporated by the State.

(c) Unless a consolidation agreement makes site-specific incorporation necessary, a previously incorporated group that includes all the individuals and groups that joined in applying for the TAG shall not be required to reincorporate for the specific purpose of representing affected individuals at the site provided that the group can demonstrate that it has a substantial history of involvement at the site.

§ 35.4025 Eligible applicants.

Eligible applicants, except as provided in § 35.4030, are any group of individuals that may be affected by a release or a threatened release at any facility that is listed on the NPL or is proposed for listing under the NCP and at which a response action has begun.

§ 35.4030 Ineligible applicants.

(a) Potentially responsible parties (PRPs) are ineligible to receive or be represented in groups receiving or using TAGs.

(1) No group established or sustained by a PRP shall be eligible for a TAG.

(2) No group that receives services provided by or paid for by a PRP shall be eligible for a TAG.

(3) For an applicant to obtain a grant it must establish an identity separate from that of an entity that is ineligible under § 35.4030 (a)(1) or (2) by making a reasonable demonstration of independence from the ineligible entity. Such a demonstration requires, at a minimum, a showing that the applicant has a formal legal identity (e.g., officers) and a substantive existence, including finances, separate and distinct from that of the ineligible entity.

(b) The following groups and organizations are also ineligible to receive or be represented in groups receiving or using TAGs.

(1) Corporations that are not incorporated for the specific purpose of representing affected individuals at the site except as provided in § 35.4020(c);

(2) Academic institutions;

(3) Political subdivisions (e.g., townships and municipalities); and

(4) Groups established or presently sustained by ineligible entities under § 35.4030 (b) through (c) (including emergency planning committees and citizen advisory boards who may be precluded from acting independently).

(c) This section shall not preclude any individual affected by a Superfund site from participating in a recipient group in his or her capacity as an individual. However, an individual whose financial involvement in a PRP (as other than an employee or contractor) is determined by the Award Official to be sufficiently substantial may be precluded from participation in a recipient group in any capacity.

§ 35.4035 Evaluation criteria.

(a) EPA will award a TAG only after it has determined that all eligibility and responsibility requirements listed in §§ 35.4020, 35.4025, and 35.4030 are met, and after review of the applicant's qualifications in the narrative section of the grant application. Each applicant will be required to provide information on how it meets the eligibility criteria in the grant application. The "Applicant Qualifications" section is Part IV of SF–424.

(b) Sole Applicant. After the Letter of Intent process (see § 35.4040), if there is still only one group, the evaluation process will consist of the Agency ensuring that the applicant meets the criteria stated in § 35.4035(c) in addition to the administrative and management capability requirements, and can demonstrate that it is representative of the community affected by a release or a threatened release at a facility that is listed on the NPL or is proposed for listing under the NCP and where a response action has begun, as demonstrated by fulfillment of the criteria in § 35.4035(c). Once these requirements have been met by the sole applicant, the Agency may award a TAG.

(c) Multiple Applicants. Where there are competing applicants EPA will evaluate the strengths and weaknesses of each applicant. EPA will rank each applicant relative to other applicants. Each criterion is assigned a weight showing its relative importance. EPA will rank each applicant by utilizing criteria described below. In order to qualify, applicants must meet criterion 1 and/or 5 and not score zero on criteria 2, 3, or 4.

(1) The presence of an actual or potential health threat posed to group members by the site (this criterion can be met by establishing a demonstrable threat to members' health or a reasonable belief that the site poses a substantial threat to their health) (30 points);

(2) The applicant best represents groups and individuals affected by the site (20 points);

(3) The identification of how the group plans to use the services of a Technical Advisor throughout the Superfund response action (20 points);

(4) The demonstrated intention and ability of the applicant to inform others in the community of the information provided by the Technical Advisor (20 points); and

(5) The presence of an actual or potential economic threat or threat of an impaired use or enjoyment of the environment to group members that is caused by the site (this criterion can be met by establishing a demonstrable economic or environmental threat to group members or a reasonable belief that the site poses a substantial economic or environmental threat) (10 points).

§ 35.4040 Notification process.

(a) Groups wishing to apply for a TAG should first submit a Letter of Intent (LOI) to EPA. EPA will respond in writing to an LOI. A grant application submitted by a community group without having first submitted an LOI will fulfill the LOI requirement, thus initiating the notification process.

(b) Upon receipt of the first LOI, EPA will undertake certain activities depending on the schedule for work at the site:

(1) If commencement of the remedial investigation or a removal action is not underway or scheduled to begin, EPA will advise the group in writing that grant applications for the site are not yet being accepted. EPA may informally notify other interested groups that it has received an LOI; or

(2) If a response action is already underway or scheduled to begin, EPA may conduct mailings and/or meetings, in addition to the required public notice, to provide formal notice to other interested parties that a grant for the site soon may be awarded. These formal notification activities will generally be conducted far enough in advance of the start of the response action to allow time for groups to consolidate, apply for and receive a grant award, and procure a Technical Advisor before work commences at the site.

(c) Other potential applicants will have 30 days to contact the original applicant to form a coalition. If the community groups are unable to form a coalition, they must notify EPA within the 30 days. EPA will then accept separate applications from all interested groups for an additional 30-day period. EPA may consider written requests for extensions of this time. If there is a qualified applicant, a grant will be awarded from among the competing applications based on the evaluation criteria described in § 35.4035. The schedule for response activities at a site will not be affected by the TAG application process.

§ 35.4045 Submission of application.

(a) After meeting the LOI requirement, the applicant must then submit a TAG application on SF–424.

(b) An applicant must submit a budget clearly showing the proposed expenditure of funds, how it will provide the cash and/or in-kind contributions to meet the "match" requirement, and how the funds and other resources, including the "match" will be used to complete the TAG project. As part of the application process, the applicant must submit the following certifications:

(1) Drug-Free Workplace,

(2) Debarment, Suspension, and Other Responsibility Matters, and

(3) Anti-Lobbying (if the grant is $100,000 or more).

§ 35.4050 Timing of award.

An award of a TAG will be made no earlier than the start of the response action. Grants to qualified applicants could be delayed depending upon the availability of funds for the Superfund program.

§ 35.4055 Ineligible activities.

The following activities are ineligible for assistance under this program:

(a) Litigation or underwriting legal actions such as paying for attorney fees or paying for the time of the Technical Advisor to assist an attorney in preparing a legal action or preparing for

and serving as an expert witness at any legal proceeding regarding or affecting the site;

(b) Political activity and lobbying in accordance with OMB Circular A–122;

(c) Other activities inconsistent with the cost principles stated in OMB Circular A–122, "Cost Principles for Non–Profit Organizations";

(d) Tuition or other expenses for recipient group members or Technical Advisors to attend training, seminars or courses, except for required Health and Safety training for the Technical Advisor to allow access to the local Superfund site, provided written permission is obtained in advance from the Regional EPA Office. Training may be approved for one time only at an amount not to exceed $1,000.00;

(e) Any activities or expenditures for recipient group members' travel;

(f) Generation of new primary data such as well drilling and testing, including split sampling;

(g) Reopening final Agency decisions such as the Records of Decision or conducting disputes with the Agency in accordance with its dispute resolution procedures set forth at 40 CFR part 30, subpart L; and

(h) Epidemiological or health studies, such as blood or urine testing.

§ 35.4060 Eligible activities.

TAGs may be used to obtain technical assistance in interpreting information with regard to the nature of the hazard, remedial investigation and feasibility study, record of decision, remedial design, selection and construction of remedial action, operation and maintenance, or a significant removal action at a facility that is listed on the NPL or proposed for listing and at which a response action has begun. TAGs shall be used to fund activities that will contribute to the public's ability to participate in the decision-making process by improving the public's understanding of overall conditions and activities.

§ 35.4065 Technical advisor's qualifications.

(a) A Technical Advisor must possess the following credentials:

(1) Demonstrated knowledge of hazardous or toxic waste issues;

(2) Academic training in a relevant discipline (e.g., biochemistry, toxicology, environmental sciences, engineering); and

(3) Ability to translate technical information into terms understandable to lay persons.

(b) A Technical Advisor should possess the following credentials:

(1) Experience working on hazardous or toxic waste problems;

(2) Experience in making technical presentations;

(3) Demonstrated writing skills; and

(4) Previous experience working with affected individuals or community groups or other groups of individuals.

§ 35.4066 Procurement.

(a) *Competition.* (1) The recipient must provide maximum open and free competition.

(2) Recipients must not unduly restrict or eliminate competition.

(3) The individual(s) developing the specifications will be excluded from competition for the Technical Advisor and/or Grant Administrator position.

(b) *Documentation.* Recipients must document all procurement activities with written records that furnish reasons for decisions.

(c) *Cost.* (1) The recipient must determine that all costs are reasonable.

(2) The recipient must conduct a cost analysis of all contracts over $25,000 and all change orders regardless of dollar value.

(d) *Debarment.* Recipients and contractors must not make any contract at any time to anyone who is on the "List of Parties Excluded from Federal Procurement or Nonprocurement Programs."

(e) *Recipient responsibility.* (1) The recipient is responsible for the settlement and satisfactory completion of all contractual and administrative issues arising out of contracts entered into under a grant.

(2) The recipient must ensure that the contractor(s) perform in accordance with the terms and conditions of the contract.

(f) *Responsible contractors.* The recipient shall award contracts only to responsible contractors that possess the potential ability to perform successfully under the terms and conditions of a proposed contract.

(g) *Disadvantaged business enterprises.* The recipient shall comply with the "Small, Minority, Women's, and Labor Surplus Area Business" requirements in § 33.240.

(h) *Illegal contracts.* Recipients may not award cost-plus-percentage-of-cost or percentage-of-construction-cost contracts.

(i) *Contract provisions.* The recipient must include the following provisions in each contract:

(1) Statement of work;

(2) Schedule for performance;

(3) Due dates for deliverables;

(4) Total cost of the contract;

(5) Payment provisions; and

(6) The following clauses from 40 CFR 33.1030, "Model contract clauses":

(i) Supersession;

(ii) Privity of Contract;

(iii) Termination;

(iv) Remedies;

(v) Audit, Access to Records;

(vi) Covenant Against Contingent Fees;

(vii) Gratuities;

(viii) Responsibility of the Contractor; and

(ix) Final Payment.

(j) *Subcontracting.* A contractor must comply with the following provisions in its award of subcontracts (these requirements do not apply to subcontractors for the supply of materials to produce equipment, materials, and subcontracts for catalog, off-the-shelf, or manufactured items.):

(1) Section 35.4066(b) Documentation;

(2) Section 35.4066(c) Cost;

(3) Section 35.4066(d) Debarment;

(4) Section 35.4066(f) Responsible contractor;

(5) Section 35.4066(g) Disadvantaged business enterprises;

(6) Section 35.4066(i) Illegal contracts; and

(7) Section 35.4066(j) Contract provisions.

(k) *Bid protests.* The recipient must establish a procedure for resolving protests which complies with the provisions of 40 CFR part 33, Subpart G— Protests.

(l) *Competitive procurements.* Recipients shall not divide any procurements into smaller parts to get under any dollar limit.

(1) If the aggregate amount of the purchase is $1,000 or less, the recipient may make the purchase as long as the recipient determines that the price is reasonable. No oral or written solicitations are necessary.

(2) If the aggregate amount of the proposed contract is over $1,000 but less than $25,000, the recipient must obtain and document oral or written price quotations from two or more qualified sources.

(3) If the aggregate amount of the proposed contract is $25,000 to $50,000, the recipient must:

(i) Solicit written bids from three or more sources who are willing and able to do the work;

(ii) Provide potential sources the scope of the work to be performed and the criteria the recipient will use to evaluate bids;

(iii) Objectively evaluate all bids submitted; and

(iv) Notify all unsuccessful bidders.

(4) If the aggregate amount of the proposed contract is greater than

$50,000, the recipient must follow the procurement rules in 40 CFR part 33.

(m) *Non-competitive procurements.* If an adequate number of potential sources cannot be identified, the recipient may request written authority from the EPA Award Official to award a contract to a sole bidder.

§ 35.4067 Contract review.

Each applicant must inform EPA of any proposed contract over $1000 and must provide EPA the opportunity to review the contract before it is awarded or amended.

§ 35.4070 Sanctions.

If EPA determines that the recipient has failed to comply with any terms of the grant agreement, EPA will initiate an appropriate measure as set forth at 40 CFR part 30, subpart I.

§ 35.4075 Pre-award costs.

(a) Grant funds may not be used to pay costs incurred prior to award of the TAG, except as provided in paragraph (b) of this section.

(b) Necessary and reasonable costs of incorporation, if incurred for the sole purpose of complying with this subpart, will be eligible pre-award costs and may be charged to the TAG or count toward the matching funds requirement described in § 35.4085(a)(2).

§ 35.4080 Method of payment.

All grant recipients shall be reimbursed for grant-related eligible, allocable, allowable, and reasonable costs up to the amount of the TAG which have been incurred and which the recipients are currently and legally obligated to pay. Recipients may submit monthly or quarterly requests for reimbursement to the Agency on SF–270—Request for Advance or Reimbursement, or the appropriate State form if the State is administering the TAG Program. Costs incurred greater than $500 may be submitted monthly.

§ 35.4085 Grant limitations.

TAGs will be awarded subject to the following limitations:

(a) The recipient must contribute 20 percent of the total costs of the TAG project, except as provided in § 35.4090(b).

(1) Absent specific statutory authority, no Federal funds may be included in the matching share.

(2) To meet the matching funds requirement, the recipient may use cash and/or in-kind contributions.

(b) The TAG award will not initially exceed $50,000 for a single recipient, except in the case of a single application covering multiple sites.

(c) Not more than one TAG may be awarded for any site.

(d) Administrative costs of the grant may not exceed 20 percent of project costs. Administrative costs may include, but are not limited to, paying an individual(s) to administer the grant.

§ 35.4090 Waivers.

(a) Waivers of the $50,000 per recipient limit may be granted under either or both of the following circumstances:

(1) *Multiple sites.* In order to reduce the administrative burden to a recipient group where there are several eligible sites geographically close to each other, the limitation that a single recipient may not receive more than $50,000 may be waived by the Agency (e.g., 3 sites x $50,000 = grant of $150,000).

(2) *Complex sites.* The Award Official may waive the $50,000 per recipient limit if the recipient group demonstrates that the site is especially complex and that the following criteria have been met:

(i) Site(s) characteristics indicate that due to the nature or volume of the site-related information for review, additional funds are necessary;

(ii) The recipient's management of any previous TAG award(s) was satisfactory and that costs incurred under the previous award are allowable and reasonable; and

(iii) No recipient group may receive more than $100,000 in TAG awards for any one site.

(b) Waivers of the Matching Funds Requirement. The Award Official may waive all or part of the recipient's matching funds requirement only after establishing that:

(1) There is a need for a waiver because providing the "match" would constitute an unusual financial hardship;

(2) A good faith effort at raising the "match," including obtaining in kind services, has failed; and

(3) The waiver is necessary to facilitate public participation in the selection of remedial action at the facility.

(c) Where a TAG recipient subsequently obtains a waiver of the matching funds requirement, the grant agreement must be amended. (See 40 CFR part 30, subpart G.)

(d) No waivers of the matching funds requirement will be granted by the Agency once the Record of Decision has been issued at the last operable unit at the site.

§ 35.4100 Disputes.

(a) If the Agency administers the TAG Program, the Agency shall review disputes between Agency officials and the applicant or recipient in accordance with its dispute resolution procedures set forth at 40 CFR part 30, subpart L.

(b) If the State administers the TAG Program, any applicant or recipient who has been adversely affected by a State's action or omission may request Agency review of such action or omission, but must first submit a petition for review to the State agency that made the initial decision. The State must provide, in writing, normally within 45 days of the date it receives the petition, the basis for its decision regarding the disputed action or omission. The final State decision must be labeled as such and, if adverse to the applicant or recipient, must include notice of the right to request Agency review of the State decision under this section. A State's failure to address the disputed action or omission in a timely fashion, or in writing, will not preclude Agency review.

(1) Requests for Agency review must include:

(i) A copy of any written State decision;

(ii) A statement of the amount in dispute;

(iii) A description of the issues involved; and

(iv) A concise statement of the objections to the State decision.

(2) The request must be filed by registered mail, return receipt requested, within 30 days of the date of the State decision or within a reasonable time if the State fails to respond in writing to the request for review.

(c) The Agency shall determine whether the State's review is comparable to a Dispute Decision Official's (DDO) review pursuant to 40 CFR part 30, subpart L. If the State's review is comparable, the Regional Administrator will conduct the Agency's review of the State's decision. If the State's review is not comparable, an Agency DDO will review the State's decision and issue a written decision. If the Agency DDO issues a decision, the applicant or recipient may request a Regional Administrator's review of the decision. The applicant or recipient may request an EPA Assistant Administrator review of a Regional Administrator's decision pursuant to subpart L.

§ 35.4105 Record retention and audits.

(a) *Records and audit-recipient.*(1) Each recipient shall keep and preserve full written financial records accurately disclosing the amount and the disposition of any funds, whether in cash or in-kind, applied to the TAG project, and shall comply with the terms and conditions of the grant agreement.

(2) Such records shall be retained for ten (10) years from the date of the final Financial Status Report, or until any audit, litigation, cost–recovery, and/or any disputes initiated before the end of the 10-year retention period are settled, whichever is longer. A recipient must obtain EPA's prior written approval to destroy records after the record retention period.

(3) Recipients must comply with OMB Circular A–133 "Audits of Institutions of Higher Education and Other Non-profit Organizations," for all grants over $25,000.

(b) *Records and audit-contractor(s).*(1) The recipient shall require its contractor(s) to keep and preserve detailed records in connection with the contract, reflecting acquisitions, work progress, reports, expenditures, and commitments and indicating their relationship to established costs and schedules.

(2) Contractors must retain records for a period of 10 years after the termination or end of the contract.

(Approved by the Office of Management and Budget under control number 2030–0020)

§ 35.4110 Reports.

(a) *Progress reports.* Each recipient shall submit quarterly progress reports to EPA for the TAG project 45 days after the end of each calendar quarter. Progress reports shall fully describe in chart or narrative format the progress achieved in relationship to the approved schedule, budget, and the TAG project milestones. Special problems encountered must be explained.

(b) *Financial status report.* Each recipient shall submit to EPA a financial status report annually, within 90 days after the anniversary date of the start of the TAG project, and within 90 days after the end of the grant budget period and project. A recipient shall submit to the EPA a financial status report on SF–269 or on the appropriate State form if the State is administering the TAG Program.

(c) *Final report.* Each recipient shall submit to EPA a draft of the final report for review no later than 90 days prior to the end of the TAG project and a final report within 90 days of the end of the project. The report shall document TAG project activities over the entire period of grant support and shall describe the recipient's achievements with respect to stated TAG project purposes and objectives.

(Approved by the Office of Management and Budget under control number 2030–0020)

§ 35.4115 Availability of information.

Each recipient shall ensure that all final written products developed by a contractor for the recipient under its grant are disseminated by providing copies of such documents to EPA for the local Superfund information repository(ies).

§ 35.4120 Budget period.

The budget period may not exceed three years. A TAG project period may be comprised of more than one three-year budget period.

§ 35.4125 Federal facilities.

EPA will use the criteria found in § 35.4025 in evaluating the eligibility of any group of individuals who may be affected by a release or a threatened release at a Federal facility for a TAG under this subpart.

§ 35.4130 Conflict of interest and disclosure requirements.

(a) The recipient shall require each prospective contractor on any contract to provide, with its bid or proposal:

(1) Information on its financial and business relationship with all PRPs at the site, and with their parent companies, subsidiaries, affiliates, subcontractors, contractors, and current clients or attorneys and agents. This disclosure requirement encompasses past and anticipated financial and business relationships, including services related to any proposed or pending litigation, with such parties;

(2) Certification that, to the best of its knowledge and belief, it has disclosed such information or no such information exists; and

(3) A statement that it shall disclose immediately any such information discovered after submission of its bid or after award. The recipient shall evaluate such information and shall exclude any prospective contractor if the recipient determines the prospective contractor's conflict of interest is significant and cannot be avoided or otherwise resolved.

(b) Contractors and subcontractors may not be Technical Advisors to recipient groups at the same NPL site for which they are doing work for the Federal or State government or any other entity.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6944

[OR–943–4214–10; GP2–298; OR–47552]

Withdrawal of National Forest System Land for Granite Chinese Walls Historic Site; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order withdraws 43.75 acres of National Forest System land in the Whitman National Forest from mining for a period of 20 years for protection of the Granite Chinese Walls Historic Site. The land has been and will remain open to such forms of disposition as may by law be made of National Forest System land and to mineral leasing.

EFFECTIVE DATE: October 1, 1992.

FOR FURTHER INFORMATION CONTACT: Donna Kauffman, BLM Oregon State Office, P.O. Box 2965, Portland, Oregon 97208–2965, 503–280–7162.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714 (1988), it is ordered as follows:

1. Subject to valid existing rights, the following described National Forest System land is hereby withdrawn from location and entry under the United States mining laws (30 U.S.C. ch. 2 (1988)), but not from leasing under the mineral leasing laws, to protect a cultural and historical resource site:

Willamette Meridian

Whitman National Forest

T. 8 S., R. 35½E.,
Sec. 34, SE¼SW¼NW¼NW¼, SW¼SE¼NW¼NW¼, W½SE¼SE¼NW¼NW¼, W½E½E½SW¼NW¼, W½E½SW¼NW¼, E½W½SW¼NW¼, W½E½NE¼NW¼SW¼, W½NE¼NW¼SW¼, and E½NW¼NW¼SW¼.

The area described contains 43.75 acres in Grant County.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of National Forest System lands under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

3. This withdrawal will expire 20 years from the effective date of this order unless, as a result of a review conducted before the expiration date pursuant to section 204(f) of the Federal

Land Policy and Management Act of 1976, 43 U.S.C. 1714 (1988), the Secretary determines that the withdrawal shall be extended.

Dated: August 21, 1992.

Dave O'Neal,

Assistant Secretary of the Interior.

BILLING CODE 4310-33-M

43 CFR Public Land Order 6946

[NM-930-4214-10; NMNM 31869]

Revocation of Public Land Order No. 5721; New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order revokes in its entirety a public land order which withdrew approximately 67,000.00 acres of public lands for use in an exchange between the Bureau of Land Management and the Navajo Indian Tribe. Of the lands withdrawn, 57,509.41 acres were patented to the Navajo Tribe of Indians. The remaining lands are no longer needed for the purpose for which they were withdrawn. This action will open 8,477.19 acres of the remaining lands to surface entry and mining, while 330.49 acres in an overlapping withdrawal will remain closed to surface entry, mining, and oil and gas leasing. Of the lands patented to the Navajo Tribe of Indians, 56,709.41 acres, containing federally reserved minerals will be opened to mining. All of the lands, with the exception of the 330.49 acres within the overlapping withdrawal, and 800 acres of lands with no federally reserved mineral interest, have been and remain open to mineral leasing.

EFFECTIVE DATE: November 2, 1992.

FOR FURTHER INFORMATION CONTACT: Clarence F. Hougland, BLM New Mexico State Office, P.O. Box 27115, Santa Fe, New Mexico 87502-7115, 505-438-7400.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714 (1988), it is ordered as follows:

1. Public Land Order No. 5721, which withdrew public lands for use by the Navajo Tribe of Indians in an exchange between the Tribe and the Bureau of Land Management, is hereby revoked in its entirety:

(a) The following described public lands that were not exchanged will return to the administration of the Bureau of Land Management, and will be open to surface entry and mining:

New Mexico Principal Meridian

The areas described aggregate 50,709.41 acres in Sandoval, McKinley, San Juan, and Rio Arriba Counties.

(d) The surface estate of the following described lands was patented to the Navajo Tribe of Indians. The minerals are not federally owned and will not be opened to location and entry:

New Mexico Principal Meridian

T. 17 N., R. 4 W.,
sec. 2, S½.
T. 17 N., R. 6 W.,
sec. 16, SE¼.
T. 18 N., R. 7 W.,
sec. 16, NE¼.
T. 25 N., R. 11 W.,
sec. 32, SE¼.

The areas described aggregate 800 acres in Sandoval, McKinley, and San Juan Counties.

2. All of the lands, with the exception of the lands described in paragraphs 1(b) and 1(d), have been and remain open to mineral leasing.

3. At 9 a.m. on November 2, 1992, the lands described in paragraph 1(a) will be opened to the operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, other segregations of record, and the requirements of applicable law. All valid applications received at or prior to 9 a.m. on November 2, 1992, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

4. At 9 a.m. on November 2, 1992, the lands described in paragraphs 1(a) and 1(c) will be opened to location and entry under the United States mining laws subject to valid existing rights, the provisions of existing withdrawals, other segregations of record, and the requirements of applicable law. Appropriation of any of the lands described in this order under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38 (1988), shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

Dated: September 21, 1992.

Dave O'Neal,

Assistant Secretary of the Interior.

43 CFR Public Land Order 6848

[ID-943-4214-10; IDI-15709A; IDI-0586401]

Partial Revocation of Secretarial Order Dated January 29, 1927, Which Established Powersite Classification No. 166, and Public Land Order No. 1567, Which Established the Forest Service Recreation Area Roadside Zone; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order revokes one Secretarial Order and one Public Land Order insofar as they affect 0.21 acre of National Forest System land withdrawn for the Bureau of Land Management's Powersite Classification No. 166, and a Forest Service Recreation Area Roadside Zone. The land is no longer needed for these purposes, and the revocation is needed to permit disposal of the land through land exchange. This action will open 0.21 acre to surface entry and mining. The land has been and will remain open to mineral leasing.

EFFECTIVE DATE: November 2, 1992.

FOR FURTHER INFORMATION CONTACT: Larry R. Lievsay, BLM Idaho State Office, 3380 Americana Terrace, Boise, Idaho 83706, 208-384-3166.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714 (1988), it is ordered as follows:

1. The Secretarial Order dated January 29, 1927, which established Powersite Classification No. 166, and Public Land Order No. 1567, which established Forest Service Recreation Area Roadside Zones, are hereby revoked insofar as they affect the following described land:

A parcel of land situated in lot 7, Section 4, T. 32 N., R. 6 E., Boise Meridian. Being more particularly described as follows:

Commencing at the NW corner of said lot 7; thence along the West line of lot 7, S. 01°11' E., 645.40 feet to the North right-of-way line of U.S. Highway 12 and the true point of beginning; thence S. 73°45' E., 117.10 feet along the North right-of-way line of U.S. Highway 12; thence leaving said right-of-way line N. 41°25' E., 57.40 feet; thence N. 66°05' W., 167.70 feet; thence S. 01°11' E., 80.90 feet to the point of beginning.

The area described contains 0.21 acre in Idaho County.

2. At 9 a.m. on November 2, 1992, the land shall be opened to such forms of disposition as may by law be made of National Forest System land, including location and entry under the United States mining laws, subject to valid existing rights, the provisions of existing withdrawals, other segregations of record, and the requirements of applicable law. Appropriation of land described in this order under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38 (1988), shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

Dated: September 21, 1992.

Dave O'Neal,

Assistant Secretary of the Interior.

[FR Doc. 92-23775 Filed 9-30-92; 8:45 am]

BILLING CODE 4310-GG-M

ACTION

45 CFR Part 1224

Implementation of the Privacy Act of 1974

AGENCY: ACTION.

ACTION: Final rule.

SUMMARY: On August 11, 1992, ACTION published for notice and comment a proposed rule to exempt a system of records from certain provisions of the Privacy Act of 1974, 5 U.S.C. 552a ("Privacy Act"), to the extent that the system contains investigatory material pertaining to the enforcement of criminal laws or compiled for law enforcement purposes. The system of records to be exempted contains the investigative files of the Office of the Inspector General. (See 57 FR 35775.) ACTION did not receive any comments on the proposed rule. Therefore, ACTION has exempted this system of records from certain provisions of the Privacy Act.

EFFECTIVE DATE: November 16, 1992.

FOR FURTHER INFORMATION CONTACT: Thomas C. Buchanan, Counsel to the Inspector General, ACTION, at (202) 606-4804; or Edward F. Carey, Privacy Act Officer, at (202) 606-5242.

SUPPLEMENTARY INFORMATION: On December 31, 1991, ACTION published a "Notice of Systems of Records" in the **Federal Register** (56 FR 67576). Included in this notice is system number "ACTION-15," the Office of the Inspector General Investigative Files. This system contains investigatory material pertaining to the enforcement of criminal laws and compiled for law enforcement purposes.

ACTION has now exempted this system of records from specified provisions of the Privacy Act. Section (j)(2) of the Privacy Act provides that the head of an agency may promulgate rules to exempt any system of records within the agency from any part of section 552a except subsections (b), (c)(1) and (2), (e)(4)(A) through (F), (e)(6), (7), (9), (10), and (11), and (i), if the system of records is—

maintained by an agency or component thereof which performs as its principal function any activity pertaining to the enforcement of criminal laws * * * and which consists of (A) Information compiled for the purpose of identifying individual criminal offenders and alleged offenders and consisting only of identifying data and notations of arrests, the nature and disposition of criminal charges, sentencing, confinement, release, and parole and probation status; (B) information compiled for the purpose of a criminal investigation, including reports of informants and investigators, and associated with an identifiable individual; or (C) reports identifiable to an individual compiled at any stage of the process of enforcement of the criminal laws from arrest or indictment through release from supervision.

Section (k)(2) of the Privacy Act provides that the head of an agency may promulgate rules to exempt any system of records within the agency from sections 552a (c)(3), (d), (e)(1), (e)(4) (G) through (I), and (f), if the system of records is "investigatory material compiled for law enforcement purposes."

If a system of records is not exempted from these sections, the Privacy Act generally requires the agency to: Account for disclosures; permit individuals access to their records; permit individuals to request amendment to their records; collect information directly from the subject individual; publish information in the **Federal Register** about access to records; and promulgate rules that establish procedures for notice and disclosure of records. The exemptions that may be asserted with respect to investigatory systems of records permit an agency to protect information when disclosure would interfere with the conduct of the agency's investigations.

The Office of the Inspector General Investigative Files contain information of the type described in the above mentioned exemptions to the Privacy Act. The Inspector General Act of 1978, as amended, 5 U.S.C. app. 3, authorizes the Inspector General of ACTION to conduct investigations to detect fraud and abuse in the programs and operations of ACTION and to assist in the prosecution of participants in such fraud or abuse. The Office of the Inspector General of ACTION maintains information in this system of records pursuant to its law enforcement and criminal investigation functions. Exemptions under section 552a (j)(2) and (k)(2) are necessary to maintain the integrity and confidentiality of the investigative files and to protect individuals from harm. Disclosure of information in these investigatory files or disclosure of the identity of confidential sources would seriously undermine the effectiveness of the Inspector General's investigations. Knowledge of such investigations also could enable subjects of the investigation to take action to prevent detection of criminal activities, conceal or destroy evidence, or escape prosecution. Disclosure of this information could lead to intimidation of, or harm to, informants, witnesses, investigative personnel, or their families. The imposition of certain restrictions on the manner in which information is collected, verified, or retained could significantly impede the effectiveness of the investigations of the Office of the Inspector General and could preclude the apprehension and successful prosecution of persons engaged in fraud or criminal activity.

Section 1224.1-14 of the ACTION regulations (45 CFR part 1224) previously was promulgated to exempt various investigatory records from certain requirements of the Privacy Act. In connection with the establishment of the system of records containing the Office of the Inspector General Investigative Files, ACTION has amended part 1224 by adding a new section, 45 CFR 1224.1-19, Inspector General Exemptions, pursuant to section 552a (j)(2) and (k)(2) of the Privacy Act.

Pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), the Director of ACTION certifies that the amendments to part 1224 will not have a significant impact on a substantial number of small entities. The

Director further finds that the proposed rule is not a "major rule" under Executive Order No. 12291 since it will not have an annual effect on the economy of $100 million or more.

List of Subjects in 45 CFR Part 1224

Privacy, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, chapter XII, subtitle B, title 45, Code of Federal Regulations, is amended as follows:

PART 1224—IMPLEMENTATION OF THE PRIVACY ACT OF 1974

1. The authority citation for part 1224 continues to read as follows:

Authority: Public Law 93–579, 5 U.S.C. 552a.

2. Section 1224.1–19 is added to read as follows:

§ 1224.1–19 Inspector General exemptions.

Pursuant to sections (j) and (k) of the Privacy Act of 1974, ACTION has promulgated the following exemptions to specified provisions of the Privacy Act:

(a) Pursuant to, and limited by, 5 U.S.C. 552a(j)(2), the system of records maintained by the Office of the Inspector General of ACTION that contains the Investigative Files shall be exempted from the provisions of 5 U.S.C. 552a, except subsections (b), (c) (1) and (2), (e)(4) (A) through (F), (e) (6), (7), (9), (10), and (11), and (i), and 45 CFR 1224.1–12, 1224.1–13, 1224.1–15, 1224.1–16, 1224.1–17, and 1224.1–18, insofar as the system contains information pertaining to criminal law enforcement investigations.

(b) Pursuant to, and limited by, 5 U.S.C. 552a(k)(2), the system of records maintained by the Office of the Inspector General of ACTION that contains the Investigative Files shall be exempted from 5 U.S.C. 552a (c)(3), (d), (e)(1), (e)(4) (G), (H), and (I), and (f), and 45 CFR 1224.1–12, 1224.1–13, 1224.1–15, 1224.1–16, 1224.1–17, and 1224.1–18, insofar as it contains investigatory materials compiled for law enforcement purposes.

Dated: September 24, 1992.

Jane A. Kenny,

Director, ACTION.

BILLING CODE 6050–28

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 214

[FRA Docket No. ROS–2, Notice No. 3]

RIN 2130–AA48

Bridge Worker Safety Rules

AGENCY: Federal Railroad Administration (FRA), DOT.

ACTION: Suspension of sections on fall protection.

SUMMARY: On June 24, 1992, FRA published regulations on safety standards for the protection of those who work on railroad bridges (49 CFR part 214). On July 2, 1992 (57 FR 25561), the effective date was corrected to July 24, 1992, and on July 9, 1992 (57 FR 30429) FRA changed the effective date to August 24, 1992. FRA is suspending 49 CFR 214.103 and 49 CFR 214.105 until November 24, 1992. The effective date of all other sections of 49 CFR part 214 remains August 24, 1992.

EFFECTIVE DATES: Part 214, which was published at 57 FR 28116, was effective on August 24, 1992. Effective September 28, 1992, 49 CFR 214.103 and 214.105 are suspended until November 24, 1992.

ADDRESSES: Any petition for reconsideration should be submitted to the Docket Clerk, Office of Chief Counsel, FRA, 400 Seventh Street SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Edward R. English, Director, Office of Safety Enforcement, Office of Safety, FRA, 400 Seventh Street, SW., Washington DC 20590 (Telephone: 202–366–9252), or Christine Beyer, Trial Attorney, Office of Chief Counsel, FRA, 400 Seventh Street SW., Washington, DC 20590 (Telephone: 202–366–0443).

SUPPLEMENTARY INFORMATION: On August 12, 1992, the Association of American Railroads (AAR) filed a Petition for an Extension of Time of the Effective Date of the Bridge Worker Safety Rules, 49 CFR part 214. In that Petition, the AAR states that an extension of the effective date for implementation of the bridge worker standards from August 24, 1992 to January 1, 1993 is necessary in order to provide the railroads sufficient time to purchase fall protection equipment and train employees on its use. The AAR states that the bridge standards promulgated by the Federal Railroad Administration (FRA) on June 24, 1992 (57 FR 28116) require the use of fall protection in situations where equipment was not used previously, and that the new equipment could not be furnished by suppliers prior to the effective date or with sufficient time to allow for necessary training of employees. In support of this, the AAR submitted affidavits from the Atchison, Topeka & Santa Fe Railway Company and Burlington Northern Railroad.

AAR's Petition requests a delay in the effective date for all sections of the Bridge Worker Safety Rule, but the evidence supplied concerning unavailability of equipment and training time relate only to those sections involving fall protection, 49 CFR 214.103 and 214.105. Therefore, the request to delay the effective date of the entire rule is denied. Sections 214.1 through 214.101 and sections 214.107 through 214.117 remain in effect as of August 24, 1992.

Based on information received from the AAR, however, FRA has determined that in the interest of employee safety the sections of the rule that relate specifically to fall protection, §§ 214.103 and 214.105, must be suspended. This suspension is provided so that the railroads can complete a comprehensive acquisition, implementation, and training program that will meet the requirements of the rule, and ultimately ensure a safe workplace for bridge workers. Class 1 railroads such as CSX Transportation, Inc., Union Pacific Railroad company, and Southern Pacific Transportation Company were fully prepared to meet all requirements of the rule on its effective date, August 24, 1992. In addition, many Class 2 and 3 railroads were in compliance on that date. However the AAR has submitted information indicating that many Class 1 railroads, including Burlington Northern Railroad, Consolidated Rail Corporation, Norfolk Southern Railway Company, Atchison, Topeka & Santa Fe Railway Company, and Illinois Central Railroad Company have been unable to acquire a sufficient number of body harnesses and lifeline systems to fully equip their track employees who perform work on railroad bridges.

In addition, the AAR states that the railroads have not had ample time to complete a training program for bridge and track employees on proper use of the new equipment. While FRA believes that a diligent effort by all railroads to meet the requirements of the new rule would have resulted in a suitable supply of complying fall protection devices, the sixty days that elapsed between publication and implementation of the rule now appears to have been an insufficient amount of time to train adequately the track and bridge workers who must use the required equipment. In particular, many track employees will be using fall protection systems for the

first time, and must be provided a comprehensive training program to ensure their safety. Therefore, this suspension is granted so that all railroads complete such a program for their employees. Although sections 214.103 and 214.105 are suspended until November 24, 1992, FRA intends to actively monitor the railroads' progress toward full compliance with the requirements of 49 CFR part 214 during this acquisition, implementation, and training period.

Finally, because regulations promulgated by the Occupational Safety and Health Administration (OSHA) applied to railroad bridge workers until the effective date of FRA's new bridge worker standards, OSHA's standards that address fall protection systems specifically shall now remain in effect until November 24, 1992.

Due to potential employee safety hazards and the need for a prompt response to the AAR's Petition to Extend Time, FRA has determined that notice and comment on this issue would be impractical, unnecessary, and contrary to the public interest. The parties directly affected by the extension, the railroad industry and the Brotherhood of Maintenance-of-Way Employees, have been apprised of the request and given an opportunity to comment.

Regulatory Impact

E.O. 12291 and DOT Regulatory Policies and Procedures

This change to the final rule has been evaluated in accordance with existing policies and procedures and is considered to be nonmajor under Executive Order 12291. However, it is considered to be significant under DOT policies and procedures (44 FR 11304) because it is part of a substantial regulatory program.

The suspension relates to only two sections of the final rule, and those sections, governed by the regulations of the Occupational Safety and Health Administration (OSHA) prior to issuance of FRA's bridge worker standards, will continue to be governed by OSHA until the new effective date. Therefore, there are no new costs associated with this suspension.

Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires a review of rules to assess their impact on small entities. This suspension of two sections of the final rule results in a continuation of authority of the existing OSHA regulations, and will have no new direct or indirect economic impact on small units of government, businesses, or other organizations. Therefore, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the provisions of the Regulatory Flexibility Act.

Paperwork Reduction Act

There are no paperwork requirements associated with this suspension.

Environmental Impact

FRA has evaluated this suspension in accordance with its procedures for ensuring full consideration of the environmental impact of FRA actions, as required by the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*), other environmental statutes, Executive Orders, and DOT Order 5610.1c. This suspension meets criteria establishing this as a nonmajor action for environmental purposes.

Federalism Implications

This suspension will not have a substantial effect on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with Executive Order 12612, preparation of a Federalism Assessment is not warranted.

Therefore, effective September 28, 1992, 49 CFR 214.103 and 214.105 are suspended until November 24, 1992.

Issued this 28th day of September 1992.

Gilbert E. Carmichael,

Administrator.

BILLING CODE 4910-06-M

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 81-2; Notice 13]

RIN 2127-AD35

Federal Motor Vehicle Safety Standards Lamps, Reflective Devices, and Associated Equipment

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Change of effective date for adding previously adopted amendments to the Code of Federal Regulations (CFR).

SUMMARY: This document changes the date when amendments to Standard No. 108 published on April 19, 1991, will be added to the text of that standard as it appears in the CFR, from September 1, 1993, to October 1, 1992. There is no substantive effect of this change as the paragraphs containing substantive requirements for center high-mounted stop lamps (CHMSL) on vehicles other than passenger cars retain the originally stated date of September 1, 1993, for mandatory compliance with the CHMSL requirements. The change has the effect of making immediately effective the redesignation of certain paragraphs of the standard. This action is taken pursuant to a comment submitted in an unrelated rulemaking.

EFFECTIVE DATE: The effective date of the amendment to 49 CFR part 571 published in FR Doc 91-9220 on April 19, 1991 (56 FR 16105) is changed from September 1, 1993, to October 1, 1992.

FOR FURTHER INFORMATION CONTACT: Patrick Boyd, Office of Rulemaking (202-366-6436).

SUPPLEMENTARY INFORMATION: This notice resolves a conflict that has arisen between a final rule amending Federal Motor Vehicle Safety Standard No. 108, *Lamps, Reflective Devices, and Associated Equipment*, and a notice of proposed rulemaking (NPRM).

On April 19, 1991, NHTSA issued a final rule (56 FR 16020) that had the following effects. Paragraph S5.1.1.27 was revised to require motor vehicles other than passenger cars "manufactured on and after September 1, 1993" to be equipped with high-mounted stop lamps. Paragraphs S5.1.1.28, S5.1.1.29, S5.1.1.30 and S5.1.1.31 were redesignated respectively as paragraphs S5.1.1.29, S5.1.1.30, S5.1.1.31, and S5.1.1.32. New paragraph S5.1.1.28 was added to permit vehicles other than passenger cars "manufactured between September 1, 1992, and September 1, 1993" to be voluntarily equipped in accordance with S5.1.1.27 and S5.3.1.8, also revised by the final rule. Finally, Tables III and IV were revised to reflect the applicability and location requirements for center high-mounted stop lamps on vehicles other than passenger cars. The notice gave the overall effective date of the final rule as September 1, 1993. The amendments were published at pages 320-21, following the current text of Standard No. 108, in "Title 49 Code of Federal Regulations parts 400 to 999 Revised as of October 1, 1991."

On July 8, 1992, NHTSA published a notice of proposed rulemaking (NPRM) (57 FR 30189) regarding the marking of sealed beam headlamps which also proposed to transfer paragraphs of S5.1.1 relating to replacement equipment to paragraph S5.7 *Replacement*

Equipment. Under the NPRM, redesignation of many of the remaining paragraphs of S5.1.1 was also proposed. However, the proposal was made with reference to Standard No. 108 as it remains in effect until September 1, 1993, and did not take into account the amendments which become effective that day. Ford Motor Company, in commenting on the NPRM, related it to the standard as amended by the April 1991 notice, instead of the standard as it currently appears in the CFR, and found certain apparent errors and inconsistencies.

In formulating the final rule on the NPRM, NHTSA is faced with two choices. The first is based on the standard as it currently appears in the CFR. If the agency took this approach, it would issue the final rule with the redesignations as proposed in July 1992, (which would only be in effect until September 1, 1993), relating Ford's comments to the extent possible. At the same time, the agency would amend the redesignations that are scheduled to become effective on September 1, 1993. The second choice is based on the standard as amended by the April 1991 final rule. Under this approach, the agency would accelerate the 1993 effective date for adding the 1991 amendments to the CFR so that the final rule on headlamp markings can adopt a definitive redesignation of paragraphs without further amendments. The agency has chosen this alternative course.

Accelerating the effective date for adding the April 1991 amendments to the CFR results in no substantive burden. No compliance date or text is changed. The mandatory CHMSL provisions of paragraph S5.1.1.27, by their own terms, will still not come into effect for vehicles other than passenger cars until September 1, 1993. The optional CHMSL compliance provisions in Paragraph S5.1.1.28, by their own terms, are still effective only between September 1, 1992, and September 1, 1993. There is no substantive reason why the redesignation of paragraphs of S5.1.1, and the changes to Tables III and IV cannot be made effective immediately. NHTSA also notes that such an amendment with an effective date of October 1, 1992 for adding the amendments to the text of the standard in the CFR, will allow publication of the most current version of Standard No. 108 in the next volume of 49 CFR parts 400–999 revised as of October 1, 1992. The clarity that this will afford is in the public interest.

Accordingly, for the reasons stated above, NHTSA finds that prior notice and an opportunity for comment are not required for this change, and that an effective date of October 1, 1992 for adding the amendments to 49 CFR 571.108 Motor Vehicle Safety Standard No. 108, published on April 19, 1991, to the CFR is in the public interest. The effective date for adding the amendments of April 19, 1991, to the CFR is changed from September 1, 1993, to October 1, 1992.

Authority: 15 U.S.C. 1392, 1407; delegation of authority at 49 CFR 1.50.

Issued on: September 28, 1992.

Marion C. Blakey,

Administrator.

BILLING CODE 4910–59–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AB56

Endangered and Threatened Wildlife and Plants; Determination of Threatened Status for the Washington, Oregon, and California Population of the Marbled Murrelet

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service) determines the Washington, Oregon, and California population of the marbled murrelet (*Brachyramphus marmoratus marmoratus*) to be a threatened species pursuant to the Endangered Species Act of 1973, as amended (Act) (16 U.S.C. 1531 et seq.). The marbled murrelet is threatened by the loss and modification of nesting habitat (older forests) primarily due to commercial timber harvesting. It is also threatened from mortality associated with current gill-net fishing operations off the Washington coast and the effects of oil spills. This rule extends the Act's protection to the marbled murrelet in Washington, Oregon, and California. Pursuant to an order of the United States District Court, Western District of Washington at Seattle, dated September 15, 1992, this listing takes effect immediately.

EFFECTIVE DATE: September 28, 1992.

ADDRESSES: The complete file for this rule is available for public inspection, by appointment, during normal business hours at the U.S. Fish and Wildlife Service, Portland Field Office, 2600 SE. 98th Avenue, suite 100, Portland, Oregon 97266.

FOR FURTHER INFORMATION CONTACT: Mr. Russell D. Peterson, Field Supervisor, at the above address (503/231–6179).

SUPPLEMENTARY INFORMATION:

Background

Biological Considerations

The marbled murrelet (*Brachyramphus marmoratus*) is a small seabird of the Alcidae family. It was first described in 1789 by Gmelin as *Colymbus marmoratus*, but in 1837 Brandt placed it under the genus *Brachyramphus* (American Ornithologists' Union 1983). The North American subspecies (*B. m. marmoratus*) ranges from the Aleutian Archipelago in Alaska, eastward to Cook Inlet, Kodiak Island, Kenai Peninsula, and Prince William Sound, southward coastally throughout the Alexander Archipelago of Alaska, and through British Columbia, Washington, Oregon, to central California. Some wintering birds are found in southern California. A separate subspecies (*B. m. perdix*) is present in Asia.

Marbled murrelets feed primarily on fish and invertebrates in near-shore marine waters. The majority of marbled murrelets are found within or adjacent to the marine environment, although there have been detections of marbled murrelets on rivers and inland lakes (Carter and Sealy 1986). Marbled murrelets spend the majority of their lives on the ocean, and come inland to nest, although they visit some inland stands during all months of the year. Marbled murrelets have been recorded up to 80 kilometers (50 miles) inland in Washington (Hamer and Cummins 1991), 56 kilometers (35 miles) inland in Oregon (Nelson 1990), 37 kilometers (22 miles) inland in northern California (Carter and Erickson 1988, Paton and Ralph 1990), and 18 kilometers (11 miles) inland in central California (Paton and Ralph 1990). However, marbled murrelets are not evenly distributed from the coast to the maximum inland distances, with higher detections being recorded closer to the coast. Hamer and Cummins (1991) found that over 90 percent of all observations were within 60 kilometers (37 miles) of the coast in the northern Washington Cascades. In Oregon, marbled murrelets are observed most often within 20 kilometers (12 miles) of the ocean (Nelson 1990).

Marbled murrelets are semi-colonial in their nesting habits, and simultaneous detections of more than one bird are frequently made at inland sites. Nesting marbled murrelets are often aggregated; for example, two nests discovered in

Washington in 1990 were located only 46 meters (150 feet) apart (Hamer and Cummins 1990).

Marbled murrelets do not reach sexual maturity until their second year. Like other alcids, adult marbled murrelets produce 1 egg per nest. Alcids typically have a variable (not all adults may nest every year) reproductive rate, and marbled murrelets exhibit this same trend. Adult/juvenile ratios from counts along the central Oregon coast indicated a recruitment rate of less than 2 percent per year over the past 4 years (1988–1991) (Nelson, *in litt.*, 1992).

Adult marbled murrelets lay one egg on the limb of an old-growth conifer tree. Nesting occurs over an extended period from mid-April to late September (Carter and Sealy 1987). Incubation lasts about 30 days and fledging takes another 28 days (Hirsch *et al.* 1981, Simons 1980). Both sexes incubate the egg in alternating 24-hour shifts (Simons 1980, Singer *et al.* 1991). Flights by adults are made from ocean feeding areas to inland nest sites most often at dusk and dawn (Hamer and Cummins 1991). The adults feed the chick at least once per day, carrying one fish at a time (Carter and Sealy 1987; Hamer and Cummins 1991; Singer *et al.* 1992; Nelson, OR Coop. Wildl. Res. Unit, pers. comm., 1992). The young are altricial, and remain in the nest longer than young of most other alcids. Before leaving the nest, the young molt into a distinctive juvenile plumage. Fledglings appear to fly directly from the nest to the sea, rather than exploring the forest environment first (Hamer and Cummins 1991).

In California, Oregon, and Washington marbled murrelets use older forest stands near the coastline for nesting. These forests are generally characterized by large trees (> 80 centimeters (32 inches) dbh), multi-storied stand, and a moderate to high canopy closure. In certain parts of the range, marbled murrelets are also known to use mature forests with an old-growth component. Trees must have large branches or deformities for nest platforms (Binford *et al.* 1975; Carter and Sealy 1987; Hamer and Cummins 1990, 1991; Singer *et al.* 1991, 1992; Nelson, *in litt.*, 1991). Marbled murrelets tend to nest in the oldest trees in the stand.

Twenty-three tree nests have been located in North America; five in Washington, seven in Oregon, four in California, two in British Columbia, and five in Alaska (Binford *et al.* 1975; Quinlan and Hughes 1990; Hamer and Cummins 1990, 1991; Kuletz 1991; Singer *et al.* 1991, 1992; Nelson *et al.*, unpubl. data). All 16 of the nests found in Washington, Oregon, and California were located in old-growth trees that ranged in diameter at breast height (dbh) from 88 centimeters (35 inches) to 533 centimeters (210 inches) with a mean of 203 centimeters (80 inches). Nests were located high above ground and usually had good overhead protection; such locations would allow easy access to the exterior of the forest. Nest sites were located in stands dominated by Douglas-fir (*Pseudotsuga menziesii*) in Oregon and Washington, and in old-growth redwood (*Sequoia sempervirens*) stands in California. Nests were mostly placed in older Douglas-fir trees within these stands.

It is difficult to locate individual nests for a species that may only show activity near its nest one time per day, and may do so under low light conditions. Therefore, occupied sites or suitable habitat become the most important parameters to consider when evaluating its status. Active nests, egg shell fragments or young found on the forest floor, birds seen flying through the forest beneath the canopy, birds seen landing, or birds heard calling from a stationary perch are all strong indicators of occupied habitat. Biologists have documented 154 occupied sites in the Oregon Coast Ranges, all in old-growth forests or mature forest stands with an old-growth component.

Marbled murrelets more commonly occupy old-growth forests compared to mixed-age and young forests in California, Oregon, and Washington. In California, the species is restricted to old-growth redwood forests in Del Norte, Humboldt, San Mateo, and Santa Cruz Counties (Paton and Ralph 1988). In surveys of mature and second-growth forests of California, marbled murrelets were only found in these forests where there was nearby old-growth, or where residual older trees remained; murrelets were absent from 80 percent of the second-growth forests examined (Ralph *et al.* 1990). In northwest Washington, marbled murrelets are mostly found at old-growth/mature sites (Hamer and Cummins 1990). In Oregon, marbled murrelets occupy stands dominated by larger trees (averaging greater than or equal to 82 centimeters (32 inches) dbh) more often (statistically significant) than those dominated by smaller trees (Nelson 1990).

Stand size is also an important factor for marbled murrelets. These birds more commonly occupy larger stands (greater than 202 hectares (500 acres)) than smaller stands (less than 40 hectares (100 acres)) in California; marbled murrelets are usually absent from stands less than 24 hectares (60 acres) in size (Paton and Ralph 1988, Ralph *et al.* 1990). Marbled murrelets generally do not occur in isolated stands of coastal old-growth forest in California (CDFG, *in litt.*, 1992). In Washington, marbled murrelets are found more often when the percent of available old-growth/mature forests makes up over 30 percent of the landscape. Similarly, fewer murrelets are found when clearcut/meadow areas make up more than 25 percent of the landscape (Hamer and Cummins 1990). Nelson (1990) found that a statistically significant lower number of detections were noted in the highly fragmented Oregon Coast Range, compared to detection rates documented by Paton and Ralph (1988) in a less fragmented area in northern California.

Concentrations of marbled murrelets offshore are almost always adjacent to older forests on-shore. Nelson (1990) and Ralph *et al.* (1990) found marbled murrelets were absent offshore where on-shore older forests were absent. Large geographic gaps in offshore marbled murrelet numbers occur in areas such as that between central and northern California (a distance of 480 kilometers (300 miles)), and between Tillamook County, Oregon, and the Olympic Peninsula (a distance of about 190 kilometers (120 miles)), where nearly all older forest has been removed near the coast. Small rafts of marbled murrelets may be found associated with remaining insolated stands of older forests (e.g., the Nemah site). Historically, records for California indicate that marbled murrelets were found "regularly" and were "plentiful" along the coast from Monterey County north to the Oregon border (Grinnell and Miller 1944; Paton and Ralph 1988). Historical records of marbled murrelets also showed significant numbers during the nesting season near the mouth of the Columbia River in Clatsop County, Oregon. Marbled murrelets are rarely found in this area, where extensive harvesting of older forests has also occurred (Nelson *et al.*, in press).

Population size for marbled murrelets is most accurately estimated by counting the numbers of birds observed in the marine environment. Washington's breeding population is estimated to be a maximum of 5,000 birds (Speich *et al.*, in press). The current population estimates for Oregon and California are fewer than 1,000 pairs (Nelson *et al.*, in press), and about 2,000 birds (Carter *et al.* 1990), respectively. By extrapolating from known population numbers in relation to the remaining available nesting habitat, it has been estimated that 60,000 marbled murrelets may have been found historically along the coast of California (Larsen 1991).

The principal factor affecting the marbled murrelet in the three-state area, and the main cause of population decline has been the loss of older forests and associated nest sites. Older forests have declined throughout the range of the marbled murrelet as a result of commercial timber harvest, with additional losses from natural causes such as fire and windthrow. Most suitable nesting habitat (old-growth and mature forests) on private lands within the range of the subspecies in Washington, Oregon, and California has been eliminated by timber harvest (Green 1985; Norse 1988; Thomas *et al.* 1990). Remaining tracts of potentially suitable habitat on private lands throughout the range are subject to continuing timber harvest operations (see Factor A). Mortality associated with oil spills and gill-net fisheries (in Washington) are lesser threats adversely affecting the marbled murrelet.

Distinct Population Segment

The Act defines "species" to include any subspecies of fish or wildlife or plants, and any distinct population segment of any species or vertebrate fish or wildlife which interbreeds when mature (16 U.S.C. 1532 (6)). As discussed under Factor D in the Summary of Factors Affecting the Species section of this rule, existing legal mechanisms are not adequate to protect the marbled murrelet in California, Oregon, and Washington. The three states encompass roughly one-third of the geographic area occupied by this subspecies, comprising a significant portion of its range. The amount of nesting habitat has undergone a tremendous decline since the late 1800s (most of which has taken place during the last 20 to 30 years), especially in the coastal areas of all three states.

At the time of proposing to list the marbled murrelet in Washington, Oregon, and California, the Service considered the murrelets in these States to constitute a distinct population segment comprising a significant portion of the eastern Pacific subspecies of the marbled murrelet. While the Service continues to believe that existing legal protection is not adequate to ensure survival of murrelets in the three-state area, some question remains whether the population listed in this rule qualifies for protection under the Act's definition of "species."

Compliance with a court order required a final decision on listing to be made at this time. Based on the information now available to the Service, the only supportable decision that can be reached within the limit imposed by the court is to list the population as proposed. Nevertheless, the Service intends to reexamine the basis of recognizing this population of murrelets as a "species" under the Act. Within 90 days, the Service will announce the results of this examination and at that time may propose a regulatory change that would alter the listing of the murrelet as a threatened species.

Previous Federal Actions

The National Audubon Society submitted a petition to the Service on January 15, 1988, the list the Washington, Oregon, California population of the marbled murrelet as a threatened species. Section 4(b)(3)(A) of the Act requires that, to the maximum extent practicable, within 90 days of receipt of a petition to list, delist, or reclassify a species, a finding be made as to whether substantial information has been presented indicating that the requested action may be warranted. The 90-day finding stating that the petition had presented substantial information to indicate that the requested action may be warranted was published in the **Federal Register** on October 17, 1988 (53 FR 40479). Because of the increased research efforts and the amount of new data available, the status review period was reopened, with the concurrence of the petitioners, from March 5, 1990 through May 31, 1990 (55 FR 4913).

The marbled murrelet has been included in the Service's Notice of Review for vertebrate wildlife as a category 2 candidate species for listing since 1989 (54 FR 554). A category 2 candidate is one for which information contained in Service files indicates that preparation of a proposal to list the species is possibly appropriate but additional data is needed to support a listing proposal. The best available scientific and commercial data were analyzed and evaluated as a result of the status review mentioned above. The review included the pertinent data available from both published and unpublished sources. Unpublished sources included solicited progress and final reports, file data, meeting notes, letters, and personal contact with agencies, organizations, and individuals. These data elevated the marbled murrelet to category 1 candidate status and contributed to the information on which the decision to propose this species for listing was based. A category 1 candidate is one for which the Service has sufficient data in its possession to support a listing proposal. On June 20, 1991, the Service published a proposal to list the marbled murrelet as a threatened species in Washington, Oregon, and California (56 FR 28362). This proposed rule constituted the 12-month finding that the petitioned action was warranted, in accordance with section 4(b)(3)(B) of the Act.

On January 30, 1992, the Service published a notice in the **Federal Register** (57 FR 3804) that reopened the comment period on the proposed listing for 30 days. This action was taken to gather the most updated information on the marbled murrelet. Having considered all the information presented during the comment periods, the Service now determines the marbled murrelet in Washington, Oregon, and California to be a threatened species.

Summary of Comments and Recommendations

In the June 20, 1991, proposed rule (56 FR 28362) and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final decision. The comment period originally closed September 18, 1991. Appropriate state agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. No requests for public hearings were received. On January 30, 1992, the Service published in the **Federal Register** (57 FR 3804) a notice that reopened the comment period for 30 days to solicit additional biological information on the status of the marbled murrelet.

During the comment periods, totaling 120 days, 52 letters on the proposal were received. Five additional comments were received shortly after the official comment period closing dates. Of the 57 comments received, 30 (53 percent) supported the proposal, 8 (14 percent) opposed the proposal, and 19 (33 percent) were neutral. Opposing comments were received from various companies and organizations that are directly or indirectly related to the timber industry, and from individuals who rely on a timber-supported economy. The California Department of Fish and Game (CDFG) and Oregon Department of Fish and Wildlife (ODFW) submitted biological information on the status of the marbled murrelet and supported Federal listing. The Washington Department of Wildlife submitted biological information, but did not state a position on the proposed listing. The Forest Service, Bureau of Land Management (Bureau), and U.S. Department of the Navy presented biological information on the murrelet but did not state positions on the proposed Federal listing. Some of the

commenters submitted additional data that has been incorporated into this rule.

Written comments obtained during the comment periods are combined in the following discussion. Opposing comments and other comments questioning the rule can be placed in a number of general groups, organized around specific issues. These categories of comment, and the Service's response to each are listed below.

Issue 1. Current Regulatory Mechanisms

Comment: Some commenters disagreed with the conclusion that adequate regulatory protection does not exist for the marbled murrelet in California. They stated that the majority of known marbled murrelet habitat in California is located in State or National Parks that is protected from timber harvesting. In addition, the small but significant amount of murrelet habitat found on private timberlands in California is adequately protected through the evaluation and review process conducted by the California Board of Forestry (Board). California environmental statutes provide sufficient protection for the bird in that state.

Another commenter stated that the Service failed to assess the degree to which current regulatory mechanisms will maintain a viable sub-population of marbled murrelets and that land allocations and projected forest conditions described in the Final Forest Service Land Management Plans (Forest Plans) were not analyzed. Through wilderness, critical habitat for the northern spotted owl (*Strix occidentalis caurina*), and other non-timber harvest "set asides," final Forest Plans in Oregon and Washington have left only 18 percent of the original land base that was primarily available for timber production.

Service Response: The Service considered all the existing applicable regulatory mechanisms that deal with timber harvest and marbled murrelets on private, State, and Federal lands in California, Oregon, and Washington. These issues are discussed in the Summary of Factors section, Factor D. The Service concludes that existing management plans pertaining to timber harvest and marbled murrelets are inadequate to ensure the survival of the species. The management direction for the northern spotted owl, in many cases, will not adequately provide for marbled murrelets (see Factor D). Furthermore, Forest Plans are flexible and could be altered in the future, and thus protection afforded to marbled murrelets may be temporary.

Comment: The Siuslaw National Forest's Land and Resource Plan provided adequate protection for the marbled murrelet because the age class inventory of acres that marbled murrelets can utilize increases over time.

Service Response: The Siuslaw National Forest is highly fragmented at present; and it is only a small part of the marbled murrelet's range. The Siuslaw National Forest Plan (USDA 1990) estimates only 6 percent (13,680 hectares (33,800 acres)) of the forested land base remains as older forest. Of this total, 32 percent (4,330 hectares (10,700 acres)) is non-reserved. The Forest Plan estimates that 1,200 hectares (3,000 acres) of the non-reserved old-growth will be harvested during the next 10 years and the remaining within the next 50 years (p. III–3). The Service will continue to work with the Siuslaw National Forest to evaluate the value of the forest for marbled murrelets and encourage actions that are of benefit to the species.

Issue 2. Insufficiency of Scientific Data

Habitat Association

Comment: Several commenters thought that too few nests had been discovered to date to be able to make the assumption that nesting habitat consisted of old-growth and mature forests, and the small set of marbled murrelet nest sites did not provide substantive evidence (with a statistically valid sample size) that the marbled murrelet prefers late stage vegetation in the Pacific States.

Service Response: The Act requires the Service to base its decision upon the best scientific information available. As discussed in the Background section of this rule, nests sites comprise a small part of the information the Service has used to determine habitat preferences and use. A larger sample size of nests would be helpful in providing a more detailed description of nesting habitat and nest site selection. Surveys have been conducted in forests of all age classes; and marbled murrelets do not occupy stands lacking old-growth characteristics. Furthermore, 8 of 10 downy young and 20 of 31 fledglings from throughout the range were located in old-growth coniferous forests, with the remainder being adjacent or near to old-growth forests (Carter and Sealy 1987). Since the publication of the proposed rule, the number of known nests has more than doubled; all nests have been in old-growth trees.

Comment: One commenter stated that surveys in forests in California, Oregon, and Washington suggest, but do not verify, that marbled murrelets require larger areas of old-growth or mature forests for nesting. Also, statements indicating that fragmentation has a negative impact on nesting are not backed by sufficient scientific data.

Service Response: The Service's conclusions regarding the murrelet's preference for old growth, and vulnerability, are based upon numerous studies comparing the findings of marbled murrelets in various stand age classes, sizes, and structure. All studies show a strong affinity/dependence on larger older forest stands. A statistically significant higher rate of marbled murrelet detections has been observed in old-growth forests compared to mixed-age and young forests in California, Oregon, and Washington.

In a few instances murrelets have been found in mature stands, but always in close association with residual older trees. These stands had recovered naturally following a natural disaster. The structural characteristics of the surrounding stand, size and configuration of the timber stand, existing condition of adjacent timber stands, distance to and abundance of a prey source, and density of and vulnerability to predators are all very likely important aspects of marbled murrelet nesting habitat. The marbled murrelet's semi-colonial social structure may dictate some nest site characteristics as well.

Comment: Some commenters stated that attempts to correlate general observations of marbled murrelets along coastlines or bodies of water with adjacent mainland old-growth must not be misconstrued as a cause-and-effect relationship. These aggregations could be the resultant effect of historical groupings, prey base availability, or coastline features such as estuarine environments or topographical features that offer protection from prevailing winds, rather than necessarily being "old growth" driven. Furthermore, the conclusion that widespread timber harvesting may have caused dramatic declines in marbled murrelet populations cannot be considered unequivocal because past populations may have been limited by food availability and/or winter mortality rather than availability of nesting habitat. In addition since we do not know how breeding marbled murrelets were distributed over the forest landscape historically, we cannot know if they are different today.

Service Response: The Service determines species to be endangered or threatened using the best scientific information as the basis for such decisions. The Service agrees that prey

availability probably influences the offshore distribution of marbled murrelets; however, murrelets are absent from some areas where prey species are abundant. Therefore, the absence of marbled murrelets offshore from most areas where older forests have been extensively depleted strongly suggests that offshore abundance of marbled murrelets is correlated with adjacent mainland mature and old-growth forests, particularly given historical accounts of birds located in these areas prior to extensive logging. As discussed in the Background section of this rule, current research has shown that marbled murrelets are strongly associated with older forest habitat.

Comment: Although the density of nesting pairs may be low in managed forests, the vast acreage involved possible could include a considerable number of marbled murrelets.

Service Response: As discussed in the Background section of this rule, current research has shown that marbled murrelets are strongly associated with older forest habitat. Second-growth forests lack marbled murrelets except in those rare instances where residual old-growth trees remain.

Comment: One commenter stated that although the conclusion that marbled murrelets are linked to old-growth and mature forests for nesting is supported by field observations, it is unknown if the forest as a whole promotes successful nesting or if structural conditions found within such forests determine use of forests. Two examples suggested that required nesting structures may not necessarily include extensive old-growth or mature forest. One such example was the area along the Nemah River near Willapa Bay, Washington. Although it is not known conclusively if marbled murrelets nest in the area, birds are consistently observed there during the nesting season. The commenter stated that this area was selectively harvested about 50 years ago, and now consists largely of remnant old-growth trees (Sitka spruce, 366 centimeters (144 inches) dbh; western red cedar, 427 centimeters (168 inches) dbh; in a forest area now largely composed of about 60 year-old trees. A second example presented was the Brandy Bar study area reported by Varoujean *et al.* (1989) from coastal Oregon; however, no descriptive information was provided for this site.

Service Response: The Service obtained information on the Nemah River site, an isolated stand in southwest Washington, from Washington Department of Wildlife personnel who have been conducting surveys for marbled murrelets in the area (Hamer, Wash. Dept. Wildl., pers. comm., 1992). The Nemah site is an unmanaged stand that naturally regenerated after fire and windthrow. The majority of trees in the stand are approximately 70 years old and grew back naturally after severe windstorms that occurred during 1921. Remnant old-growth trees are scattered throughout the stand. Although no nests have been discovered to date, high numbers of detections indicate occupancy. The Brandy Bar site in coastal Oregon is also a naturally regenerated stand. The majority of trees in the stand, which are approximately 80 years old, grew back naturally after fire. Similar to the Nemah stand, large remnant old-growth trees are scattered throughout the site. These observations are consistent with the information on habitat preference presented in the Background section of this rule.

Life History Information

Comment: Some commenters questioned life history parameters presented and indicated that a sample size of so few nests was insufficient to draw such conclusions. Such issues included the number of eggs laid per nest and the semi-colonial behavior of the bird.

Service Response: The Service has continued to collect information on the marbled murrelet in the three-state area. We have information from twice as many nests as were known at the time of the proposal. New observations continue to indicate that marbled murrelets lay one egg per nest and are semi-colonial in nesting areas. None of the commenters provided data or observations that refuted statements regarding the life history strategy of marbled murrelets.

Population Estimates and Trends

Comment: One commenter stated that the Service should clearly define the threshold, such as population level, for a species such as the marbled murrelet to be delineated as threatened. Without supplying a minimum population threshold level it considers viable, the Service has no way to determine that sufficient habitat is not available.

Service Response: The Act does not establish such thresholds, nor does it require the Service to set thresholds. The Service has information indicating that the marbled murrelet population has undergone a decline, and that the primary cause of that decline, loss of nesting habitat, is likely to continue. Lesser threats of oil spills, gill-net fisheries, and predation also contribute to the decline and are likely to continue.

Comment: One commenter stated that surveys that have occurred were concentrated in older forests, thereby biasing the data in favor of the dependence of marbled murrelets on older forests. The commenter stated that population trends cannot be established using such data. The Service assumed that populations have declined but lacks demographic studies upon which to verify this trend. The Service lacks historical population data to compare to current population levels.

Service Response: Many studies have surveyed a variety of forest age classes to avoid any survey bias towards older forests. The anecdotal historical information suggests a precipitous decline in total numbers (from an estimated 60,000 birds in California to 9,000 for the three-state area). Although demographic information could contribute to our understanding of the decline, it is not needed to validate the trend.

Issue 3. Decision is Political, Not Biological

Comment: One commenter stated that the decision process was being driven by politics and threatened legal pressure from the Sierra Club, National Wildlife Federation, etc. and was not based on facts.

Service Response: The Service bases its decisions on the listing of species solely upon biological information, as required by the Act.

Issue 4. Critical Habitat

Comment: One commenter asked why, if old-growth and mature forests are critical for the viability of the marbled murrelet, didn't the Service list all old-growth and mature forests within the range of the species as critical habitat according to section 4(a)(3) of the Act during the rule development. Another commenter stated that due to the strong commitment of the private timberland owners in California, the vast quantity of public land presently being managed for the murrelet, and the legally protected status of the species in California, they did not feel it was necessary or prudent to designate critical habitat in California. Several commenters urged designating critical habitat for the marbled murrelet at the time of listing.

Service Response: During the comment periods on the proposed listing, the Service sought additional agency and public input on critical habitat, along with information on biological status and threats to the species. The Service must also take into consideration the economic impacts of

specifying any particular area as critical habitat (16 U.S.C. 1533(b)(2)). The Service will continue to analyze information and will propose critical habitat to the maximum extent prudent and determinable, within the timeframes specified in the Act. The Service's process in determining critical habitat for the marbled murrelet is discussed in more detail in the Critical Habitat section of this rule.

Issue 5. Alternate Listing Status Recommended

Comment: ODFW recommended that it may be more appropriate to list the marbled murrelet as endangered in California and Oregon and threatened in Washington.

Service Response: After a thorough status review, the Service proposed threatened status for the population. Although the status of the murrelet is not uniform throughout its range in Washington, Oregon, and California, the overall picture presented is one of a threatened species. Recovery planning will consider the status of the marbled murrelet within the individual states and smaller sub-regions.

Comment: One commenter suggested that the species should be considered for listing as threatened in Alaska as well. They presented data on logging practices in southeast Alaska, in particular, on the Tongass National Forest. They also expressed concern for the marbled murrelet population in Prince William Sound that experienced high losses as a result of the Exxon Valdez oil spill and is also subject to pressures from logging of adjacent private old-growth forests. They suggested that the marbled murrelet should be listed as threatened in Alaska until it could be demonstrated conclusively that planning for logging (including accurate forest inventories), had fail-safe provisions to assure that marbled murrelet nesting habitat would not be significantly diminished.

Service Response: This rule presents the final determination that the proposal (56 FR 28362) to list the marbled murrelet in Washington, Oregon, and California as a threatened species is warranted. Alaska was not included in the proposed rule; therefore, it cannot be included in this final rule for listing. The Service will continue to evaluate the status of the marbled murrelet and its habitat in Alaska.

Issue 6. National Environmental Policy Act

Comment: One commenter stated that the Service should prepare an Environmental Impact Statement (EIS), pursuant to the National Environmental Policy Act (NEPA), on this rule. A decision to list the marbled murrelet is a major Federal action significantly affecting the quality of the human environment that must be accompanied by an EIS under NEPA.

Service Response: The Service has determined that preparation of an EIS is not required in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended (see National Environmental Policy Act section of this rule). The Service's reasons for this determination were published in the **Federal Register** (see 48 FR 49244).

Issue 7: Distinct Population Segment

Comment: The Service failed to explain how it determined the marbled murrelet in California, Oregon, and Washington to be a "distinct population segment". The commenter questioned the significance of the area selected.

Service Response: This issue is discussed in the Distinct Population Segment section of this rule. In summary, no comments were received indicating that the marbled murrelet in Washington, Oregon, and California is more widespread, more common, or under lesser threats than indicated by previous analyses.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that the Washington, Oregon, and California population of the marbled murrelet should be classified as a threatened species. Procedures found in section 4 of the Act and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the Washington, Oregon, and California population of the marbled murrelet (*Brachyramphus marmoratus marmoratus*) are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of the Species' Habitat or Range

Current estimates of 1.4 million hectares (3.4 million acres) of old-growth forest throughout western Oregon and Washington represent a reduction of approximately 82.5 percent from prelogging levels (Booth 1991). Old-growth forests in the Douglas-fir/mixed conifer region of northwestern California have undergone a reduction of about 45 to 80 percent since the mid-1800's (Laudenslayer 1985, California Department of Forestry and Fire Protection 1988). Estimates of the amount of reduction of coastal old-growth redwood forests in California (all formerly marbled murrelet habitat) range from approximately 85 to 96 percent (Green 1985, Fox 1988, Larsen 1991). The marbled murrelet occurs along the coastline, occupying only a small fraction of area that was formerly dominated by older forests, and a small fraction of the area that still contains older forests.

In addition, reduction of the remaining older forest has not been evenly distributed over western Oregon, Washington, and northwestern California. Harvest has been concentrated at the lower elevations and within the Coast Ranges (Thomas *et al.* 1990), generally corresponding with the range of the marbled murrelet. Reduction of these older forests is largely attributable to timber harvesting and land conversion practices, although natural perturbations, such as forest fires and windthrow, have caused considerable losses as well.

The geographic distribution of the marbled murrelet along the west coast of North America is discontinuous. The gap in the present distribution in the southern portion of the range in California was apparently the result of extensive clearcutting of forests in the earlier half of this century that eliminated most nesting habitat (Paton and Ralph 1988, Carter and Erickson 1988). Other local breeding populations, especially between the Olympic Peninsula in Washington and Tillamook County in Oregon, were very likely eliminated through loss of their nesting habitat (Nelson, pers. comm., 1991).

Some of the old-growth areas that have been lost through natural perturbations such as forest fire and windthrow still provide habitat suitable for marbled murrelets. Mature forests, naturally regenerated from such perturbations, that retain scattered old-growth trees and a diversity of structure are sometimes occupied and used for nesting, but less commonly than large stands of old growth forests. That is particularly true in coastal Oregon where there has been extensive fire history. No occupied sites have been located in young stands or clear-cuts, or young/mature mixed forests that lack remnant old-growth trees (Nelson, pers. comm., 1992). Mature second-growth does not support breeding when it occurs isolated from older forest or residual (fragmented) older forest stands (Larsen 1991).

Forests generally require approximately 200 years to develop old-growth characteristics. The older trees within these stands have large horizontal limbs used by nesting murrelets. However, forests in Washington, Oregon, and northern California have been subjected to, and are proposed for, intensive management with average cutting rotations of 70 to 120 years to produce wood at a non-declining rate (USDI 1984, USDA 1988). Cutting rotations of 40 to 50 years are used for some private lands. Current preferred timber harvest strategies on Federal lands and some private lands emphasize dispersed clearcut patches for even-aged management as the pattern of harvest. Although recently both the Forest Service and the Bureau announced that their respective agencies intend to de-emphasize clearcutting in their future timber sale planning efforts, alternate methods of timber harvest vary greatly in terms of how they will modify marbled murrelet habitat. For example, timber harvest methods such as the shelterwood and seed tree methods, in addition to "new forestry" techniques, remove a varying amount of trees from a particular area. Although the remaining trees and habitat components left by these alternate harvest methods may help decrease the amount of time it would take an area to again become suitable habitat for marbled murrelets, the harvest methods would not provide suitable habitat over the short-term. Thus, public forest lands that are intensively managed for timber production (cutting rotations of 70 to 120 years) are, in general, not allowed to develop old-growth characteristics. As a result of this short rotation age and the continued harvest of old-growth and mature forests, loss and fragmentation of remaining suitable nesting habitat for marbled murrelets will continue throughout the forested range of the subspecies under current management practices, except in reserved areas.

Most remaining nesting habitat within the petitioned states is on Federal and State owned lands, as most nesting habitat on private lands has been eliminated. Under current forest management practices, logging of the remaining older forests is likely to continue, except in areas with mandated protection. In Oregon, 8 of 154 forest stands in which marbled murrelets are found, have been eliminated or greatly modified by logging practices. Additionally, 10 or more stands with occupied sites are likely to be modified or eliminated due to timber harvest in 1992 (Nelson, *in litt.*, 1992).

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Not known to be applicable.

C. Disease or Predation

Predation is an additional threat to the continued existence of the marbled murrelet. Of the 23 tree nests located, 8 were successful, 13 failed (10 from predation, 2 from human interference, and 1 from edge effects (wind blew the chick out of the nest)), and the status of the remaining 2 was indeterminable (Nelson, *in litt.*, 1992). Great horned owls (*Bubo virginianus*), Stellar's jays (*Cyanocitta stelleri*), common ravens (*Corvus corax*), peregrine falcons (*Falco peregrinus*), and sharp-shinned hawks (*Accipiter striatus*) are known predators. Additional suspected predators include gray jays (*Perisoreus canadensis*) and common crows (*Corvus brachyrhynchos*). Predation at 10 of 23 (43 percent) nests is high and could have a substantial effect on the viability of this species. There is a substantial amount of information on the effects of forest fragmentation on depredation of bird nests by corvids (jays, ravens, crows). Corvid predation on nests (eggs and chicks) increases with the fragmentation of older-aged forests (Yahner and Scott 1988), and avian nesting success is lower in small forest fragments than larger intact forests because of predation and decreased fecundity (Ambuel and Temple 1983, Andren *et al.* 1985, Wilcove 1985, Temple and Cary 1988).

D. Inadequacy of Existing Regulatory Mechanisms

Marbled murrelets are protected from "take" by the Migratory Bird Treaty Act (16 U.S.C. 703 *et seq.*). The marbled murrelet is identified as Sensitive by the Forest Service and the Bureau. The States of California, Oregon, and Washington have legislative mandates and acts specific to listing and protecting species determined to be endangered or threatened.

The marbled murrelet was listed as endangered within the State of California by the CDFG. Under provisions of the California Endangered Species Act, the California Department of Forestry (CDF) must consult with CDFG if a proposed timber harvest plan for private or State lands has the potential to adversely affect the marbled murrelet or its habitat. However, most of the marbled murrelet habitat in California is Federally controlled (National Parks and Forest Service) and does not fall under the protection of the State Act. In addition, the State Act does not require that a recovery plan be developed, in contrast to a federally listed threatened or endangered species. The CDF, responsible for regulating the harvest of commercial timber from private and State timberlands in California, adopted emergency rules to protect the marbled murrelet that became effective on June 28, 1991. These emergency rules required surveys for marbled murrelets in potential habitat and required feasible mitigation to reduce or avoid a significant adverse impact on the species in known activity areas. These emergency rules expired on March 2, 1992. Proposed permanent rules promote consistency and conformity with the State Act which prohibits "take" of an endangered species. The specific protections under the State Act extended to habitat protection for the marbled murrelet are unclear at this time.

In Oregon, the marbled murrelet is classified as Sensitive by the ODFW, which provides no mandated protection. The Oregon Board of Forestry is currently reviewing a proposal, submitted by the Portland Audubon Society in late November 1991, to list the marbled murrelet as a species that uses sensitive nesting sites. Until final rules are adopted, timber harvests within known marbled murrelet sites on State-owned forest land are being examined on a case-by-case basis. Although affording some protection to known occupied sites, the proposed rules would not require surveys in potential marbled murrelet habitat prior to conducting activities that could impact the habitat.

In Washington, the marbled murrelet is also listed as Sensitive by the WDW. Under its State Forest Practices Act, the Washington Department of Natural Resources (WDNR) is responsible for regulating harvesting of commercial timber from private and State DNR managed timberlands in Washington. The WDW does provide management recommendations to WDNR on proposed harvests within known marbled murrelet areas; however, WDNR has no rules that provide legally mandated protection for the marbled murrelet.

The National Forest Management Act of 1976 and its implementing regulations require the Forest Service to manage National Forests to provide sufficient habitat to maintain viable populations of native vertebrate species, such as the marbled murrelet. These regulations define a viable population as one which "* * * has the estimated numbers and distribution of reproductive individuals to insure its continued existence is well

distributed in the planning area" (36 CFR 219.19).

A system of Habitat Conservation Areas (HCAs) was developed as part of a conservation strategy for the northern spotted owl (Thomas *et al.* 1990). These areas have been recommended as "no harvest" areas. Currently neither the Forest Service nor the Bureau are harvesting timber in these areas. However, neither agency has made a final decision on the long term management of these areas. Some portions of these HCAs occur within the range of the marbled murrelet in all three states. The HCA's were designed to support a pair target of northern spotted owls in the future, and may not currently support sufficient habitat for the target number of owls.

These HCAs were modified to produce the Designated Conservation Areas (DCAs) in the draft recovery plan for the northern spotted owl. The DCA lines are only recommendations. Final decisions on HCA or DCA lines will be determined by the individual agency's land management planning process.

Category 4 HCAs are a maximum of 32 hectares (80 acres) in size, and may not be large enough to support reproductively successful marbled murrelets. In addition, sites on the edge of protected areas may experience the adverse effects of forest fragmentation.

On January 15, 1992, the Service finalized designation of 2.8 million hectares (6.88 million acres) as critical habitat for the northern spotted owl in Washington, Oregon, and California (57 FR 1796). These critical habitat areas include most of the HCAs and add areas around and between them. Acres in spotted owl critical habitat, in addition to HCAs and other protected land allocations, equal approximately 78 percent of the suitable marbled murrelet habitat managed by the Forest Service on the Mount Baker-Snoqualmie, Olympic, Siuslaw, and Siskiyou National Forests (Gunderson, Forest Service, pers. comm., 1992), examining areas up to 80 kilometers (50 miles) inland.

In Washington, Oregon, and California, the HCAs, plus other protected areas (primarily managed for northern spotted owls), encompass approximately 67 percent of the suitable marbled murrelet habitat managed by the Forest Service (Gunderson, pers. comm., 1992). However, about 29 percent of the known occupied sites within the four Forests are located within Forest Plan allocations where timber harvest will occur. These estimates used 50 miles inland as the boundary of marbled murrelet occurrence; however, in the northern Washington Cascades on the Mount Baker-Snoqualmie National Forest, over 90 percent of all inland observations have been within 60 kilometers (37 miles) of the coast (Hamer and Cummins 1991). In Oregon, the majority of detections and number of marbled murrelets occur within 40 kilometers (25 miles) of the coast (Nelson, pers. comm.). The Service concludes that although the marbled murrelet will be afforded some amount of incidental protection through the management of HCAs for the northern spotted owl, this protection is not adequate.

Although these critical habitat areas and other designations for the northern spotted owl may provide some incidental protection for the marbled murrelet, such areas do not provide adequate protection for marbled murrelets. For example, critical habitat designation for the owl does not necessarily preclude timber harvest or other project activities from occurring within critical habitat boundaries. Northern spotted owls use various age classes and structures of forest habitat, and critical habitat boundaries encompass all types of habitat used by spotted owls. Spotted owls use forests for nesting, roosting, foraging, and dispersal. Although nesting habitat for spotted owls and marbled murrelets may be somewhat similar, spotted owls can use younger stands for activities such as foraging and dispersal. Marbled murrelets use older forests solely for nesting purposes. Roosting and foraging take place in the marine environment. Federal agencies are required to consult with the Service on any actions they authorize, fund, or carry out that may affect spotted owl critical habitat. Habitat requirements and impacts specific to marbled murrelets are not addressed during consultation on spotted owl critical habitat. The results of such consultations may provide for owl dispersal or foraging habitat, or other forest structures that are not used by marbled murrelets. Moreover, spotted owls may be more adaptable in their nest site selection than are marbled murrelets. For example, in approximately 7 percent of the range of the northern spotted owl (i.e., northern California), owls use comparatively young second-growth redwood forests, whereas marbled murrelets do not (probably because redwoods do not provide the large horizontal limbs needed by marbled murrelets for nesting). Spotted owls use some second-growth forests where inefficient logging practices left remnant patches of older trees. Marbled murrelets are known to use some second-growth forests that recovered following natural disasters, but only where residual old-growth trees remained. Forests may recover more rapidly from natural disasters (e.g., windthrow, fire) because fallen trees decay and nutrients are returned to the soil, and more older trees may be spared.

In California, only about 28,300 hectares (70,000 acres) (3.5 percent) of the original old-growth coastal coniferous forest remains (Larsen 1991). Of these remaining hectares, 24,300 (60,000 acres) are in State or Federal parks, where logging is precluded. The remaining 4,000 hectares (10,000 acres) are under private ownership as commercial timberland and are eligible for harvest. Marbled murrelets would not be adequately preserved by depending solely on remaining old-growth coastal coniferous forest maintained on parkland (Larsen 1991). In a park situation where human food and garbage are readily available, the population levels of corvids are unnaturally high and may lead to increased nest predation. Tree cutting and the removal of large horizontal branches and snags through safety pruning operations in picnic areas and campgrounds may also adversely affect the marbled murrelet (Singer, *in litt.*, 1991).

E. Other Natural or Man-made Factors Affecting its Continued Existence

Mortality from gill-net fishing and oil spills has had a negative impact on the marbled murrelet. Although California and Oregon no longer allow gill-net operations, gill-net fishing is an annual occurrence in Washington. For example, about 1,200 gill-net licenses are issued each year in Washington (Marshall 1988). Gill-net fisheries occur in areas of marbled murrelet concentrations in Washington, but the mortality rate is unknown. One study conducted in British Columbia along Vancouver Island documented gill-netting as responsible for killing approximately 8 percent of the potential fall population of marbled murrelets (Carter and Sealy 1984). In a 1990 study of incidental take in the Prince William Sound salmon gill-net fishery, marbled murrelets were the most frequently caught seabird (Kuletz 1992). By extrapolation, an estimated 1,200 (95 percent CI–702–1,764) murrelets, or 1.4 percent of the Prince William Sound population, were taken. These studies suggest that the gill-net fishery in Washington may negatively affect marbled murrelet numbers there.

Marbled murrelets have a high susceptibility to mortality from oil spills because they tend to spend most of their time swimming on the sea surface and

feeding in local concentrations close to shore. In a paper presented at the 1975 Symposium on Conservation of Marine Birds of North America, the marbled murrelet was given one of the highest oil spill vulnerability ratings of any Northeast Pacific seabird (King and Sanger 1979). Oil spills are chance events but, depending on the location, extent, and season of spill, could have significant adverse effects on local or regional populations of marbled murrelets. The *Exxon Valdez* oil spill of 1989 occurred in Prince William Sound, Alaska, and adversely affected local populations of marbled murrelets (Piatt *et al.* 1990). The number of carcasses recovered after the spill was from 612 to 642. Identified *Brachyramphus* murrelets, most of which were probably marbled murrelets, represented 11.6 percent of the Prince William Sound carcasses recovered. At the time of the spill, marbled murrelets were estimated to be 6.3 percent of the seabirds present in Prince William Sound and, thus, proportionally more murrelets were killed than were at risk (Piatt *et al.* 1990, Kuletz 1992). For the three-state area of this proposed rule, Puget Sound in Washington is a special concern.

Marbled murrelets are found both during the nesting season and during winter within areas affected by oil shipments. If approved, proposed oil exploration, possibly leading to production and increased movement of oil along the near-shore marine environment in Washington, Oregon, and California would increase the degree of threat from oil spills. Oiled marbled murrelets have been reported in several Washington oil spills, including the *Seagate* oil spill of 1956, the *Arco Anchorage* oil spill of 1985, the *Nestucca* oil spill of 1988, and the *Teenyo Maru* oil spill of 1991 (Leschner and Cummins 1990; Momot, U.S. Fish and Wildl. Serv., pers. comm., 1992). Several instances of marbled murrelet mortality due to oil spills have been documented in California as well (Carter and Erickson 1988, Carter *et al.* 1990). Oil spills are random events that would adversely affect marbled murrelets in the local area of the spill. Because the populations in Oregon, Washington, and California are small and locally concentrated, oil spills could result in local extirpations.

The marbled murrelet's reproductive strategy offers little opportunity for the population to rapidly increase in number. Murrelets probably do not reproduce every year, and pairs only lay one egg in a nest. Such a low reproductive rate would not yield a rapidly increasing population or one that can easily recover once numbers have been depleted.

The Service has carefully assessed the best scientific and commercial data available and concluded that the marbled murrelet in California, Oregon, and Washington is threatened due to loss of mature and old-growth forests that provide suitable nesting habitat. Secondary threats include gill-net fisheries in Washington, predation, and oil spills. The species' intrinsically low reproductive rate makes it unlikely that it will rapidly increase in number. The degree of threat facing the marbled murrelet does not suggest that extinction is imminent, but continued loss of nesting habitat throughout the forested portion of its range, indicates the species is likely to become endangered within the foreseeable future throughout a significant portion of its range. Under these circumstances, listing as threatened is appropriate.

Critical Habitat

Section 4(a)(3) of the Act requires, to the maximum extent prudent and determinable, that the Secretary designate critical habitat at the time a species is determined to be endangered or threatened. Critical habitat is defined as the specific areas within the geographical area currently occupied by a species on which are found the physical or biological features essential to the conservation of the species and that may require special management considerations or protection (16 U.S.C. 1532(5); 50 CFR 424.02(d)). Designations of critical habitat must be based on the best scientific data available and must take into consideration the economic and other relevant impacts of specifying any particular area as critical habitat (16 U.S.C. 1533(b)(2)).

When prompt listing of a species is essential to its conservation, but sufficient information to perform required analyses of the impacts of a critical habitat designation is lacking, the Service may go forward with a final listing decision without designating critical habitat. A critical habitat determination, to the maximum extent prudent, must then be completed not later than 1 year after the listing. The Service is continuing to gather information to be used in these analyses, and to evaluate the benefits (if any) of designating critical habitat for this species.

The Service currently lacks sufficient information to perform required analyses of the impacts of a critical habitat designation for the marbled murrelet. The Service must evaluate several aspects of a critical habitat designation for the marbled murrelet. The marbled murrelet nests in older forests, but roosts and forages in the marine environment. The Service must determine whether or not designation of critical habitat in the marine environment is prudent. The Service must also carefully study all known occupied sites and other suitable areas, in order to determine which physical or biological features are in fact essential to the conservation of the murrelet. Ongoing studies will help refine the Service's knowledge of the marbled murrelet's association with timber stands of varying size and structure, and of the surrounding landscape conditions.

In addition, in order to analyze the economic impacts of a critical habitat designation, the Service must obtain information about the costs of such a designation over and above costs associated with listing. The Service must have information on the costs associated with a designation of critical habitat in the marine environment. Such information would include the possible increased costs associated with oil spill contingency plans, changing oil tanker routes, and a possible alteration of fishery practices. Such information will be gathered by coordinating with appropriate Federal agencies. The restrictions on timber harvest for a critical habitat designation for the marbled murrelet would be different from those associated with critical habitat for the northern spotted owl. The costs associated with timber harvest reductions in critical habitat for the murrelet would be different from those associated with critical habitat for the owl.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain activities. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against certain activities are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat if any is being designated. Regulations implementing

this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(2) of the Act requires Federal agencies to insure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. Regulations governing these consultations are found at 50 CFR 402.14.

The Forest Service and Bureau have active timber sale programs in Washington, Oregon, and California, whereby private timber companies bid for timber on Federal land. A substantial portion of these timber sales occur in older forests. The Forest Service and Bureau would review and assess the potential impacts of these timber sales on the murrelet, and would be required to consult with the Service on these sales to ensure compliance pursuant to section 7 of the Act. Other Federal agencies that are likely to have projects that may affect the marbled murrelet include the Bureau of Indian Affairs (timber harvest) and the Army Corps of Engineers (waste disposal and dredging/fill operations).

The Act and implementing regulations found at 50 CFR 17.21 and 17.31 set forth a series of general prohibitions and exceptions that apply to all threatened wildlife not covered by a special rule. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States, to take (defined as harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect; or to attempt any of these activities), import or export, transport in interstate or foreign commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce, any threatened species not covered by a special rule. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving threatened wildlife species under certain circumstances. Regulations governing threatened species permits are provided in 50 CFR 17.32. Unless otherwise provided by special rule, such permits are available for scientific purposes, to enhance the propagation or survival of the species, for economic hardship, zoological exhibition, educational purposes, special purposes consistent with the Act, and/or for incidental take in connection with otherwise lawful activities. Information on permits to take federally listed species may be obtained by writing to the Office of Management Authority, U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, room 432, Arlington, Virginia 22203–3507 (703/358–2104, FAX 703/358–2281)

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244).

Regulation Promulgation

PART 17—[Amended]

Accordingly, part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations is amended as set forth below:

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500; unless otherwise noted.

2. Amend § 17.11(h) by adding the following, in alphabetical order under Birds, to the List of Endangered and Threatened Wildlife:

§ 17.11 Endangered and threatened wildlife.

Proposed Rules

Federal Register
Vol. 57, No. 191
Thursday, October 1, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL HOUSING FINANCE BOARD

12 CFR Parts 935 and 940

[No. 92-727]

Advances

AGENCY: Federal Housing Finance Board.

ACTION: Proposed rule.

SUMMARY: The Federal Housing Finance Board (Board) is proposing to amend its regulations to establish revised and new requirements governing secured loans (called advances) made by the Federal Home Loan Banks (Banks). The proposed rule modifies or renews existing regulations and implements provisions in the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA), which amended the Federal Home Loan Bank Act of 1932 (Act). The proposed rule also transfers the Board's Statements of Policy on advances from one regulatory part to another, as discussed in the **SUPPLEMENTARY INFORMATION:** Section.

DATES: Comments must be submitted in writing to the Board by November 30, 1992.

ADDRESSES: Written comments may be mailed to: Executive Secretariat, Federal Housing Finance Board, 1777 F Street, NW., Washington, DC 20006. Comments will be available for public inspection at this address.

FOR FURTHER INFORMATION CONTACT: Christine M. Freidel, Financial Analyst, (202) 408–2976; Thomas D. Sheehan, Assistant Director, District Banks Directorate, (202) 408–2870; James H. Gray, Jr., Associate General Counsel, (202) 408–2552; Sharon B. Like, Attorney-Advisor, (202) 408–2930; Charles J. Szlenker, Attorney-Advisor, (202) 408–2554, Office of Legal and External Affairs; Federal Housing Finance Board, 1777 F Street, NW., Washington, DC 20006.

SUPPLEMENTARY INFORMATION:

I. Background

The Federal Home Loan Bank System (System) is comprised of 12 District Banks. Each Bank is federally chartered, wholly owned by its members and managed by a board of directors that sets policies pursuant to regulations and guidelines established by the Board. The Banks act as intermediaries in the capital markets, raising funds on favorable terms and passing the proceeds on to member institutions in the form of advances. Advances are required to be fully secured, primarily by residential mortgage collateral, see 12 U.S.C. 1430(a), and are made available over a range of maturities. The Board is responsible for supervising the Banks, and ensuring that the Banks: (1) Remain adequately capitalized and able to raise funds in the capital markets; (2) operate in a safe and sound manner; and (3) carry out their housing finance mission. See 12 U.S.C. 1422a(a)(3).

All savings institutions insured by the Savings Association Insurance Fund (SAIF) of the Federal Deposit Insurance Corporation (FDIC) are members of the System, as are many savings banks insured by the FDIC's Bank Insurance Fund, and a limited number of insurance companies. With he passage of FIRREA, membership in the System also was opened to federally insured commercial banks and credit unions that make long-term home mortgage loans and that have at least 10 percent of their total assets in residential mortgage loans. See 12 U.S.C. 1424(a).

Each member is required to hold stock in its Bank based upon the level of the member's mortgage-related assets and outstanding advances. See 12 U.S.C. 1426. Bank stock pays dividends, is not publicly traded, and is redeemable at par. See *id.*

II. Analysis of Proposed Rulemaking

Subpart A—Advances to Members

A. Primary Credit Mission of the Banks

Section 935.2 of the proposed rule sets forth the primary credit mission of the Banks, which is to enhance the availability of residential mortgage credit by providing a readily available, economical and affordable source of funds in the form of advances to their member institutions. In order to carry out this mission, the Banks shall offer competitively priced advance products and programs that satisfy their members' credit needs. Limitations on advances, beyond those specifically prescribed by statute, regulation, policy or other requirements of the Board, shall be those that protect the financial integrity of a Bank and accommodate the practical constraints associated with a Bank's ability to raise funds.

B. Bank Advances Policies and Application for Advances

Section 935.3 of the proposed rule continues the requirement in the Board's current regulation that each Bank's board of directors adopt, and review at least semiannually, a policy on extending advances to members of that Bank. Each Bank's policy shall be consistent with the requirements of the Act, 12 U.S.C. 1421 *et seq.*, this part, and general guidelines established by the Board, as reflected in its resolutions, orders, or manuals. A Bank's board of directors may designate officers authorized to extend or deny credit, or take other actions consistent with the Bank's advances policy. Exceptions to a Bank's policy must receive the approval of its board of directors, a committee thereof, or officers specifically authorized by the board of directors to approve exceptions. Such exceptions to Bank policy must comply with the Act, this part, and policies and guidelines of the Board.

Section 935.4 of the proposed rule requires the Banks to enter into advances and security agreements with their members that govern the terms and conditions under which credit will be extended. Section 935.4(a) permits a Bank to accept oral or written applications for advances from its members. Section 935.4(b) specifies that a Bank shall require any member applying for an advance to enter into a primary and unconditional obligation to repay such advance and all other indebtedness to the Bank: Section 935.4(c)(1) provides that a Bank shall make only fully secured advances to its members. Section 935.4(c)(2) provides that a Bank shall execute a written security agreement with each borrowing member that gives the Bank a perfectible security interest in the collateral pledged to secure the advances. In practice, the advances and security agreements may be consolidated in one document. Such document may also constitute a master

agreement covering all outstanding advances by a Bank to a member.

Section 935.4(d) of the proposed rule requires a Bank's board of directors, or a delegated committee thereof, to approve the Bank's advances application forms, advances agreements, and security agreements. A Bank's board is not required to approve each revision to an already approved form, it the resulting document is substantially the same as the previously approved form. The Act requires that the form for the advance application, as well as the form of the document evidencing a member's obligation to repay outstanding advances, be approved by the Board, 12 U.S.C. 1429, 1430(d). The proposed rule deems the forms to be approved by the Board, if the terms of the documents comply with the prescribed requirements of this part. The Banks are required to provide the Board with copies of their standard advances and security agreements, as well as any substantive revisions thereto.

C. Limitations on Access to Advances

Section 935.5(a) of the proposed rule implements 12 U.S.C. 1429 by authorizing the Banks, in their discretion, to limit or deny a member's application for an advance, or to approve it on such additional terms as the Bank may prescribe, subject to the Act, this part, and Board policy guidelines. Advances may be limited or denied if, in the Bank's judgment, a member is engaged or has engaged in any unsafe or unsound business practices, has inadequate capital, is sustaining operating losses, has financial or managerial deficiencies that bear upon the member's creditworthiness, or has any other deficiencies as determined by the Bank.

Section 935.5(b) of the proposed rule sets forth new requirements for Bank lending to certain capital deficient members. These requirements were adopted in part as Board policy in April, 1992 (see Board Resolution No. 92–277.1). The Board today proposes to revise and incorporate these guidelines into its advances regulation, and specifically requests comment on all aspects of the new requirements.

Prior to the adoption of the policy guidelines, there were no Board-mandated restrictions on a Bank's ability to lend to an insolvent member. Although the secured nature of advances protects the Banks from credit risk, the Board is concerned that, by making advances available to certain capital deficient members, a Bank may inadvertently be acting contrary to the wishes of a member's primary Federal regulator. Section 935.5(b)(1) of the proposed rule, therefore, restricts a Bank from making a new advance to a member that does not have positive tangible capital, unless the member's appropriate Federal banking agency or insurer requests in writing that funding be made available to such member, and the Bank determines in its discretion that it may safely make such advance to the member.

Section 935.1 of the proposed rule defines "tangible capital" as capital, calculated according to Generally Accepted Accounting Principles (GAAP), less intangible assets, as reported in a savings association member's Thrift Financial Report (TFR), or a commercial or savings bank member's Report of Condition and Income (Call Report). GAAP capital currently is reported as "equity" capital on the Call Report and TFR. For credit unions and insurance company members, the level of tangible capital will be determined by the Bank, consistent with the parameters used for savings association and commercial bank members.

In defining tangible capital, the Board is proposing a standard that is consistent with the approach suggested by the FDIC in its proposed rulemaking on prompt corrective action. See 57 FR 29662 (July 6, 1992). The prompt corrective action procedures provide a framework for determining supervisory action. The FDIC has proposed to implement prompt corrective action procedures based on an institution's level of Tier 1 capital or core capital. GAAP capital less intangible assets results in a definition of tangible capital that is similar to Tier 1 or core capital, as defined by the Federal banking regulators. See *e.g.*, 12 CFR part 3, appendix A, section 2(a) (Office of the Comptroller of the Currency); 12 CFR part 208, appendix A, II.A.1 (Federal Reserve Board); 12 CFR 325.(m) (FDIC); 12 CFR 567.5(a) (Office of Thrift Supervision (OTS)).

The proposed definition will allow the Banks to easily verify most federally insured depository institution members' capital positions, using information from members' TFRs, Call Reports or financial statements, since these documents are reviewed at the time of application for an advance. Each Bank will determine the level of tangible capital held by credit union and insurance company members, since regulatory capital for these members is more variable and includes certain insurance and reserve accounts that may not be appropriate to the definition of tangible capital.

The Board realizes that placing restrictions on advances to members without positive tangible capital could cause liquidity problems for these members. Therefore, proposed § 935.5(b)(2) permits renewals of existing advances to these members for periods of up to 30 days, if the Bank determines that such renewals can be safely made. Such renewals may be extended for successive 30-day terms if the Bank determines that it may safely make such extensions to the member. The renewal authority should provide the member with time to identify alternative sources of funds that can be used to repay maturing advances and fund ongoing operations. Renewals may be for periods longer than 30 days if requested by the member's appropriate regulator or insurer and agreed to by the Bank.

Section 935.5(c) of the proposed rule provides that, in the case of members that are not federally insured depository institutions, the provisions in § 935.5(b) may be implemented upon a written request from the member's state regulator.

Section 935.5(d) of the proposed rule requires each Bank to provide the Board with a monthly report of outstanding Bank advances and commitments to all members. It also directs the Banks, upon written request from a member's appropriate Federal banking agency, insurer or state regulator, to provide to such entity information on advances and commitments outstanding to the member.

The proposed rule does not include an existing Board policy provision that directs each Bank to honor written requests from a member's regulator or insurer to limit or deny a tangibly solvent member's access to advances. This provision has been removed in acknowledgment of the sufficiency of current mechanisms available to the members' regulators for denying an institution's access to outside funding.

Section 935.5(e) of the proposed rule requires that the written advances agreement required by § 935.4(b)(2) of the proposed rule shall stipulate that a Bank shall not fund commitments for advances previously made to members whose access to advances has subsequently been restricted pursuant to § 935.5(b).

In proposing the above restrictions on advances, the Board recognizes the authority and responsibility of the regulators and the insurer to supervise and regulate member activities. The restrictions are designed solely to ensure that the Banks do not unintentionally undermine regulatory intent. The Board specifically requests comment on all aspects of this proposal

to restrict access to advances by members without positive tangible capital.

D. Terms and Conditions for Advances

Section 935.6(a) of the proposed rule continues the Board's regulatory requirement that the Banks offer advances with maturities of up to ten years. The proposed rule also authorizes each Bank to offer advances with maturities of any length, consistent with the safe and sound operation of the Bank. This is consistent with the Board's recently promulgated interim final rule, see 57 FR 42,888 (Sept. 17, 1992), eliminating an earlier Board regulatory requirement that advance maturities not exceed 20 years.

The requirement that the Banks offer advances with maturities of up to ten years is designed to ensure that a sufficient variety of advance maturities is available to assist members in their asset/liability management. Members frequently hedge against interest rate movements by funding their long-term home mortgage loans, which generally have an average life between five and ten years, with matching term Bank advances. Long-term advances provide an important funding source for non-conforming loans for which the secondary market has not been a viable financing alternative.

The Board's recent rulemaking that allows the Banks to offer advances with maturities greater than 20 years facilitates the Bank's support of affordable housing finance. Some participants in the Affordable Housing Program (AHP), see 12 U.S.C. 1430(j), had requested AHP loans from Bank members with maturities greater than 20 years in order to lock in financing over the life of a project. However, members were often understandably reluctant to provide such long-term financing without matched funding. The availability of Bank advances with maturities greater than 20 years enables members to match fund such projects and avoid interest rate risk exposure.

Although offering longer-term funding could expose the Banks to additional interest rate risk, their ability to raise long-term debt, the availability of hedging options, and the Bank's expertise in asset/liability management will allow them to offer advances with a broad range of maturities without undue financial risk. The Banks will offer such funding only to the extent they are able to control their own interest rate risk exposure.

Section 935.6(b)(1) of the proposed rule eliminates a current Board policy requirement that the Banks generally price advances within a prescribed schedule of minimum and maximum mark-ups over their cost of issuing consolidated obligations (COs). Each Bank would instead be required to price advances taking into account its marginal cost of raising matching maturity funds in the marketplace, as well as any administrative and operating costs associated with making the advances. Advances offered through a Bank's AHP are exempt from this requirement. See 12 U.S.C. 1430(j).

Under the Board's current policy pricing schedule, the Banks are required to price advances within a specified range above their estimated cost of issuing COs. A required minimum mark-up of 20 basis points over the cost of COs applies across the maturity spectrum. The maximum permissible mark-up on advances declines from a high of 120 basis points over the cost of COs for advances with maturities greater than six months and less than or equal to one year, to a low of 60 basis points over the cost of COs for advances with maturities greater than nine years.

At the time the pricing schedule was established, COs dominated Bank funding. However, while COs remain the Banks' primary funding source, member deposits now comprise about 24 percent of the System's liabilities. Since deposits can be a lower cost funding alternative for short-term advances, a Bank's overall short-term cost of funds may at times be lower than its cost of issuing COs. By removing the minimum mark-up, the Board is encouraging the Banks' efforts to provide attractively priced funding to their members.

Moreover, the minimum and maximum mark-ups have not met their intended policy objectives. The intent of the 20 basis point minimum mark-up was to preclude the Banks from pricing advances below their total cost of funding the advances. When the pricing schedule was established, individual Bank operating expenses, as a percentage of assets, ranged from ten to 18 basis points. The Banks have subsequently introduced operating efficiencies that have significantly reduced the cost of their operations.

Rather than continuing to use a pricing schedule based on static expense figures, which may or may not be accurate over time, § 935.6(b)(1) of the proposed rule provides each Bank with the discretion to determine the appropriate minimum mark-up on advances based upon its current administrative and operating costs. This flexibility should enhance the Banks' regional competitiveness, since the minimum mark-up on advances will reflect an individual Bank's, rather than the System's, administrative costs.

The current maximum mark-up, which declines as advance maturities increase, was principally intended to encourage long-term lending for housing finance purposes, as well as to ensure a supply of longer-term funds at a reasonable cost to assist members in their asset-liability management. However, over the past several years the maximum mark-up has not been a binding constraint. Banks generally have priced advances will below the pricing ceiling and at relatively constant margins across the maturity spectrum.

Since the current Board policy has not significantly influenced pricing behavior, and there is no indication that the Banks are applying relatively higher mark-ups for longer-term advances, the proposed rule eliminates the maximum mark-up as well. The Board believes that the Banks will continue to price short- and long-term advances competitively absent an explicit pricing schedule. In addition, pricing flexibility allows the Banks to include hedging costs when pricing advances, particularly when market constraints inhibit their ability to match fund advances.

Section 935.6(b)(2)(i) of the proposed rule authorizes the Banks to extend credit to individual borrowers on varying terms, based upon the amount of credit risk associated with lending to a particular borrower or other reasonable criteria, provided the criteria apply equally to all members.

Section 7(j) of the Act requires that each Bank's board of directors administer the affairs of the Bank fairly and impartially and without discrimination in favor of or against a member borrower. See 12 U.S.C. 1427(j). Section 9 of the Act gives the Banks broad authority to determine the terms of an advance, subject to statutory and regulatory requirements. Specifically, it provides that a Bank may at its discretion deny any such application for an advance, or, subject to the approval of the Board, may grant it *on such conditions as the Bank may prescribe.* 12 U.S.C. 1429 (emphasis added).

The Board has concluded that the extension of credit on differing terms to Bank members based on the member's creditworthiness, or other reasonable criteria applied equally to all members, does not constitute "discrimination" under section 7(j) of the Act. Such a practice is consistent with the Banks' broad discretion to make advances under section 9 of the Act. It also is consistent with a Federal district court ruling in 1983 that sections 9 and 7(j) of the Act, when read together, confer upon the Banks plenary discretion in the

exercise of their lending authority. See *Fidelity Financial Corp. v. Federal Home Loan Bank of San Francisco*, 589 F. Supp. 885, 897 (N.D. Cal. 1983) *aff'd*, 792 F.2d 432 (9th Cir. 1986), *cert. denied*, 479 U.S. 1064 (1987).

Furthermore, risk-based pricing of advances should enhance the fairness of the Banks' credit programs, since terms on advances and other Bank credit products to more creditworthy members should be more favorable than those to members posing a greater credit risk to a Bank. Risk-based pricing will allow the Banks to offer competitive rates to their more creditworthy members, thereby enabling the Banks to better carry out their housing finance mission. It also will compensate the Banks for bearing any increased credit exposure associated with lending to higher risk members.

Differential pricing of advances based upon criteria other than credit risk also would be allowed, subject to the application of consistent standards to all borrowing members. For example, certain Banks have offered "volume discounts" to members who finance a certain percentage of their total assets with Bank advances. Section 935.6(b)(2)(ii) of the proposed rule requires each Bank to establish written standards and criteria for differential pricing and to apply such standards and criteria consistently and without discrimination to all borrowers.

Section 10(i) of the Act, as amended by the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA), Public Law 101–73, 103 Stat. 183 (August 9, 1989), requires each Bank to establish a Community Investment Program (CIP) to provide funding for members to undertake community-oriented mortgage lending. See 12 U.S.C. 1430(i). "Community-oriented mortgage lending" is defined in section 10(i) to include loans to finance the purchase and rehabilitation of housing for low- and moderate-income families, and commercial and economic development activities benefiting low- and moderate-income families or activities located in low- and moderate-income neighborhoods. *Id.*

The Act requires that the Banks price CIP advances at the cost of consolidated Bank obligations of comparable maturities, taking into account reasonable administrative costs. *Id.* However, as noted previously, the Banks' overall short-term funding costs can at times be lower than their cost of issuing COs. Section 935.7 of the proposed rule, therefore, directs the Banks to price CIP advances as provided in proposed § 935.6, except that the cost of such CIP advances shall not exceed the Bank's cost of issuing COs of comparable maturity, taking into account reasonable administrative costs.

E. Fees

The Banks currently are required by Board policy to charge prepayment fees that make them financially indifferent to a borrower's decision to prepay advances. These fees are designed to protect the Banks from interest rate risk and can be considered the price of the member's option to prepay. Since many advances are match funded and prepayments occur when interest rates fall, the Banks can suffer losses if the principal portion of the prepaid advances must be invested in lower yielding assets which continue to be funded by higher cost debt.

Under current Board policy, prepayment fees must equal 90 to 110 percent of the present value of the lost cash flow to the Bank, based upon the difference between the contract rate on the prepaid advance and the rate for a new advance of the same remaining maturity. The discount rate for calculating the present value is the current offering rate for a new advance with the same remaining maturity.

Although prepayment fees theoretically are designed to insulate the Banks from interest rate risk, the current prepayment fee structure may not adequately compensate a Bank for the loss in future cash flows due to an advance prepayment. The discount rate used in the calculation assumes that the Bank can replace the prepaid advance with a new advance. However, in the current operating environment, such opportunities have not always been readily available. The Bank is then forced to invest the prepaid principal and fees in lower-yielding assets, generally at a reduced, and sometimes even a negative, spread or to retire the underlying debt, possibly at a loss.

Therefore, § 935.8(a)(1) of the proposed rule continues the requirement that the Banks charge prepayment fees, but authorizes each Bank to determine the cost of the prepayment option. The fee shall sufficiently compensate the Bank for providing a prepayment option on an advance, and act to make the Bank financially indifferent to the borrower's decision to repay the advance prior to its maturity date.

Under proposed § 935.8(a)(2), prepayment fees are not required for advances with terms to maturity or repricing periods of six months or less, for advances funded by callable debt, or for advances which are otherwise appropriately hedged so that the Bank is financially indifferent to their prepayment. Proposed § 935.8(a)(3) provides that a prepayment fee may be waived only by a Bank's board of directors, a designated committee of the board of directors, or officers specifically authorized by the board, and only if such waiver will not result in an economic loss to the Bank. Any such waiver must subsequently be ratified by the board of directors. The Board specifically requests comment on the proposed change to the prepayment fee requirements.

Section 935.8(b) of the proposed rule eliminates a current Board policy requirement that the Banks charge commitment fees, and provides each Bank with the discretion to charge such fees. Section 935.8(c) authorizes a Bank to charge other fees as it deems necessary and appropriate.

F. Eligible Collateral

Section 10(a) of the Act requires a Bank to obtain and thereafter maintain a security interest in specific types of eligible collateral at the time of origination or renewal of an advance. See 12 U.S.C. 1430(a). Prior to FIRREA, a Bank could accept without limit any collateral that had a readily ascertainable value and in which the Bank could perfect a security interest. See 12 CFR 525.7(b)(4)(1989) (superseded).

In accordance with the requirements imposed by FIRREA in section 10(a) of the Act, § 935.9(a) of the proposed rule specifies four categories of eligible collateral:

(1)(i) Fully disbursed, whole first mortgage loans on improved residential real property not more than 90 days delinquent; or

(ii) Whole mortgage pass-through securities as defined in § 935.1 of this part.

(2) Securities issued, insured or guaranteed by the United States Government, or any agency thereof, including without limitation mortgage-backed securities as defined in § 935.1 of this part, issued or guaranteed by the Federal Home Loan Mortgage Corporation, the Federal National Mortgage Association, or the Government National Mortgage Association.

(3) Deposits in a Bank.

(4)(i) Except as provided in paragraph (a)(4)(iii) of this section, other real estate-related collateral acceptable to the Bank, if:

(A) Such collateral has a readily ascertainable value; and;

(B) The Bank can perfect a security interest in such collateral.

(ii) Eligible other real estate-related collateral may include, but is not limited to:

(A) Non-agency mortgage-backed securities not otherwise eligible under paragraph (a)(1)(ii) of this section;

(B) Second mortgage loans, including home equity loans or lines of credit;

(C) Commercial real estate loans; and

(D) Mortgage loan participations.

(iii) A Bank shall not permit the aggregate amount of outstanding advances to any one member, secured by such other real estate-related collateral, to exceed 30 percent of such member's capital, as calculated according to GAAP, at the time the advance is issued or renewed.

Bank in its discretion may further restrict the types of collateral it will accept based upon the creditworthiness and operations of the borrower, the quality of collateral, or other reasonable criteria.

Section 10(a)(1) of the Act provides that eligible mortgage loans under category (1) must be on "improved residential real property." See 12 U.S.C. 1430(a)(1). Section 935.1 of the proposed rule defines "residential real property" as: One-to-four family property; multifamily property; real property to be improved or in the process of being improved by the construction of dwelling units; or combination business or farm property, where at least 50 percent of the total appraised value of the combined property is attributable to the residential portion of the property. (In such cases, 100 percent of the appraised value of the combined property could be used to secure an advance.) The term "residential real property" does not include "nonresidential real property" as defined in § 935.1 of the proposed rule. "Improved residential real property" is defined as residential real property, excluding real property to be improved, or in the process of being improved, by the construction of dwelling units. The Board specifically requests comment on these definitions.

A "whole mortgage pass-through security" is narrowly defined in the proposed rule so that under category (1)(ii), only privately issued mortgage pass-through securities that represent ownership of all of the fully disbursed, whole first mortgages in an underlying pool under category (1)(i), may be pledged as collateral. Other privately issued mortgage-backed securities, including privately issued mortgage debt securities, that do not meet this requirement may qualify as collateral under category (4), see 12 U.S.C. 1430(a)(4) (other real estate-related collateral).

The Board also is considering at least two other alternative approaches that would significantly broaden the collateral eligible under category (1)(ii). First, the Board is considering the possibility that the final rule will broaden category (1)(ii) to permit the acceptance of any privately issued mortgage pass-through security that represents an equity interest in a *pro rata* share of the principal and interest payments from the underlying fully disbursed, whole first mortgage loans, including mortgage pass-though securities that do not represent ownership of the entire pool of underlying fully disbursed, whole first mortgage loans.

Second, the Board is considering the possibility that the final rule will broaden category (1)(ii) to permit the acceptance of any privately issued mortgage-backed security that represents a *pro rata* share of principal and interest payments from an underlying pool of fully disbursed, whole first mortgage loans. This second alternative would include treating collateralized mortgage obligations or other mortgage debt securities as eligible collateral under category (1)(ii).

The approach taken in the proposed rule is based on the most conservative interpretation of the phrase "securities representing a whole interest in * * * mortgages." *Id.* This interpretation is consistent with the Joint Explanatory Statement of the Committee of Conference, H.R. Conf. Rep. No. 222, 101st Cong., 1st Sess. 427–28 (1989) reprinted in 1989 U.S. Code Cong. & Admin. News 432, 466–67 (FIRREA Conference Report). The FIRREA Conference Report states that the collateral requirements in 12 U.S.C. 1430(a), imposed by FIRREA, were intended to enable the Banks to continue to accept privately issued mortgage-backed securities as collateral. The approach taken in the proposed rule is consistent with the FIRREA Conference Report because some privately issued mortgage pass-through securities may continue to be eligible under category (1)(ii).

The FIRREA Conference Report also indicates that the Bank collateral requirements imposed by FIRREA,

> preclude[ ] acceptance of interest payments or the principal payments on such loans, (iii) any security representing a subordinated interest in mortgage loans, or (iii) any security that represents an interest in a residual or other high risk mortgage derivative product.

Id. The proposed rule, as well as the alternative positions under consideration, would preclude these classes of securities identified in the FIRREA Conference Report from qualifying as acceptable collateral for advances, except under category (4). Accordingly, the Finance Board believes that the approach taken in the proposed rule, as well as the two alternatives under consideration, are consistent with the requirements of the Act and the legislative history as expressed in the Conference Report.

The Board is seriously considering broadening its interpretation of "whole interest" to include privately issued mortgage pass-through securities representing a *pro rata* share of principal and interest payments from the underlying mortgage loans (the first alternative above), because virtually all securities representing an interest in mortgages do not represent ownership of all of the mortgages in the underlying pool. They represent a share of the beneficial interest in the underlying pool of mortgages.

Furthermore, by specifically excluding principal only and interest only "stripped" securities, the FIRREA Conference Report can be interpreted to allow the Banks to accept privately issued securities as qualifying collateral under category (1)(ii), provided they represent a *pro rata* share of the principal and interest payments from the underlying mortgage loans. *Id.*

The second alternative, pursuant to which the Board would include in category (1)(ii) all privately issued mortgage-backed securities, including the lower risk tranches of privately issued collateralized mortgage obligations, would allow the Banks maximum flexibility to treat mortgage-related securities as eligible collateral under category (1)(ii), while still precluding acceptance of certain high risk securities specifically identified in the FIRREA Conference Report language quoted above.

The Board specifically requests comment on its interpretation of the phrase "securities representing a whole interest" in section 10(a)(1) of the Act, as well as the approach taken in the proposed rule, and the two alternatives under consideration.

Section 10(a)(2) of the Act authorizes the Banks to accept, without limitation, all types of securities issued, insured, or guaranteed by the United States government, or any agency thereof. See 12 U.S.C. 1430(a)(2). Eligible securities include, but are not limited to, those issued by the FHLMC, the FNMA, and the GNMA. Section 935.9(a)(2) of the proposed rule implements section 10(a)(2), and allows a Bank to accept as collateral stripped, residual and other high risk securities that are issued, insured or guaranteed by the United States government or one of its agencies.

Although the Board's Financial Management Policy (see Board Resolution No. 91–214, dated June 25, 1991), prohibits Bank investment in such securities due to the interest rate risk associated with holding these instruments, the Board believes that, for

collateral purposes, the Banks can protect themselves by adequately discounting the securities. It is expected that a Bank accepting such securities as collateral will have established systems in place to accurately value the collateral and will establish appropriate loan-to-value rations.

Securities issued by the former Federal Savings and Loan Insurance Corporation (FSLIC) are considered eligible collateral under category (2). The Board has concluded that not only should FSLIC notes be considered securities issued by an agency of the United States government, but also that FIRREA, in transferring liability for the notes to the FSLIC Resolution Fund and making the United States Treasury ultimately responsible for their repayment, has effectively bestowed the full faith and credit of the United States on the FSLIC notes. As of August 31, 1992, there were only $156 million in outstanding Bank advances secured by FSLIC notes, which is less than one percent of the System's total outstanding advances.

Mortgage-backed securities packaged by the Resolution Trust Corporation (RTC) are not issued, insured or guaranteed by the RTC in its corporate or agency capacity, and therefore are not eligible collateral under category (2). However, such securities may qualify as category (1)(ii) or category (4) collateral.

The Board interprets the inclusive "other real estate-related collateral" language of category (4), in conjunction with the 30 percent of capital limitation, to mean that category (4) permits limited amounts of mortgage-related collateral otherwise ineligible under category (1). For example, the following types of collateral may be considered eligible under category (4): Privately-issued mortgage-backed securities not otherwise eligible under category (1)(ii); second mortgage loans, including home equity loans; commercial real estate loans; and mortgage loan participations. This list is not intended to be exclusive.

Sectin 935.9(a)(4) of the proposed rule interprets category (4) broadly to include any other real estate-related collateral acceptable to the Bank, if such collateral has a readily ascertainable value and the Bank can perfect a security interest in such collateral. See 12 U.S.C. 1430(a)(4). Each Bank will determine the particular types of other real estate-related collateral acceptable to that Bank, consistent with the regulatory definition of eligible collateral, and will apprise its members accordingly. However, a member's use of category (4) collateral to secure advances is limited to 30 percent of its capital, calculated according to GAAP, at the time the advance is issued or renewed.

Proposed § 935.9(c) implements section 10(a)(5) of the Act by authorizing each Bank to require a member to pledge additional collateral to protect the Bank's secured position on outstanding advances, even though such collateral may not constitute "eligible collateral" under proposed § 935.9(a). See 12 U.S.C. 1430(a)(5). Section 935.9(d) of the proposed rule implements section 10(c) of the Act by providing that a Bank shall automatically have a lien upon, and shall hold, the Bank capital stock owned by a member as further collateral security for all indebtedness of the member to the Bank. See 12 U.S.C. 1430(c).

Section 935.9(e) of the proposed rule implements section 10(b) of the Act by prohibiting a Bank from accepting as collateral for an advance a home mortgage loan otherwise eligible as collateral for an advance, if any director, officer, employee, attorney or agent of the Bank or of the borrowing member is personally liable thereon, unless the board of directors of the Bank has specifically approved such acceptance by formal resolution, and the Board, or its designee, has endorsed such resolution. See 12 U.S.C. 1430(b).

G. Maintenance of Bank Security Interest in Pledged Collateral

Section 935.10 of the proposed rule implements section 10(f) of the Act (sometimes referred to as the "superlien" provision), by providing that, notwithstanding any other provision of law, the Banks have a priority interest in collateral pledged by a member ahead of other lien creditors, including a receiver or conservator, but not including bona fide purchasers for value of such collateral or creditors with a perfected security interest in the collateral under applicable state law. See 12 U.S.C. 1430(f).

This provision was added to the Act by the Competitive Equality Banking Act of 1987, Public Law 100–86, 101 Stat. 575, section 306(d) (1987). Congress, in establishing the Bank's senior creditor status, stated that the provision "recognizes the special position of the [Banks] * * *" as lenders to the home finance industry. H. Rep. No. 261, 100th Cong., 1st Sess. 163 (1987). The FDIC has adopted a regulation recognizing the special status of the Banks where the borrower of a Bank is in receivership. See 12 CFR 360.1.

Proposed § 935.11(a)(1) provides that a Bank may allow a borrowing member that is a depository institution to retain documents evidencing collateral pledged to the Bank, provided the member executes an agreement with the Bank to hold the collateral solely for the benefit of the Bank and subject to the Bank's direction and control.

A Bank's ability to perfect its security interest in collateral pledged by non-depository institution members, such as insurance companies, is dependent on state law to a greater extent than is the Bank's ability to perfect its security interest in collateral pledged by depository institutions. Proposed § 935.11(a)(2) requires a Bank to take any steps necessary to ensure that its security interest in all collateral pledged by non-depository institutions for an advance is as secured as its security interest in collateral pledged by depository institutions.

Section 935.11(a)(3) of the proposed rule provides that a Bank may at any time perfect its security interest in pledged collateral securing an advance to a member. This may include requiring a member to segregate pledged collateral, or to physically deliver collateral to the Bank or to a designated third party custodian operating on behalf of the Bank.

Proposed § 935.11(b) requires the Banks to regularly verify that collateral pledged to secure advances exists. A Bank shall establish written collateral verification procedures, with standards similar to those established by the Auditing Standards Board of the American Institute of Certified Public Accountants, for verifying the existence of collateral.

Under proposed § 935.12, each Bank is required to determine the value of the collateral securing its advances, according to established written valuation procedures. The valuation procedures used to determine the value of collateral shall be applied consistently and fairly to all borrowers. A Bank may require a member to obtain an appraisal to ascertain the value of collateral pledged to the Bank.

H. Restrictions on Advances to Members That are not Qualified Thrift Lenders (QTLs)

While FIRREA opened membership in the System to federally insured commercial banks and credit unions, it imposed further restrictions on borrowing by members that do not hold a certain level of housing-related assets, as specified in the Qualified Thrift Lender test (QTL test). See 12 U.S.C. 1430(e)(1). Section 935.13 of the proposed rule implements these new restrictions.

The QTL test, as defined in section 10(m) of the Home Owners' Loan Act (HOLA), as amended, 12 U.S.C.

1467a(m), requires that savings associations maintain at least 65 percent of their assets in "qualified thrift investments" (QTI).[1]

Section 10(e) of the Act, as amended by FIRREA, 12 U.S.C. 1430(e), permits members that are not QTLs to borrow from the Banks under the following conditions: (1) Non-QTLs may only use advances for housing finance purposes; (2) each Bank's aggregate amount of advances to non-QTL members shall not exceed 30 percent of the Bank's total advances; and (3) a Bank must grant priority for advances to QTL borrowers over non-QTL borrowers. *Id.* at 1430(e)(1), (2). In addition, a non-QTL borrower must hold Bank stock at the time it receives an advance in an amount equal to at least five percent of the borrower's total advances, divided by its actual thrift investment percentage (ATIP). See *id.* at 1430(e)(1).

The ATIP, used to determine compliance with the QTL test, is a ratio whose numerator is QTI and whose denominator is "portfolio assets." "Portfolio assets" is statutorily defined as total assets, less goodwill and other intangible assets, the value of an institution's business property, and a limited amount of liquid assets. See 12 U.S.C. 1467a(m)(4)(A), (B); 12 CFR 563.51(a), (e).

These limitations do not apply to: (1) A savings bank, as defined in section 3(g) of the Federal Deposit Insurance Act, as amended, 12 U.S.C. 1813(g); (2) a Federal savings association in existence as such on August 9, 1989 that (i) was chartered as a savings bank or cooperative bank prior to October 15, 1982 under state law, or (ii) that acquired its principal assets from an institution that was chartered prior to October 15, 1982 as a savings bank or cooperative bank under state law.

Section 10(m) of the HOLA further restricts non-QTL savings associations' access to Bank advances. Savings associations that fail the QTL test may not take down new Bank advances. See 12 U.S.C. 1467a(m)(3)(B)(i)(III). In addition, if such a savings association fails to regain its QTL status within three years, it must repay all outstanding Bank advances. See 12 U.S.C. 1467a(m)(3)(B)(ii)(II).

[1] QTI assets are divided into two "baskets," one available in unlimited amounts and the other limited to an amount equal to 20 percent of a savings association's portfolio assets. (See following discussion in text.) The unlimited basket contains housing-related assets (mortgage loans, home equity loans, and mortgage-backed securities, as well as certain government agency obligations); the 20 percent basket contains consumer loans and assets associated with community lending. See 12 U.S.C. 1467a(m)(4)(C); 12 CFR 563.51(f).

Since the QTL test, as defined in the HOLA, has application only to savings associations, the requirements in section 10(e) of the Act arguably may be interpreted as applying only to non-QTL savings association members. However, the HOLA specifically prohibits non-QTL savings associations from borrowing advances, making the section 10(e) restrictions, which merely limit advances access, irrelevant for these institutions. It seems unlikely that Congress would create special restrictions on access to advances only for a class of members that, for separate reasons, are not eligible to borrow from a Bank.

In addition, the fact that Congress specifically exempted state-chartered savings banks from section 10(e), but not commercial banks, credit unions or insurance companies, suggests that the requirement was intended to have broader application than just to savings associations. It seems clear, therefore, that Congress used the QTL test to determine access to advances because the test provides a benchmark for measuring a member's commitment to housing finance. The section 10(e) restrictions therefore are being interpreted to have application to all non-QTL System members which are eligible to borrow.

The OTS is responsible for monitoring savings associations' compliance with the QTL test, and for enforcing penalties applicable to institutions that fail the test. See 12 U.S.C. 1467a(m), 1813(q). Therefore, unless otherwise informed by the OTS, a Bank may assume that a member savings association is a QTL. Section 935.13(a) of the proposed rule provides that upon receipt of written notification from the OTS that a savings association member has been designated by the OTS as a non-QTL and is subject to the restrictions on advances applicable to non-QTL savings associations, a Bank shall not extend any new advances or renew existing advances to such member. Proposed § 935.13(b) provides that, upon receipt of written notification from the OTS that all advances held by a non-QTL savings association must be repaid because the association has not requalified as a QTL member within the three-year period, the Bank, in conjunction with the member, shall develop a schedule for the prompt and prudent repayment of all outstanding advances. The schedule shall be consistent with the Bank's and the member's safe and sound operations and shall be forwarded promptly by the Bank to the OTS and the Board.

Proposed § 935.13(c) implements the statutory restrictions on advances to non-QTL members other than savings associations. The Act requires that non-QTL borrowers use advances only for "housing finance" purposes. See 12 U.S.C. 1430(e)(1). ("Housing finance" is defined as "residential housing finance" for the purposes of this part 935). However, the fungibility of money makes it very difficult and costly to track the actual use of an advance. Therefore, § 935.13(c)(1)(i) of the proposed rule ties on non-QTL member's ability to borrow advances to its level of "residential housing finance assets," as determined pursuant to proposed § 935.13(c)(2). The Board believes that a member's level of residential housing finance assets is a reasonable and measurable indicator of a non-QTL borrower's commitment to housing finance and its use of Bank advances for the purpose.

Section 935.1 of the proposed rule defines "residential housing finance assets" as loans secured by residential real property; securities representing an ownership interest in, or collateralized by, loans secured by residential real property; participations in such loans; loans financed by CIP advances; or any loan or investment that the Board, in its discretion, otherwise determines is a residential housing finance asset. This definition includes home equity loans.

The definitions of residential housing finance assets in proposed § 935.1 includes all loans funded by CIP advances, although some of these loans may be for community and economic development projects and thus may be nonresidential. Section 10(i) of the Act specifically includes the financing of commercial and economic activities that benefit low- and moderate-income families and neighborhoods in the definition of community-oriented mortgage lending. See 12 U.S.C. 1430(i). The Board believes that this definition indicates that all loans funded under the CIP should be included in the definition of residential housing finance assets. Otherwise, the Banks could not provide CIP advances to a non-QTL, non-savings association member, or long-term CIP advances to any member, if the advances funded community and economic development projects. (The Act, as amended, requires that long-term advances only be used for purposes of funding residential housing finance, 12 U.S.C. 1430(a). See Section I below.) The Board specifically requests comments on the inclusion of CIP loans in its definition of residential housing finance assets.

Section 935.13(c)(l)(ii) of the proposed rule implements section 10(e)(1) of the Act by providing that a Bank shall

require a non-QTL non-savings association member to hold stock in its Bank at the time it receives an advance in an amount equal to at least five percent of the outstanding principal amount of the member's total advances, divided by the member's ATIP. The ATIP shall be calculated pursuant to proposed § 935.13(c)(3). See 12 U.S.C. 1430 (e)(1).

Proposed § 935.13(c)(1)(iii) implements sections 10(e)(2) of the Act by providing that a Bank may not extend an advance to a non-QTL non-savings association member if the advance would cause the Bank's aggregate amount of outstanding advances to non-QTL non-savings associations members to exceed 30 percent of the Bank's total outstanding advances. See 12 U.S.C. 1430(e)(2). In the event that a Bank's level of outstanding advances to QTL members declines such that existing non-QTL advances exceed 30 percent of total advances, the Bank will not be required to call any outstanding non-QTL advances in order to comply with the requirement.

Section 935.13(c)(2) of the proposed rule provides that prior to granting a non-QTL non-savings association member's request for an advance, a Bank shall determine that the principal amount of outstanding advances to the members does not exceed the total book value of the member's residential housing finance assets, as indicated on the most recent Call Report or financial statement made available by the member.

The Board believes that the proposed compliance monitoring mechanism for residential housing finance assets is an operationally feasible method for implementing the statutory requirement in 12 U.S.C. 1430(e)(1)(B), and is consistent with the legislative intent of FIRREA. The Board specifically requests comments on any alternative methods for verifying that advances are used for housing finance purposes.

Under proposed § 935.13(c)(3), the Banks are responsible for monitoring the ATIP of non-savings association members in order to determine their required capital stock holdings to support outstanding advances. The proposed rule requires a Bank to calculate a non-savings association member's ATIP annually, between January 1 and April 15, based upon financial data as of December 31 of the prior year. The Bank will use this calculation to determine the member's stock purchase requirement for the remainder of the current calendar year and until such time as the next annual calculation is performed. The Board specifically requests comment on this proposal for monitoring the ATIP of non-savings association members.

Section 935.13(c)(4) of the proposed rule provides that the requirements of paragraphs (c)(1), (2) and (3) of this section do not apply to certain state-chartered savings banks and Federal savings associations. Applications for AHP and CIP advances are exempt from the requirements of paragraph (c)(2). The Board is permitting this exemption because, as part of the AHP and CIP advance application process, members supply documentation which certifies that the funds will be used for residential housing finance purposes.

Proposed § 935.13(d) provides that if a Bank is unable to meet its members' aggregate demand for advances, the Bank shall give priority to the demands of its QTL members, taking into consideration the member's creditworthiness, the effect of making such advances on the Bank's financial integrity, the availability of compatible funding, and any other factors that the Bank determines to be relevant. The requirements of paragraph (d) do not apply to special, or otherwise limited, advance offerings by a Bank, which may be offered on a first come, first served basis. This section of the proposed rule implements section 10(e)(2) of the Act. See 12 U.S.C. 1430(e)(2).

Section 935.13(e) of the proposed rule requires that the written advances agreement required by § 935.4(b)(2) of this part stipulate that a Bank shall not fund commitments for advances made to then-QTL savings association members whose access to advances is subsequently restricted pursuant to paragraph (a) of this section, or to then-QTL members other than savings associations whose access to advances is restricted pursuant to paragraph (c) of this section.

I. Limitations on Long-Term Advances

Section 10(a) of the Act, as amended by FIRREA, provides that all *long-term* advances shall only be made for the purpose of providing funds for *residential housing finance*. 12 U.S.C. 1430(a) (emphasis added). Section 935.1 of the proposed rule defines a "long-term advance" as an advance with an original term to maturity greater than five years. Although there is no explicit definition of long-term advance in the Act, this proposed definition is consistent with the historic System definition of long-term, and with the definition of "long-term advances" provided in the Community Support Regulation promulgated by the Board. See 56 F.R. 58639, 58647 (Nov. 21, 1991).

The designation of five years or less as short-term and greater than five years as long-term derives in part from section 11(g) of the Act, see 12 U.S.C. 1431(g). That section requires that each Bank maintain investments in an amount equal to current member deposits, and includes advances with maturities of up to five years in the list of investments eligible to fulfill this liquidity requirement. In addition to this statutory foundation, the housing finance mission of the Banks points to a definition that exceeds five years, since as noted earlier, residential mortgage loans, which long-term advances are designed to finance, generally have an average life greater than five years.

Section 935.14(a) of the proposed rule implements section 10(a) of the Act by requiring that the Banks make long-term advances only for the purpose of enabling a member to fund or purchase new or existing residential housing finance assets. The Board intends to require that the Banks monitor the use of long-term advances for this purpose by using the same method proposed for monitoring advances to non-QTL borrowers.

Specifically, § 935.14(b)(1) of the proposed rule provides that, before funding an advance with a maturity greater than five years, a Bank shall determine that the borrowing member's level of outstanding advances with original maturities greater than five years does not exceed the total book value of the member's residential housing finance assets. The bank shall use the member's most recent TFR, Call Report or other financial statement to determine the total book value of the member's residential housing finance assets.

Applications for AHP and CIP advances are exempt from this requirement. As noted above, the definition of residential housing finance assets includes loans funded with CIP advances, which means that long-term CIP advances also may fund community and economic development projects.

J. Capital Stock Requirements and Redemption of Excess Stock

The Act sets forth two minimum stockholding requirements for System members (minimum subscription requirements). See 12 U.S.C. 1426(b)(1), (4); 1430(e)(3). The first minimum stock subscription requirement provides that each member shall purchase Bank capital stock in an amount equal to one percent of the aggregate unpaid principal of its home mortgage loans, home-purchase contracts and similar obligations, but not less than $500. See 12 U.S.C. 1426(b)(1), (4).

The second minimum subscription requirement provides that each member shall purchase and maintain stock, pursuant to the one percent requirement, as if at least 30 percent of its assets consisted of home mortgage loans (*i.e.*, the minimum purchase requirement equals .3 percent of a member's total assets). This provision only has application to members that have less than 30 percent of their assets in home mortgage loans. For these institutions, the .3 percent of total assets requirement is greater than the one percent of aggregate unpaid loan principal requirement. See 12 U.S.C. 1430(e)(3). These statutory minimum subscription requirements will be addressed more fully in a future Board rulemaking on Bank membership requirements.

In addition to the minimum subscription requirements, the Act specifies two stock purchase requirements based on advance levels (the advances-to-stock requirements). These requirements are implemented in proposed § 935.15(a). All members must hold stock in an amount equal to at least five percent of outstanding advances (*i.e.*, the aggregate amount of advances to a member may not exceed 20 times the amount paid in by such member for capital stock in the Bank). In addition, non-QTL non-savings association members applying for an advance must hold capital stock in the Bank at the time the advance is received in an amount equal to at least five percent of the member's total advances, divided by the member's ATIP. See 12 U.S.C. 1430(c), (e)(1), and proposed § 935.13(c)(1)(ii) discussed *supra*. A member's Bank stockholdings must be at least equal to the greater of its minimum subscription requirement for membership or its respective advances-to-stock requirement.

The Act authorizes the Banks to redeem stock in excess of the minimum requirements at a member's request. See 12 U.S.C. 1426(b)(1). The Banks annually recalculate a member's minimum subscription requirement, and members holding stock in excess of the recalculated amount may request that the Bank redeem the excess stock. *Id.* The Act also authorizes the Banks to unilaterally redeem stock upon the termination of a stockholder's membership in the System if the terminated member has no outstanding indebtedness to the Bank. See *id.* at 1426(e). The Act does not specifically address the issue of whether a Bank has the authority to redeem Bank stock held by a member in excess of the advances-to-stock requirements. In practice, the Banks redeem stock, at the request of a member, in excess of its advances-to-stock requirement throughout the year as advances are repaid, as long as the minimum subscription is maintained.

Section 935.15(b) of the proposed rule provides that a Bank, after providing 15 calendar days advance written notice to a member, may unilaterally redeem the portion of a member's stockholdings in excess of its advances-to-stock requirement, as long as the member's minimum subscription requirement is maintained. The Board believes that this express authority is a reasonable interpretation of the Act, and will aid the Banks in managing their equity levels as part of their financial planning. The 15-day advance notice requirement is designed to allow each member an opportunity to identify alternative investments for the amount received from redemption of the stock.

K. Advance Participations and Intradistrict Transfers of Advances

Section 10(d) of the Act requires Board approval for the participation or sale of advances to other Banks. Section 935.16 of the proposed rule incorporates existing Board policy which provides that, subject to the approval of the boards of directors of the relevant Banks and consistent with Board policy, a Bank may allow any other Bank to purchase a participation interest in any advance, together with an appropriate assignment of the underlying security therefor. See 12 U.S.C. 1430(d). Participation agreements already in place are deemed to meet the requirements of this part, and will not require further approval by the Bank's board or the Board.

Proposed § 935.17 provides that a Bank may allow one of its members to assume advances outstanding to another of its members, provided the assumption conforms to the requirements in this part 935 for the issuance of a new advance. A Bank may charge an appropriate fee for processing the transfer.

L. Special Advances to Savings Associations

Section 935.18(a) of the proposed rule implements section 10(h) of the Act by providing that, upon receipt of a written request from the Director of the OTS, the Banks may extend short-term advances to troubled but solvent member savings associations having reasonable and demonstrable prospects of returning to a satisfactory financial condition. See 12 U.S.C. 1430(h). Proposed § 935.18(b), consistent with section 10(h) of the Act, provides that any advance made pursuant to this section shall be at the interest rate applicable to short-term advances of similar type and maturity made available to members that do not pose such a supervisory concern and shall be subject to the same collateral requirements applicable to other advances. The requirements of the Act, therefore, preclude risk-based pricing of advances made available under this section. The statutory provision regarding these liquidity advances specifies that extending such advances is not mandatory. See 12 U.S.C. 1430(h). The Board expects that a Bank will consider the effect on its own financial integrity of agreeing to make such advances.

M. Liquidation of Advances Upon Termination of Membership

Section 935.19 of the proposed rule implements section 6(e) of the Act by specifying that if an institution's membership in a Bank is terminated, the indebtedness of such institution to the Bank shall be liquidated in an orderly manner, as determined by the Bank. See 12 U.S.C. 1426(e). Such liquidation shall be deemed a prepayment of any such indebtedness and subject to any applicable prepayment fees. A Bank shall not be required to call any such indebtedness prior to maturity if doing so would be inconsistent with the Bank's safe and sound operation.

Subpart B—Advances to Nonmembers

A. Scope

Section 935.20 of the proposed rule provides that advances to nonmembers shall be subject to the provisions in subpart A of this part 935, except as otherwise provided in §§ 935.21 and 935.22 of subpart B of this part 935. This requirement is designed to ensure that nonmember advance programs operate within the same regulatory framework as member advance programs and without special benefits to nonmembers.

B. Advances to SAIF

Section 935.21(a) of the proposed rule implements section 11(k) of the Act, providing that upon receipt of a written request from the FDIC, a Bank may make advances to the FDIC for the use of the SAIF. Pursuant to proposed § 935.21(b), such an advance shall: (1) Bear a rate of interest not less than the Bank's marginal cost of funds, taking into account the maturities involved and reasonable administrative costs; (2) be for a maturity acceptable to the Bank; (3) be subject to any prepayment, commitment or other appropriate fees; and (4) be adequately secured by collateral acceptable to the Bank. See 12 U.S.C. 1431(k).

C. Advances to Nonmember Mortgagees

Under Section 10b of the Act, a Bank may make advances to nonmembers that are approved mortgagees under title II of the National Housing Act (NHA) (12 U.S.C. 1707 *et seq.*). See 12 U.S.C. 1430b. The administration of title II of the NHA is the responsibility of the Federal Housing Administration (FHA), a unit of the Department of Housing and Urban Development (HUD). Approved mortgagees have HUD authorization to buy and sell FHA-insured mortgages.

The Board has approved a program permitting the Dallas Bank to lend up to $2 million over a period of two years to the New Mexico Mortgage Finance Authority to promote the availability of affordable housing in that state. Similar programs are being considered by other Banks. The Board believes that these programs are in keeping with the System's mission to provide housing finance for low- and very low-income families. The proposed rule revises the Board's current regulation to include specific criteria for nonmember mortgagee eligibility for advances, and requirements governing Bank advances to such entities.

Section 935.22(a) of the proposed rule authorizes a Bank, subject to the Act and subpart B of this part 935, to make advances to an entity that is not a member of a Bank, if the entity qualifies as a nonmember mortgagee pursuant to section 10b of the Act and proposed § 935.22(b).

Proposed § 935.22(b) contains the four statutory conditions that a nonmember mortgagee must meet in order to borrow from a Bank:

(1) The mortgagee must be chartered under law and have succession. A corporation, or other entity that has rights, characteristics and powers under applicable law similar to those granted a corporation, or a government agency, meet this requirement;

(2) The mortgagee must be subject, pursuant to statute or regulation, to the inspection, supervision and oversight of a Federal, state or local government agency;

(3) The mortgagee must lend its own funds as its principal activity in the mortgage field; and

(4) The mortgagee must be approved by HUD as a "mortgagee" pursuant to HUD's regulations (24 CFR part 203), under title II of the NHA (12 U.S.C. 1707—1715z–20).

Pursuant to the Act, advances made under this section are not subject to certain other provisions of the Act, *e.g.*, member stock purchase and collateral requirements. See 12 U.S.C. 1430b. However, as noted above, where appropriate, the proposed rule makes the regulatory requirements that are applicable to the Banks' member advances programs also applicable to their nonmember advances programs, except as specifically provided in this proposed § 935.22. The Banks are expected to apply to nonmember mortgagees the same advance application requirements, credit underwriting standards, collateral safekeeping requirements, restrictions on lending to institutions without positive tangible capital, advance maturity requirements, prepayment fees, and other regulatory requirements applicable to members under subpart A of this part 935.

Section 935.22(c) of the proposed rule provides that prior to establishing a program to lend to nonmember mortgagees, each Bank shall adopt a policy on advances to nonmember mortgagees consistent with the requirements of the Act, part 935 of the Board's regulations, and general guidelines of the Board.

Section 935.22(d)(1)(i) of the proposed rule requires the Banks to price advances to nonmember mortgagees to cover the funding, operating and administrative costs associated with making such advances. The pricing may reflect the credit risk associated with lending to the nonmember mortgagee, or other reasonable differential pricing criteria, provided that the terms for differential pricing are applied equally to all nonmember mortgagee borrowers.

In addition, proposed § 935.22(d)(ii) provides that the pricing of advances shall compensate the Bank for the absence of a capital investment by the nonmember mortgagee in the Bank. A Bank may implement this provision by requiring that the nonmember mortgagee hold a compensating balance in a deposit account with the Bank. Proposed § 935.22(d)(2) provides that, in accordance with section 10b of the Act, the principal amount of any advance made to a nonmember mortgagee may not exceed 90 percent of the unpaid principal of the collateral pledged as security.

Proposed § 935.22(e)(1) implements the Act by providing that nonmember mortgagee advances may be collateralized with FHA-insured mortgages. See 12 U.S.C. 1430b. Section 935.22(e)(2) of the proposed rule permits a Bank to additionally accept as collateral, securities representing a *pro rata* share of the principal and interest payments due on a pool of FHA-insured mortgage loans (GNMAs), provided that a Bank shall require a nonmember mortgagee to provide evidence that the securities are backed solely by FHA-insured mortgages.

Section 935.22(f)(1) of the proposed rule provides that a Bank shall require a nonmember mortgagee applying for an advance to agree in writing to inform the Bank promptly of any change in its status as a nonmember mortgagee. The Bank will not be required to call outstanding advances to a nonmember that loses its HUD-approved mortgagee status or otherwise ceases to fulfill the eligibility qualifications for a nonmember mortgagee under proposed § 935.22(b). However, pursuant to proposed § 935.22(f)(2), it may not extend a new advance or renew an existing advance to the nonmember until the Bank is satisfied that the entity again fulfills the requirements for a nonmember mortgagee provided herein.

Under proposed § 935.22(g), a Bank may, from time to time, require a nonmember mortgagee borrower to provide evidence that it continues to satisfy all of the qualifications and requirements contained in this section. The Board specifically requests comment on all aspects of the proposed nonmember mortgagee requirements.

Board Statements of Policy and Former Federal Home Loan Bank Board Policy on Advances

The proposed rule would incorporate the Statements of Policy on advances currently contained in 12 CFR part 940 to the extent the Board deems appropriate. The proposed rule would remove and reserve part 940. The proposed rule also is intended to supersede the former Federal Home Bank Board's policy on advances, adopted by minute entry on July 6, 1988. This minute entry was not published in the **Federal Register**.

Regulatory Flexibility Act

The proposed rule largely implements statutory requirements applicable to all System members, regardless of their size. The Board is not at liberty to make adjustments to those statutory requirements to accommodate small entities. The Board has not imposed any additional regulatory requirements that will have a disproportionate impact on small entities. The only significant requirement added by the Board is limits on advances to members without positive tangible capital. The Board has written the proposed rule specifically so that in many cases members can meet the requirements of the proposed rule by providing copies of reports already generated for other purposes. For these reasons, it is certified, pursuant to section 605(b) of the Regulatory

Flexibility Act, 5 U.S.C. 605b, that this proposed rule, as promulgated, will not have a significant economic impact on a substantial number of small entities.

List of Subjects

12 CFR Part 935

Advances, credit, Federal home loan banks.

12 CFR Part 940

Advances, Federal home loan banks.

The Finance Board hereby proposes to amend chapter IX, title 12, Code of Federal Regulations, as follows:

1. Part 935 is revised to read as follows:

PART 935—ADVANCES

Subpart A—Advances to Members

Sec.

935.1 Definitions.
935.2 Bank credit mission.
935.3 Bank advances policy.
935.4 Authorization and application for advances; obligation to repay advances.
935.5 Limitations on access to advances.
935.6 Terms and conditions for advances.
935.7 Interest rates on Community Investment Program advances.
935.8 Fees.
935.9 Collateral.
935.10 Banks as secured creditors.
935.11 Pledged collateral; verification.
935.12 Collateral valuation; appraisals.
935.13 Restrictions on advances to members that are not Qualified Thrift Lenders.
935.14 Limitations on long-term advances.
935.15 Capital stock requirements; unilateral redemption of excess stock.
935.16 Advance participations.
935.17 Intradistrict transfer of advances.
935.18 Special liquidity advances to savings associations.
935.19 Liquidation of advances upon termination of membership.

Subpart B—Advances to Nonmembers

935.20 Scope.
935.21 Advances to the Savings Association insurance Fund.
935.22 Advances to nonmember mortgagees.

Authority: 12 U.S.C. 1422b(a)(1), 1426, 1429, 1430, 1430b, 1431.

Subpart A—Advances to Members

§ 935.1 Definitions.

As used in this part:

Act means the Federal Home Loan Bank Act, as amended (12 U.S.C. 1421 *et seq.*).

Actual thrift investment percentage or *ATIP* means generally the percentage of a member's assets actually invested in, or held as, qualified thrift investments, as defined more specifically in section 10(m)(4) of the Home Owners' Loan Act (12 U.S.C. 1467a(m)(4)) and in the implementing regulations of the OTS at 12 CFR 563.51. The ATIP will be calculated and used for purposes of this part for all members of the Banks, whether or not they are savings associations.

Advance means a loan from a Bank pursuant to the Act that is:

(1) Provided pursuant to a written agreement;

(2) Supported by a note or other written evidence of the borrower's obligation; and

(3) Fully secured by collateral in accordance with the Act.

Affordable Housing Program or *AHP* means the program described in section 10(j) of the Act (12 U.S.C. 1430(j)) and part 960 of the Board's regulations.

Appropriate Federal banking agency. The term "appropriate Federal banking agency" has the same meaning as used in 12 U.S.C. 1813(q) and for federally insured credit unions shall mean the National Credit Union Administration.

Bank means a Federal Home Loan Bank established under the authority of the Act.

Board means the Federal Housing Finance Board established under the authority of the Act, its governing Board of Directors, or an official duly authorized to act on its behalf.

Combination business or farm property means real property for which the total appraised value is attributable to residential, and business or farm uses.

Community Investment Program or *CIP* means the program(s) described in section 10(i) of the Act (12 U.S.C. 1430(i)).

Depository institution means a bank or savings association, as defined in 12 U.S.C. 1813, or a credit union, as defined in 12 U.S.C. 1752.

Dwelling unit means a single, unified combination of rooms designed for residential use by one household.

FDIC means the Federal Deposit Insurance Corporation.

GAAP means Generally Accepted Accounting Principles.

HUD means the Department of Housing and Urban Development.

Improved residential real property means residential real property excluding real property to be improved, or in the process of being improved, by the construction of dwelling units.

Insurer means:

(1) the FDIC for banks and savings associations; or

(2) the National Credit Union Share Insurance Fund for credit unions.

Long-term advance means, for the purposes of this part, an advance with an original term to maturity greater than five years.

Manufactured housing means a manufactured home as defined in section 603(6) of the Manufactured Home Construction and Safety Standards Act of 1974, as amended (42 U.S.C. 5402(6)).

Member means an institution that has been admitted to membership in a Bank and, [pursuant to the requirements of § 933.7 of this chapter], has purchased capital stock in the Bank.

Mortgage-backed security means, for purposes of this part, an equity security representing an ownership interest in a pool of fully disbursed, whole mortgage loans on improved residential property or a collateralized mortgage obligation, mortgage-backed bond or other debt security backed entirely by fully disbursed, whole first mortgage loans on improved residential real property.

Multifamily property means:

(1) Real property containing five or more dwelling units; or

(2) Real property containing five or more dwelling units with commercial units combined, provided the property is primarily residential.

Nonresidential real property means real property not used for residential purposes, including business or industrial property, hotels, motels, churches, hospitals, nursing homes, educational and charitable institutions, dormitories, clubs, lodges, association buildings, "homes" for elderly persons, golf courses, recreational facilities, farm property not containing a dwelling unit, or similar types of property, except as otherwise determined by the Board in its discretion.

OCC means The Office of the Comptroller of the Currency within the United States Department of the Treasury.

One-to-four family property means any of the following:

(1) Real property containing:

(i) One-to-four dwelling units; or

(ii) More than four dwelling units if each unit is separated from the other units by dividing walls that extend from ground to roof, including rowhouses, townhouses or similar types of property;

(2) Manufactured housing if:

(i) Applicable state law defines the purchase or holding of manufactured housing as the purchase or holding of real property; and

(ii) The loan to purchase the manufactured housing is secured by such manufactured housing as evidenced by a mortgage or other lien on real property;

(3) Individual condominium dwelling units or interests in individual cooperative housing dwelling units that are part of a condominium or cooperative building without regard to

the number of total dwelling units therein; or

(4) Real property containing one-to-four dwelling units with commercial units combined, provided the property is primarily residential.

OTS means the Office of Thrift Supervision.

Qualified Thrift Lender or *QTL* means the term defined in section 10(m)(1) of the Home Owners' Loan Act (12 U.S.C. 1467a(m)(1)) and in the implementing regulations of the OTS (12 CFR 563.50). A non-savings association member which otherwise meets the QTL test will be treated as a QTL for purposes of this part.

Qualified Thrift Lender test or *QTL test* means the formula described generally in section 10(m) of the Home Owners' Loan Act (12 U.S.C. 1467a(m)) and in the implementing regulations of the OTS (12 CFR 563.50). The QTL test will be applied to all members of a Bank for purposes of this part.

Residential housing finance assets means any of the following:

(1) Loans secured by residential real property;

(2) Mortgage-backed securities;

(3) Participations in loans secured by residential real property;

(4) Loans financed by CIP advances; or

(5) Any loans or investments which the Board, in its discretion, otherwise determines to be residential housing finance assets.

Residential real property means any of the following:

(1) One-to-four family property;

(2) Multifamily property;

(3) Real property to be improved by the construction of dwelling units;

(4) Real property in the process of being improved by the construction of dwelling units;

(5) Combination business or farm property, provided that at least 50 percent of the total appraised value of the combined property is attributable to the residential portion of the property;

(6) The term does not include nonresidential real property as defined in this section.

Savings association means a savings association as defined in section 3(b) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1813(b)).

State means a state of the United States, the District of Columbia, Guam, Puerto Rico or the U.S. Virgin Islands.

State regulator means a state insurance commissioner or state regulatory entity with primary responsibility for supervising a member that is not a federally insured depository institution.

Tangible capital means:

(1) Capital, calculated according to GAAP, less "intangible assets" as reported in the member's Thrift Financial Report for members whose primary Federal regulatory is the OTS, or as reported in the Report of Condition and Income for members whose primary Federal regulator is the FDIC, the OCC or the Board of Governors of the Federal Reserve System; or

(2) Capital calculated according to GAAP, less intangible assets, as defined by a Bank for members which are not regulated by the OTS, the FDIC, the OCC, or the Board of Governors of the Federal Reserve System.

Whole mortgage pass-through security means, for purposes of this part, a security representing the entirety of the beneficial interest in a pool of fully disbursed, whole first mortgage loans on improved residential real property.

§ 935.2 Bank credit mission.

(a) The primary credit mission of the Banks shall be to enhance the availability of residential mortgage credit.

(b) Each Bank shall fulfill its primary credit mission by:

(1) Providing a readily available, economical and affordable source of funds in the form of advances to its members; and

(2) Offering such advances products or programs that satisfy the credit needs of its members.

(c) Notwithstanding paragraph (b) of this section, each Bank shall place such limitations on the making of advances to its members as shall:

(1) Be specifically prescribed by statute, regulation or policy;

(2) Protect the financial integrity of such Bank and accommodate the practical constraints associated with the Bank's ability to raise funds; or

(3) Be required by the Board.

§ 935.3 Bank advances policy.

(a) Each Bank's board of directors shall adopt, and review at least semiannually, a policy on advances to members consistent with the requirements of the Act, this part, and the general guidelines of the Board, as reflected in its resolutions, orders or manuals.

(b) A Bank's board of directors may designate officers authorized to extend or deny credit and take other action consistent with the Bank's advances policy.

(c) A Bank may make exceptions to its advances policy only with the approval of its board of directors, a committee thereof, or officers specifically authorized by the board of directors to approve such exceptions, provided that any such exceptions shall comply with the Act, this part and Board policies and guidelines.

(d) A Bank's board of directors shall:

(1) Require the officers designated pursuant to paragraph (b) of this section to report promptly to it, or a designated committee of the board, all actions taken under this section; and

(2) Review such actions for compliance with this section.

§ 935.4 Authorization and application for advances; obligation to repay advances.

(a) *Application for advances.* A Bank may accept oral or written applications for advances from its members.

(b) *Obligation to repay advances.* (1) A Bank shall require any member applying for an advance to enter into a primary and unconditional obligation to repay such advance and all other indebtedness to the Bank, together with interest and any unpaid costs and expenses in connection therewith, according to the terms under which such advance or other indebtedness was made.

(2) Such obligations shall be evidenced by a written advances agreement that shall be reviewed by the Bank's legal counsel to ensure such agreement is in compliance with applicable law.

(c) *Secured advances.* (1) Each Bank shall make only fully secured advances to its members as set forth in the Act, the provisions of this part and policies established by the Board.

(2) The Bank shall execute a written security agreement with each borrowing member which establishes the Bank's security interest in collateral securing advances.

(3) Such written security agreement shall, at a a minimum, describe the type of collateral securing the advances and give the Bank a perfectible security interest in the collateral.

(d) *Approval*—(1) *By the Bank's board of directors.* Applications for advances, advances agreements and security agreements shall be in substantially such form as approved by the Bank's board of directors, or a committee thereof specifically authorized by the board of directors to approve such forms.

(2) *By the Board.* Each Bank's forms for all advances applications, advances agreements and security agreements are deemed approved by the Board if such forms are consistent with the requirements of this part. Each Bank shall provide copies of its current forms for all advances agreements and security agreements, and any

substantive revisions thereto, to the Board.

§ 935.5 Limitations on access to advances.

(a) *Credit underwriting.* A Bank, in its discretion, may:

(1) Limit or deny a member's application for an advance if, in the Bank's judgment, such member:

(i) Is engaging or has engaged in any unsafe or unsound business practices;

(ii) Has inadequate capital;

(iii) Is sustaining operating losses;

(iv) Has financial or managerial deficiencies, as determined by the Bank, that bear upon the member's creditworthiness; or

(v) Has any other deficiencies, as determined by the Bank; or

(2) Approve a member's application for an advance subject to such additional terms as the Bank may prescribe, pursuant to the provisions of the Act, this part and any policy guidelines of the Board.

(b) *Advances to members without positive tangible capital*—(1) *New Advances.* A Bank shall not make a new advance available to a member without positive tangible capital unless:

(i) The member's appropriate Federal banking agency or insurer requests in writing that the Bank make such advance; and

(ii) The Bank determines in its discretion that it may safely make such advance to the member. The Bank shall promptly inform the Board of any such request.

(2) *Renewal of maturing advances.* (i) A Bank may renew an existing advance to a member without positive tangible capital for successive terms of up to 30 days each if the Bank determines that it may safely make such renewals to the member.

(ii) A Bank may renew an existing advance to a member without positive tangible capital for a term greater than 30 days at the written request of the appropriate Federal banking agency or insurer, if the Bank determines that it may safely make such renewal.

(c) *Members without Federal regulators.* The provisions of paragraph (b) of this section, in the case of members that are not federally insured depository institutions, may be implemented upon written request to the Bank from the member's state regulator.

(d) *Reporting.* (1) Each Bank shall provide the Board with a monthly report of the Bank's advances and commitments outstanding to each of its members.

(2) Such monthly report shall be in a format or on a form prescribed by the Board.

(3) Each Bank shall, upon written request from a member's appropriate Federal banking agency, insurer or state regulator, provide to such entity information on advances and commitments outstanding to the member.

(e) *Advance commitments.* The written advances agreement required by § 935.4(b)(2) of this part shall stipulate that the Bank shall not fund commitments for advances previously made to members whose access to advances is restricted pursuant to this section.

§ 935.6 Terms and conditions for advances.

(a) *Advance maturities.* Each Bank shall offer advances with maturities of up to ten years, and may offer advances with longer maturities consistent with the safe and sound operation of the Bank.

(b) *Advance pricing*—(1) *General.* Each Bank shall price its advances to members taking into account the following factors:

(i) The marginal cost to the Bank of raising matching maturity funds in the marketplace; and

(ii) The administrative and operating costs associated with making such advances to members.

(2) *Differential pricing.* (i) Each Bank may, in pricing its advances, distinguish among members based upon its assessment of:

(A) The credit risk to the Bank of lending to any particular member; or

(B) Other reasonable criteria that may be applied equally to all members.

(ii) Each Bank shall establish written standards and criteria for such differential pricing and shall apply such standards and criteria consistently and without discrimination to all members applying for advances.

(3) *Affordable Housing Program Advances.* The advance pricing policies and procedures contained in paragraph (b)(1) of this section shall not apply in the case of a Bank's AHP advances made pursuant to part 960 of this chapter.

(c) *Authorization for pricing advances.* (1) A Bank's board of directors, a committee thereof, or the Bank's president, if so authorized by the Bank's board of directors, shall set the rates of interest on advances consistent with paragraph (b) of this section.

(2) A Bank president authorized to set interest rates on advances pursuant to this paragraph (c) may delegate any part of such authority to any officer or employee of Bank.

§ 935.7 Interest rates on Community Investment Program advances.

Each Bank shall price its CIP advances as provided in § 935.6 of this part, provided that the cost of such CIP advances shall not exceed the Bank's cost of issuing consolidated obligations of comparable maturity, taking into account reasonable administrative costs.

§ 935.8 Fees.

(a) *Prepayment fees.* (1) Each Bank shall establish and charge a prepayment fee which sufficiently compensates the Bank for providing a prepayment option on an advance, and which acts to make the Bank financially indifferent to the borrower's decision to repay the advance prior to its maturity date.

(2) Prepayment fees are not required for:

(i) Advances with terms to maturity or repricing periods of six months or less;

(ii) Advances funded by callable debt; or

(iii) Advances which are otherwise appropriately hedged so that the Bank is financially indifferent to their prepayment.

(3) The board of directors of each Bank, a designated committee thereof, or officers specifically authorized by the board of directors, may waive a prepayment fee only if such waiver will not result in an economic loss to the Bank. Any such waiver must subsequently be ratified by the board of directors.

(b) *Commitment fees.* Each Bank is authorized to charge a fee for the Bank's commitment to fund an advance.

(c) *Other fees.* Each Bank is authorized to charge other fees as it deems necessary and appropriate.

§ 935.9 Collateral.

(a) *Eligible security for advances.* At the time of origination or renewal of an advance, each Bank shall obtain, and thereafter maintain, a security interest in collateral that meets the requirements of one or more of the following categories:

(1) *Mortgage loans and privately issued securities.* (i) Fully disbursed, whole first mortgage loans on improved residential real property not more than 90 days delinquent; or

(ii) Whole mortgage pass-through securities as defined in § 935.1 of this part.

(2) *Agency securities.* Securities issued, insured or guaranteed by the United States Government, or any agency thereof, including without limitation mortgage-backed securities.

as defined in § 935.1 of this part, issued or guaranteed by:

(i) the Federal Home Loan Mortgage Corporation;

(ii) the Federal National Mortgage Association; or

(iii) the Government National Mortgage Association.

(3) *Deposits.* Deposits in a Bank.

(4) *Other collateral.* (i) Except as provided in paragraph (a)(4)(iii) of this section, other real estate-related collateral acceptable to the Bank if:

(A) Such collateral has a readily ascertainable value; and

(B) The Bank can perfect a security interest in such collateral.

(ii) Eligible other real estate-related collateral may include, but is not limited to:

(A) Non-agency mortgage-backed securities not otherwise eligible under paragraph (a)(1)(ii) of this section;

(B) Second mortgage loans, including home equity loans;

(C) Commercial real estate loans; and

(D) Mortgage loan participations.

(iii) A Bank shall not permit the aggregate amount of outstanding advances to any one member, secured by such other real estate-related collateral, to exceed 30 percent of such member's capital, as calculated according to GAAP, at the time the advance is issued or renewed.

(b) *Bank restrictions on eligible collateral.* A Bank at its discretion may further restrict the types of eligible collateral acceptable to the Bank as security for an advance, based upon the creditworthiness or operations of the borrower, the quality of the collateral, or other reasonable criteria.

(c) *Additional collateral.* The provisions of paragraph (a) of this section shall not affect the ability of any Bank to take such steps as it deems necessary to protect its secured position on outstanding advances, including requiring additional collateral, whether or not such additional collateral conforms to the requirements for eligible collateral in paragraph (a) of this section or section 10 of the Act (12 U.S.C. 1430).

(d) *Bank stock as collateral.* (1) Pursuant to section 10(c) of the Act (12 U.S.C. 1430(c)), a Bank shall have a lien upon, and shall hold, the stock of a member in the Bank as further collateral security for all indebtedness of the member to the Bank.

(2) The written security agreement used by the Bank shall provide that the borrowing member's Bank stock is assigned as additional security by the member to the Bank.

(3) The security interest of the Bank in such member's Bank stock shall be entitled to the priority provided for in section 10(f) of the Act (12 U.S.C. 1430(f)).

(e) *Collateral security requiring formal approval.* No home mortgage loan otherwise eligible to be accepted as collateral for an advance by a Bank under this section shall be accepted as collateral for an advance if any director, officer, employee, attorney or agent of the Bank or of the borrowing member is personally liable thereon, unless the board of directors of the Bank has specifically approved such acceptance by formal resolution, and the Board or its designee has endorsed such resolution.

§ 935.10 Banks as secured creditors.

(a) Except as provided in paragraph (b) of this section, notwithstanding any other provision of law, any security interest granted to a Bank by a member, or by an affiliate of such member, shall be entitled to priority over the claims and rights of any party, including any receiver, conservator, trustee or similar party having rights of a lien creditor, to such collateral.

(b) A Bank's security interest as described in paragraph (a) of this section shall not be entitled to priority over the claims and rights of a party that:

(1) Would be entitled to priority under otherwise applicable law; and

(2) Is an actual bona fide purchaser for value of such collateral or is an actual secured party whose security interest in such collateral is perfected in accordance with applicable state law.

§ 935.11 Pledged collateral; verification.

(a) *Collateral safekeeping.* (1) A Bank may permit a member that is a depository institution to retain documents evidencing collateral pledged to the Bank, provided that the Bank and such member have executed a written security agreement pursuant to § 935.4(c) of this part whereby such collateral is retained solely for the Bank's benefit and subject to the Bank's control and direction.

(2) A Bank shall take any steps necessary to ensure that its security interest in all collateral pledged by non-depository institutions for an advance is as secured as its security interest in collateral pledged by depository institutions.

(3) A Bank may at any time perfect its security interest in collateral securing an advance to a member.

(b) *Collateral verification.* Each Bank shall establish written procedures, with standards similar to those established by the Auditing Standards Board of the American Institute of Certified Public Accountants, for verifying the existence of collateral securing the Bank's advances, and shall regularly verifying the existence of the collateral securing its advances in accordance with such procedures.

§ 935.12 Collateral valuation; appraisals.

(a) Each Bank shall establish written procedures for determining the value of the collateral securing the Bank's advances, and shall determine the value of such collateral in accordance with such procedures.

(b) Each Bank shall apply the valuation procedures consistently and fairly to all borrowing members, and the valuation ascribed to any item of collateral by the Bank shall be conclusive as between the Bank and the member.

(c) A Bank may require a member to obtain an appraisal of any item of collateral, and to perform such other investigations of collateral as the Bank deems necessary and proper.

§ 935.13 Restrictions on advances to members that are not qualified thrift lenders.

(a) *Restrictions on advances to non-QTL savings associations.* A Bank shall not make a new advance or renew an existing advance to a savings association member after receiving written notification from the OTS that such savings association has been designated as a non-QTL and that the restrictions on advances that apply to non-QTLs should be enforced.

(b) *Repayment of advances by non-QTL savings associations.* (1) Upon receipt of written notification from the OTS that all advances held by a savings association must be repaid because the association has not requalified as a QTL member, the Bank, in conjunction with the non-QTL savings association member, shall develop a schedule for the prompt and prudent repayment of outstanding advances by that member, consistent with the member's and the Bank's safe and sound operations.

(2) Notice of the agreed upon schedule referred to in paragraph (b)(1) of this section shall be provided promptly by the Bank to the OTS and the Board.

(c) *Restrictions on advances to non-QTL members other than savings associations.* (1) Except as provided in paragraphs (c)(4) and (c)(5) of this section, a Bank may make or renew an advance to a non-QTL member that is not a savings association only under the following conditions:

(i) Non-QTL members of a Bank that are not savings associations may only receive advances for the purpose of funding or purchasing new or existing

residential housing finance assets, as determined pursuant to paragraph (c)(2) of this section;

(ii) The member holds Bank stock at the time it receives the advance in an amount equal to at least five percent of the outstanding principal amount of the member's total advances, divided by such member's ATIP, calculated pursuant to paragraph (c)(3) of this section; and

(iii) The aggregate amount of a Bank's advances to non-QTL non-savings association members shall not exceed 30 percent of the amount of the Bank's total outstanding advances, at the time such advances are made or renewed.

(2) Prior to approving an application for an advance, a Bank shall determine that the principal amount of all advances outstanding to the non-QTL non-savings association member at the time the advance is requested does not exceed the total book value of residential housing finance assets held by such member, which shall be determined using the member's most recent Report of Condition and Income or financial statement made available by the member.

(3) The Bank shall calculate each non-QTL non-savings association member's ATIP annually, between January 1 and April 15, based upon financial data as of December 31 of the prior calendar year.

(4) The requirements of paragraphs (c)(1), (2) and (3) of this section shall not apply to:

(i) A savings bank, as defined in section 3(g) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1813(g)); or

(ii) A Federal savings association in existence as such on August 9, 1989 that:

(A) Was a state chartered savings bank or cooperative bank before October 15, 1982; or

(B) Acquired its principal assets from an institution that was a state chartered savings bank or cooperative bank before October 15, 1982.

(5) The requirements of paragraph (c)(2) of this section shall not apply to applications from members for AHP or CIP advances.

(d) *Priority for QTL members.* (1) Except as provided in paragraph (d)(3) of this section, if a Bank is unable to meet the aggregate advance demand of all of its members, the Bank shall give priority to applications for advances from its QTL members, subject to the following considerations:

(i) The effect of making the advances on the financial integrity of the Bank;

(ii) The member's creditworthiness;

(iii) The availability of funding with maturities compatible with advance applications; and

(iv) Any other factors that the Bank determines to be relevant.

(2) The institutions identified in paragraph (c)(4) of this section shall be treated as QTLs for purposes of this paragraph.

(3) The requirements of paragraphs (d)(1) and (2) of this section shall not apply to a Bank's special, or otherwise limited, advance offerings.

(e) *Advance commitments.* The written advance agreement required by § 935.4(b)(2) of this part shall stipulate that the Bank shall not fund commitments for advances previously made to members whose access to advances is restricted pursuant to paragraph (a) or (c) of this section.

§ 935.14 Limitations on long-term advances.

(a) A Bank shall make long-term advances only for the purpose of enabling a member to fund or purchase new or existing residential housing finance assets.

(b)(1) Prior to approving an application for a long-term advance, a Bank shall determine that the principal amount of all long-term advances currently held by the member does not exceed the total book value of residential housing finance assets held by such member. The Bank shall determine the total book value of such residential housing finance assets, using the member's most recent Thrift Financial Report, Report of Condition and Income, or financial statement made available by the member.

(2) Applications for AHP and CIP advances are exempt from the requirements of this section.

§ 935.15 Capital stock requirements; unilateral redemption of excess stock.

(a) *Capital stock requirement for advances.* (1) At no time shall the aggregate amount of outstanding advances made by a Bank to a member exceed 20 times the amount paid in by such member for capital stock in the Bank.

(2) A non-QTL non-savings association member shall hold stock in the Bank at the time it receives an advance in an amount equal to at least the amount of stock required to be held pursuant to § 935.13(c)(1)(ii) of this part.

(b) *Unilateral redemption of excess stock.* A Bank, after providing 15 calendar days' advance written notice to a member, may unilaterally redeem that amount of the member's Bank stock that exceeds the stock requirements set forth in paragraph (a) of this section provided the minimum amount required in section 6(b)(1) of the Act is maintained.

§ 935.16 Advance participations.

A Bank may allow any other Bank to purchase a participation interest in any advance, and any other Bank may accept a participation interest therein, together with an appropriate assignment of security therefor, subject to the approval of the boards of directors of the relevant Banks and consistent with Board policy.

§ 935.17 Intradistrict transfer of advances.

A Bank may allow one of its members to assume an advance obligation of another of its members, provided the assumption complies with the requirements of this part governing the issuance of new advances. A Bank may charge an appropriate fee for processing the transfer.

§ 935.18 Special liquidity advances to savings associations.

(a) *Eligible institutions.* (1) A Bank, upon receipt of a written request from the Director of the OTS, may make short-term advances to a member savings association.

(2) Such request must certify that the member:

(i) Is solvent but presents a supervisory concern to the OTS because of the member's financial condition; and

(ii) Has reasonable and demonstrable prospects of returning to a satisfactory financial condition.

(b) *Terms and conditions.* Advances made by a Bank to a member savings association under this section shall:

(1) Be subject to all applicable collateral requirements of the Bank, this part and section 10(a) of the Act (12 U.S.C. 1430(a)); and

(2) Be at the interest rate applicable to advances of similar type and maturity that are made available to other members that do not pose such a supervisory concern.

§ 935.19 Liquidation of advances upon termination of membership.

If an institution's membership in a Bank is terminated, the Bank shall determine an orderly schedule for liquidating any indebtedness of such member of the Bank; provided that this section shall not require a Bank to call any such indebtedness prior to maturity of the advance, if so doing would be inconsistent with the Bank's safe and sound operation. The Bank shall deem any such liquidation a prepayment of the member's indebtedness, and the member shall be subject to any fees applicable to such prepayment.

Subpart B—Advances to Nonmembers

§ 935.20 Scope.

The requirements of subpart A of this part apply to this subpart, except as otherwise provided in §§ 935.21 and 935.22 of this subpart.

§ 935.21 Advances to the Savings Association Insurance Fund.

(a) A Bank may, upon receipt of a written request from the FDIC, make advances to the FDIC for the use of the Savings Association Insurance Fund. The Bank shall provide a copy of such request to the Board.

(b) Such advances shall:

(1) Bear a rate of interest not less than the Bank's marginal cost of funds, taking into account the maturities involved and reasonable administrative costs;

(2) Be for a maturity acceptable to the Bank;

(3) Be subject to any prepayment, commitment or other appropriate fees of the Bank; and

(4) Be adequately secured by collateral acceptable to the Bank.

§ 935.22 Advances to nonmember mortgagees.

(a) *Authority.* Subject to the provisions of the Act and this part, a Bank may make advances to an entity that is not a member of a Bank, if the entity qualifies as a nonmember mortgagee pursuant to section 10b of the Act (12 U.S.C. 143b) and paragraph (b) of this section.

(b) *Qualified nonmember mortgagee.* To qualify for an advance as a nonmember mortgagee, an entity must meet the following requirement:

(1) *Charter.* It must be chartered under law and have succession. A corporation, another entity that has rights, characteristics and powers under applicable law similar to those granted a corporation, or a government agency, meets this requirement;

(2) *Examination.* It must be subject, pursuant to statute or regulation, to the inspection, supervision and oversight of a Federal, state, or local government agency;

(3) *Lending activity.* (i) The entity's principal activity in the mortgage field must consist of lending its own funds, which may include appropriated funds in the case of a Federal, state or local government agency;

(ii) An entity meets the requirement in paragraph (b)(3)(i) of this section, notwithstanding that the majority of its total operations are unrelated to mortgage lending, if the majority of its mortgage activity conforms to this requirement;

(iii) An entity that acts principally as a broker for others making mortgage loans, or makes mortgage loans for the account of others, does not meet the requirement in paragraph (b)(3)(i) of this section; and

(4) *HUD approval.* The entity must be approved by the Department of Housing and Urban Development (HUD) as a "mortgagee" pursuant to HUD regulations (24 CFR part 203), under title II of the National Housing Act (12 U.S.C. 1707—1715z–20).

(c) *Bank advance policy for nonmember mortgagees.* Prior to establishing a program to lend to nonmember mortgagees, a Bank's board of directors shall adopt a policy on advances to nonmember mortgagees consistent with the requirements of the Act, this part, and general guidelines of the Board, as reflected in its resolutions, orders or manuals. Such policy shall be reviewed by the Bank's board of directors at least semiannually.

(d) *Terms and conditions*—(1) *Advance pricing*—(i) *Costs.* Each Bank making an advance to a nonmember mortgagee shall price the advance so as to cover the funding, operating and administrative costs associated with making the advance. The price of the advance may reflect the credit risk or other reasonable differential pricing criteria associated with lending to the nonmember mortgagee, provided that the criteria are applied equally to all nonmember mortgagee borrowers.

(ii) *Capital investment.* The price of the advance shall compensate the Bank for the lack of a capital stock investment by the nonmember mortgagee in the Bank. This requirement may be satisfied by requiring the nonmember mortgagee to maintain a compensating deposit balance with the Bank.

(2) *Limitation on advances.* The principal amount of any advance made to a nonmember mortgagee may not exceed 90 percent of the unpaid principal of the mortgage loans or securities described in paragraph (e) of this section that are pledged as security for the advance.

(e) *Collateral.* A Bank may grant an advance to a nonmember mortgagee pursuant to this section only on the security of the following collateral:

(1) Mortgage loans insured by the Federal Housing Administration of the Department of Housing and Urban Development, pursuant to title II of the National Housing Act (12 U.S.C. 1707—1715z–20); or

(2) Securities representing a *pro rata* share of the principal and interest payments due on a pool of mortgage loans, all of which mortgage loans meet the requirements of paragraph (e)(1) of this section. A Bank shall require a nonmember mortgagee using collateral as described in this paragraph (e)(2) to provide evidence that such securities are backed solely by mortgages of the type described in paragraph (e)(1) of this section.

(f) *Loss of nonmember mortgagee eligibility.* (1) A Bank shall require each nonmember mortgagee that applies for an advance under this section to agree in writing to inform the Bank promptly of any change in its status as a nonmember mortgagee.

(2) If a nonmember mortgagee borrower ceases to fulfill the eligibility requirements for a nonmember mortgagee pursuant to paragraph (b) of this section, a Bank may not extend a new advance or renew an existing advance to such entity, until the Bank is satisfied that the entity again fulfills the requirements for a nonmember mortgagee contained in this section.

(g) *Verification of nonmember mortgagee requirements.* A Bank may, from time to time, require a nonmember mortgagee borrower to provide evidence that such institution continues to satisfy all of the qualifications and requirements contained in this section.

PART 940—[REMOVED]

2. Part 940 is removed and reserved.

By the Federal Housing Finance Board.

Daniel F. Evans, Jr.,

Chairman.

OFFICE OF NATIONAL DRUG CONTROL POLICY

21 CFR Part 1401

Proposed Rule Regarding Public Availability of Information

AGENCY: Office of National Drug Control Policy.

ACTION: Proposed rule and request for comments.

SUMMARY: The Freedom of Information Act (FOIA) requires every Federal agency to make available to the public official documents and other records upon request, unless the material requested falls under one of several limited exceptions. FOIA also requires agencies to publish rules stating the time, place, fees, and procedures to apply in making records available to any person upon request. Further, Section 1803 of the Freedom of Information Reform Act of 1986 requires each agency to establish a system for recovering costs associated with

responding to requests for information under FOIA. The Office of Management and Budget (OMB) has issued guidelines that set standard government-wide definitions for assessing and collecting FOIA fees (OMB Fee Guidelines).

This proposed rule describes the procedures to be followed in submitting a FOIA request to the Office of National Drug Control Policy (ONDCP) and the procedures that ONDCP will use in responding to such requests. Included are provisions for assessing and collecting fees from FOIA requesters in accordance with the OMB Fee Guidelines.

DATES: Comments must be received on or before November 30, 1992.

ADDRESSES: Written comments should be sent to the Office of the General Counsel, Office of National Drug Control Policy, Executive Office of the President, Washington, DC 20500.

FOR FURTHER INFORMATION CONTACT: Paul Cellupica, Office of the General Counsel, Office of National Drug Control Policy, Washington, DC 20500, (202) 467–9840.

SUPPLEMENTARY INFORMATION: The Office of National Drug Control Policy was created by the Anti-Drug Abuse Act of 1988, Public Law 100–690, 21 U.S.C. 1501 *et seq.*, and was charged with the development and coordination of national policy toward illegal drugs.

List of Subjects in 21 CFR Part 1401

Archives and records, Freedom of information, Records.

For the reasons set out in the preamble, title 21, chapter III of the Code of Federal Regulations as proposed to be established at 57 FR 31160, July 14, 1992, is proposed to be amended by establishing a new part 1401 to read as follows:

CHAPTER III—OFFICE OF NATIONAL DRUG CONTROL POLICY

PART 1401—PUBLIC AVAILABILITY OF INFORMATION

Sec.

1401.1 Purpose.
1401.2 The Office of National Drug Control Policy—Organization and functions.
1401.3 Definitions.
1401.4 Records of other agencies.
1401.5 How to request records—form and content.
1401.6 Initial determination.
1401.7 Prompt response.
1401.8 Responses—form and content.
1401.9 Appeal procedures.
1401.10 Fee schedule.
1401.11 Payment of fees.
1401.12 Waiver of fees.
1401.13 Aggregation of requests.
1401.14 Records that are exempt from disclosure.
1401.15 Deletion of exempted information.

Authority: 5 U.S.C. 552, as amended.

§ 1401.1 Purpose.

The purpose of this part is to prescribe rules, guidelines and procedures to implement the Freedom of Information Act (FOIA), 5 U.S.C 552, as amended.

§ 1401.2 The Office of National Drug Control Policy—organization and functions.

(a) The Office of National Drug Control Policy (ONDCP) was created by the Anti-Drug Abuse Act of 1988, 21 U.S.C. 1501 *et seq.* The mission of ONDCP is to coordinate the anti-drug efforts of the various agencies and departments of the Federal government, to consult with States and localities and assist their anti-drug efforts, and to annually promulgate the National Drug Control Strategy. ONDCP is headed by the Director of National Drug Control Policy. The Director is assisted by a Deputy Director for Supply Reduction, a Deputy Director for Demand Reduction, and an Associate Director for State and Local Affairs.

(b) ONDCP has an Office of Public Affairs that is responsible for providing information to the press and to the general public. If members of the public have general questions about ONDCP that can be answered by telephone, they may call the Office of Public Affairs at (202) 467–9890. This number should not be used to make FOIA requests. All oral requests for information under FOIA will be rejected.

§ 1401.3 Definitions.

As used in this part, the following definitions shall apply:

(a) *Commercial-use request* means a request from or on behalf of one who seeks information for a cause or purpose that furthers the commercial, trade or profit interests of the requester or the person or institution on whose behalf the request is made. In determining whether a requester properly belongs in this category, ONDCP will consider how the requester intends to use the documents.

(b) *Direct costs* means those expenditures that ONDCP actually incur in searching for and duplicating (and in the case of commercial requesters, reviewing) documents to respond to a FOIA request. Direct costs include, for example, the salary of the employee performing work (the basic rate of pay for the employee plus 16 percent of that rate to cover benefits) and the cost of operating duplicating machinery. Not included in direct costs are overhead expenses such as costs of space, and heating or lighting the facility in which the records are stored.

(c) *Duplication* means the process of making a copy of a document in response to a FOIA request. Such copies can take the form of paper copy, microform, audio-visual materials, or machine readable documentation. ONDCP will provide a copy of the material in a form that is usable by the requester unless it is administratively burdensome to do so.

(d) *Educational institution* means preschool, a public or private elementary or secondary school, an institution of graduate higher education, an institution of undergraduate higher education, an institution of professional education, or an institution of vocational education, which operates a program or programs of scholarly research.

(e) *Noncommercial scientific institution* means an institution that is not operated on a "commercial" basis as that term is referenced above, and that is operated solely for the purpose of conducting scientific research the results of which are not intended to promote any particular product or industry.

(f) *Records* and/or *information* means all books, papers, manuals, maps, photographs, or other documentary materials, regardless of physical form or characteristics, made or received by ONDCP and preserved or appropriate for preservation by ONDCP as evidence of the organization, functions, policies, decisions, procedures, operations, or other activities of the Government or because of the information value of the data in them, but does not include books, magazines or other material acquired solely for library purposes and through other sources, and does not include analyses, computations, or compilations of information not extant at the time of the request. The term "records" does not include objects or articles such as structures, furniture, paintings, sculptures, three-dimensional models, vehicles, and equipment.

(g) *Representative of the news media* means any person actively gathering news for a entity that is organized and operated to publish or broadcast news to the public. The term *news* means information that is about current events or that would be of current interest to the public. Examples of news media include television or radio stations broadcasting to the public at large, and publishers of periodicals (but only in those instances when they can qualify as disseminators of "news") that make their products available for purchase or subscription by the general public. Freelance journalists may be regarded as working for a news organization if

they can demonstrate a reasonable basis for expecting publication through that organization, even though not actually employed by it.

(h) *Request* means a letter or other written communication seeking records or information under FOIA.

(i) *Review* means the process of examining documents located in response to a commercial-use request to determine if that document or any portion of that document is permitted to be withheld. It also includes processing any document for disclosure (i.e., doing all that is necessary to excise those portions of the document not subject to disclosure under FOIA and otherwise preparing them for release). Review does not include time spent resolving general legal or policy issues regarding the application of exemptions.

(j) *Search* means all time spent looking for material that is responsive to a request, including page-by-page or line-by-line identification of material within documents. Searches should be performed in the most efficient and least expensive manner so as to minimize costs for both ONDCP and the requester; for example, line-by-line searches should not be undertaken when it would be more efficient to duplicate the entire document. Searches should be distinguished from "review" of material in order to determine whether the material is exempt from disclosure. Searches may be done manually or by computer using existing programming.

§ 1401.4 Records of other agencies.

Requests for records that originated in another agency and are in the custody of ONDCP shall be referred to the originating agency for processing, and the person submitting the request shall be so notified. Any decision made by the originating agency with respect to such records will be honored by ONDCP.

§ 1401.5 How to request records—form and content.

(a) Requests for records under FOIA must be submitted in writing, addressed to: Office of the General Counsel, Office of National Drug Control Policy, Executive Office of the President, Washington, DC 20500. The words "FOIA REQUEST" or "REQUEST FOR RECORDS" must be clearly marked on both the letter and the envelope. If the request is not so marked and addressed, the 10-day time limit imposed by § 1401.7 of this part shall not begin to run until the request has been received by the Office of the General Counsel and identified as a FOIA request. Due to security requirements, FOIA requests may not be delivered in person.

(b) Any ONDCP employee who receives a request shall promptly forward it to the Office of the General Counsel. Any ONDCP employee who receives an oral request made under the FOIA shall inform the person making the request of the provisions of this part requiring a written request.

(c) Each request must reasonably describe the record(s) sought, including when known: The specific event or action to which the request refers, if any; the name of the agency, office, organization or person that originated the record; the date or time period to which the request refers; the subject matter of the records requested; the type of document requested; the location of the record(s) requested; and any other pertinent information that would assist in promptly locating the record(s).

(d) When a request is not considered reasonably descriptive, or requires the production of voluminous records, or places an extraordinary burden on ONDCP, seriously interfering with its normal functioning to the detriment of the business of the Government, ONDCP may require the person or agent making the FOIA request to confer with an ONDCP representative in order to attempt to verify, and, if possible, narrow the scope of the request.

(e) Upon initial receipt of a request, the Office of the General Counsel shall determine which official or officials within ONDCP shall have the primary responsibility for collecting and reviewing the requested information and drafting a proposed response.

§ 1401.6 Initial determination.

The General Counsel or his or her designee shall have the authority to approve or deny requests received pursuant to these regulations. The decision of the General Counsel shall be final, subject only to administrative review as provided in § 1401.9.

§ 1401.7 Prompt response.

(a) The General Counsel or his or her designee shall either approve or deny a request for records within 10 working days (excluding Saturday, Sundays and Federal holidays) after receipt of the request unless additional time is required for one of the following reasons:

(1) It is necessary to search for, collect, and appropriately examine a voluminous amount of separate and distinct records that are demanded in a single request; or

(2) It is necessary to consult with another agency having a substantial interest in the determination of the request or among two or more components of ONDCP that have a substantial interest in the subject matter of the request.

(b) When additional time is required for one of the reasons stated in paragraph (a) of this section, the General Counsel or his or her designee shall acknowledge receipt of the request within the 10 working day period and include a brief explanation of the reason for delay, indicating the date by which a determination will be forthcoming. An extended deadline adopted for one of the reasons set forth above may not exceed 10 additional working days.

§ 1401.8 Responses—form and content.

(a) When a requested record has been identified and is available, the General Counsel or his or her designee shall notify the person making the request as to where and when the record will be available for inspection or the copies will be available. The notification shall also advise the person making the request of any fees assessed under § 1401.10 of this part.

(b) A denial or partial denial of a request for a record shall be in writing signed by the General Counsel or his or her designee and shall include:

(1) The name and title of the person making the determination;

(2) Either a reference to the specific exemption under FOIA authorizing the withholding of the record and a brief explanation of how the exemption applies to the record withheld, or a statement that, after diligent effort, the requested records have not been found or have not been adequately examined during the time allowed by § 1401.7, and that the denial will be reconsidered as soon as the search or examination is complete; and

(3) A statement that the denial may be appealed to the Director within 30 days of its receipt by the requester.

(c) If a requested record cannot be located from the information supplied, or is known to have been destroyed or otherwise disposed of, the person making the request shall be so notified and the legal authority for disposition shall be cited.

§ 1401.9 Appeal procedures.

(a) When the General Counsel or his or her designee denies a request for records in whole or in part, the person making the request may, within 30 days of receipt of the notice of denial, appeal the denial to the Director of ONDCP. The appeal must be in writing, addressed to the Director, Office of National Drug Control Policy, Executive Office of the President, Washington, DC 20500. The envelope should be clearly

labeled as a "Freedom of Information Act Appeal."

(b) The Director will act upon the appeal within 20 working days of its receipt. The Director may extend the 20-day period of time by any number of working days which could have been used by the General Counsel or his or her designee under § 1401.7 but which were not used in making the initial determination. The Director's action on an appeal shall be in writing and signed.

(c) If the decision is in favor of the requester, the Director shall order records promptly made available to the requester.

(d) A denial in whole or in part of a request on appeal shall set forth a brief explanation of the reasons for the decision, and shall inform the requester of his or her right to seek judicial review of the denial and ruling on appeal as provided in 5 U.S.C. 552(a)(4).

(e) No personal appearance, oral argument or hearing will ordinarily be permitted in connection with an appeal to the Director.

§ 1401.10 Fee schedule.

(a) There are four categories of requesters: Commercial use requesters; educational and non-commercial scientific institutions; representatives of the news media; and all other requesters. FOIA prescribes different levels of fees for each of these categories.

(1) *Commercial use requesters.* When a request for records is made for commercial use, charges will be assessed to cover all the costs of searching for, reviewing for release, and duplicating the records sought.

(2) *Educational and non-commercial scientific institutions.* When a request for records is made by an educational or a non-commercial scientific institution in furtherance of scholarly or scientific research, charges will be assessed to cover the cost of duplication alone, excluding charges for duplication of the first 100 pages.

(3) *Requests by representatives of the news media.* When a request for records is made by a representative of the news media for the purpose of news dissemination, charges will be assessed to cover the cost of duplication alone, excluding charges for duplication of the first 100 pages.

All other requests. When a request for records is made by a requester who does not fit into any of the preceding categories, charges will be assessed to cover the costs of searching for and duplicating the records sought, excluding charges for the first two hours of search time and the duplication of the first 100 pages. Moreover, requests from individuals for records about themselves will be treated under the Privacy Act of 1974, 5 U.S.C. 552a, which permits the assessment of fees for duplication costs only, regardless of the requester's characterization of the search.

(b) Fees for searches, review of records and duplication of records are charged as follows:

(1) *Search for records.* The charge for a manual search is calculated by determining the search time to the nearest quarter hour and multiplying that figure by the sum of the basic rate of pay per hour of the employee conducting the search plus 16 percent of that rate. The charge for a computer search is calculated by determining the search time to the nearest quarter hour and multiplying that figure by the sum of the basic rate of pay per hour of the employee conducting the search, plus 16 percent of that rate, plus the direct cost of the operation of the computer for that portion of time attributable to the search.

(2) *Review of records.* Only requesters who are seeking documents for commercial use will be charged for time spent reviewing records to determine whether they are exempt from mandatory disclosure. Charges will be assessed only for the initial review; i.e., the review undertaken the first time ONDCP analyzes the applicability of a specific exemption to a particular record or portion of a record. Charges will not be assessed for review at the administrative appeal level of the exemption(s) already applied. The cost for review will be calculated based on the salary of the category of the employee who actually performed the review plus 16 percent of that rate.

(3) *Duplication of records.* Copies made by routine photostatic copying shall be charged at the rate of $0.15 per page. If copies need to be made by other methods, the direct costs of such copies will be charged to the requester, as determined by the General Counsel.

(4) *Unsuccessful searches.* Requesters may be charged for unsuccessful or unproductive searches or for searches when records located are determined to be exempt from disclosure.

(5) *Other charges.* ONDCP will recover the direct costs of providing special services such as certifying that records are true copies, and sending records by special methods such as express mail.

(c) No fee will be charged by ONDCP when the routine costs of collecting and processing the fee equal to or exceed the amount of the fee. For purposes of this section, the routine costs of collecting and processing a fee chargeable under FOIA are estimated to be $15.00 for each FOIA request.

§ 1401.11 Payment of fees.

(a) The requester must agree to pay all fees that are chargeable under this section prior to issuance of the requested copies.

(b) Payment of fees shall be in the form either of a personal check or bank draft drawn on a bank in the United States, or a postal money order. Remittances shall be made payable to the order of the Treasurer of the United States and mailed to the General Counsel, Office of National Drug Control Policy, Executive Office of the President, Washington, DC 20500.

(c) If it is anticipated that the fees chargeable under this section will amount to more than $25.00, and the requester has not indicated in advance his willingness to pay such fees, the requester shall be promptly notified of the amount of the anticipated fee or such portion thereof as can readily be estimated. In instances where the estimated fees will exceed $250.00, an advance deposit may be required. The notice or request for an advance deposit shall extend to the requester an offer to consult with ONDCP personnel in order to reformulate the request in a manner which will reduce the fees. A reformulated request shall be considered a new request, thus beginning a new 10 workday period for responding to the request.

(d) When a requester has previously failed to pay a fee in a timely fashion (i.e., within 30 days of the date of the billing), ONDCP may require the requester to demonstrate that he or she has, in fact, paid any outstanding fees from past requests, and to make an advance payment of the full amount of the estimated fee for the present request before ONDCP responds to that request.

(e) Interest charges on an unpaid bill may be assessed starting on the 31st day following the day on which the billing was sent. Interest shall be assessed at the rate prescribed in 31 U.S.C. 3717, and shall accrue from the date of the billing. The fact that a fee has been received by ONDCP, even if not processed, will suffice to stay the accrual of interest.

(f) To encourage the repayment of delinquent fees, ONDCP shall use the procedures described in the Debt Collection Act of 1982, 31 U.S.C. 3716–3719, including the use of collection agencies and disclosure to consumer reporting agencies.

§ 1401.12 Waiver of fees.

(a) Records shall be furnished without charge, or at a reduced charge, upon a determination by the General Counsel of ONDCP that: (1) Waiver or reduction of the fees is in the public interest because release of the requested information is likely to contribute significantly to public understanding of the operations or activities of ONDCP and is not primarily in the commercial interest of the requestor; or (2) Assessment of fees is not feasible.

(b) Upon written request, a written explanation will be provided as to why a request for waiver or reduction of FOIA fees was not granted.

(c) There is no right to an administrative appeal from a decision not to waive or reduce fees.

§ 1401.13 Aggregation of requests.

(a) When the General Counsel reasonably believes that a requester, or a group of requesters acting in concert, is attempting to break down a request into a series of requests for the purpose of evading the assessment of fees, such requests may be aggregated and fees may be charged accordingly.

(b) In determining whether a series of requests shall be aggregated, the General Counsel will consider two factors: Whether the requests concern a single subject or two or more closely related subjects; and whether the requests were all made within a 30-day period. If a series of requests is made by multiple requesters, the General Counsel will also consider whether there is substantial evidence to support the conclusion that the requesters are acting in concert.

§ 1401.14 Records that are exempt from disclosure.

(a) Records described in 5 U.S.C. 552(b) are exempt from disclosure under FOIA. These include the following categories of records:

(1) Records that are specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy and are in fact properly classified pursuant to such Executive order;

(2) Records related solely to the internal personnel rules and practices of an agency;

(3) Records specifically exempted from disclosure by statute (other than 5 U.S.C. 552b), provided that such statute (i) Requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (ii) Establishes particular criteria for withholding or refers to particular types of matters to be withheld;

(4) Records of trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) Inter-agency or intra-agency memoranda or letters which would not be available by law to a party other than in litigation with the agency;

(6) Personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and

(7) Records or information compiled for law enforcement purposes, but only to the extent that the production of such law enforcement records or information (i) Could reasonably be expected to interfere with enforcement proceedings, (ii) Would deprive a person of a right to a fair trial or an impartial adjudication, (iii) Could reasonably be expected to constitute an unwarranted invasion of personal privacy, (iv) Could reasonably be expected to disclose the identity of a confidential source including a state, local, or foreign agency or authority or any private institution which furnished information on a confidential basis, and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source, (v) Would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines or law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law, or (vi) Could reasonably be expected to endanger the life or physical safety of any individual.

§ 1401.15 Deletion of exempted information.

When requested records contain matters that are exempted under 5 U.S.C. 552(b), but such exempted matters are reasonably segregable from the remainder of the records, the records shall be disclosed by ONDCP with the necessary deletions. ONDCP shall attach to each such record a written justification for making the deletion or deletions. A single such justification shall suffice for deletions made in a group of similar or related records.

Bob Martinez,

Director.

BILLING CODE 3180-02-M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Parts 17, 19, 70, 170, 194, 197, 250

[Notice No. 758; Re Notice No. 748; 73R-24P]

Taxpaid Distilled Spirits Used in Manufacturing Products Unfit for Beverage Use

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Proposed rule; extension of comment period.

SUMMARY: This document extends the comment period for Notice No. 748, a notice of proposed rulemaking (NPRM) published in the Federal Register on August 31, 1992 (57 FR 39536). Notice No. 748 concerned taxpaid distilled spirits used to manufacture nonbeverage products. ATF has received a request to extend the comment period in order to provide sufficient time for all interested parties to respond to the difficult and complex issues addressed in the NPRM.

DATES: Comments must be filed on or before October 30, 1992.

ADDRESSES: Send written comments to: Chief, Distilled Spirits and Tabacco Branch, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 50221, Washington, DC 20091-0221; ATTN: Notice No. 758.

FOR FURTHER INFORMATION CONTACT: Mr. Steve Simon Distrilled Spirits and Tabacco Branch, Bureau of Alcohol, Tobacco and Firearms, 650 Massachusetts Avenue NW., Washington, DC 20226, (202) 927-8210.

SUPPLEMENTARY INFORMATION:

Notice of Proposed Rulemaking

On August 31, 1992, ATF published Notice No. 748 in the Federal Register (57 FR 39536). Notice No. 748 proposed to amend and recodify the regulations currently in 27 CFR part 197 (Drawback on Distilled Spirits Used in Manufacturing Nonbeverage Products). The recodified regulations would be designated as 27 CFR part 17. In conjunction with the recodification, a number of amendments to the drawback regulations were proposed. The regulations currently in 27 CFR part 170, Subpart U (Manufacture and Sale of Certain Compounds, Preparations, and Products Containing Alcohol) would be distributed between part 19 and the new part 17. Conforming changes were proposed in 27 CFR parts 70, 194, and 250.

Significant proposed changes from current regulations include the following: Allowing manufacturers of nonbeverage products the option of filing claims for credit, if they are also proprietors of distilled spirits plants; simplifying the requirements for supporting data filed with drawback claims; and adding a section to provide for alternate methods of procedures when approved by the ATF Director. The proposed new regulations reflect the holdings of 19 published rulings and one published procedure. For complete details of the proposals, Notice No. 748 should be consulted.

A comment period of just 30 days was provided by Notice No. 748. Primarily this was due to the fact that most of the proposals had been previously aired for public comment by Notice No. 634 (52 FR 28286, July 29, 1987). Notice No. 634 provided a 90-day comment period. Further comments concerning Notice No. 634 were accepted during an additional period of 30 days under Notice No. 649 (52 FR 46628). In total, only four public comments were received.

Request for Extension of Comment Period

The comment period for Notice No. 748 was scheduled to close on September 30, 1992. On September 14, 1992, a request was filed with ATF for an extension of the comment period. This request was submitted by the Distilled Spirits Council of the United States, Inc., a national trade association representing the suppliers of over 80% of the distilled spirits sold in the United States. An extension of an additional 90 days was requested, due to the complexity of the issues raised in Notice No. 748.

In consideration of this request, ATF will grant an extension of the comment period. However, since most of the same issues have previously been aired for public comment during a sufficient length of time, ATF has determined that an extension of an additional 30 days is appropriate. Therefore, the comment period for Notice No. 748 will be extended until October 30, 1992. Drafting Information.

The principal drafter of this document is Steven C. Simon of the Distilled Spirits and Tobacco Branch, Bureau of Alcohol, Tobacco and Firearms.

Authority and Issuance: This notice is issued under the authority of 26 U.S.C. 7805.

Signed: September 23, 1992.

Stephen E. Higgins,

Director.

BILLING CODE 4810-31-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[CA-11-7-5589; FRL-4512-6]

Approval and Promulgation of Implementation Plans; California State Implementation Plan Revision; Santa Barbara County Air Pollution Control District, San Diego County Air Pollution Control District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: EPA is proposing a limited approval and limited disapproval of revisions to the California State Implementation Plan (SIP) adopted by the Santa Barbara County Air Pollution Control District (SBCAPCD) on February 20, 1990 and the San Diego County Air Pollution Control District (SDCAPCD) on May 21, 1991. The California Air Resources Board (ARB) submitted the SBCAPCD revision to EPA on December 31, 1990 and the SDCAPCD revision on May 30, 1991. The revisions concern SBCAPCD Rule 323, Architectural Coatings, which controls the emission of volatile organic compounds (VOCs) from architectural coatings and SDCAPCD Rule 67.16, Graphic Arts, which regulates the emission of VOCs from graphic arts operations. EPA has evaluated the revisions to SDCAPCD Rule 323 and SBCAPCD Rule 67.16 and is proposing a limited approval under sections 110(k)(3) and 301(a) of the Clean Air Act, as amended in 1990 (CAA or the Act) because these revisions strengthen the SIP. At the same time, EPA is proposing a limited disapproval under sections 110(k)(3) and 301(a) of the CAA because the rules do not meet the Part D, section 182(a)(2)(A) requirement of the CAA.

DATES: Comments must be received on or before November 2, 1992.

ADDRESSES: Comments may be mailed to: Daniel A. Meer, Rulemaking Section II (A-5-3), Air and Toxics Division, Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105.

Copies of the rule revisions and EPA's evaluation report of each rule are available for public inspection at EPA's Region 9 office during normal business hours. Copies of the submitted rule revisions are also available for inspection at the following locations:

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 1219 "K" Street, Sacramento, CA 95814

Santa Barbara County Air Pollution Control District, 26 Castillian Drive, B-23, Goleta, CA 93117

San Diego County Air Pollution Control District, 9150 Chesapeake Drive, San Diego, CA 92123-1095

FOR FURTHER INFORMATION CONTACT: Christine Vineyard, Rulemaking Section II (A-5-3), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105, Telephone: (415) 744-1195, FAX: 744-1076.

SUPPLEMENTARY INFORMATION:

Background

On March 3, 1978, EPA promulgated a list of ozone nonattainment areas under the provisions of the 1977 Clean Air Act (1977 CAA or pre-amended Act) that included Santa Barbara County and the San Diego Area. 43 FR 8964; 40 CFR 81.305. Because Santa Barbara County and the San Diego Area were unable to reach attainment by the statutory attainment date of December 31, 1982, California requested under pre-amended section 172(a)(2), and EPA approved, an extension of the attainment date to December 31, 1987. 40 CFR 52.238, 52.222. Santa Barbara County and the San Diego Area did not attain the ozone standard by the approved attainment date. On May 26, 1988, EPA notified the Governor of California that SBCAPCD and the SDCAPCD portions of the SIP were inadequate to attain and maintain the ozone standard and requested that deficiencies in the existing SIP be corrected (EPA's SIP-Call). On November 15, 1990, amendments to the 1977 CAA were enacted. Public Law 101-549, 104 Stat. 2399, codified at 42 U.S.C. 7401-7671q. In amended section 182(a)(2)(A) of the CAA, Congress statutorily adopted the requirement that nonattainment areas fix their deficient reasonably available control technology (RACT) rules for ozone and established a deadline of May 15, 1991 for states to submit corrections of those deficiencies.

Section 182(a)(2)(A) applies to areas designated as nonattainment prior to enactment of the amendments and classified as marginal or above as of the date of enactment. It requires such areas to adopt and correct RACT rules pursuant to preamended section 172(b) as interpreted in EPA's pre-amendment guidance.[1] EPA's SIP-Call used that

[1] Among other things, the pre-amendment guidance consists of those portions of the proposed Post-1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044 (November 24, 1987); "Issues Relating to VOC Regulations Cutpoints, Deficiencies, and Deviations, Clarification to Appendix D of November 24, 1987 Federal Register

Continued

guidance to indicate the necessary corrections for specific nonattainment areas. Santa Barbara County is classified as moderate and San Diego County is classified as severe [2]; therefore, these two area are subject to the RACT fix-up requirement and the May 15, 1991 deadline.

The State of California submitted many revised RACT rules to EPA for incorporation into its SIP on December 31, 1990 and May 30, 1991, including the rules being acted on in this notice. This notice addresses EPA's proposed action for SBCAPCD Rule 323 and SDCAPCD Rule 67.16. These submitted rules were found to be complete on February 28, 1991 and July 10, 1991 respectively pursuant to EPA's completeness criteria adopted on February 16, 1990 (55 FR 5830) and set forth in 40 CFR Part 51, Appendix V,[3] and are being proposed for limited approval and limited disapproval.

SBCAPCD Rule 323 controls the emission of VOCs from architectural coatings [4] and SDCAPCD Rule 67.16 controls the emission of VOCs from graphic arts operations. VOCs contribute to the production of ground level ozone and smog. SBCAPCD's revised Rule 323 was originally adopted as part of SBCAPCD's effort to achieve the National Ambient Air Quality Standard (NAAQS) for ozone. SBCAPCD's revision of Rule 323 and SDCAPCD's new Rule 67.16 have been adopted to meet EPA's SIP-Call and the section 182(a)(2)(A) CAA requirement. The following is EPA's evaluation and proposed action for SBCAPCD Rule 323 and SDCAPCD Rule 67.16.

EPA Evaluation and Proposed Action

In determining the approvability of a VOC rule, EPA must evaluate the rule for consistency with the requirements of the CAA and EPA regulations, as found in section 110 and Part D of the CAA and 40 CFR part 51 (Requirements for Preparation, Adoption, and Submittal of Implementation Plans). The EPA interpretation of these requirements, which forms the basis for today's action, appears in the various EPA policy guidance documents listed in footnote 1. Among the provisions of the CAA is the requirement that a VOC rule must, at a minimum, provide for the implementation of RACT for stationary sources of VOC emissions. This requirement was carried forth from the preamended Act.

For the purpose of assisting state and local agencies in developing RACT rules, EPA prepared a series of Control Technique Guideline (CTG) documents. The CTGs are based on the underlying requirements of the Act and specify the presumptive norms for what is RACT for specific source categories. Under the CAA, Congress ratified EPA's use of these documents, as well as other Agency policy, for requiring States to "fix-up" their RACT rules. See section 182(a)(2)(A). The CTG applicable to SDCAPCD Rule 67.16 is entitled, "Control of Volatile Organic Emissions from Existing Stationary Sources Volume VII: Graphic Arts—Rotogravure and Flexography," EPA document # EPA–450/2–78–033. Further interpretations of EPA policy are found in the Blue Book. In general, these guidance documents have been set forth to ensure that VOC rules are fully enforceable and strengthen or maintain the SIP. For some source categories, such as architectural coatings, EPA has not published a CTG[5].

While the EPA has not developed a CTG for architectural coatings at this time, on May 12, 1989, the ARB approved a suggested control measure (SCM) for the architectural coatings category. The SCM was developed by the California Technical Review Group (TRG)[6] in cooperation with the paints and coatings industry and was intended to serve as a model architectural coatings rule for ozone nonattainment areas (e.g., the SBCAPCD) in California. The SCM built upon previous architectural coating model rules adopted by ARB in 1977 and 1986. EPA supported the ARB's adoption of the SCM as demonstrating progress toward attainment of the NAAQA for ozone and representing standards which are technically and economically feasible. SBCAPCD Rule 323 is modeled after the SCM.

SBCAPCD Rule 323, Architectural Coatings, controls emissions of VOCs from the use of architectural coatings within the district. SDCAPCD Rule 67.16 is a new rule which was adopted to control the emission of VOCs from the operation of all continuous web or single sheet fed graphic arts printing, processing, laminating or drying operations within the district.

EPA has evaluated SBCAPCD Rule 323 and SDCAPCD Rule 67.16 for consistency with the CAA, EPA regulations, and EPA policy and has found that these submitted rules serve to strengthen the SIP. SBCAPCD Rule 323 will achieve VOC reductions from: amended definitions and additional administrative requirements; new emission limits for previously exempt speciality coatings; and revised emission limits for several specialty coating categories. The revisions include:

- Approximately thirty new or revised definitions which further clarify the applicable coating categories and delete non-substantive verbiage;
- New VOC content limits for approximately eighteen specialty categories through consolidation with other categories; and
- The elimination of one and addition of eight administrative requirements.

For a detailed description of the revision, readers should contact the individual listed previously in the notice. In summary, the revisions strengthen the limits in and improve the enforceability of the current SIP rule.

- SDCAPCD Rule 67.16 will achieve VOC reductions by:
- Setting emission limits for sources previously unregulated and the option of using control equipment in lieu of compliant materials;
- Adding cleanup requirements;
- Requiring daily recordkeeping of the type and amount of graphic arts material used; and
- Adding test methods to determine compliance.

Furthermore, the addition of the more stringent limits in SBCAPCD Rule 323

Notice" (Blue Book) (notice of availability was published in the Federal Register on May 25, 1988); and the existing control technique guidelines (CTGs).

[2] Santa Barbara County and the San Diego Area retained their designation and were classified by operation of law pursuant to sections 107(d) and 181(a) upon the date of enactment of the CAA. See 56 FR 56694 (November 6, 1991).

[3] EPA has since adopted completeness criteria pursuant to section 110(k)(1)(A) of the amended Act to be codified at 40 CFR part 51, appendix V. See 56 FR 42216 (August 26, 1991).

[4] Architectural coatings include but are not limited to: Ordinary house and trim paints, lacquers, varnishes, concrete curing compounds, industrial maintenance coatings, stains, primers, sealers, undercoaters, roof coatings, traffic coatings, and water sealers.

[5] EPA has not developed a Control Technique Guideline (CTG) for architectural coatings. As required under section 183(e) of the CAA, EPA is investigating the development of a CTG or regulations for consumer and commercial products which will include paints, coatings, and solvents (e.g. architectural coatings).

[6] The TRG is a statewide regulatory work group comprised of representatives from the Air Resources Board, various California air pollution control districts, and the federal Environmental Protection Agency. In California, the TRG has been instrumental in assisting the ARB and various air pollution control districts with the development of control strategies which represent RACT for a variety of pollutants, including various VOC categories. On May 24, 1989, the TRG approved the Suggested Control Measure adopted by ARB making it the "Air Resources Board—California Air Pollution Control Officers Association Suggested Control Measure for Architectural Coatings".

and SDCAPCD Rule 67.16 should lead to more emission reductions.

Although the approval of SBCAPCD Rule 323 and SDCAPCD Rule 67.16 will strengthen the SIP, these rules still contain deficiencies which were required to be corrected pursuant to the section 182(a)(2)(A) requirements of Part D of the CAA.

SBCAPCD Rule 323 contains the following deficiencies: (1) Allowance for "equivalent" compliance test methods without EPA review and approval; and (2) a lack of VOC definition in the rule. (SBCAPCD's Rule 102—Definitions has not been approved into the SIP; if approved, the lack of a VOC definition in Rule 323 would no longer be a deficiency). A detailed discussion of rule deficiencies can be found in the Technical Support Document for Rule 323, which is available from the U.S. EPA, Region 9 office. SDCAPCD Rule 67.16 contains one deficiency. This deficiency allows the use of a test method (Bay Area Air Quality Management District Test Method 30) for measurement of VOC content in non-heatset inks that has been found by EPA to be unacceptable for this intended use. A detailed discussion of this deficiency can be found in the Technical Support Document for Rule 67.16, which is available from the U.S. EPA, Region 9 office. Because of these deficiencies, the rules are not approvable pursuant to section 182(a)(2)(A) of the CAA because they are not consistent with the interpretation of section 172 of the 1977 CAA as found in the Blue Book and may lead to rule enforceability problems.

Because of the above deficiencies, EPA cannot grant full approval of these rules under section 110(k)(3) and Part D. Also, because the submitted rules are not composed of separable parts which meet all the applicable requirements of the CAA, EPA cannot grant partial approval of the rules under section 110(k)(3). However, EPA may grant a limited approval of the submitted rules under section 110(k)(3) in light of EPA's authority pursuant to section 301(a) to adopt regulations necessary to further air quality by strengthening the SIP. The approval is limited because EPA's action also contains a simultaneous limited disapproval. In order to strengthen the SIP, EPA is proposing a limited approval of SBCAPCD submitted Rule 323 and SDCAPCD submitted Rule 67.16 under section 110(k)(3) and 301(a) of the CAA.

At the same time, EPA is also proposing a limited disapproval of these rules because they contain deficiencies that have not been corrected as required by section 182(a)(2)(A) of the CAA, and, as such, the rules do not fully meet the requirements of Part D of the Act. Under section 179(a)(2), if the Administrator disapproves a submission under section 110(k) for an area designated nonattainment, based on the submission's failure to meet one or more of the elements required by the Act, the Administrator must apply one of the sanctions set forth in section 179(b) unless the deficiency has been corrected within 18 months of such disapproval. Section 179(b) provides two sanctions available to the Administrator: highway funding and offsets. The 18 month period referred to in section 179(a) will begin at the time EPA publishes final notice of this disapproval. Moreover, the final disapproval triggers the federal implementation plan (FIP) requirement under section 110(c).

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Regulatory Process

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. §§ 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

Limited approvals under sections 110 and 301, and subchapter I, Part D of the CAA do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (S.Ct. 1976); 42 U.S.C. 7410(a)(2).

EPA's limited disapproval of the State request under sections 110 and 301, and subchapter I, Part D of the CAA does not affect any existing requirements applicable to small entities. Federal disapproval of the state submittal does not affect its state-enforceability. Moreover, EPA's disapproval of the submittal does not impose any new federal requirements. Therefore, EPA certifies that this disapproval action does not have a significant impact on a substantial number of small entities because it does not remove existing requirements nor does it impose any new federal requirements.

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and Table 3 SIP revisions (54 FR 2222) from the requirements of Section 3 of Executive Order 12291 for a period of two years. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

Approval and Promulgation of Implementation Plans, California State Implementation Plan Revision; Placer, San Diego and San Joaquin Valley Unified Air Pollution Control District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: EPA is proposing to approve revisions to the California State Implementation Plan (SIP) adopted by the Placer County Air Pollution Control District (APCD) on September 25, 1990, the San Joaquin Valley Unified APCD on September 19, 1991, and the San Diego County APCD on October 16, 1990. The California Air Resources Board (CARB) submitted the Placer County APCD revisions to EPA on April 5 and May 30, 1991. CARB submitted the San Diego

County APCD and the San Joaquin Valley Unified APCD revisions to EPA on April 5, 1991 and January 28, 1992, respectively. The revisions concern the adoption of four rules: Placer County Rule 213, Gasoline Transfer into Stationary Storage Containers, Placer County Rule 215, Transfer of Gasoline into Tank Trucks, Trailers and Railroad Tank Cars at Loading Facilities, San Joaquin Valley Unified Rule 463.2, Storage of Organic Liquids, and San Diego County Rule 61.4, Transfer of Volatile Organic Compounds into Vehicle Fuel Tanks. These rules control the emission of volatile organic compounds (VOCs) from the transfer of organic liquids, primarily gasoline, to storage, cargo and fuel tanks. EPA has evaluated each of these rules and is proposing to approve them under section 110(k)(3) as meeting the requirements of section 110(a) and part D of the Clean Air Act, as amended in 1990 (CAA or the Act).

DATES: Comments must be received on or before November 2, 1992.

ADDRESSES: Comments may be mailed to: Esther J. Hill, Rulemaking Section I (A–5–4), Air and Toxics Division, U.S. Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, CA 94105.

Copies of the rule revisions and EPA's evaluation report of each rule are available for public inspection at EPA's Region 9 office during normal business hours. Copies of the submitted rule revisions are also available for inspection at the following locations:

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 2020 "L" Street, Sacramento, CA 95814
Placer County Air Pollution Control District, 11464 B. Avenue, Auburn, CA 95603
San Joaquin Valley Unified Air Pollution Control District, 2314 Mariposa Street, Fresno, CA 93721
San Diego County Air Pollution Control District, 9150 Chesapeake Drive, San Diego, CA 92123–1095

FOR FURTHER INFORMATION CONTACT: William E. Davis, Jr., Rulemaking Section I (A–5–4), Air and Toxics Division, U.S. Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, CA 94105, Telephone: (415) 744–1183.

SUPPLEMENTARY INFORMATION:

Background

On March 3, 1978, EPA promulgated a list of ozone nonattainment areas under the provisions of the Clean Air Act, as amended in 1977 (1977 CAA or pre-amended Act), that included the Sacramento Metro Area (which includes Placer County with the exception of those areas in the County included in the Lake Tahoe Air Basin),[1] the San Joaquin Valley Area, and the San Diego Area. 43 FR 8964, 40 CFR 81.305. Because these areas were unable to meet the statutory attainment date of December 31, 1982, California requested under pre-amended section 172(a)(2), and EPA approved, an extension of the attainment date to December 31, 1987.[2] 40 CFR 52.238. On May 26, 1988, EPA notified the Governor of California that the above districts' portions of the California SIP were inadequate to attain and maintain the ozone standard and requested that deficiencies in the existing SIP be corrected (EPA's SIP-Call). On November 15, 1990, the Clean Air Act Amendments of 1990 were enacted. Pub. L. 101–549, 104 Stat. 2399, codified at 42 U.S.C. 7401–7671q. In amended section 182(a)(2)(A) of the CAA, Congress statutorily adopted the requirement that nonattainment areas fix their deficient reasonably available control technology (RACT) rules for ozone and established a deadline of May 15, 1991 for states to submit corrections of those deficiencies.

On March 20, 1991, the San Joaquin Valley Unified APCD was formed. This District has authority over the San Joaquin Valley Air Basin which includes Fresno, Kings, Madera, Merced, San Joaquin, Stanislaus, and Tulare Counties, and over a portion of Kern County. The Kern County APCD has authority over the remainder of Kern County which lies in the Southeast Desert Air Basin.

Section 182(a)(2)(A) applies to areas designated as nonattainment prior to enactment of the amendments and classified as marginal or above as of the date of enactment. It requires such areas to adopt and correct RACT rules pursuant to pre-amended section 172(b) as interpreted in EPA's pre-amendment guidance.[3] EPA's SIP-Call used that guidance to indicate the necessary corrections for specific nonattainment areas. Placer County (excluding the Tahoe Basin) and the San Joaquin Valley Area APCDs are classified as serious and the San Diego Area is classified as severe; therefore, these areas are subject to the RACT fix-up requirement and the May 15, 1991 deadline.[4]

The State of California submitted many revised RACT rules for incorporation into its SIP on April 5, 1991 and January 28, 1992, including the rules being acted on in this notice. This notice addresses EPA's proposed action for Placer County Rules 213, Gasoline Transfer into Stationary Storage Containers and 215, Transfer of Gasoline into Tank Trucks, Trailers and Railroad Tank Cars at Loading Facilities; San Joaquin Valley Unified Rule 463.2, Storage of Organic Liquids; and San Diego County Rule 61.4, Transfer of Volatile Organic Compounds into Vehicle Fuel Tanks. The rules submitted on April 5, 1991 were found to be complete on May 21, 1991 pursuant to EPA's completeness criteria adopted on February 16, 1990 (55 FR 5830) and set forth in 40 CFR part 51 appendix V.[5] The rule submitted on January 28, 1992 was found to be complete on April 3, 1992 pursuant to EPA's completeness criteria adopted August 26, 1991 (see footnote 5). All four rules are being proposed for approval into the SIP.

Each of these rules controls VOC emissions from organic liquids. Placer County Rules 213 and 215 control emissions from the transfer of gasoline to storage and cargo tanks, respectively. San Joanquin Valley Rule 463.2 controls emissions from storage tanks primarily through engineering requirements. San Diego County Rule 61.4 controls vapors displaced from vehicle fuel tanks at service stations by transferring them back into the storage tank (commonly called Stage II vapor control). VOCs contribute to the production of ground level ozone and smog. The rules were adopted as part of each district's efforts to achieve the National Ambient Air Quality Standard (NAAQS) for ozone and in response to EPA's SIP-Call and the section 182(a)(2)(A) CAA

[1] On November 6, 1991, the two Placer County nonattainment areas, which were part of the Sacramento Air Quality Maintenance Area (AQMA) and Mountain Counties Air Basin non-AQMA, were combined and redefined as part of the Sacramento Metro Area (55 FR 56694).

[2] This extension applied to Fresno, San Joaquin and Stanislaus Counties which, at the time of the extension, were three of the eight counties comprising the San Joaquin Valley Air Basin. This extension was not requested for Kern, Kings, Madera, Merced and Tulare Counties, which are the remaining five counties in the Basin. Thus, the attainment date for these five latter counties remained December 31, 1982.

[3] Among other things, the pre-amendment guidance consists of those portions of the proposed Post-1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044 (November 24, 1987); "Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations, Clarification to Appendix D of November 24, 1987 **Federal Register** Notice" (Blue Book) (notice of availability was published in the **Federal Register** on May 25, 1988); and the existing control technique guidelines (CTGs).

[4] The Placer County nonattainment area and both the San Joaquin Valley and San Diego Areas retained their designation and were classified by operation of law pursuant to sections 107(d) and 181(a) upon the date of enactment of the CAA. See 55 FR 56694 (November 6, 1991).

[5] EPA has since adopted completeness criteria pursuant to section 110(k)(1)(A) of the amended Act. See 56 FR 42216 (August 26, 1991) to be codified at 40 CFR part 51, appendix V.

requirement. The following is EPA's evaluation and proposed action for these rules.

EPA Evaluation and Proposed Action

In determining the approvability of a VOC rule, EPA must evaluate the rule for consistency with the requirements of the CAA and EPA regulations, as found in section 110 and Part D of the CAA and 40 CFR Part 51 (Requirements for Preparation, Adoption, and Submittal of Implementation Plans). The EPA interpretation of these requirements, which forms the basis for today's action, appears in the various EPA policy guidance documents listed in footnote 3. Among the provisions of the CAA is the requirement that a VOC rule must, at a minimum, provide for the implementation of RACT for stationary sources of VOC emissions. This requirement was carried forth from the pre-amended Act.

For the purpose of assisting state and local agencies in developing RACT rules, EPA prepare a series of Control Technique Guideline (CTG) documents. The CTGs are based on the underlying requirements of the Act and specify the presumptive norms for what is RACT for specific source categories. Under the CAA, Congress ratified EPA's use of these documents, as well as other Agency policy, for requiring States to "fix-up" their RACT rules. See section 182(a)(2)(A). The CTGs applicable to the Placer County Rule 213 are "Control of Volatile Organic Compounds from Bulk Gasoline Plants", EPA Document 450/2–77–035, and "Control of Volatile Organic Compound Leaks from Gasoline Tank Trucks and Vapor Collection Systems", EPA Document 450/2–78–051. The CTG applicable to Placer County Rule 215 is "Control of Hydrocarbons from Tank Truck Gasoline Loading Terminals", EPA Document 450/2–77–026. The CTGs applicable to San Joaquin Valley Rule 463.2 are "Control of Volatile Organic Emissions from Petroleum Liquid Storage in External Floating Roof Tanks", EPA Document 450/2–48–047, and "Control of Organic Emissions from Storage of Petroleum Liquids in Fixed-Roof Tanks", EPA Document 450/2–77–036. There is no CTG applicable to San Diego County's Rule 61.4 which deals with Stage II vapor controls. However, a document entitled "Technical Guidance—Stage II Vapor Recovery Systems for Control of Vehicle Refueling Emissions at Gasoline Dispensing Facilities, Volumes I and II", EPA Documents 450/3–91–022a and –022b, is available for guidance. Further interpretations of EPA policy are found in the Blue Book, referred to in footnote 3. In general, these guidance documents have been set forth to ensure that VOC rules are fully enforceable and strengthen or maintain the SIP.

The Placer County APCD submitted Rule 213, Gasoline Transfer into Stationary Storage Containers, and submitted Rule 215, Transfer of Gasoline into Tank Trucks, Trailers and Railroad Tank Cars at Loading Facilities, include the following significant changes from the current SIP rules:

- Air Pollution Control Officer (APCO) discretion to allow the use of alternative control systems has been deleted from both rules.
- Test methods for determining compliance with the rules' standards have been added.
- Recordkeeping provisions requiring daily throughput logs have been added to both rules.
- Definitions of relevant terms have been expanded.

The San Joaquin Valley Unified APCD submitted Rule 463.2, Organic Liquid Storage, includes the following significant changes from the eight existing country SIP rules which this rule will replace:

- Specific limits for the gap (space) between the floating roof seal and the tank wall have been set for the whole District. Three of the eight counties did not have gap specifications in their SIP rules. In some cases, these limits are more stringent than those in several of the individual county SIP rules which have gap limits. Also, gap limits for secondary toroid seals are now specified.
- APCO discretion to allow the use of any control equipment other than that specified in the rule has been deleted.
- A provision has been added that new seal designs may be approved by the APCO if EPA approves the designs and publish the approval pursuant to 40 CFR 60.114(b).
- Recordkeeping provisions providing tank contents and storage temperature data have been added which were not a part of three of the existing SIP rules.
- Test methods to determine compliance have been added which were not a part of three of the SIP rules. Also, the test methods have been expanded and clarified from those methods in SIP rules that had test methods.

The San Diego County APCD submitted Rule 61.4, Transfer of Volatile Organic Compounds into Vehicle Fuel Tanks, includes the following significant changes from the current SIP:

- Recordkeeping provisions for throughput by facilities claiming throughput exemptions have been added.
- CARB certification procedures have been added which helps to insure that the equipment has a 95% vapor control efficiency.
- Provisions have been added that make it a violation to operate altered or damaged equipment.

EPA has evaluated the submitted rules and has determined that they are consistent with the CAA, EPA regulations, and EPA policy. Therefore, Placer County's Rules 213 and 215, San Joaquin Valley Unified's Rule 463.2, and San Diego County's Rule 61.4 are being proposed for approval under section 110(k)(3) of the CAA as meeting the requirements of section 110(a) and Part D.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Regulatory Process

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et. seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under sections 110 and subchapter I, Part D of the CAA do not create any new requirements but simply approve requirements that the State is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, it does not have a significant impact on any small entities affected. Moreover, due to the nature of the Federal-State relationship under the CAA, preparation of a flexibility analysis for a SIP approval would constitute Federal inquiry into the economic reasonableness of the State action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *U.S. E.P.A.*, 427 U.S. 246, 256–66 (S.Ct. 1976); 42 U.S.C. 7410(a)(2).

This action has been classified as a Table 2 action by the Regional Administrator under the procedures published in the Federal Register on January 19, 1989 (54 FR 2214–2225). On

January 6, 1989, the Office of Management and Budget (OMB) waived Table 2 and Table 3 SIP revisions (54 FR 2222) from the requirements of Section 3 of Executive Order 12291 for a period of two years. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request.

[FRL–4516–2]

National Emission Standards for Hazardous Air Pollutants for Source Categories: Perchloroethylene Emissions From Dry Cleaning Facilities

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability of new information on control of perchloroethylene (PCE) emissions during clothing transfer at dry cleaning facilities which use transfer dry cleaning machines.

SUMMARY: National emission standards for hazardous air pollutants (NESHAP) for PCE dry cleaning facilities were proposed in the **Federal Register** on December 9, 1991 (56 FR 64382). This notice announces the availability of new information on control of PCE emissions during clothing transfer at dry cleaning facilities which use transfer machines. This notice solicits public review of this information and public comment on the use of this information in developing NESHAP limiting PCE emissions from dry cleaning facilities.

DATES: *Comments:* Written comments must be received on or before November 2, 1992.

Public Meeting: If anyone requests a public meeting by October 11, 1992 a public meeting will be held on October 16, 1992. This meeting will begin at 9 a.m., and it will be held at the EPA Environmental Research Center Annex Auditorium, located at Alexander Drive and Highway 54 in Research Triangle Park, North Carolina. Persons interested in attending the public meeting should call Ms. Julia Stevens at (919) 541–5578 to verify that a public meeting will be held.

Request to Speak at Public Meeting: Persons wishing to make oral statements at this public meeting must contact Ms. Julia Stevens at (919) 541–5578 by October 11, 1992.

ADDRESSES: *Comments:* Written comments should be submitted (in duplicate, if possible) to: Air Docket Section (LE–131), Attention Docket Number A–88–11, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

Docket: A special docket category, Docket Number A–88–11, Category IV–M, containing new information on control of PCE emissions during clothing transfer from dry cleaning facilities using transfer machines is available for public inspection between 8:30 a.m. and 3:30 p.m., Monday through Friday, at the EPA's Air Docket, at the address above. A reasonable fee may be charged for copying. Anyone wishing to have a copy of the contents of this docket category mailed to them should contact Mr. George Smith at (919) 541–1549.

FOR FURTHER INFORMATION CONTACT: Mr. George Smith at (919) 541–1549 or Mr. Fred Porter at (919) 541–5251, Standards Development Branch (MD–13), U.S. EPA, Research Triangle Park, NC 27711.

SUPPLEMENTARY INFORMATION: The information presented in this notice is organized as follows:

I. Introduction.
II. Background.
III. Emissions of PCE During Clothing Transfer.
IV. Control of Emissions During Clothing Transfer.
  A. Hamper Enclosures.
  B. Room Enclosures.
  C. Replacement with Dry-to-Dry Machines.
  D. Emission Control Performance.
V. Preliminary Economic Impact Assessment.
  A. Projected Economic Impacts at Proposal.
  B. Preliminary Assessment of Economic Impacts.
  C. Concerns with Preliminary Assessment.
VI. New Transfer Machines.
VII. Reclaimers.
VIII. Public Meeting.

I. Introduction

On December 9, 1991, NESHAP limiting PCE emissions from new and existing dry cleaning facilities were proposed in the **Federal Register** (56 FR 64382). The reader is referred to the December 9, 1991 **Federal Register** notice for the detailed requirements included in the proposed NESHAP.

To summarize briefly, however, the NESHAP proposed to subcategorize the source category of PCE dry cleaning facilities into two subcategories: Those using transfer machines and those using dry-to-dry machines. In addition, the NESHAP proposed to exempt from all regulatory requirements, except the notification requirements, existing transfer machines which consume less than 1,100 liters per year (300 gallons per year) of PCE and existing dry-to-dry machines which consume less than 830 liters per year (220 gallons per year) of PCE.

Basically, the NESHAP proposed that all owners and operators of transfer and dry-to-dry machines consuming more than the amounts of PCE noted above install and operate carbon absorbers, refrigerated condensers, or equivalent equipment on the vents from these dry cleaning machines. In addition, the NESHAP also proposed that these owners and operators follow pollution prevention practices, such as good operation and maintenance, to prevent liquid or vapor leaks of PCE from dry cleaning equipment. As discussed below, however, the NESHAP proposed no requirements to limit emissions of PCE form clothing transfer at dry cleaning facilities using transfer machines.

This notice summarizes information regarding control of PCE emissions during clothing transfer at dry cleaning facilities using transfer machines which the EPA was unaware of at the time of proposal of the NESHAP. It also summarizes information the EPA was unaware of at proposal of the NESHAP concerning the likelihood that dry cleaning facilities might purchase and install new transfer machines, as well as the use of a piece of dry cleaning equipment referred to within the dry cleaning industry as a "reclaimer."

This notice solicits public comment on this information. It also solicits public comment on what, if any, requirements should be incorporated into final NESHAP at promulgation to limit emissions of PCE from clothing transfer at dry cleaning facilities using transfer machines. In addition, this notice solicits public comment on what, if any, requirements should be incorporated into the final NESHAP at promulgation limiting PCE emissions from new transfer machines (if any new machines of this type are installed) and what, if any, requirements should be included in the final NESHAP at promulgation limiting PCE emissions from reclaimers. This notice does not reopen the public comment period on the proposed NESHAP; only public comments pertaining to the specific issues mentioned in this notice will be reviewed and considered by the EPA in

developing the final NESHAP for promulgation.

II. Background

Under Title III of the 1990 CAA, NESHAP limiting PCE emissions from major source dry cleaning facilities (that is, those which emit or have the potential to emit more than 10 tons per year of PCE) must reflect maximum achievable control technology (MACT). For new major source dry cleaning facilities, MACT can be no less stringent than the level of emission control currently achieved at the best performing similar source. Thus, it would appear that the final NESHAP promulgated for new major source dry cleaning facilities which use transfer machines must include requirements requiring use of the technologies outlined below (or equivalent technologies) for control of PCE emissions during clothing transfer. Specific public comment is solicited on whether the emission control achieved by the technologies outlined below controlling PCE emissions during clothing transfer must be or should be considered MACT for new major source dry cleaning facilities which use transfer machines.

For existing major source dry cleaning facilities, MACT can be no less stringent than the level of emission control currently achieved at the best performing 12 percent of similar sources. Far fewer than 12 percent of existing major source dry cleaning facilities which use transfer machines use any of the technologies outlined below for control of PCE emissions during clothing transfer. MACT must, however, also reflect the maximum degree of emission control which the Administrator determines is achievable, considering the costs and any non-air quality health and environmental and energy impacts associated with this emission control. Specific public comment, therefore, is solicited on whether the emission control achieved by the technologies outlined below for controlling PCE emissions during clothing transfer should be considered MACT for existing major source dry cleaning facilities which use transfer machines (that is, achievable considering the costs and other impacts associated with the use of these technologies). If these technologies are considered MACT for existing major source dry cleaning facilities using transfer machines, the final NESHAP promulgated would include requirements requiring the use of these technologies (or equivalent technologies) at existing major source dry cleaning facilities using transfer machines.

Only a small percentage of dry cleaning facilities, however, are considered major sources. Most dry cleaning facilities are considered area sources (that is, they emit less than 10 tons per year of PCE). Under Title III of the 1990 CAA Amendments, NESHAP for new and existing area sources may reflect MACT or they may reflect generally available control technology (GACT). The December 9, 1991 Federal Register notice proposed that NESHAP for both new and existing area source dry cleaning facilities reflect GACT and the reader is referred to that Federal Register notice for further detail. This notice is not reopening for public comment this proposed action to base NESHAP for area source dry cleaning facilities on GACT.

GACT is the maximum degree of emission control the Administrator determines is reasonable, considering the costs and other impacts associated with this emission control. GACT may or may not be as stringent as MACT. In addition, as with MACT, GACT may be different for new area sources than for existing area sources.

Specific public comment is solicited on whether the technologies outlined below should be considered generally available (that is, GACT) for controlling PCE emissions during clothing transfer at new and/or existing area source dry cleaning facilities using transfer machines. In other words, should use of these technologies be considered reasonable in light of the costs and other impacts associated with their use, and should the final NESHAP promulgated include requirements requiring the use of these technologies (or equivalent technologies) at new and/or existing area source dry cleaning facilities using transfer machines.

The new information outlined below on control of PCE emissions during clothing transfer at dry cleaning facilities using transfer machines has been included in Docket A–88–11 in Docket Category IV–M. Docket Category IV–M is available as an information packet. This information packet was mailed to all those who commented on the December 9, 1991 proposed NESHAP. Anyone else who wishes to receive the information packet will be sent a copy (see **ADDRESSES**).

III. Emissions of PCE During Clothing Transfer

There are two types of dry cleaning machines: Transfer machines and dry-to-dry machines. A transfer machine consists of two pieces of equipment: A washer and a dryer. At the conclusion of the washing cycle, clothing is manually transferred from the washer to the dryer. Since this clothing is damp with PCE, this step is a significant source of PCE emissions at dry cleaning facilities using transfer machines.

A dry-to-dry machine consists of a single piece of equipment which serves as both a washer and a dryer. As a result, there is no clothing transfer step at facilities using dry-to-dry machines. Since the clothing transfer step is eliminated, there are no PCE emissions during clothing transfer.

The table below illustrates the significance of PCE emissions during clothing transfer in comparison to overall PCE emissions at both transfer and dry-to-dry machines.

EMISSION FACTORS FOR DRY CLEANING MACHINES

[Pounds of PCE Per 100 Pounds of Clothes]

Source	Transfer	Dry-to-Dry
Machine vent	4.0	3.1
Clothing transfer	2.5	0
Equipment leaks	2.5	2.5
Total	9.0	5.6

Nearly a third of all PCE emissions from transfer machines are created during clothing transfer. Overall, transfer machines emit almost twice the PCE emissions that dry-to-dry machines do.

IV. Control of Emissions During Clothing Transfer

At the time of the December 9, 1991 proposal of NESHAP to limit PCE emissions from dry cleaning facilities, the EPA was unaware of any technologies for controlling PCE emissions during clothing transfer at facilities using transfer machines. Public comments submitted in response to the proposal, however, as well as additional information gathered by EPA in response to these public comments, indicate there are several technologies which have been developed recently to control these emissions.

These technologies are termed transfer enclosures for the purpose of further discussion. A transfer enclosure captures or collects PCE emissions during clothing transfer at dry cleaning facilities using transfer machines. Transfer enclosures have been subclassified into two types: Hamper enclosures and room enclosures.

In addition to the use of transfer enclosures, another approach to control PCE emissions during clothing transfer is to replace the transfer machine with a dry-to-dry machine. This approach eliminates the need for clothing transfer,

thus eliminating PCE emissions from this step.

As mentioned earlier, in response to public comments submitted on the December 9, 1991 proposed NESHAP, EPA has attempted to gather all available information on various technologies for capturing and controlling PCE emissions during clothing transfer at dry cleaning facilities using transfer machines. This notice summarizes the results of these efforts and EPA believes all available information has been collected. There may, however, remain other technologies the EPA is unaware of for controlling PCE emissions during clothing transfer at dry cleaning facilities using transfer machines and, as a result, this notice solicits information on any other technologies that may be in use for this purpose.

A. Hamper Enclosures

Clothing is transferred from the washer to the dryer at dry cleaning facilities using tranfer machines in a clothing hamper. A hamper enclosure basically consists of a hood or canopy that effectively encloses the clothing hamper and the open door of the washer when clothing is removed from the washer and placed in the clothing hamper. The same or a different hood or canopy is used to effectively enclose the clothing is transferred from the hamper to the dryer. In addition, the clothing hamper is covered or enclosed when it is wheeled from the washer to the dryer, as well as when it is not in use, to prevent escape of PCE vapors from the hamper.

Hamper enclosures are constructed of a material impervious to PCE vapors, typically clear plastic. The use of clear plastic permits the operator to see into the enclosure. Openings or slits in the hamper enclosure provide access, allowing one to reach into the enclosure provide access, allowing one to reach into the enclosure, open the door of the washer or dryer, transfer clothing to or from the hamper, and then close the door of the washer or dryer. Sleeves and gloves may be attached to these openings or slits, so that when one reaches into the enclosure, their arms and hands are covered.

If the hamper enclosure has openings through which PCE vapors could escape during clothing transfer, fans are used to draw room air into the enclosure to prevent PCE vapors from escaping. Captured PCE vapors are routed to a control device for control. If the hamper enclosure has no openings through which PCE vapors could escape, fans are not necessary.

Hamper enclosures currently sell for about $3,000. Operation and maintenance costs are reported to be negligible, and in some cases, particularly for larger dry cleaning facilities, the use of hamper enclosures are reported to "pay for themselves" through the savings generated as a result of additional PCE solvent recovery.

B. Room Enclosures

A room enclosure, as the name implies, basically consists of a room built to enclose the transfer machine—both the washer and the dryer. The enclosure is constructed of a frame covered by a material impervious to PCE vapors. The frame is typically metal, but could be constructed of other materials, and the material covering the frame is typically clear plastic. A fan is turned on to draw air from outside the room enclosure through louvered door opening(s) in the enclosure during clothing transfer to collect PCE vapors. The PCE vapors collected during clothing transfer are routed to a control device for control.

The louvered door opening(s) in the room enclosure typically consist of strips of plastic hanging from the top of the door openings to the floor. These strips of plastic are moved aside to permit entry to or exit from the room enclosure.

Room enclosures currently sell for about $10,000–$12,000. Operation and maintenance costs are reported to be negligible.

C. Replacement by Dry-to-Dry machines

Each of the technologies mentioned above are used with a transfer machine to control PCE emissions during clothing transfer. Another approach to control PCE emissions from clothing transfer is to replace the transfer machine with a dry-to-dry machine. Dry-to-dry machines perform both the washing cycle and the drying cycle in the same machine. The use of a dry-to-dry machine, therefore, eliminates the clothing transfer step. As a result, this eliminates PCE emissions from clothing transfer.

A new dry-to-dry machine can cost as much as $25,000 or more depending on the size of machine purchased. In addition to the cost of purchasing a new dry-to-dry machine, however, there would be additional costs associated with the removal of the existing transfer machine, since many dry cleaning facilities would probably have to remove the existing transfer machine to make space for a new replacement dry-to-dry machine.

D. Emission Control Performance

Information on the emission control performance of transfer enclosures is limited. Transfer enclosures have been developed relatively recently, and only a small number of dry cleaning facilities currently use them. Based on observation during visits to sites using transfer enclosures and the use of "engineering judgment," the hamper enclosure is considered to be about 75 percent effective in reducing PCE emissions during clothing transfer at dry cleaning facilities using transfer machines. The room enclosure is considered to be about 95 percent effective. In comparison, replacement of an existing transfer machine with a new dry-to-dry machine is 100 percent effective since the clothing transfer step is eliminated.

V. Preliminary Economic Impact Assessment

As discussed in the December 9, 1991 **Federal Register** notice proposing NESHAP for dry cleaning facilities using PCE, the Regulatory Flexibility Act (5 U.S.C. 601 et seq.) requires that special consideration be given during the development of regulations to the potential impacts of regulation on small business entities. Dry cleaning firms are generally small businesses and a large portion of these businesses are family-owned and operated. Many of these businesses are characterized by limited cash flows, marginal profitability and, as a result, do not have ready access to large amounts of capital for investment in the business. Thus, the economic impact analysis undertaken to support the proposed NESHAP focused on the potential impact of the NESHAP on small dry cleaning facilities.

A. Projected Economic Impacts at Proposal

The reader is referred to the December 9, 1991 **Federal Register** notice for a full discussion of the economic impact analysis undertaken to support the proposed NESHAP. Two significant potential impacts examined in the analysis were the number of firms projected to experience difficulty raising capital to purchase the emission control equipment required by the NESHAP and the number of projected closures that might occur as a result of adopting the NESHAP. To summarize briefly, the analysis projected that some 670 facilities could experience difficulty raising the capital necessary to comply with the proposed NESHAP and some 30 facilities could close as a result of adopting the proposed NESHAP.

The proposed NESHAP included an exemption from the major requirements of the NESHAP for facilities with gross annual revenues of less than $100,000. (This exemption was expressed in terms of an annual PCE consumption level.) If the exemption level was lowered to only exempt facilities with gross annual revenues of less than $50,000, some 360 additional facilities could experience difficulty raising the capital necessary to comply and some 150 additional facilities could close. As a result, the total number of facilities that might experience difficulty raising the capital necessary to comply with the NESHAP could increase from about 670 to about 1,030, and the total number of facilities that might close could increase from about 30 to about 180.

If the exemption level was lowered to only exempt facilities with annual gross revenues of less than $25,000, some further 1,260 additional facilities could experience difficulties raising the capital necessary to comply and some further 280 additional facilities could close. As a result, the total number of facilities that might experience difficulties raising the capital necessary to comply with the NESHAP could increase from about 670 to about 2,290, and the total number of facilities that might close could increase from about 30 to about 460.

B. Preliminary Assessment of Economic Impacts

To examine the potential economic impacts that might be associated with including requirements to limit PCE emissions from clothing transfer in the final NESHAP adopted at promulgation, a preliminary assessment of these impacts was undertaken. This preliminary assessment employed the same analytic methodology as that used in the economic analysis undertaken to support the proposed NESHAP. Due to a number of concerns, however, which are discussed further below, this preliminary assessment is considered limited in scope.

The major limitation is the assumption that all dry cleaning facilities with transfer machines could purchase and install a hamper enclosure at a cost of $3,000 to limit PCE emissions from clothing transfer. The EPA has a number of concerns with this assumption (as discussed below), but given the time and difficulty associated with developing a more sophisticated methodology that might model a "monopolistic market" environment, EPA chose to use this assumption to examine the potential economic impacts under what might be termed a "best case" scenario.

The complete preliminary economic impact assessment is included in docket category IV–M. To briefly summarize the projected impacts, however, the preliminary assessment projects that if requirements based on the use of hamper enclosures (or equivalent equipment) were included in the proposed NESHAP to limit PCE emissions from clothing transfer, some 490 additional dry cleaning facilities might experience difficulty raising the capital necessary to comply with the NESHAP and some additional 5 facilities might close. Thus, including such requirements in the proposed NESHAP could increase the number of firms projected to experience difficulty raising the capital necessary to comply with the NESHAP from about 670 to about 1,160. The projected number of facilities that might close could increase from about 30 to about 35.

As mentioned, the proposed NESHAP include an exemption from the major requirements of the NESHAP for dry cleaning facilities with annual gross revenues of less than $100,000. The projections cited above also assume this exemption level would apply to requirements to limit PCE emissions from clothing transfer. If the exemption level for the requirements to control PCE emissions from clothing transfer was lowered to exempt only facilities with annual gross revenues of less than $50,000 (but the $100,000 exemption level still applied to all other major requirements of the NESHAP), some 310 additional facilities could experience difficulties raising the capital necessary to comply and some 130 additional facilities might close. Thus, the total projected number of facilities that might experience difficulty raising the capital necessary to comply with the NESHAP could increase from about 670 to about 1,470 and the total number of facilities that might close could increase from about 30 to about 165.

Finally, if the exemption level for requirements to control PCE emissions from clothing transfer was lowered to only exempt facilities with annual gross revenues of less than $25,000, the preliminary assessment projects some further 300 additional facilities could experience difficulties raising the capital necessary to comply and some further 130 additional facilities might close. Thus, the total projected number of facilities that might experience difficulties raising the capital necessary to comply with the NESHAP could increase from about 670 to about 1,770 and the total number of facilities that might close could increase from about 30 to about 295.

The magnitude of these potential impacts associated with including requirements in the NESHAP to limit PCE emissions from clothing transfer is considered quite significant. As discussed in the December 9, 1991 **Federal Register** notice proposing the NESHAP for PCE dry cleaning facilities, the costs of the emission control equipment necessary to comply with the proposed NESHAP were estimated to be in the range of $6,000 to $8,000. As mentioned above, the preliminary assessment assumes the equipment necessary to control PCE emissions from clothing transfer at dry cleaning facilities using transfer machines would cost about $3,000. Thus, the magnitude of these potential impacts projected by the preliminary assessment is not surprising.

C. Concerns With Preliminary Assessment

As mentioned earlier, the EPA believes this preliminary assessment of potential economic impacts associated with requirements to limit PCE emissions from clothing transfer at dry cleaning facilities using transfer machines is limited in scope. As a result, the projected impacts cited above are viewed as a "best case" scenario. A more sophisticated analysis would probably indicate the potential impacts would be much more severe.

The basic reason stems from the critical assumption in the preliminary assessment that requirements to limit PCE emissions from clothing transfer would be based on the use of hamper enclosures and that dry cleaning facilities using transfer machines would experience costs of only $3,000 to purchase and install a hamper enclosure (or equivalent equipment). It seems highly questionable that the actual costs dry cleaning facilities would experience to obtain this technology would remain as low as $3,000. It seems more likely the actual costs would increase, perhaps substantially, above $3,000 due to the demand created within the dry cleaning industry for this technology by including such requirements in the NESHAP.

Currently, there is only one vendor actively selling hamper enclosures and this vendor has obtained patents on his device. This vendor has sold about 20 hamper enclosures. A second vendor has sold hamper enclosures in the past of a somewhat different design than that of the first vendor's. This second vendor no longer does so, however, due to a patent dispute with the first vendor. A third vendor has designed a hamper enclosure, also of a somewhat different design than that of the fist vendor's, and has experimented with its use. However, this third vendor appears reluctant to pursue sales at this point.

Including requirements in the NESHAP to control PCE emissions during clothing transfer, based on the use of hamper enclosures (or equivalent equipment), therefore, could give rise to a monopoly market for hamper enclosures. In this environment, the cost of a hamper enclosure would likely increase to that of alternatives—such as the room enclosure.

This alternative, however, is also currently offered only by a single vendor and this vendor has obtained patents on his device. A second vendor has built several custom designed room enclosures which appear quite effective in capturing PCE vapors from clothing transfer. To date, however, the room enclosures built by this second vendor have not included a control device to control the PCE vapors collected by the room enclosure; the collected PCE vapors are merely collected and released to the atmosphere outside the dry cleaning facility.

Consequently, even if requirements included in the NESHAP to limit PCE emissions from clothing transfer were based on the use of hamper enclosures (or equivalent equipment), the actual costs experienced by dry cleaning facilities to comply with these requirements could increase substantially beyond the $3,000 cost assumed in the preliminary assessment. Eventually other approaches for controlling PCE emissions from clothing transfer would be developed, which would ultimately serve to limit increases in the costs of transfer enclosures. At this point, however, it is very difficult to determine what the actual costs would be of regulatory requirements to control PCE emissions from clothing transfer.

In addition to these concerns regarding the actual costs of transfer enclosures, concerns also exist regarding the ability of the vendor or vendors of these transfer enclosures to supply a large market. Under Title III of the CAA Amendments, all sources for which NESHAP are developed must be in compliance with these NESHAP within three years following adoption or promulgation of the NESHAP.

Currently, about half of the estimated 30,000 commercial dry cleaning facilities are believed to operate with annual gross revenues of more than $100,000. About a third of these facilities are believed to use transfer machines. Thus, including requirements to control PCE emissions from clothing transfer in the final NESHAP adopted at promulgation would create a demand for as many as 5,000, or possibly more, transfer enclosures.

The vendor of the hamper enclosure has only sold about 20 hamper enclosures. The vendor of the room enclosure has only sold some 5 room enclosures. While this does not mean these vendors could not supply several thousand transfer enclosures within three years, it does raise concerns about their ability to adequately supply the potential market.

This in turn, raises concerns about the fate of existing dry cleaning facilities using transfer machines, if the NESHAP required control of PCE emissions during clothing transfer. Many facilities that could afford to purchase transfer enclosures and who tried to purchase enclosures might be unable to obtain and install them within the three year time frame provided by the Act. This would require the EPA to take enforcement action against these dry cleaning facilities and this, quite possibly, could result in a substantial number of closures.

As mentioned earlier, another approach to limit PCE emissions from clothing transfer at dry cleaning facilities using transfer machines is to replace the transfer machines with dry-to-dry machines. The costs of a new dry-to-dry machine, however, can be as much as $25,000 or more. As a result the potential impacts associated with including requirements in the NESHAP which effectively required replacement of existing transfer machines with new dry-to-dry machines would be much more severe than the potential impacts cited above. Consequently, the EPA is inclined to conclude that control of PCE emissions from clothing transfer through replacement of existing transfer machines with new dry-to-dry machines at existing major source dry cleaning facilities using transfer machines is not achievable within the meaning of the Act. Similarly, the EPA is inclined to conclude this is also not generally available (within the meaning of the Act) at existing area source dry cleaning facilities using transfer machines.

In light of the magnitude of the potential impacts projected by the preliminary assessment, as well as the concerns outlined above which lead the EPA to believe these impacts could be much greater, the EPA is inclined to conclude that control of PCE emissions from clothing transfer at existing major source dry cleaning facilities using transfer machines is not achievable within the meaning of the Act. In addition, the EPA is also inclined to conclude that control of PCE emissions from clothing transfer at existing area source dry cleaning facilities using transfer machines is not generally available within the meaning of the Act.

As mentioned above, this notice solicits public comment on whether control of PCE emissions during clothing transfer is achievable (within the meaning of the Act) for existing major source day cleaning facilities and/or generally available for existing area source dry cleaning facilities using transfer machines. This judgment must take into consideration the potential impacts and concerns outlined above. Specific comment on the potential impacts and concerns outlined above is solicited. In addition, if control of PCE emissions from clothing transfer is considered achievable and/or generally available, specific comment is solicited on whether the NESHAP should include requirements based on the use of hamper enclosures, room enclosures, replacement of transfer machines by new dry-to-dry machines, or some other approach.

VI. New Transfer Machines

At the time of proposal of the December 9, 1991 NESHAP for PCE dry cleaning facilities, the EPA believed that no new transfer machines had been sold in recent years and that no new transfer machines would be sold in the future. All new dry cleaning machines were expected to be dry-to-dry machines, mainly because of the problems arising from occupational exposure to PCE emissions that may occur during clothing transfer at dry cleaning facilities using transfer machines.

The permissible exposure limit (PEL) for PCE of 25 parts per million (ppm), which the Occupational Safety and Health Administration (OSHA) had adopted, was felt to be a major driving force from transfer machines to dry-to-dry machines. In fact, EPA believed that transfer machines would not be able to meet this OHSA PEL.

Public comment has stated otherwise, however, claiming that maybe half of the existing dry cleaning facilities using transfer machines currently are able to meet the 25 ppm PEL for PCE. Also, the Eleventh Circuit Appeals Court recently remanded the 25 ppm PEL to the OSHA for reconsideration. This action may have the effect of lessening the movement from transfer machines to dry-to-dry machines in the dry cleaning industry.

Public comment has also stated that manufacturers of petroleum solvent transfer machines could sell these machines for use as new PCE transfer machines. Thus, new PCE transfer machines could easily and quickly be offered for sale in response to a demand for such machines. Transfer machines are claimed to be less costly and more productive than dry-to-dry machines, and this could lead to a resurgence in

their use. Accordingly, this notice solicits public comment on the likely market for new transfer machines under the proposed NESHAP.

In addition, this notice also solicits public comment on what requirements, if any, should be included in the final NESHAP promulgated for new PCE transfer machines. Such requirements could require control of PCE emissions from only the washer and dryer vents, could require control of PCE emissions from the washer and dryer vents and during clothing transfer, or could require all new dry cleaning machines to limit PCE emissions to the levels that can be achieved through the use of new dry-to-dry machines. This last approach could effectively preclude the use of new transfer machines.

As mentioned earlier, MACT for new major source dry cleaning facilities must be no less stringent than the level of emission control achieved by the best similar source. As a result, it would appear that the final NESHAP adopted at promulgation must include requirements based on the use of room enclosures (or equivalent equipment) to limit PCE emissions from clothing transfer at new major source dry cleaning facilities using new transfer machines. The EPA, therefore, is inclined to conclude that control of PCE emissions from clothing transfer based on the use of room enclosures (or equivalent equipment) at new major source dry cleaning facilities using new transfer machines is achievable within the meaning of the Act.

On the other hand, EPA is inclined to conclude that control of PCE emissions from clothing transfer based on the use of new dry-to-dry machines (or equivalent equipment) at new major source dry cleaning facilities using new transfer machines is not achievable within the meaning of the Act. The additional control of PCE emissions achieved through the use of a new dry-to-dry machine over the use of a room enclosure appears marginal, particularly in comparison with the increased costs of a new dry-to-dry machine over a room enclosure. The incremental cost effectiveness of emission control, for example, is about $17,000 per ton of PCE.

Specific public comment is solicited on EPA's inclination to conclude that requirements in the NESHAP based on the use of room enclosures to limit PCE emissions from clothing transfer at new major source dry cleaning facilities that use new transfer machines are achievable within the meaning of the Act. In addition, specific public comment is solicited on EPA's inclination to conclude that requirements based on the use of new dry-to-dry machines are not achievable within the meaning of the Act.

With regard to new area source dry cleaning facilities that use new transfer machines, the EPA is included to conclude that requirements based on the use of hamper enclosures (or equivalent equipment) to limit PCE emissions from clothing transfer are generally available within the meaning of the Act. On the other hand, requirements to limit PCE emissions from clothing transfer based on the use of room enclosures (or equivalent equipment), as well as new dry-to-dry machines (or equivalent equipment) are not generally available within the meaning of the Act.

The additional control of PCE emissions achieved through the use of a hamper enclosure appears quite reasonable compared to the costs of a hamper enclosure. The incremental cost effectiveness of emission control, for example, is about $700 per ton of PCE.

The additional control of PCE emissions achieved through the use of a room enclosure over the use of a hamper enclosure appears marginal, particularly in comparison with the increased cost of a room enclosure over a hamper enclosure. The incremental cost effectiveness of emission control, for example, is about $9,000 per ton of PCE. It is the same with the use of a new dry-to-dry machine.

Specific public comment is solicited on EPA's inclination to conclude that requirements in the NESHAP based on the use of hamper enclosures to limit PCE emissions from clothing transfer at new area source dry cleaning facilities that use new transfer machines are achievable within the meaning of the Act. In addition, specific public comment is solicited on EPA's inclination to conclude that requirements based on the use of room enclosures or new dry-to-dry machines are not achievable within the meaning of the Act.

With regard to requirements based on the use of hamper enclosures (or equivalent equipment), it seems reasonable to assume that few, if any, owners/operators, or for that matter, potential new entrants into the dry cleaning industry, with ready access to sufficient capital to purchase a new transfer machine, would experience difficulty raising the additional capital necessary to purchase a hamper enclosure (or equivalent equipment). It also seems reasonable to assume that few, if any, owners/operators, or for that matter potential new entrants into the dry cleaning industry, would find that the additional capital requirements associated with purchasing a hamper enclosure would adversely alter the potential profitability of purchasing a new transfer machine enough to deter this decision.

VI. Reclaimers

EPA was also unaware at proposal of a piece of dry cleaning equipment referred to within the industry as a reclaimer. It appears that reclaimers are being sold for use with dry-to-dry machines. Used with a reclaimer, a dry-to-dry machine is operated in a manner similar to that of a washer in a transfer machine. Clothing is washed in the dry-to-dry machine and then transferred to the reclaimer for drying. The use of a reclaimer is said to increase the capacity of a dry cleaning facility which uses a dry-to-dry machine.

Although no new transfer machines may have been sold in recent years, a number of reclaimers have been sold. Buying a reclaimer is less expensive than buying a new dry-to-dry machine, and thus buying a reclaimer offers a less expensive means of increasing a dry cleaner's capacity than the purchase of another dry-to-dry machine.

This notice solicits information on the number of reclaimers presently being used within the dry cleaning industry and on potential future sales of reclaimers.

The EPA believes the use of a reclaimer essentially converts a dry-to-dry machine into a transfer machine. As a result, the EPA believes existing dry-to-dry machine which are operated in conjunction with a reclaimer should be considered as transfer machines—not dry-to-dry machines—under the NESHAP. Also, the EPA believes that adding a new reclaimer to an existing dry-to-dry machine should result in that machine (both the dry-to-dry machine and the reclaimer) being considered a new transfer machine under the NESHAP. This notice, therefore, solicits public comment on this approach to the use of reclaimers under the NESHAP.

VIII. Public Meeting

Written comments should be submitted to the docket at the address provided under **ADDRESSES** above and by the date provided under **DATES** above. As mentioned above, in addition to requesting written comments, the EPA has also scheduled a public meeting to solicit oral comments. This public meeting does not constitute a public hearing for purposes of section 307(d)(5) of the CAA Amendments of 1990. A public hearing was scheduled to be held on January 8, 1992 in Research Triangle Park, North Carolina, following proposal of the NESHAP on December 9, 1991. No

one requested to speak at this public hearing, so no public hearing was held. Since the opportunity for a public hearing has been provided, the public comment period will not remain open for thirty days following the public meeting. Nevertheless, some parties may want to provide additional written comments in response to what is said at the meeting (if one is held) and, as a result, the comment period will remain open for fifteen days following the public meeting. The time, date, and location of the public meeting are provided under **ADDRESSEES** above. The EPA recognizes that the brief period provided for public comment is shorter than normal. However, the EPA is bound by a Consent Decree with the U.S. District Court for the District of Oregon to promulgate the NESHAP for PCE dry cleaning facilities. This requires that public review and comment of the information presented in this notice be done as rapidly as possible, and will not allow for a longer comment period. It should be noted that the focus of the public comments requested is narrow, and the EPA believes the material in Category IV–M of Docket A–88–11 can be adequately reviewed within this time period. In addition, as mentioned earlier, the comment period on other issues is not being reopened; only comments pertaining to the specific issues mentioned in this notice will be accepted.

Dated: September 9, 1992.

Michael Shapiro,

Acting Assistant Administrator for Air and Radiation.

Notices

Federal Register
Vol. 57, No. 191
Thursday, October 1, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

Agency Information Collection

AGENCY: ACTION, the Federal Domestic Volunteer Agency.

ACTION: Information collection submitted to the Office of Management and Budget (OMB) for review.

SUMMARY: The following form has been submitted to OMB for approval under the Paperwork Reduction Act (44 U.S.C. chapter 35). This entry is not subject to 44 U.S.C. 3504(h). Copies of the submission(s) may be obtained from the ACTION Clearance Officer.

DATES: OMB and ACTION will consider comments received within 60 days from the date of this publication. Send comments to both:

Janet Smith, Clearance Officer, ACTION, 1100 Vermont Ave., NW., Washington, DC 20525, Tel: (202) 606–5245

Steve Semenuk, Desk Officer for ACTION, Office of Management and Budget, 3002 New Executive Office Bldg., Washington, DC 20503

Title of Form: Vista Pre-Application Inquiry.

ACTION Forms No.(s): A–1024.

Need and Use: This document is used by the ACTION State Program Offices to ascertain qualifications of potential VISTA sponsors.

Type of Request: Pre-Application Inquiry.

Respondent's Obligation to Reply: Optional—determined by State Program Office.

Description of Respondents: Public agencies and private non-profits, including small, grass-roots organizations.

Frequency of Collection: Once, as determined by State Office.

Estimated Number of Annual Responses: 200.

Average Burden Hours per Response: 1¼.

Estimated Annual Reporting or Disclosure Burden: 250 hours.

Dated: September 24, 1992.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Government Processes; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Committee on Governmental Processes of the Administrative Conference of the United States. The meeting will be held at 2 p.m., on Thursday, October 22, 1992, at the Administrative Conference of the United States, suite 500, 2120 L Street, NW., Washington, DC (Library, 5th Floor).

The Committee will meet to discuss a study by Professor Ronald F. Wright, Wake Forest University School of Law, on right to counsel issues arising in agency proceedings.

For further information concerning this meeting, contact Deborah S. Laufer, Office of the Chairman, Administrative Conference of the United States, 2120 L Street, NW., suite 500, Washington, DC (Telephone: 202–254–7020).

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman at least one day in advance. The committee chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting. Any member of the public may file a written statement with the committee before, during, or after the meeting. Minutes of the meeting will be available upon request.

Dated: September 25, 1992.

Jeffrey S. Lubbers,

Research Director.

BILLING CODE 6110–01–M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

DEPARTMENT OF LABOR

Immigration and Nationality Act (Section 210A); Seasonal Agricultural Services Worker Shortage Determination

AGENCIES: Office of the Secretary, United States Department of Agriculture; Office of the Secretary, United States Department of Labor.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Secretaries of Agriculture and Labor (the Secretaries) have determined jointly that the number of additional aliens who should be admitted to the United States or who should otherwise acquire the status of aliens lawfully admitted for temporary residence under section 210A of the Immigration and Nationality Act (INA), to meet a shortage of workers to perform seasonal agricultural services (SAS), during fiscal year (FY) 1993, is zero.

Notice is also given that the Secretaries have calculated jointly the annual numerical limitation on the number of such aliens who should be admitted or who should otherwise acquire the status of aliens lawfully admitted for temporary residence, under section 210A of the INA. The annual numerical limitation for FY 1993 is 506,883. This number represents the upper limit on the number of aliens who may be authorized for admission or adjustment of status.

The actual number of aliens to be admitted or whose status is to be adjusted for FY 1993 is the zero "shortage number" announced above.

DATES: This notice is effective during the period October 1, 1992, through September 30, 1993, unless superseded by a subsequent notice.

FOR FURTHER INFORMATION CONTACT: Mr. Gary B. Reed, DOL; telephone (202) 523–6007, or Mr. Al French, USDA; telephone (202) 720–4737.

SUPPLEMENTARY INFORMATION: Section 303 of the Immigration Reform and Control Act of 1986 added section 210A to the Immigration and Nationality Act (INA). Section 210A of the INA requires that before the beginning of each FY, starting with FY 1990 and ending with

FY 1993, the Secretaries determine jointly, according to a specific statutory formula, the number of additional aliens (if any) who should be admitted to the United States or who should otherwise acquire the status of aliens lawfully admitted for temporary residence to meet a shortage of workers to perform SAS. These aliens are known as replenishment agricultural workers (RAWs) and the number of such workers to be admitted in each FY is known as the "shortage number." The INA further provides that the Attorney General shall provide for the admission of a number of RAWs equal to the shortage number, or, if less, a number of RAWs equal to the annual numerical limitation which is established by a statutory formula contained in section 210A(b) of the INA. The Secretaries make the calculation of the annual numerical limitation concurrently with their determination of the shortage number. Regulations regarding the procedure used in the determination of the shortage number and calculation of the annual numerical limitation have been promulgated jointly by the Secretaries. Identical versions of the regulations were published in the **Federal Register** on January 2, 1990 (55 FR 106), and are located at 7 CFR part 1e and 29 CFR part 503. Criteria for admission as a RAW are established by the Immigration and Naturalization Service (INS) in regulations located at 8 CFR part 210a.

Because the INS was unable to complete adjudication of all special agricultural worker (SAW) applications by the end of FY 1992, the Secretaries will recalculate the annual numerical limitation prior to the end of each fiscal quarter. This will be done each time by including all those aliens who have been finally adjudicated as SAWs subsequent to any earlier determination of the annual numerical limitation, and by adjusting the number of SAWs who worked in SAS to take into account the increase in the number of reportable workers who obtained SAW status. These quarterly recalculation will continue until the Secretaries are advised by INS and the Director of the Bureau of the Census (the Director) that all applications for SAW status have been finally adjudicated. Thereafter, the annual numerical limitation will be calculated annually for the entire FY.

In recognition of the uncertainties associated with agricultural production, section 210A(a)(7) of the INA contains emergency procedures for adjusting the shortage number. The procedures through which a group or association representing employers or potential employers of individuals who perform SAS may request an increase in the shortage number are set forth in 7 CFR 1e.20 and 29 CFR 503.20. Until the Secretaries are advised by INS and the Director that all applicants for SAW status have been finally adjudicated, if an emergency increase in the shortage number is granted pursuant to 7 CFR 1e.20 and 29 CFR 503.20, but additional RAWs would otherwise be barred from entry due to the annual numerical limitation, the Secretaries will recalculate the annual numerical limitation based upon the most recent data available from INS and the Director.

Authority: 8 U.S.C. 1161.

Done at Washington, DC, this 25th day of September 1992.

Daniel A. Sumner,

Assistant Secretary for Economics, U.S. Department of Agriculture.

Done at Washington, DC, this 24th day of September 1992.

Lynn Martin,

Secretary of Labor.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

September 25, 1992.

The Department of Agriculture has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extension, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, room 404-W Admin. Bldg., Washington, DC 20250, (202) 690-2118.

DEPARTMENT OF COMMERCE

Performance Review Board; Membership

This notice announces membership of the Departmental Performance Review Board (PRB) in the Department of Commerce. The purpose of the Departmental PRB is to review the performance appraisals of appointing authorities and their immediate deputies who are in the SES, and SES members whose ratings are initially prepared by their respective appointing authorities.

These Departmental PRB members are appointed for a two year term. The list of members is as follows:

Organization/member/type of appointment	Term expiration
Office of the Secretary (Immediate Office):	
Mary Ann Fish, Deputy Assistant Secretary for White House Liaison (NC)	11/94
General Counsel:	
Lynn S. West, Deputy General Counsel (NC)	11/94

Organization/member/type of appointment	Term expiration
Barbara S. Fredericks, Assistant General Counsel for Administration (C)	11/94
Chief Financial Officer and Assistant Secretary for Administration:	
Otto J. Wolff, Deputy Assistant Secretary (NC)	11/94
Mark E. Brown, Director, Office of Budget (C)	11/94
Minority Business Development Agency:	
William H. Bailey, Deputy Director (NC)	11/93
Bharat K. Bhargava, Assistant Director for Operations (NC)	11/93
Economics and Statistics Administration:	
Susanne H. Howard, Deputy Under Secretary (NC)	11/94
Allan H. Young, Chief Statistician, Bureau of Economic Analysis (C)	11/94
O. Bryant Benton, Associate Director for Field Operations, Bureau of the Census (C)	11/94
Harry A. Scarr, Deputy Assistant Secretary for Statistical Affairs (C)	11/94
Frederick T. Knickerbocker, Executive Director (C)	11/94
Technology Administration:	
Lyle H. Schwartz, Director, Materials Science and Engineering Laboratory (NIST) (C)	11/93
Guy W. Chamberlin, Director of Administration (NIST) (C)	11/93
George A. Sinnott, Director for International and Academic Affairs (NIST) (C)	11/94
Lura J. Powell, Chief, Biotechnology Division (NIST) (C)	11/93
John C. Williams, Director, Office of Technology Policy (C)	11/94
National Telecommunications and Information Administration:	
Charles M. Rush, Chief Scientist (C)	11/93
William F. Maher, Jr., Associate Administrator, Office of Policy Analysis and Development (C)	11/93
Economic Development Administration:	
Richard S. Seline, Deputy Assistant Secretary for Program Support (NC)	11/94
John E. Corrigan, Atlantic Regional Director (C)	11/94
International Trade Administration:	
Augustine D. Tantillo, Deputy Assistant Secretary for Textiles, Apparel and Consumer Goods (NC)	11/93
Peter A Cashman, Director, Office of the Pacific Basin (C)	11/93
George Muller, Director, Office of Export Trading Company Affairs (C)	11/93
Francis J. Sailer, Deputy Assistant Secretary for Investigations, Import Administration (NC)	11/94
Lawrence B. Ryan, Deputy Assistant Secretary for Technology and Aerospace Industries (NC)	11/94
Holly A. Kuga, Director, Office of Agreements Compliance (C)	11/93
Roland L. McDonald, Director, Office of Antidumping Compliance (C)	11/93
Christina M. Bolton, Deputy Assistant Secretary for Basic Industries (NC)	11/93
National Oceanic and Atmospheric Administration:	
Thomas N. Pyke, Assistant Administrator for National Environmental Satellite, Data and Information Services (C)	11/93
James W. Brennan, Deputy General Counsel for Atmospheric and Ocean Research and Services (C)	11/93
Ronald D. McPherson, Director, National Meteorological Center (C)	11/93
Thomas A. Campbell, General Counsel (NC)	11/93
Carmen J. Blondin, Deputy Assistant Secretary for International Interests (C)	11/93
Alan R. Thomas, Deputy Assistant Administrator for Oceanic and Atmospheric Research (C)	11/93
Richard A. Edwards, Deputy Assistant Secretary (NC)	11/93
William W. Fox, Jr., Assistant Administrator for National Marine Fisheries Service (NC)	11/93
Patent and Trademark Office:	
Stephen G. Kunin, Deputy Assistant Commissioner for Patents (C)	11/93
boyd L. Alexander, Deputy Assistant Commissioner for Information Systems (C)	11/93
Bureau of Export Administration:	
John A. Richards, Deputy Assistant Secretary for Industrial Resources Administration (C)	11/93
James LeMunyon, Deputy Assistant Secretary for Export Administration (NC)	11/93
William V. Skidmore, Director, Office of Antiboycott Compliance (C)	11/93

Persons desiring further information about the Departmental PRB or its membership may contact Mr. Thomas J. Lambiase, Executive Secretary to the Departmental PRB, Office of Human Resources Management, Herbert C. Hoover Building, Room 5102, Washington, DC 20230 (202) 377–3453.

Dated: September 24, 1992.

Thomas J. Lambiase,

Executive Secretary, Departmental Performance Review Board, Department of Commerce.

BILLING CODE 3510-BS-M

National Oceanic and Atmospheric Administration

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Pacific Fishery Management Council's (Council) Groundfish Management Team (GMT) will hold a public meeting on October 13–15, 1992. The meeting will begin on October 13 at 1 p.m. and adjourn on October 15 at 4:30 p.m. The GMT will meet in the Conference Room of the Pacific States Marine Fisheries Commission in the Oregon Department of Fish and Wildlife (ODFW) building, 2501 SW First Avenue, suite 200, Portland, Oregon, on October 13 and on October 15. On October 14 *ONLY*, beginning at 8 a.m., the meeting site will be moved to the Multnomah Falls Room at the Red Lion Hotel-Portland Downtown, 310 SW Lincoln Street, Portland, OR.

The GMT will: (1) Prepare the annual Stock Assessment and Fishery Evaluation document and final recommendations for 1993 groundfish harvest levels; (2) discuss environmental and socio-economic analyses of proposed Pacific whiting and salmon bycatch measures; and (3) review the individual quota proposal under Council consideration. Other issues of importance to the West Coast groundfish industry may also be discussed. The GMT will prepare recommendations on these issues for presentation to the Council at its upcoming meeting on November 17–20 in Seattle, WA.

For more information contact Lawrence D. Six, Executive Director, Pacific Fishery Management Council, Metro Center, suite 420, 2000 S.W. First Avenue, Portland, OR 97201; telephone: (503) 326–6352.

Dated: September 25, 1992.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Restraint Limits for Certain Cotton and Wool Textile Products Produced or Manufactured in Uruguay

September 25, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits for the new agreement year.

EFFECTIVE DATE: October 2, 1992.

FOR FURTHER INFORMATION CONTACT: Nicole Bivens Collinson, International

Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–5850. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

In exchange of notes dated July 27, 1992 and August 18, 1992, the Governments of the United States and Uruguay agreed to extend their current bilateral agreement through June 30, 1993.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to establish limits for the period July 1, 1992 through June 30, 1993.

A copy of the current bilateral agreement is available from the Textiles Division, Bureau of Economic and Business Affairs, U.S. Department of State (202) 647–3889.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 56 FR 60101, published on November 27, 1991).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

September 25, 1992.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1991, pursuant to the Bilateral Cotton and Wool Textile Agreement, effected by exchange of notes dated December 30, 1983 and January 23, 1984, as amended and extended, between the Governments of the United States and Uruguay; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on October 2, 1992, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and wool textile products in the following categories, produced or manufactured in Uruguay and exported during the twelve-month period beginning on July 1, 1992 and extending through June 30, 1993, in excess of the following levels of restraint:

Category	Twelve-month restraint limit [1]
334	104,155 dozen.
335	89,661 dozen.
410	2,713,607 square meters of which not more than 1,550,634 square meters shall be in Category 410–A [2] and not more than 2,498,242 square meters shall be in Category 410–B [3]
433	16,203 dozen.
434	24,173 dozen.
435	48,820 dozen.
442	34,535 dozen.

[1] The limits have not been adjusted to account for any imports exported after June 30, 1992.

[2] Category 410–A: only HTS numbers 5111.11.3000, 5111.11.7030, 5111.11.7060, 5111.19.2000, 5111.19.6020, 5111.19.6040, 5111.19.6060, 5111.19.6080, 5111.20.9000, 5111.30.9000, 5111.90.3000, 5111.90.9000, 5212.11.1010, 5212.12.1010, 5212.13.1010, 5212.14.1010, 5212.15.1010, 5212.21.1010, 5212.22.1010, 5212.23.1010, 5212.24.1010, 5212.25.1010, 5311.00.2000, 5407.91.0510, 5407.92.0510, 5407.93.0510, 5407.94.0510, 5408.31.0510, 5408.32.0510, 5408.33.0510, 5408.34.0510, 5515.13.0510, 5515.22.0510, 5515.92.0510, 5516.31.0510, 5516.32.0510, 5516.33.0510, 5516.34.0510 and 6301.20.0020.

[3] Category 410–B: only HTS numbers 5007.10.6030, 5007.90.6030, 5112.11.2030, 5112.11.2060, 5112.19.9010, 5112.19.9020, 5112.19.9030, 5112.19.9040, 5112.19.9050, 5112.19.9060, 5112.20.3000, 5112.30.3000, 5112.90.3000, 5112.90.9010, 5112.90.9090, 5212.11.1020, 5212.12.1020, 5212.13.1020, 5212.14.1020, 5212.15.1020, 5212.21.1020, 5212.22.1020, 5212.23.1020, 5212.24.1020, 5212.25.1020, 5309.21.2000, 5309.29.2000, 5407.91.0520, 5407.92.0520, 5407.93.0520, 5407.94.0520, 5408.31.0520, 5408.32.0520, 5408.33.0520, 5408.34.0520, 5515.13.0520, 5515.22.0520, 5515.92.0520, 5516.31.0520, 5516.32.0520, 5516.33.0520 and 5516.34.0520.

Imports charged to these category limits for the period July 1, 1991 through June 30, 1992 shall be charged against those levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The limits set forth above are subject to adjustment in the future pursuant to the provisions of the current bilateral agreement between the Governments of the United States and Uruguay.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

Denial of Participation in the Special Access and Special Regime Programs

September 25, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs denying the right to participate in the Special Access and Special Regime Programs.

EFFECTIVE DATE: November 1, 1992.

FOR FURTHER INFORMATION CONTACT: Lori E. Goldberg, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–3400.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The Committee for the Implementation of Textile Agreements (CITA) has determined that F.M. Industries and F. C. Industries are in violation of the requirements set forth for participation in the Special Access and Special Regime Programs.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs, effective on November 1, 1992, to deny F.M. Industries and F. C. Industries the right to participate in the Special Access and Special Regime Programs, for a period of three months, from November 1, 1992 through January 31, 1993.

Requirements for participation in the Special Access Program are available in **Federal Register** notices 51 FR 21208, published on June 11, 1986; 52 FR 26057, published on July 10, 1987; and 54 FR 50425, published on December 6, 1989.

Requirements for participation in the Special Regime Program are available in **Federal Register** notices 53 FR 15724, published on May 3, 1988; 53 FR 32421, published on August 25, 1988; 53 FR 49346, published on December 7, 1988;

and 54 FR 50425, published on December 6, 1989.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

September 25, 1992.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: The purpose of this directive is to notify you that the Committee for the Implementation of Textile Agreements has determined that F.M. Industries and F.C. Industries are in violation of the requirements for participation in the Special Access and Special Regime Programs.

Effective on November 1, 1992, you are directed to prohibit F.M. Industries and F.C. Industries from further participation in the Special Access and Special Regime Programs, for a period of three months, from November 1, 1992 through January 31, 1993. Goods accompanied by Form ITA–370P which are presented to U.S. Customs for entry under the Special Access and Special Regime Programs will no longer be accepted. In addition, for the period November 1, 1992 through January 31, 1993, you are directed not to sign ITA–370P forms for export of U.S.-formed and cut fabric for F.M. Industries and F.C. Industries.

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[OMB Control No. 9000–0018]

OMB Clearance Request for Certification of Independent Price Determination and Parent Company and Identifying Data

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for a approval of a previously approved OMB clearance (9000–0018).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request for approval of a previously approved information collection requirement concerning Certification of Independent Price Determination and Parent Company and Identifying Data.

DATES: Comments may be submitted on or before November 2, 1992.

ADDRESSES: Send comments to Mr. Peter Weiss, FAR Desk Officer, OMB, room 3235, NEOB, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Beverly Fayson, Office of Federal Acquisition Policy, GSA (202) 510–4755.

SUPPLEMENTARY INFORMATION:

A. Purpose

Agencies are required to report under 41 U.S.C. 252(d) and 10 U.S.C. 2305(d) suspected violations of the antitrust laws (*e.g.*, collusive bidding, identical bids, uniform estimating systems, etc.) to the Attorney General.

As a first step in assuring that Government contracts are not awarded to firms violating such laws, offerors on Government contracts must complete the certificate of independent price determination. An offer will not be considered for award where the certificate has been deleted or modified. Deletions or modifications of the certificate and suspected false certificates are reported to the Attorney General.

B. Annual Reporting Burden

The annual reporting burden is estimated as follows: Respondents, *64,250;* responses per respondent, *20;* total annual responses, *1,285,000;* preparation hours per response, *.02;* and total response burden hours, *25,700.*

Obtaining Copies of Proposals

Requester may obtain copies of OMB applications or justifications from the General Services Administration, FAR Secretariat (VRS), room 4037, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0018, Certification of Independent Price Determination and Parent Company and Identifying Data, in all correspondence.

Dated: September 25, 1992.

Beverly Fayson,

FAR Secretariat.

BILLING CODE 6820–34–M

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Office of Information Resources Management, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATES: Interested persons are invited to submit comments on or before October 21, 1992.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Dan Chenok: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection request should be addressed to Cary Green, Department of Education, 400 Maryland Avenue, SW., Room 5624, Regional Office Building 3, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Cary Green (202) 708–5174.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Director of the Information Resources Management Service, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Frequency of collection; (4) The affected public; (5) Reporting burden; and/or (6) Recordkeeping burden; and (7) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Cary Green at the address specified above.

Dated: September 25, 1992.

Cary Green,

Director, Information Resources Management Service.

Office of Elementary and Secondary Education

Type of Review: Existing.

Title: Application for Grants under the Women's Educational Equity Act (WEEA) Program

Frequency: Annually.

Affected Public: Individuals or households; state or local governments; non-profit institutions.

Reporting Burden:

Responses: 400.

Burden Hours: 6,400.

Recordkeeping Burden:

Recordkeepers: 0.

Burden Hours: 0.

Abstract: This form will be used by State educational agencies to apply for funding under the Women's Educational Equity Act (WEEA) Program. The Department will use the information to make grant awards.

Office of Postsecondary Education

Type of Review: Revision.

Title: Free Application for Federal Student Aid.

Frequency: Annually.

Affected Public: Individuals or households.

Reporting Burden:

Responses: 7,924,954.

Burden Hours: 8,823,464.

Recordkeeping Burden:

Recordkeepers: 0.

Burden Hours: 0.

Abstract: The information is used to calculate the Pell Grant Index (PGI) for the distribution of Pell Grants and the Family Contribution (FC) used by financial aid administrators to determine the amount of a student's SEOG, College Work-Study, Perkins Loan, and Stafford Loan. The PGI is governed by Section 411 and the FC by Part F of the Higher Education Act of 1965, as amended.

Office of Postsecondary Education

Type of Review: Revision.

Title: Student Aid Report (SAR).

Frequency: Annually.

Affected Public: Individuals or households; non-profit institutions, business or other for-profit.

Reporting Burden:

Responses: 13,103,260.

Burden Hours: 2,331,273.

Recordkeeping Burden:

Recordkeepers: 7,300.

Burden Hours: 599,486.

Abstract: The Student Aid Report (SAR) is used to notify applicants of their eligibility to receive Federal financial aid. The forms are submitted by the applicants to the participating institution of their choice. The institution submits part 3 of the SAR to the Department to receive funds for the applicant.

BILLING CODE 4000-01-M

[CFDA No.: 84-195P]

Bilingual Education: Educational Personnel Training Program; Notice Inviting Applications for New Awards for Fiscal Year (FY) 1993

Purpose of Program: To provide assistance to meet the need for additional or better trained educational personnel for programs for limited English proficient (LEP) persons.

Eligible Applicants: Institutions of higher education.

Deadline for Transmittal of Applications: January 27, 1993.

Deadline for Intergovernmental Review: March 29, 1993

Applications Available: October 23, 1992.

Available Funds: $2.5 million.

Estimated Range of Awards: $65,000–$190,000.

Estimated Average Size of Awards: $150,000.

Estimated Number of Awards: 17.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 48 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 81, 82, 85, and 86; and (b) The regulations for this program in 34 CFR parts 500 and 561.

Priority: The Priority in the notice of final priority for this program, as published elsewhere in this issue of the **Federal Register**, applies to this competition.

Selection Criteria: In evaluating applications for grants under this program, the Secretary uses the selection criteria in 34 CFR 561.31.

In addition to the maximum of 100 points awarded under 34 CFR 561.31, the program regulations in 34 CFR 561.32(b) provide that the Secretary distributes 10 additional points among the factors listed in 34 CFR 561.32(a). For this completion the Secretary distributes the 10 additional points as follows:

(1) Job placement and development (34 CFR 561.32(a)(1))—1 point.

(2) Evidence of prior participant's success in serving LEP children in accordance with the needs identified in the prior project (34 CFR 561.32(a)(2))—1 point.

(3) Evidence of demonstrated capacity and cost effectiveness as described in 34 CFR 561.31(d) and (f) (34 CFR 561.32(a)(3))—8 points.

For Applications or Information Contact: Cynthia J. Ryan, U.S. Department of Education, 400 Maryland Avenue, SW., Room 5086, Switzer Building, Washington DC 20202–6642. Telephone: (202) 205–8722. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–8339 (in the Washington DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 3321.

Dated: September 23, 1992.

Nguyen Ngoc-Bich,

Acting Director, Office of Bilingual Education and Minority Languages Affairs.

[FR Doc. 92-23774 Filed 9-30-92; 8:45 am]

BILLING CODE 4000-01-M

Bilingual Education: Educational Personnel Training Program; Final Priority for Fiscal Year 1993

AGENCY: Department of Education.

ACTION: Notice of final priority for fiscal year 1993.

SUMMARY: The Secretary announces an absolute priority for the fiscal year (FY) 1993 competition under the Bilingual Education: Educational Personnel Training (EPT) Program. The Secretary takes this action to focus Federal financial assistance on an identified national need. The priority is intended to assist institutions of higher education (IHEs) to meet the need for additional or better trained teachers of limited English proficient (LEP) students in mathematics and science.

EFFECTIVE DATE: This priority takes effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of this priority, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Cynthia J. Ryan, U.S. Department of Education, 400 Maryland Avenue SW., room 5086, Switzer Building, Washington, DC 20202–6642. Telephone: (202) 205–8842. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION: Awards under the EPT Program are made to IHEs to prepare additional or better trained educational personnel for programs for limited English proficient students. The authority for the EPT Program is section 7041 of the Bilingual Education Act (20 U.S.C. 3321).

The Secretary announces an absolute priority for the FY 1993 competition under the EPT Program to assist IHEs in preparing teachers to meet the needs of LEP students in mathematics and

science. This competition supports the President's AMERICA 2000 strategy for helping the Nation move itself toward the National Education Goals, particularly Goal 3 and Goal 4. Goal 3 calls for all students to demonstrate competency in challenging subject matter, including mathematics and science. Goal 4 calls for American students to be first in the world in science and mathematics achievement by the year 2000. Under this priority, all EPT funds that are not committed to continuing projects will be reserved for projects that prepare teachers to help LEP students achieve competence in mathematics and science.

On June 17, 1992, the Secretary published a notice of proposed priority for this program in the **Federal Register** (57 FR 27036).

Note: This notice of final priority does *not* solicit applications. A notice inviting applications under this competition is published in this issue of the **Federal Register.**

Analysis of Comments and Changes

In response to the Secretary's invitation in the notice of proposed priority, three parties submitted comments. An analysis of the comments and of the changes in the priority since publication of the notice of proposed priority follows. Technical and other minor changes—and suggested changes the Secretary is not legally authorized to make under the applicable statutory authority—are not addressed.

Comments: Each commenter expressed concern that the proposed priority did not specify options for the types of certification that would be allowable under this priority. Two of the commenters believed the proposed priority would exclude programs that train teachers to be certified in bilingual education or English-as-a-second-language (ESL). The third commenter believed the priority would exclude certification in mathematics and science.

Also, one commenter expressed the concern that the proposed priority appeared to limit participation to bilingual education and ESL teachers. This commenter was concerned that limiting participation in the program to bilingual education and ESL teachers would exclude the participation of mathematics and science teachers who need training in providing instruction to LEP students.

Discussion: The Bilingual Education Act requires that preservice and inservice training under the EPT Program assist educational personnel in meeting State and local certification requirements.

The Act, however, does not specify the program areas in which participants may need to obtain certification so that they may meet the instructional needs of the LEP students they will be serving. The purpose of the priority is to assist IHEs to meet the need for additional and better trained teachers of LEP students. The Secretary does not intend for the priority in this notice to limit certification options. Moreover, the Secretary does not intend for the priority to limit participation in training programs to bilingual education and ESL teachers, but rather intends that applications submitted under the priority allow for the participation of any teacher of LEP children in need of this training.

Changes: The Secretary has reworded the priority to clarify the types of certification and participants that will be allowable in applications funded under this priority.

Priority

Under 34 CFR 75.105(c)(3), the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds under this competition only applications that meet this absolute priority:

Training to prepare teachers to instruct limited English proficient children in one or both of the following core curriculum areas: mathematics or science. The training must be designed to assist participants in meeting State and local certification requirements.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Applicable Program Regulations: 34 CFR parts 500 and 561.

Program Authority: 20 U.S.C. 3321.

(Catalog of Federal Domestic Assistance Number 84.195P Bilingual Education: Educational Personnel Training Program)

Dated: September 11, 1992.

Lamar Alexander,

Secretary of Education.

[FR Doc. 92-23786 Filed 9-30-92; 8:45 am]

BILLING CODE 4000-01-M

[CFDA No. 84.031A, CFDA No. 84.031G]

Notice Inviting Applications for Designation as an Eligible Institution for Fiscal Year 1993 for the Strengthening Institutions Program and the Endowment Challenge Grant Program

Purpose: Institutions of higher education must meet specific statutory and regulatory requirements to be designated eligible to receive funds under the Strengthening Institutions Program and the Endowment Challenge Grant Program.

Deadline for Transmittal of Applications: November 30, 1992.

Applications Available: October 16, 1992.

Eligibility Information: Under section 312 of the Higher Education Act of 1965, as amended (HEA), an institution of higher education qualifies as an eligible institution under the Strengthening Institutions and Endowment Challenge Grant Programs if, among other requirements, it has a high enrollment of needy students, *and* its educational and general (E&G) expenditures are low per full-time equivalent (FTE) undergraduate student, in comparison with the average E&G expenditures per FTE student of institutions that offer similar instruction.The complete eligibility requirements are found in 34 CFR 607.2 through 607.5 of the Strengthening Institutions Program regulations.

As a result of amendments made to the statute relating to institutional eligibility requirements, an institution may qualify as an eligible institution if it is fully accredited by a nationally recognized accrediting agency and is legally authorized by the State in which it is located to be a junior or community college or to provide a bachelors degree program. Such an institution no longer has to satisfy those requirements for five years before being eligible to receive funds.

Enrollment of Needy Students: Under 34 CFR 607.3(a), an institution is considered to have a high enrollment of needy students if—

(1) At least 50 percent of its degree students received financial assistance under one or more of the following programs: Pell Grant, Supplemental Educational Opportunity Grant, College Work Study, or Perkins Loan Program; or (2) The percentage of its undergraduate degree students who were enrolled on at least a half-time basis and received Pell Grants exceeded the median percentage of undergraduate degree students who were enrolled on at least a half-time basis and received Pell

Grants at comparable institutions that offer similar instruction. To qualify under the second criterion, an applicant's Pell grant percentage must be more than the median for its category provided on the table in this notice.

E&G Expenditures Per FTE Students: An applicant should compare its average E&G expenditure/FTE student to the average E&G expenditure/FTE student for its category of institution contained in the table in this notice. If the applicant's average E&G expenditure for the 1990–91 base year is less than the average for its category, the applicant meets this eligibility requirement.

The applicant's E&G expenditures are the total amount expended by the institution during the base year for instruction, research, public service, academic support, student services, institutional support, operation and maintenance, scholarships and fellowships, and mandatory transfers.

The following table identifies the relevant median Pell Grant percentages and the average E&G expenditures per FTE student for the 1990–91 base year.

	Median Pell Grant percentage	Average E&G per FTE student
2-year public institutions	37.0	$6,225
2-year non-profit private institutions	43.0	11,565
4-year public institutions	32.0	10,928
4-year non-profit private institutions	30.0	14,350

Waiver Information: Applicants unable to meet the high needy student enrollment requirement and/or the low E&G expenditure requirement may apply to the Secretary for waiver of these requirements under various options described in 34 CFR 607.3(b) and 34 CFR 607.4 (c) and (d), respectively.

For the purpose of 34 CFR 607.3(b)(2), under which an applicant must demonstrate that at least 30 percent of the students it served in base year 1990–91 were from low-income families, "low-income" is defined as an amount that does not exceed 150 percent of the amount equal to the poverty level as established by the U.S. Bureau of the Census. The following table sets forth the low-income levels for various sizes of families.

For the purposes of this waiver provision, low-income families are identified according to the following:

FISCAL YEAR 1991 ANNUAL LOW-INCOME LEVELS

Size of family unit	Contiguous 48 States, the District of Columbia, and outlying jurisdictions	Alaska	Hawaii
1	$9,930	$12,435	$11,415
2	13,320	16,665	15,315
3	16,710	20,895	19,215
4	20,100	25,125	23,115
5	23,490	29,355	27,015
6	26,880	33,585	30,915
7	30,270	37,815	34,815
8	33,660	42,045	38,715

For family units with more than eight members, add the following amount for each additional family member: $3,390 for the contiguous 48 states, the District of Columbia and outlying jurisdictions; $4,230 for Alaska; and $3,900 for Hawaii.

The figures shown under family income represent amounts equal to 150 percent of the family income levels established by the U.S. Bureau of the Census for determining poverty status. These levels were published by the U.S. Department of Health and Human Services in the **Federal Register** of February 20, 1991, Volume 56, Number 34, Pages 5859–6861.

In reference to the waiver option specified in section 607.3(b)(4) of the regulation, information about "metropolitan statistical areas" may be obtained by writing: National Technical Information Services, Document Sales, 5285 Port Royal Road, Springfield, Virginia 22161, or calling (703) 487–4650. The title of the document is Metropolitan Statistical Areas, 1989 #PB89–192546. There is a charge for this publication. *Applicable Regulations:* Regulations applicable to the eligibility process include: (a) The Strengthening Institutions Program Regulations, 34 CFR part 607; (b) the Endowment Challenge Grant Program Regulations, 34 CFR part 628; and (c) the Education Department General Administrative Regulations, 34 CFR parts 74, 75, 77, 82, 85, and 86.

For Applications or Information Contact: Strengthening Institutions Program Branch, Division of Institutional Development, U.S. Department of Education, 400 Maryland Avenue, SW., room 3042, ROB#3, Washington, DC 20202–5335, Telephone: (202) 708–8839. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Services at 1–800–877–8339 (in the Washington, DC, (202) area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 1057 and 1065a.

Dated: September 24, 1992.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. ER92–730–000, et al.]

Northeast Utilities Service Company, et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

Take notice that the following filings have been made with the Commission:

1. Northeast Utilities Service Co.

[Docket No. ER92–730–000]

September 23, 1992.

Take notice that on September 17, 1992, Northeast Utilities Service Company tendered for filing additional information requested by Commission staff in the above-referenced docket.

Comment date: October 7, 1992, in accordance with Standard Paragraph E at the end of this notice.

United Illuminating Co.

[Docket No. ER92–453–001]

September 23, 1992.

Take notice that on September 17, 1992, United Illuminating Company

tendered for filing its Refund Report in the above-referenced docket.

Comment date: October 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

Entergy Power, Inc.

[Docket No. ER92-843-000]

September 23, 1992.

Take notice that Entergy Power, Inc. (EPI) on September 18, 1992 tendered for filing an Interchange Agreement with Associated Electric Cooperative, Inc.

EPI requests an effective date for the Interchange Agreement that is sixty (60) days after the date of filing, in accordance with § 35.11 of the Commission's regulations.

Comment date: October 7, 1992, in accordance with Standard Paragraph E at the end of this notice.

Commonwealth Edison Co. of Indiana, Inc.

[Docket No. ER92-845-000]

September 23, 1992.

Take notice that on September 18, 1992, Commonwealth Edison Company of Indiana, Inc. (Edison Indiana) tendered for filing a letter agreement, dated August 26, 1992 (Letter Agreement), between Edison Indiana and its parent, Commonwealth Edison Company (Edison). The Letter Agreement modifies certain provisions of the Electric Service Agreement, dated July 1, 1941, as amended, and the Transmission Service Agreement, dated May 1, 1958, as amended between Edison Indiana and Edison. Edison Indiana seeks an effective date of January 1, 1993 and, accordingly, seeks waiver of the Commission's notice requirements. Edison Indiana proposes to lower the return on common equity to 11.47 percent pursuant to a contractual obligation in the agreements on file with the Commission. Edison Indiana and Edison have agreed that 11.47 percent shall be a fixed rate of return, subject to change under sections 205 and 206 of the Federal Power Act and have agreed to a revised capital structure resulting in lower rates to be charged to edison by Edison Indiana.

Copies of this filing were served upon the Illinois Commerce Commission and Edison.

Comment date: October 7, 1992, in accordance with Standard Paragraph E at the end of this notice.

Idaho Power Co.

[Docket No. ER92-851-000]

September 23, 1992.

Take notice that on September 15, 1992, Idaho Power Company (Idaho) tendered for filing a letter and attachments regarding amendment of its request for a temporary rate increase for the following wholesale contracts:

1. Idaho Power-Sierra Pacific Company Agreement for a supply of Energy & Power, dated March 10, 1960, FERC Rate Schedule No. 30.
2. The City of Weiser-Idaho Power Company Agreement for Supply of Power, dated April 4, 1963, FERC Rate Schedule No. 42;
3. Idaho Power-Utah Associated Municipal Power Systems Agreement for Supply of Power & Energy, dated February 10, 1988, FERC Rate Schedule No. 74.
4. Idaho Power Company-Washington City, Utah, Agreement for Supply of Power & Energy, dated July 6, 1987, FERC Rate Schedule No. 74.

The amendment requests a change in the effective dates during which the temporary increase would be effective.

Comment date: October 7, 1992, in accordance with Standard Paragraph E at the end of this notice.

Commonwealth Electric Co.

[Docket No. ER92-354-000]

September 23, 1992.

Take notice that on September 11, 1992, Commonwealth Electric Company tendered for filing additional information requested by Commission staff in the above-referenced docket.

Comment date: October 7, 1992, in accordance with Standard Paragraph E at the end of this notice.

Northern States Power Company

[Docket No. ER92-852-000]

September 23, 1992.

Take notice that on September 15, 1992, Northern States Power Company tendered for filing an amendment in the above-referenced docket.

Comment date: October 7, 1992, in accordance with Standard Paragraph E at the end of this notice.

Arizona Public Service Company

[Docket No. ER92-844-000]

September 23, 1992.

Take notice that on September 18, 1992, Arizona Public Service Company (APS) tendered for filing revised Exhibit B to the Wholesale Power Agreement between APS and the Town of Wickenburg (Wickenburg) (APS-FERC Rate Schedule No. 74) and revised Exhibit A to the Transmission Service Agreement between APS and Wickenburg (APS-FERC Rate Schedule No. 170) collectively Exhibits and Agreements). The Exhibits list ranges of Maximum and Contract Demands applicable under the Agreements.

No change from the currently effective rate or revenue levels is proposed herein.

No new facilities or modifications to existing facilities are required as a result of this revision.

A copy of this filing has been served on Wickenburg and the Arizona Corporation Commission.

Comment date: October 7, 1992, in accordance with Standard Paragraph E at the end of this notice.

Minnesota Power & Light Co.

[Docket No. ER92-805-000]

September 23, 1992.

Take notice that on September 17, 1992, Minnesota Power & Light Company (Minnesota Power) tendered for filing an Amended Notice of Cancellation for replacement capacity and energy service to Wisconsin Public Power, Inc. SYSTEM (WPPI) under the Boswell 4 Operation, Ownership and Power Sales Agreement, Rate Schedule FERC No. 158, in accordance with Amendment No. 1 to that Agreement.

Minnesota Power requests an effective date of September 1, 1992, and requests waiver of the notice provisions of § 35.25 of the Commission's regulations.

Copies of this filing have been served on WPPI, the Minnesota Public Utilities Commission and the Wisconsin Public Service Commission.

Comment date: October 7, 1992, in accordance with Standard Paragraph E at the end of this notice.

Pennsylvania Power & Light

[Docket No. ER92-687-001]

September 23, 1992.

Take notice that on September 21, 1992, Pennsylvania Power & Light Company tendered for filing its Refund Report in the above-referenced docket.

Comment date: October 7, 1992, in accordance with Standard Paragraph E at the end of this notice.

Idaho Power Co.

[Docket No. ER92-408-000]

September 23, 1992.

Take notice that on September 1, 1992, Idaho Power Company (Idaho) tendered for filing an exhibit regarding Idaho's wholesale sale to the Oregon Trail Electric Consumers Cooperative.

Comment date: October 7, 1992, in accordance with Standard Paragraph E at the end of this notice.

MDU Resources Group, Inc.

[Docket No. ER92-60-000]

September 24, 1992.

Take notice that on September 21, 1992, MDU Resources Group, Inc. filed an application with the Federal Energy Regulatory Commission under section 204 of the Federal Power Act requesting authorization to issue not more than $50 million of short-term indebtedness on or before December 31, 1994, with a final maturity date no later than December 31, 1995.

Comment date: October 7, 1992, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-23835 Filed 9-30-92; 8:45 am]

BILLING CODE 6717-01-M

[Project Nos. 2113-022, et al.]

Hydroelectric Applications [Wisconsin Valley Improvement Company, et al.]; Applications

Take notice that the following hydroelectric applications have been filed with the Commission and are available for public inspection:

1 a. *Type of Application:* New License.

b. *Project No.:* 2113-022.

c. *Date Filed:* July 30, 1991.

d. *Applicant:* Wisconsin Valley Improvement Company.

e. *Name of Project:* Wisconsin Valley.

f. *Location:* On the Wisconsin River and its tributaries, Vilas, Oneida, Forest, Marathon, and Lincoln Counties, Wisconsin, and Gogebic County, Michigan.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. *Applicant Contact:* Mr. Robert W. Gall, Wisconsin Valley Improvement Company, 2301 North Third Street, Wausau, WI 54401, (715) 848-2976.

i. *FERC Contact:* Michael Dees (202) 219-2807.

j. *Deadline Date:* November 6, 1992.

k. *Status of Environmental Analysis:* This application is not ready for environmental analysis at this time—see attached standard paragraph E.

l. *Description of Project:* The project as licensed consists of 21 separate existing dam and storage reservoir developments (none of which contain any hydropower facilities) located in the Wisconsin River Basin. Two of the developments are located on the main stem of the Wisconsin River; the remaining developments are located on tributary rivers and streams. The 21 project developments are described as follows:

Lac Vieux Desert Development

The Lac Vieux Desert Development is an improved natural-lake reservoir, located on the Wisconsin River main stem at river mile 420.1 in Vilas County, Wisconsin and Gogebic County, Michigan. The development consists of: (1) A reinforced concrete gated dam 27 feet long, 10 feet wide, and 8.5 feet high, with upstream and downstream wingwalls, each about 9 feet long; (2) one tainter gate in the dam, 12 feet wide and 4 feet high; (3) one stop log bay in the dam, 4 feet wide and 7 feet high; and (4) a reservoir with a surface area of 4,247 acres and gross storage of 2,140 million cubic feet (mcf) at the maximum water level of 1,681.53 feet NGVD. The reservoir has usable storage of 398 mcf with a drawdown of 2.17 feet.

Twin Lakes Development

The Twin Lakes Development is an improved natural-lake reservoir, located on the Twin River 2.1 miles upstream from Pioneer Lake in Vilas County, Wisconsin. Pioneer Lake feeds Pioneer Creek which flows for 9.9 miles to join the Wisconsin at river mile 401.1. The development consists of: (1) A reinforced concrete gated dam 21.5 feet long, 17 feet wide and 9.5 feet high, with upstream wingwalls about 6 feet long, and downstream wingwalls about 26 feet long; (2) one tainter gate in the dam, 10 feet wide and 4.33 feet high; (3) one stop log bay in the dam, 4 feet wide and 8 feet high; (4) a right abutment dike about 60 feet long and 10 feet high, and a left abutment dike about 75 feet long and 10 feet high; and (5) a reservoir with a surface area of 3,535 acres and gross storage of 4,074 mcf at the maximum water level of 1,682.57 feet NGVD. The reservoir has usable storage of 301 mcf with a drawdown of 2.00 feet.

Buckatahpon Development

The Buckatahpon Development is an improved natural-lake reservoir, located on Buckatahpon Creek 1.4 miles upstream from its confluence with the Wisconsin at river mile 396.9 in Vilas County, Wisconsin. The development consists of: (1) A reinforced concrete gated dam 15 feet long, 27 feet wide, and 7.5 feet high, with upstream and downstream wingwalls, each about 9 feet long; (2) one tainter gate in the dam, 6 feet wide and 3.83 feet high; (3) one stop log bay in the dam, 5 feet wide and 5 feet high; (4) a right abutment dike about 100 feet long and 7.4 feet high, and a left abutment dike about 80 feet long and 7.4 feet high; and (5) a reservoir with a surface area of 922 acres and gross storage of 597 mcf at the maximum water level of 1,641.52 feet NGVD. The reservoir has usable storage of 120 mcf with a drawdown of 3.17 feet.

Long-on-Deerskin Development

The Long-on-Deerskin Development is an improved natural-lake reservoir, located on the Deerskin River 18 miles upstream from its confluence with the Wisconsin at river mile 378.8 in Vilas County, Wisconsin. The development consists of: (1) A reinforced concrete gated dam 18 feet long, 15 feet wide, and 9.5 feet high with upstream and downstream wingwalls, each about 9 feet long; (2) one tainter gate in the dam, 8 feet wide and 5 feet high; (3) one stop log bay in the dam, 4 feet wide and 7 feet high; (4) a right abutment dike about 35 feet long and 8.4 feet high, and a left abutment dike about 30 feet long and 8.4 feet high; and (5) a reservoir with a surface area of 2,353 acres and gross storage of 2,651 mcf at the maximum water level of 1,698.43 feet NGVD. The reservoir has usable storage of 255 mcf with a drawdown of 2.59 feet.

Little Deerskin Development

The Little Deerskin Development is an improved natural-lake reservoir, located on the Little Deerskin River 3 miles upstream from its confluence with the Deerskin River in Vilas County, Wisconsin. The development consists of: (1) A steel gated spillway structure 4 feet long, 6 wide, and 4 feet high, with upstream and downstream wingwalls, each about 4 feet long; (2) one 4-foot-wide by 2-foot-wide lift gate within the structure; (3) a right abutment dike about 40 feet long and 4 feet high, and a left abutment dike about the same size; (4) a reservoir with a surface area of 313 acres and gross storage of 82 mcf at the maximum water level of 1,642.16 feet NGVD. The reservoir has usable storage of 23 mcf with a drawdown of 1.67 feet.

Seven Mile Development

The Seven Mile Development is an improved natural-lake reservoir, located on Seven Mile Creek 2.6 miles upstream from the head of Nine Mile Reservoir in Oneida and Forest Counties, Wisconsin. The development consists of: (1) A reinforced concrete gated dam 22 feet long, 30 feet wide, and 9.5 feet high, with downstream wingwalls about 16 feet long; (2) one tainter gate in the dam, 8 feet wide and 4.83 feet high; (3) one stop log bay in the dam, 6 feet wide and 8 feet high; (4) a right abutment dike about 150 feet long and 9.7 feet high, and a left abutment dike about 110 feet long and 9.7 feet high; and (5) a reservoir with a surface area of 518 acres and gross storage of 147 mcf at the maximum water level of 1,650.14 feet NGVD. The reservoir has usable storage of 85 mcf with a drawdown of 4.33 feet.

Lower Nine Mile Development

The Lower Nine Mile Development is an improved natural-lake reservoir, located on Nine Mile Creek 1.1. miles upstream from the head of Burnt Rollways Reservoir in Oneida County, Wisconsin. The development consists of: (1) A reinforced concrete gated dam 26 feet long, 30 feet wide, and 12 feet high, with upstream wingwalls about 16 feet long; (2) two tainter gates in the dam, each 6 feet wide and 6 feet high; (3) one stop log bay in the dam, 3.75 feet wide and 6 feet high; (4) a right abutment dike about 60 feet long and 12.9 feet high, and a left abutment dike about 100 feet long and 12.9 feet high; and (5) a reservoir with a surface area of 841 acres and gross storage of 114 mcf at the maximum water level of 1,643.76 feet NGVD. The reservoir has usable storage of 104 mcf with a drawdown of 4.58 feet.

Burnt Rollways Development

The Burnt Rollways Development is an improved multiple natural-lake and channel reservoir, located on the Eagle River near its confluence with the Wisconsin River in Oneida County, Wisconsin. The development consists of: (1) A reinforced concrete gated dam 47 feet long, 55 feet wide, and 16 feet high, with upstream wingwalls about 20 feet long; (2) two dissimilar tainter gates in the dam, one 16 feet wide by 4.25 feet high, and a second 10 feet wide by 12 feet high; (3) a right abutment dike about 100 feet long and 14.4 feet high, and a left abutment dike about 150 feet long and 17.9 feet high; (4) a boat launching structure consisting of a trestle supported rail track about 105 feet long, mounted with an electrically operated rolling gantry hoist, over the right abutment dike; and (5) a reservoir with a surface area of 7,620 acres and gross storage of 4,525 mcf at the maximum normal water level of 1,625.71 feet NGVD. The reservoir has usable storage in summer of 479 mcf with a drawdown of 1.5 feet, and in winter, 852 mcf with a drawdown of 2.75 feet.

Sugar Camp Development

The Sugar Camp Development is an improved multiple natural-lake and channel reservoir, located on Sugar Camp Creek near its confluence with the Wisconsin River in Oneida County, Wisconsin. The development consists of: (1) A reinforced concrete gated dam 12 feet long, 15 feet wide, and 9.5 feet high, with upstream and downstream wingwalls about 13 feet long; (2) one tainter gate in the dam, 8 feet wide by 7 feet high; (3) a right abutment dike about 260 feet long and 9.5 feet high; and a left abutment dike about 20 feet long and 9.5 feet high; and (4) a reservoir with a maximum surface area of 1,857 acres and gross storage of 1,120 mcf at the maximum winter water level of 1,597.82 feet NGVD. The reservoir has usable storage in summer of 155 mcf with a drawdown of 2.0 feet, and in winter, 411 mcf with a drawdown of 5.5. feet.

Little St. Germain Development

The Little St. Germain Development is an improved natural-lake reservoir, located on the Little St. Germain River about 1.1 miles upstream from its confluence with the Wisconsin River in Vilas County, Wisconsin. The development consists of: (1) A reinforced concrete gated dam 14 feet long, 15 feet wide, and 8.5 feet high, with upstream wingwalls about 10 feet long; (2) one vertical lift gate in the dam, 5 feet wide by 5.17 feet high; (3) a right abutment dike about 50 feet long and 7 feet high; and a left abutment dike about 40 feet long and 7 feet high; and (4) a reservoir with a surface area of 1,008 acres and gross storage of 495 mcf at the maximum water level of 1,613.88 NGVD. The reservoir has usable storage of 77 mcf with a drawdown of 1.83 feet.

Big St. Germain Development

The Big St. Germain Development is an improved natural-lake reservoir, located on the St. Germain River in Vilas County near St. Germain, Wisconsin. The development consists of: (1) A reinforced concrete gated dam 27 feet long, 22 feet wide, and 7 feet high; (2) two similar vertical lift gates in the dam, each 7 feet wide by 4.17 feet high, and one smaller vertical lift gate in the dam, 5 feet wide by 4.17 feet high; (3) a right abutment dike about 55 feet long and 7 high, and a left abutment dike about 35 feet long and 7 feet high; (4) a reservoir with a surface area of 1,853 acres and gross storage of 1,501 mcf at the maximum water level of 1,591.16 feet NGVD. The reservoir has usable storage in summer of 94 mcf with a drawdown of 1.33 feet, and in winter, 210 mcf with a drawdown of 3.0 feet.

Pickerel Development

The Pickerel Development is an improved natural lake reservoir, located on the St. Germain River near its confluence with the Wisconsin River in Oneida County, Wisconsin. The development consists of: (1) A reinforced concrete gated dam 32 feet long, 30 feet wide, and 20.5 feet high, called Pickerel Control Dam, with upstream and downstream wingwalls about 32 feet long; (2) one tainter gate in the dam, 10 feet wide by 16 feet high; (3) a right abutment dike about 70 feet long and 18.5 feet high, and a left abutment dike about 80 feet long and 18.5 feet high; (4) a second reinforced concrete gated dam 20 feet long, 37 feet wide, and 12 feet high, called Pickerel Canal Dam, with upstream and downstream wingwalls about 20 feet long; (5) one tainter gate in the dam, 22 feet wide by 3 feet high; (6) a reservoir with a surface area of 786 acres and gross storage of 315 mcf at the maximum water level of 1,590.34 feet NGVD. The reservoir has usable storage in summer of 33 mcf with a drawdown of 1.0 foot, and in winter, 227 mcf with a drawdown of 9.0 feet.

Rainbow Development

The Rainbow Development is a man-made reservoir, located on the Wisconsin River main stem at river mile 365.2 in Oneida County near Lake Tomahawk, Wisconsin. The development consists of: (1) A reinforced concrete gated dam 128 feet long, 32 feet wide, and 38.5 feet high, with upstream wingwalls about 68 feet long, and downstream wingwalls about 55 feet long; (2) three tainter gates each 20 feet wide by 21 feet high, and two tainter gates each 10 feet wide by 28 feet high, all within the dam; (3) a right abutment dike about 1,000 feet long and 32 feet high; (4) Sawyer dike located about 3,000 feet east of the gated dam, about 800 feet long and 20 feet high; (5) Highway E dike located about 1,000 feet west of the spillway and joining the right abutment dike, about 1,050 feet long and 24 feet high; (6) Jim Hall dike located about 1.5 miles north of the spillway, about 1,550 feet long and 22 feet high; (7) Highway J dike located about 2.5 miles north of the dam, about 500 feet long and 3 feet high; (8) a reservoir with a surface area of 4,165 acres and gross storage of 2,004 mcf at

the maximum water level of 1,507.05 feet NGVD. The reservoir has usable storage of 1,987 mcf with a drawdown of 22 feet.

North Pelican Development

The North Pelican Development is an improved natural-lake reservoir located on the north branch of the Pelican River in Oneida County near Rhinelander, Wisconsin. The development consists of: (1) A reinforced concrete gated gravity dam 32 feet long, 29 feet wide, and 10.5 feet high, with upstream wingwalls about 16 feet long; (2) three vertical lift gates in the dam, each 6.5 feet wide by 4.0 feet high; (3) a right abutment dike about 30 feet long and 10.5 feet high, and a left abutment dike about 170 feet long and 10.5 feet high; (4) a reservoir with a surface area of 1,295 acres and gross storage of 379 mcf at the maximum water level of 1,569.60 feet NGVD. The reservoir has usable storage of 151 mcf with a drawdown of 3.0 feet.

South Pelican Development

The South Pelican Development is an improved natural-lake reservoir located on the main branch of the Pelican River in Oneida County near Pelican Lake, Wisconsin. The development consists of: (1) A reinforced concrete gated gravity dam 29 feet long, 24 feet wide, and 8 feet high, with upstream wingwalls about 10 feet long; (2) two vertical lift gates in the dam, each 5 feet wide by 3 feet high, and two stop log bays, each 5 feet wide by 1 foot high; (3) a right abutment dike about 20 feet long and 6 feet high, and a left abutment dike about 500 feet long and 6 feet high; (4) a reservoir with a surface area of 3,094 acres and gross storage of 2,175 mcf at the maximum water level of 1,591.96 feet NGVD. The reservoir has usable storage of 308 mcf with a drawdown of 2.0 feet.

Minocqua Development

The Minocqua Development is an improved natural-lake reservoir, located at the headwaters of the Tomahawk River in Oneida County near Minocqua, Wisconsin. The development consists of: (1) A reinforced concrete gated gravity dam 35 feet long, 30 feet wide, and 8.75 feet high; (2) two tainter gates in the dam, each 8 feet wide by 4.5 feet high; (3) one overflow bay in the dam, 8 feet wide by 4 feet high; (4) a right abutment dike about 100 feet long and 8 feet high, and a left abutment dike about 150 feet long and 8 feet high; (5) a reservoir with a surface area of 6,068 acres and gross storage of 7,243 mcf at the maximum water level of 1,585.05 feet NGVD. The reservoir has usable storage of 800 mcf with a drawdown of 2.77 feet.

Squirrel Development

The Squirrel Development is an improved natural-lake reservoir, located on the Squirrel River about 13.2 miles upstream from its confluence with the Tomahawk River in Oneida County, Wisconsin. The development consists of: (1) A reinforced concrete gated gravity dam 15 feet long, 21 feet wide, and 6.8 feet high, with upstream wingwalls about 10 feet long; (2) one vertical lift gate in the dam, 5 feet wide by 4.5 feet high; (3) one stop log bay in the dam, 5 feet wide by 4.5 feet high; (4) a left abutment dike about 65 feet long and 7.3 feet high; (5) a reservoir with a surface area of 1,505 acres and gross storage of 1,008 mcf at the maximum water level of 1,584.93 feet NGVD. The reservoir has usable storage of 149 mcf with a drawdown of 2.42 feet.

Willow Development

The Willow Development is a man-made reservoir, located on the Tomahawk River in Oneida County near Hazelhurst, Wisconsin. The development consists of: (1) A reinforced concrete gated gravity dam 72 feet long, 29 feet high, and 34.5 feet high, with upstream wingwalls about 33 feet long and downstream wingwalls about 50 feet long; (2) one central tainter gate in the dam, 20 feet wide by 12.5 feet high, and two flanking tainter gates in the dam, each 10 feet wide by 23.5 feet high; (3) a right abutment dike about 300 feet long and 30.5 feet high, and a left abutment dike about 700 feet long and 30.5 feet high; (4) Doberstein dike, located about 2,000 feet south of the gated dam, measuring about 1,400 feet in length and 18 feet in height; (5) the South dike, located about one mile south of the gated dam, measuring about 3,500 feet in length and 11 feet in height; and (6) a reservoir with a surface area of 6,392 acres and gross storage of 2,924 mcf at the maximum water level of 1,529.35 feet NGVD. The reservoir has usable storage of 2,809 mcf with a drawdown of 18.5 feet.

Rice Development

The Rice Development is a man-made reservoir, located on the Tomahawk River in Lincoln and Oneida Counties near Tomahawk, Wisconsin. The development consists of: (1) A reinforced concrete gated gravity dam 97 feet long, 34 feet wide, and 19 feet high, with upstream wingwalls about 32 feet long and downstream wingwalls about 42 feet long; (2) two tainter gates in the dam, each 20 feet wide by 15 feet high; (3) one timber needle bay in the dam, 20 feet wide by 17.7 feet high; (4) a right abutment dike about 900 feet long and 22 feet high, and a left abutment dike about 500 feet long and 22 feet high; (5) the West dike, located about 4,000 feet northwest of the gated dam, measuring about 1,550 in length and 10 feet in height; and (6) a reservoir with a surface area of 4,111 acres and gross storage of 1,922 mcf at the maximum water level of 1,463.25 feet NGVD. The reservoir has usable storage of 1,698 mcf with a drawdown of 13.25 feet.

Spirit Development

The Spirit Development is a man-made reservoir, located on the Spirit River near its confluence with the Wisconsin River at river mile 313.5 in Lincoln County near Tomahawk, Wisconsin. The development consists of: (1) A reinforced concrete gated gravity dam 60 feet long, 35 feet wide, and 26 feet high, with upstream wingwalls about 36 feet long and downstream wingwalls about 24 feet long; (2) two tainter gates in the dam, each 20 feet wide by 19 feet high; (3) a right abutment dike about 1,140 feet long and 26 feet high, and a left abutment dike about 1,330 feet long and 26 feet high; and (4) a reservoir with a surface area of 1,698 acres and gross storage of 672 mcf at the maximum water level of 1,437.88 feet NGVD. The reservoir has usable storage of 666 mcf with a drawdown of 17.0 feet.

Eau Pleine Development

The Eau Pleine Development is a man-made reservoir, located on the Big Eau Pleine River near its confluence with the Wisconsin River at river mile 237.6 in Marathon County near Mosinee, Wisconsin. The development consists of: (1) A reinforced concrete gated gravity dam 149 feet long, 30 feet wide, and 45 feet high, with upstream wingwalls about 90 feet long and downstream wingwalls about 54 feet long; (2) three tainter gates in the dam, each 26 feet wide by 15.5 feet high; (3) one sluice gate in the dam, 10 feet wide by 6 feet high; (4) a right abutment dike about 4,450 feet long and 45 feet high, and a left abutment dike about 4,000 feet long and 45 feet high; and (4) a reservoir with a surface area of 6,677 acres and gross storage of 4,275 mcf at the maximum water level of 1,145.43 feet NGVD. The reservoir has usable storage of 4,170 mcf with a drawdown of 27.43 feet.

The Applicant is not proposing any changes to the existing project works as licensed. The Applicant owns all existing project facilities.

The existing project would also be subject to Federal takeover under

concrete vertical shaft connecting the upper reservoir to a horizontal tunnel; (3) the 2,400-foot-long, 14-foot-diameter horizontal tunnel connecting the vertical shaft to a penstock; (4) the 4,000-foot-long, 14-foot-diameter penstock connecting the horizontal tunnel to a powerhouse; (5) the powerhouse containing two generating units with a total installed capacity of 200 MW; (6) two 450-foot-long, 10-foot-diameter tailrace pipes connecting the powerhouse to a lower reservoir; (7) a 78-foot-high dam and 31.65-acre lower reservoir; (8) a 5,300-foot-long transmission line; and (9) appurtenant facilities. Water for the project will be conveyed to the site via pipeline from an unidentified source.

k. Under § 4.32(b)(7) of the Commission's regulations (18 CFR), if any resource agency, Indian Tribe, or person believes that the applicant should conduct an additional scientific study to form an adequate factual basis for a complete analysis of the application on its merits, they must file a request for the study with the Commission on or before November 3, 1992 and must serve a copy of the request on the applicant.

Standard Paragraphs

A5. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the completing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application. A competing preliminary permit application must conform with 18 CFR 4.30(b)(1) and (9) and 4.36.

A7. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before a specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application. A competing license application must conform with 18 CFR 4.30(b)(1) and (9) and 4.36.

A9. Notice of Intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, and must include an unequivocal statement of intent to submit, if such an application may be filed, either a preliminary permit application or a development application (specify which type of application). A notice of intent must be served on the applicant(s) named in this public notice.

A10. Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit will be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

B1. Protests or Motions to Intervene—Anyone may submit a protest or a motion to intervene in accordance with the requirements of Rules of Practice and Procedures, 18 CFR 385.210, 385.211, and 385.214. In determining the appropriate action to take, the Commission will consider all protests filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any protests or motions to intervene must be received on or before the specified deadline date for the particular application.

C. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to Director, Division of Project Review, Federal Energy Regulatory Commission, Room 1027, at the above-mentioned address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

E. Filing and Service of Responsive Documents—The application is not ready for environmental analysis at this time; therefore, the Commission is not now requesting comments, recommendations, terms and conditions, or prescriptions. When the application is ready for environmental analysis, the Commission will notify all persons on the service list and affected resource agencies and Indian tribes. If any person wishes to be placed on the service list, a motion to intervene must be filed by the specified deadline date herein for such motions. All resource agencies and Indian tribes that have official responsibilities that may be affected by the issues addressed in this proceeding, and persons on the service list will be able to file comments, terms and conditions, and prescriptions within 60 days of the date the Commission issues a notification letter that the application is ready for an environmental analysis. All reply comments must be filed with the Commission within 105 days from the date of that letter.

All filings must (1) bear in all capital letters the title "PROTEST" or "MOTION TO INTERVENE;" (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. Any of these documents must be filed by providing the original and the number of

copies required by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, Room 1027, at the above address. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application.

Dated: September 28, 1992. Washington, DC.

Lois D. Cashell,

Secretary.

[FR Doc. 92-23814 Filed 9-30-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP92-697-000, et al.]

United Gas Pipe Line Company, et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. United Gas Pipe Line Co.

[Docket No. CP92-697-000]

September 23, 1992.

Take notice that on September 11, 1992, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP92-697-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon a portion of its transmission pipeline facilities which were certificated in Docket No. CP71-89,[1] all as more fully set forth in the application on file with the Commission and open to public inspection.

United proposes to abandon by sale to Pipeline Equities (Equities) [2] the portion of its 16-inch natural gas transmission line (Index 39) extending between its Refugio and Edna compressor stations, together with two contiguous gas supply lateral lines (Index 39-2 and Index 39-3), and related valves and appurtenances. United describes the pipeline facilities as being low pressure facilities (approximately 300 psig), constructed in 1930, approximately 60 miles in total length, and located in Jackson, Victoria, and Refugio Counties, Texas. It is stated that the facilities would be sold for $376,336.79, which corresponds to their salvage value.

United explains that it is not economical to operate the facilities since gas production in the nearby fields has drastically diminished over the years, and estimates that the abandonment would reduce United's maintenance costs by approximately $200,000 per year. United advises that Equities would not be operating the facilities as "regulated" jurisdictional facilities. United states that the 12 farm tap customers, which would be affected by this proposal, have consented to have their service taps relocated to United's parallel Index 129 pipeline, and that it has filed in Docket No. CP92-644-000 for such authorization. United further states that there is one active gas purchase contract associated with this abandonment, and United has agreed to reconnect that producer to index 129 at no cost to the producer.

Comment date: October 14, 1992, in accordance with Standard Paragraph F at the end of this notice.

2. Trunkline Gas Co.

[Docket No. CP92-705-000]

September 24, 1992.

Take notice that on September 15, 1992, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77251-1642, filed an application with the Commission in Docket No. CP92-705-000 pursuant to section 7(b) of the Natural Gas Act (NGA) for permission and approval to abandon a firm sales service to Michigan Gas Utilities Company (MGU), an existing jurisdictional sales customer, under Trunkline's FERC Rate Schedule P-2, all as more fully set forth in the request which is open to the public for inspection.

Trunkline proposes to abandon, at MGU's request, a firm sales service under Trunkline's Rate Schedule P-2 of up to 7,650 Mcf per day of natural gas. Trunkline requests authority to abandon its Rate Schedule P-2 firm sales service to MGU effective the date of any order issued in this proceeding. No facilities would be abandoned in this proposal.

Comment date: October 15, 1992, in accordance with Standard Paragraph F at the end of this notice.

3. Williams Natural Gas Co.

[Docket No. CP92-711-000]

September 24, 1992.

Take notice that on September 17, 1992, Williams Natural Gas Company (Williams), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP92-711-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon certain gathering facilities by sale, to abandon and assign gas purchases along the gathering facilities and to abandon and assign two domestic sales customers, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Williams requests authorization to abandon, by sale to Sun Operating Limited Partnership by Oryx Energy Company (Oryx), its portion of the Wakita/Clyde gathering system located in Grant and Alfalfa Counties, Oklahoma, consisting of approximately 70.4 miles of various size pipeline and associated meters and meter runs. The sale price is $430,000 it is stated. Williams also proposes to abandon and assign to Oryx its purchases of Natural Gas Act gas along the facilities and two domestic sales made from the facilities. Williams asserts that no compressors, compressor stations or mainline facilities will be sold.

Comment date: October 15, 1992, in accordance with Standard Paragraph F at the end of the notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

---

Central Vermont Public Service Corp.; Filing

September 25, 1992.

Take notice that on September 14, 1992, Central Vermont Public Service Corporation tendered for filing an amendment in the above-referenced docket.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before October 8, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TC92-14-000]

Columbia Gas Transmission Corp; Tariff Sheet Filings

September 25, 1992.

Take notice that Columbia Gas Transmission (Columbia), 1700 MacCorkle Ave. S.E., P.O. Box 1273, Charleston, WV 25325-1273, has filed its revised tariff sheets to become effective November 1, 1992, pursuant to Section 281.204(b)(2) of the Commission's Regulations, which requires interstate pipelines to update their respective index of entitlements annually to reflect changes in priority 2 entitlements (Essential Agricultural Users).

Columbia filed to revise the following sheets to become effective November 1, 1992:

(a) Third Revised Sheet Nos. 270-274
(b) Second Revised Sheet No. 275
(c) Third Revised Sheet Nos. 276-305
(d) Second Revised Sheet No. 306
(e) First Revised Sheet Nos. 307-310

Any person desiring to be heard or to make a protest with reference to said tariff sheet filing should, on or before October 18, 1992, file with the Federal Energy Regulatory Commission (825 North Capitol Street, NE., Washington, DC 20426) a motion to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedures, 18 CFR 385.214 or 385.211. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket Nos. TQ92-5-28-002 TM92-4-28-002]

Panhandle Eastern Pipe Line Co.; Compliance Filing

September 25, 1992.

Take notice that Panhandle Eastern Pipe Line Company (Panhandle) on September 14, 1992, in compliance with the Commission's August 28, 1992 letter order, submitted additional information in support of its filing.

Panhandle states that on August 28, the Commission issued a letter order accepting for filing and suspending the tariff sheets filed by Panhandle subject to refund and conditions, and directed Panhandle to file with 15 days of issuance of this order additional information in support of the filing.

Panhandle states that in compliance with the Commission's directive it has filed the filing:

1. The basis for the Trunkline Gas Company transportation rates reflected in Rate Schedules T-14, T-39, T-40, TE-8 and T-54.

2. An explanation of the Demand billing determinants used for customers served under Rate Schedules SSS-1, SSS-2, and SSS-3.

3. Workpapers to support the rate adjustments pursuant to the TCA tariff provisions.

Panhandle requests that the submittal be accepted as in satisfactory compliance with the Commission's directives in the letter order dated August 29, 1992.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before October 2, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP92-233-000]

Panhandle Eastern Pipe Line Co.; Proposed Changes in FERC Gas Tariff

September 25, 1992.

Take notice that on September 23, 1992, Panhandle Eastern Pipe Line Company (Panhandle) tendered for filing the following tariff sheets listed on appendix A to the filing, to its FERC Gas Tariff, Original Volume No. 1 in compliance with the Commission's May 28, 1992 order in Docket No. CP92-462-000. Panhandle proposes that the tariff sheets be made effective November 1, 1992.

Panhandle states that the tariff sheets are being submitted to provide for a open-access storage service. The Commission stated in the aforementioned order that the proposed storage service was consistent with the goals of Order No. 636 and that Panhandle may provide the requested storage service under part 284 of the Regulations by filing revised tariff sheets that provide for such service. The Commission expressly stated that Panhandle may implement the storage service "in advance of its required filing in full compliance with Order No. 636" and that such a filing "will benefit all market participants."

Panhandle states that copies of the filing have been served upon Panhandle's jurisdictional customers, interested state regulatory commissions and parties in the Docket No. CP92-462-000 proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before October 2, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Pelican Interstate Gas System; Proposed Change in FERC Gas Tariff

September 25, 1992.

Take notice that on September 23, 1992, Pelican Interstate Gas System (Pelican) tendered for filing Sixth Revised Sheet No. 2A and Fifth Revised Sheet No. 2B to be a part of its FERC Gas Tariff, with a proposed effective date of October 1, 1992.

Pelican states that the proposed tariff sheets provides a revised Annual Charges Adjustment (ACA) that the Federal Energy Regulatory Commission ("Commission") assesses Pelican under § 382.103 of the Commission's Regulations. Pelican states that the Commission has specified that ACA unit charge of $.0023/Mcf to be applied to rates in 1993 for recovery of 1992 annual charges.

Pelican states that copies of the filing has been mailed to Pelican's jurisdictional customers and interested state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211. All such motions or protests must be filed on or before October 2, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[FR Doc. 92–23853 Filed 9–30–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. TC92–10–000]

Southern Natural Gas Co.; Petition for Waiver

September 25, 1992.

Take notice that on September 14, 1992, Southern Natural Gas Company, (Southern), P.O. Box 2563, Birmingham, Alabama 35202–2563, tendered for filing a Petition For Waiver of certain provisions of the Stipulation and Agreement dated December 30, 1981 in Docket No. TC81–64–000.

By order dated March 18, 1982, the Commission approved the aforementioned Stipulation and Agreement, which established the procedures to be followed in updating the Priority 2.1 Essential Agricultural Use (EAU) requirements of Southern's resale and direct sale customers. One provision of the Stipulation and Agreement requires Southern to resurvey triennially its customers' EAU requirements in order to update its Index of Requirements to reflect any changes in their EAU requirements. By letter order dated November 8, 1991, the Commission authorized Southern to postpone its triennial review of the EAU requirements until September 15, 1992.

In the petition, Southern requests authorization from the Commission to extend the time for filing its triennial EAU survey until November 1, 1992 and that such update be made effective December 1, 1992. Southern submits that there is good cause to waive the triennial survey requirement until November 1, 1992, because Southern and its customers are in the process of negotiating the terms under which Southern will provide service to its customers pursuant to Order No. 636 and it would be burdensome at this time for Southern's customers to resurvey their customers for EAU requirements. Southern has consulted its customers on its Data Verification Committee and they have agreed that Southern should ask for a waiver of the triennial filing requirement until November 1, 1992 with an effective date of December 1, 1992.

Any person desiring to be heard or to protest said filing should file a Motion to Intervene or a Protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such Motions or Protests should be filed on or before October 5, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a Motion to Intervene. Copies of this filing are on file with the Commission and are available for public inspection.

AGENCY: Office of Nuclear Energy, U.S. Department of Energy.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given that the Early Site Permit Demonstration Program (ESPDP) will conduct a Siting Conference on October 14, 1992. The purpose of the meeting is to present to U.S. utilities, other potentially qualifying ESP holders, and the interested public, results and status to date. These will include discussions of ESPDP progress and other activities supporting the demonstration of the ESP process.

DATES: The conference will be held on Wednesday, October 14, 1992, from 8 a.m. to 5 p.m.

ADDRESSES: The conference will be held at the Stouffer Concourse Hotel, 2399 Jefferson Davis Highway, Arlington, Virginia 22202, (703) 979-6800.

FOR FURTHER INFORMATION CONTACT: Mr. Walter Pasedag, U.S. Department of Energy, (301) 903-3628.

Registration is required for attending the conference. To preregister, please contact Southern Electric International at (205) 868-5711. Registration is also available the day of the conference beginning at 7:15 a.m. Registration the day of the conference is on a space available basis. The meeting is open to the public.

William H. Young,

Assistant Secretary for Nuclear Energy.

BILLING CODE 6560-50-F

[OPPTS-00125; FRL-4167-3]

Toxic Substances Control Act Confidential Business Information Claims Policies and Regulations; Notice of Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meeting.

SUMMARY: Notice is hereby given that a public meeting is scheduled to elicit public comments on Toxic Substances Control Act (TSCA) Confidential Business Information (CBI) policies and on a study commissioned by EPA which examined the influence of CBI requirements on TSCA implementation. Interested persons will be given the opportunity to comment on these policies, the recently completed study, and provide suggestions for proposals for future actions in this area.

DATES: The public meeting will occur on October 14, 1992, from 9:30 a.m. to 12:30 p.m. Persons wishing to attend the meeting should contact the party listed under FOR FURTHER INFORMATION CONTACT before October 7, 1992.

ADDRESSES: The public meeting will be held at: Washington Vista Hotel, 1400 M St., NW., Washington, DC 20005.

FOR FURTHER INFORMATION CONTACT: Scott M. Sherlock, Information Management Division (TS–793), Environmental Protection Agency, 401 M St., SW., Rm. E–118, Washington, DC 20460, Telephone: (202) 260–1536, TDD: (202) 554–0551.

SUPPLEMENTARY INFORMATION: In early September 1992, EPA released a commissioned study titled "Influence of CBI Requirements on TSCA CBI." This study was commissioned as part of an EPA initiative to improve TSCA's utilization as a toxics information dissemination statute. The study provided an depth analysis of CBI claims, submitter procedures for making such claims, Agency review and challenges of claims, and effects of improper claims on EPA's toxics information mission.

Using this study as a first step, EPA is reviewing CBI claims procedures to establish a more effective way to provide the required protections to business confidential information and also to further TSCA's usefulness as a toxics information dissemination statute. The Agency in this public meeting is seeking public comment on TSCA confidential business information handling policies, TSCA information dissemination policies, and soliciting perspectives and suggestions for the next steps to be undertaken to make the TSCA confidential business information dissemination systems more effective.

Persons wishing to attend the meeting should contact Scott Sherlock at (202) 260–1536 in order to preregister. Members of the public will be granted the opportunity to make oral comments at the meeting. Individual comments will be limited to 5 minutes. Written comments are invited and should be directed to Scott Sherlock at the address listed under FOR FURTHER INFORMATION CONTACT.

Dated: September 24, 1992.

Linda A. Travers,

Director, Information Management Division, Office of Pollution Prevention and Toxics.

FEDERAL MARITIME COMMISSION

Elizabeth River Terminals, Inc., et al.; Agreement(s) Filed

The Federal Maritime Commission hereby gives notice that the following agreement(s) has been filed with the Commission pursuant to section 15 of the Shipping Act, 1916, and section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10325. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission, Washington DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments and protests are found in §§ 560.6 and/or 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult these sections before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No: 224–008435–001.

Title: Terminal Operators Conference of Hampton Roads.

Parties:

Elizabeth River Terminals, Inc.
Lambert's Point Docks, Inc.
Virginia International Terminals, Inc.
Virginia Ports Authority.

Filing Party: H. Robert Jones, Chairman, Virginia Port Authority, 600 World Trade Center, Norfolk, VA 23510.

Synopsis: The subject modification would restate and update the Agreement by acknowledging its effectiveness under the Shipping Act of 1984, expand its geographic scope, change its name, and make administrative changes within the voting provision.

Agreement No: 207–011381–001.

Title: United Yacht Transport Joint Service Agreement.

Parties:

Dock-Express Shipping B.V.
Wijsmuller Transport Holding B.V.

Filing Party: Edward Schmeltzer, Esq., Schmeltzer, Aptaker & Shepard, P.C. 2600 Virginia Avenue, NW., Washington, DC 20037–1905.

Synopsis: The proposed amendment adds Alaska and Hawaii to the U.S. port areas served, expands the Agreement's authority to include U.S. domestic service for the carriage of yachts between the U.S. Virgin Islands and other U.S. ports, and provides for the carriage of watercraft other than yachts between Mediterranean ports, Florida, and the U.S. Virgin Islands.

Dated: September 25, 1992.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

The Port of Oakland et al.; Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 800 North Capitol Street, NW., 9th Floor. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–003914–007.

Title: Port of Oakland/Sea-Land Service, Inc., Marine Terminal Agreement.

Parties:

The Port of Oakland ("Port")
Sea-Land Service, Inc ("Sea-Land").

Synopsis: The Agreement provides for certain container yard repair improvements to be performed by Sea-Land at the Port. It also provides for reimbursement by the Port to Sea-Land of a portion of the cost for container yard improvement.

Agreement No.: 224–200294–005.

Title: Georgia Ports Authority/ Japanese Three Lines Terminal Agreement.

Parties:

Georgia Ports Authority
Mitsui O.S.K. Lines, Ltd.
Nippon Yusen Kaisha.

Synopsis: The amendment revised the Agreement's rate schedule.

Agreement No.: 212–011213–029.

Title: Spain-Italy/Puerto Rico Island Pool Agreement.

Parties:

Compania Trasatlantica Espanola, S.A.
Nordana Line A/S
Sea-Land Service, Inc.

Synopsis: The proposed amendment will reduce the amount of the security

required to be deposited by each member to a flat rate of $30,000.

Agreement No.: 207–011386.

Title: NGPL—Joint Service Agreement.

Parties:

The China Navigation Co. Ltd.
Mitsui O.S.K. Lines Ltd.

Synopsis: The proposed Agreement will permit the parties to establish a joint service in the trade between Papua, New Guinea, the Solomon Islands, and other Asian ports (with transshipment in the Far East) and the United States, Puerto Rico, Northern Marianas Islands, and all of the United States territories and possessions. It will also permit the parties to fix or regulate rates, charges, practices and conditions for carriage of cargo in the service and consult and agree on sailing schedules, service frequencies, ports to be served and port rotations, issue a single bill of lading and share revenue and expenses.

Dated: September 25, 1992.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

GENERAL SERVICES ADMINISTRATION

Notice of Establishment of Committee

Establishment of Advisory Committee

This notice is published in accordance with the provisions of section 9(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463) and advises of the establishment by the General Services Administration of the Steering Committee for the African Burial Ground, New York, NY. The Administrator of General Services has determined that establishment of this committee is in the public interest.

Designation

Steering Committee for the African Burial Ground, New York, NY.

Purpose.

The committee will advise the Administrator of General Services and the Congress in determining the present and future activities affecting the pavilion portion of the Federal construction site known as the "Negro Burial Ground" on Duane and Elk Streets, New York City, including, but not limited to: (1) The review of proposals regarding the human remains on the pavilion site; (2) the analysis, curation, and reinterment of remains exhumed from the "Negro Burial Ground"; and (3) the construction of a memorial or other improvement on the pavilion site. The committee will also advise the Administrator regarding activities in the tower site relating to exhibits, the interpretive display, and artwork to the extent that construction of the tower will not be impeded.

Contact for Information

For additional information, contact: William J. Diamond, Regional Administrator, General Services Administration, Region 2, 26 Federal Plaza, New York, NY 10278, Telephone: (212) 264–2600.

Dated: September 23, 1992.

BILLING CODE 4150–04–M

Food and Drug Administration

[Docket No. 78N–0050, formerly FDC–D–634; DESI 607]

Antazoline in Fixed Combination With Naphazoline for Human Ophthalmic Use; Drug Efficacy Study Implementation; Final Evaluation

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its final evaluation, under the Drug Efficacy Study Implementation (DESI) program, of Vasocon-A, which contains 0.5 percent antazoline phosphate and 0.05 percent naphazoline hydrochloride. Vasocon-A is safe and effective for the relief of signs and symptoms of allergic conjunctivitis, and lacking substantial evidence of effectiveness for all other previously labeled indications. Vasocon-A is manufactured by IOLAB Pharmaceuticals, Inc. (IOLAB), 500 IOLAB Dr., Claremont, CA 91711.

ADDRESSES: Requests for information concerning the notice should be identified with the reference number DESI 607 and directed to the attention of the Division of Drug Labeling Compliance (HFD–310), Center for Drug Evaluation and Research, Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–295–8063.

FOR FURTHER INFORMATION CONTACT: Harry T. Schiller, Center for Drug Evaluation and Research (HFD–366), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–295–8041.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of October 14, 1971 (36 FR 19987), FDA announced that it had completed its evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group (NAS–NRC), on Antistine Phosphate Ophthalmic Solution containing antazoline phosphate (new

drug application (NDA) 6-456). Based on this evaluation, FDA found that antazoline phosphate for ophthalmic use, alone or in combination with other ingredients, was possibly effective for the relief of ocular irritation and/or congestion, or for the treatment of allergic, inflammatory, or infectious ocular conditions. Although manufacturers of affected products were given time to submit substantial evidence of effectiveness for the possibly effective indications, no data were submitted.

Subsequently, in a notice published in the **Federal Register** of June 21, 1973 (38 FR 16257), FDA reclassified the possibly effective indications for Antistine Phosphate Ophthalmic Solution to lacking substantial evidence of effectiveness, proposed to withdraw approval of NDA 6-456, and offered an opportunity for a hearing on the proposal. The notice also announced that all identical, related, and similar drug products not subject to approved NDA's were covered by the NDA reviewed and by FDA's effectiveness conclusions (21 CFR 310.6; previously 21 CFR 130.40). The notice further offered the manufacturers and distributors of these products an opportunity for a hearing concerning FDA's conclusions.

In response to the 1973 notice, Smith, Miller, and Patch, Inc., a subsidiary of Cooper Laboratories, Inc., filed a hearing request for Vasocon-A, containing 0.5 percent antazoline phosphate and 0.05 percent naphazoline hydrochloride. At that time, Vasocon-A was an unapproved combination drug product related to Antistine Phosphate Ophthalmic Solution.

No other manufacturers or distributors requested a hearing. Consequently, in a notice published in the **Federal Register** of January 21, 1974 (39 FR 2392), FDA withdrew approval of NDA 6-456. This withdrawal of approval also covered all identical, related, and similar drug products not the subjects of approved NDA's, except Vasocon-A. The agency announced that it was unlawful to ship in interstate commerce Antistine Phosphate Ophthalmic Solution and all identical, related, and similar drug products not the subjects of approved NDA's, except for Vasocon-A. The agency permitted the continued marketing of Vasocon-A pending a ruling on the hearing request.

Subsequently, Cooper Laboratories, Inc., sold its rights to Vasocon-A to IOLAB, which submitted an NDA for the drug (NDA 18-746). FDA approved Vasocon-A on April 30, 1990, for the relief of signs and symptoms of allergic conjunctivitis. On January 31, 1992, IOLAB withdrew its hearing request.

Therefore, the Director of the Center for Drug Evaluation and Research finds Vasocon-A as lacking substantial evidence of effectiveness for all other indications except for those previously approved by the agency.

As previously announced, drug products containing antazoline in combination with naphazoline are regarded as new drugs (21 U.S.C. 321(p)). An approved NDA is a requirement for marketing such products. Marketing of such products without an approved NDA will subject those products, and those persons who cause the products to be marketed, to regulatory action.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 201(n), 201(p), 502, 505 (21 U.S.C. 321(n), 321(p), 352, 355)) and under the authority delegated to the Director of the Center for Drug Evaluation and Research (21 CFR 5.70 and 5.82).

Dated: September 17, 1992.

Carl C. Peck,

Director, Center for Drug Evaluation and Research.

[FR Doc. 92-23747 Filed 9-30-92; 8:45 am]

BILLING CODE 4160-01-F

Health Resources and Services Administration

Advisory Council on Trauma Care Systems; Establishment

Pursuant to the Federal Advisory Committee Act, Public Law 92-463 (5 U.S.C. appendix 2), the Secretary, Department of Health and Human Services announces the establishment of the following advisory council.

Designation: Advisory Council on Trauma Care Systems.

Purpose: The Advisory Council on Trauma Care Systems shall advise and make recommendations to the Secretary, the Assistant Secretary for Health, and the Administrator, Health Resources and Services Administration by: (1) Periodically conducting assessments of the needs in the United States with respect to trauma care and the extent to which the States are responding to such needs, including special consideration of the unique needs of rural areas; (2) submitting the findings made as a result of such assessments; and (3) advising with respect to activities carried out under Title XII, including the development of a model trauma care plan.

Structure: The Council consists of 12 appropriately qualified representatives of the public who are not officers or employees of the United States and are appointed by the Secretary. Of such members: 3 will be individuals experienced or specially trained in trauma surgery (including a critical care nurse); 3 will be individuals experienced or specially trained in emergency medicine (including a nurse who is specially trained in emergency medicine); 1 will be an individual experienced or specially trained in the care of injured children; 1 will be an individual experienced or specially trained in physical medicine and rehabilitation; and 4 will be individuals experienced or specially trained in the development, administration or financing of trauma care systems.

Authority for this Council is continuing until otherwise provided by law.

Dated: September 25, 1992.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

BILLING CODE 4160-15-M

Public Health Service

Deletion of Text From Previously Published Notice

AGENCY: Public Health Service, HHS.

ACTION: Deletion.

On September 2, 1992, we published a notice in the **Federal Register** entitled "Specific List for Categorization of Laboratory Test Systems, Assays and Examinations by Complexity" (57 FR 40258-40296). At the bottom of column 1 on page 40293 and running to the end of the document, the notice contained text under a subheading reading "Corrections to the Specific List for Categorization of Laboratory Test Systems, Assays and Examinations by Complexity Published as a notice in the **Federal Register** on February 28, 1992." The subheading and the entirety of such text is hereby deleted.

Corrections to the categorization of tests may be published in future **Federal Register** Notices. These corrections will be made based on analysis of comments and additional information that may become available.

Dated: September 24, 1992.

James O. Mason,

Assistant Secretary for Health.

[FR Doc. 92-23752 Filed 9-30-92; 8:45 am]

BILLING CODE 4160-17-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management,

[CA-050-93-4333-13]

Closure of Public Lands in Lake County, CA

AGENCY: Bureau of Land Management Interior.

ACTION: Permanent Closure Order of Public Lands in Lake County, California.

SUMMARY: Notice is hereby given related to the permanent closure of Bureau of Land Management (BLM) administered lands to public use from the hours of 10 p.m. to 5 a.m. in accordance with regulations contained in 43 CFR subpart 8364.1(a) and known as Soda Bay Island Baths, located in T13N, R8W, within section 6 in Lake County containing 1 acre more or less in three closely spaced islands. This closure shall not apply to peace officers, firefighters, or any other emergency service personnel while in the performance of their duties. Exemption to this closure may be granted to groups or individuals by permit from BLM.

DATE: This Closure Order is effective October 1, 1992.

SUPPLEMENTARY INFORMATION: The three small rocky islands were used by the Indians and later developed as a health resort by the white man in the early 1900's. A boardwalk connected the baths to a health resort located on the mainland. In the 1940's the resort burned and was not rebuilt. The islands were claimed as government property and are now managed by the Bureau of Land Management. Today local merchants advertise the presence of the hot water baths to attract tourists to the area. As a result their has been an increase in visitor use on the islands over the past several years. The nocturnal closure is necessary because of the increase nocturnal disturbance caused to wildlife and residents living nearby. Local residents complain about increase occurrences of vandalism, excessive public drinking, and lewd and lascivious behavior which occur on the islands after dark. The Bureau of Land Mangement will continue to manage the area for daylight recreational activities and as a historic site. The area will be posted "Day Use Only", Closed 10 p.m. to 5 a.m.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management, Ukiah, California office at (707) 462-3873.

Scott C. Adams,

Clear Lake Resource Area Manager.

[OR-943-4212-13; GP2-457; OR-45050]

Conveyance of Public Land; Order Providing for Opening of Lands; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This action informs the public of the conveyance of 653.18 acres of public land out of Federal ownership. This action will also open 4,258.18 acres of reconveyed lands to surface entry, and 3,202.18 acres to mining and mineral leasing. Of the balance, the minerals in 800 acres have been and continue to be open to mining and mineral leasing, and the minerals in 256 acres not in Federal ownership.

EFFECTIVE DATE: November 6, 1992.

FOR FURTHER INFORMATION CONTACT: Linda Sullivan, BLM Oregon State Office, P.O. Box 2965, Portland, Oregon 97208, 503-280-7171.

SUPPLEMENTARY INFORMATION: 1. Notice is hereby given that in an exchange of lands made pursuant to Section 206 of the Act of October 21, 1976; 43 U.S.C. 1716, a patent has been issued transferring 653.18 acres in Deschutes County, Oregon, from Federal to private ownership.

2. In the exchange, the following described lands have been reconveyed to the United States:

Willamette Meridian

T. 5 S., R. 19 E.,
- Sec. 5, those portions of the SE¼SW¼ and SE¼ lying west of John Day River;
- Sec. 8, those portions of the E½NW¼, SW¼NW¼, NE¼SW¼, and SE¼ lying west of the John Day River;
- Sec. 15, N½, SW¼, N½SE¼, and SE¼SE¼;
- Sec. 16, W½SW¼, SE¼, and that portion of the N½ lying east of the John Dary River;
- Sec. 22, N½, N½SW¼, and SE¼;
- Sec. 27, W½NE¼, N½NW¼, and SE¼NW¼.

T. 10 S., R. 19, E.,
- Sec. 13, S½S½;
- Sec. 24.

T. 10 S., R. 20 E.,
- Sec. 18, lot 4, N½NE¼, SE¼NE¼, E½SW¼, and SE¼;
- Sec. 19, lots 1, 2, 3, and 4, E½, and E½W½;
- Sec. 30, lots 1 and 2, NE¼, and E½NW¼.

The areas described aggregate approximately 4,258.18 acres in Gilliam, Jefferson, Sherman, and Wheeler Counties, Oregon.

3. The minerals in Secs. 13 and 24, T. 10 S., R. 19 E., are in Federal ownership and have been and remain open to mining and mineral leasing.

4. The minerals in Secs. 5 and 8, T. 5 S., R. 19 E., are not in Federal ownership and will not be open to mining and mineral leasing.

5. At 8:30 a.m., on November 6, 1992, the lands described in paragraph 2 will be opened to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 8:30 a.m., on November 6, 1992, will be considered as simultaneously filed at that time. Those received thereafter will be considered in the order of filing.

6. At 8:30 a.m., on November 6, 1992, the lands described in paragraph 2, except as provided in paragraphs 3 and 4, will be opened to location and entry under the United States mining laws. Appropriation of land under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. Sec. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by

State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

7. At 8:30 a.m., on November 6, 1992, the lands described in paragraph 2, except as provided in paragraphs 3 and 4, will be opened to applications and offers under the mineral leasing laws.

Dated: September 22, 1992.

Robert E. Mollohan,

Chief, Branch of Lands and Minerals Operations.

  Sec. 32, Lot 12;
T. 31 N., R. 42 E.,

Aggregating 3,208 acres, more or less in Ferry and Stevens Counties, WA.

In exchange for all or part of these lands, the Federal Government will acquire offered private lands within the Upper Crab Creek Management Area of Lincoln County, Washington. The lands proposed for acquisition will primarily be located along the Crab Creek and Lake Creek watersheds. A detailed legal description of the property will be published as specific parcels of the proposal are identified.

The Bureau of Land Management has grouped the exchange of these public and private lands into priorities based on the opportunity to exchange individual properties and through land-use planning. Completion of the total exchange of these lands is expected to occur in several stages. The value of the lands to be exchanged in each stage will be approximately equal. The proponent may be required to make payments to equalize the values of the lands at the conclusion of the exchange.

The purpose to the land exchange is to facilitate resource management opportunities in eastern Washington as identified in the Spokane District's Resource Management Plan. The exchange will reduce the number of widely scattered parcels of public land that are difficult and uneconomic to manage, and acquire private property adjacent to existing public ownership in Lincoln County. The private lands being offered have important values for recreation, fish and wildlife habitat, riparian and watershed management.

The exchange is subject to:

1. The reservation to the United States of a right-of-way for ditches or canals constructed by the authority of the United States, Act of August 30, 1890, (43 U.S.C. 945).

2. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove the minerals.

3. All other valid existing rights, including, but not limited to, any right-or-way, permit, or lease of record.

The publication of this notice in the **Federal Register** will segregate the public lands described above to the extent that they will not be subject to appropriation under the public land laws, including the mining laws.

Detailed information concerning the exchange, is available for review at the Spokane District Office, East 4217 Main Avenue, Spokane, Washington 99202.

For a period of 45 days, interested parties may submit comments to the Spokane District Manager at the above address. Any adverse comments will be reviewed by the State Director. In absence of any adverse comments, this realty action will become a final determination of the Department of the Interior

Date of Issue: September 23, 1992.

Joseph K. Buesing,

District Manager.

BILLING CODE 4310-33-M

[ID-010-03-4350-08]

Resource Management Plan Amendment, Cascade Resource Area, ID

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability of Proposed Resource Management Plan Amendment; and proposed Area of Critical Environmental Concern Designations and Federal Land Transfer.

SUMMARY: Pursuant to the BLM Planning Regulations (43 CFR part 1600) and the National Environmental Policy Act (NEPA, section 102(2)(C)) the Boise District, BLM has prepared a proposed amendment to the Cascade Resource Management Plan to designate six sites

within the Cascade Resource Area as Areas of Critical Environmental Concern (ACECs), and to consider transfer of four parcels of land from federal ownership. The proposed plan amendment is now available for a 30-day protest period under provisions in the BLM Planning regulations found at 43 CFR 1610.5–2.

DATES: The 30-day protest period for the proposed plan amendment will begin on September 28, 1992 and close on October 28, 1992. Written protests to the Director must be received or postmarked no later than the closing date.

ADDRESSES: Protests must be sent to the Director at the following address: Director (760), Department of the Interior, Bureau of Land Management, 18th and C Streets NW., Washington, DC 20240. Any protest should include: (1) Name, address, telephone number and interest of protesting party, (2) identification of the issue being protested, (3) a statement on the parts of the plan being protested, (4) a copy of all documents addressing the issue that were submitted during the planning process, and (5) a concise statement why the State Director's decision is believed to be wrong.

FOR FURTHER INFORMATION CONTACT: John Fend, Cascade Area Manager or Fred Minckler, Environmental Specialist at the Bureau of Land Management, 3884 Development Avenue, Boise, ID 83705 Telephone (208) 384–3300.

SUPPLEMENTARY INFORMATION: The Cascade Resource Management Plan (RMP) is a land use plan for public lands within the Cascade Resource Area administered by BLM in southwest Idaho. The Boise District has prepared a proposed amendment to that plan which addresses special management actions and designation of six sites ranging in size from 40 acres to 1,250 acres as ACECs to protect *Allium aaseae* (Aase'e onion), an onion species being considered by the U.S. Fish and Wildlife Service for listing as threatened or endangered. The six sites are: Cartwright Canyon, 400 acres; Hulls Gulch, 120 acres; Sand-capped Knob, 40 acres; Sand Hollow, 1,250 acres; Willow Creek, 1,060 acres and Woods Gulch, 40 acres. Resource use limitations proposed for these areas address: livestock grazing; motorized vehicle use; rights-of-way; mineral leasing, locations and disposal; water developments and fire suppression and rehabilitation.

The proposed amendment also considers transfer of four parcels of public land form federal ownership. Two small parcels, 0.07 and 1.25 acres, would be transferred from federal ownership by direct sale, and two other parcels, 440 and 20.65 acres, would be transferred through private exchanges.

Review of the environmental assessment (EA) prepared on the Proposed Amendment has resulted in a finding that no significant impact on the human environment would result from implementing the proposal and that an environmental impact statement (EIS) need not be prepared.

Dated: September 23, 1992.

David Brunner,

District Manager.

BILLING CODE 4310–GG–M

[NM–940–02–4730–12]

Filing of Plats of Survey; New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The plats of survey described below will be officially filed in the New Mexico State Office, Bureau of Land Management, Santa Fe, New Mexico on October 31, 1992.

New Mexico Principal Meridian, New Mexico

T. 5 S., R. 1 E., Accepted September 16, 1992, for Group 898 NM.
T. 5 S., R. 15 W., Accepted September 16, 1992, for Group 863 NM.
T. 11 S., R. 10 E., Accepted September 22, 1992, for Group 730 NM.
Tps. 12 & 13 S., R. 10 E., Accepted September 22, 1992, for Group 730 NM.
Second Standard Parallel S. through R. 11 E., Accepted September 22, 1992, for Group 730 NM.

Indian Meridian, Oklahoma

T. 24 N., R. 6 E., Accepted September 16, 1992, for Group 65 OK.

If a protest against a survey, as shown on any of the above plats is received prior to the date of official filing, the filing will be stayed pending consideration of the protest. A plat will not be officially filed until the day after all protests have been dismissed and become final or appeals from the dismissal affirmed.

A person or party who wishes to protest against a survey must file with the State Director, Bureau of Land Management, a notice that they wish to protest prior to the proposed official filing date given above.

A statement of reasons for a protest may be filed with the notice of protest to the State Director, or the statement of reasons must be filed with the State Director within (30) days after the proposed official filing date.

The above-listed plats represent dependent resurveys, survey and subdivision.

These plats will be in the files of the New Mexico State Office, Bureau of Land Management, P.O. Box 27115, Santa Fe, New Mexico 87502–7115. Copies may be obtained from this office upon payment of $2.50 per sheet.

Dated: September 23, 1992.

John P. Bennett,

Chief, Cadastral Survey.

[CO–930–4214–10; COC–39308]

Proposed Withdrawal; Opportunity for Public Meeting; Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Agriculture, Forest Service, proposes to withdraw an additional 1,870.48 acres of National Forest System land adjacent to an existing withdrawal near Keystone, Colorado, to protect recreational facilities and high resource values at the Keystone Ski Area. This proposed action will withdraw the entire 6,442 acres of National Forest System land for 20 years. This notice closes the 1,870.48 acres to location and entry under the mining laws for up to two years. The lands remain open to mineral leasing and to such forms of disposition as may by law be made of National Forest System lands.

DATES: Comments on this proposed withdrawal or requests for public meeting must be received on or before December 30, 1992.

ADDRESSES: Comments and requests for a meeting should be sent to the Colorado State Director, BLM, 2850 Youngfield Street, Lakewood, Colorado 80215–7076.

FOR FURTHER INFORMATION CONTACT: Bob Barbour, 303/239–3708.

SUPPLEMENTARY INFORMATION: On September 9, 1992, the Department of Agriculture, Forest Service, filed an application to withdraw the following described National Forest System lands from location and entry under the United States mining laws:

Sixth Principal Meridian

Arapaho National Forest

T. 5 S., R. 76 W.,
Sec. 19, lots 55, 58 and NE¼NW¼NW¼;
Sec. 20, lot 46 and W½SW¼;
Sec. 29, W½E½SW¼, W½NW¼
exclusive of patented land, and

W½E½NW¼ exclusive of patented land;
Sec. 32, W½NE¼NW¼, SW¼NW¼, and W½SW¼;
T. 5 S., R. 77 W.,
Sec. 24, lots 13, 15, and 17, and E½SW¼;
Sec. 25, SE¼NW¼, E½NE¼SW¼, and SW¼SE¼;
Sec. 36, NE¼NE¼, NE¼SE¼, and E½NW¼SE¼;
T. 6 S., R. 76 W.,
Sec. 5, S½;
Sec. 6, lots 2, 7, and 10;
Sec. 7, SW¼SE¼ and SE¼SW¼;
Sec. 8, N½ and N½N½SW¼;
T. 6 S., R. 77 W.,
Sec. 2, SE¼NE¼;
Sec. 12, S½SE¼, SW¼NW¼, and NE¼SW¼.

The area described aggregates approximately 1,870.48 acres in Summit County.

The purpose of this withdrawal is to protect existing recreational facilities and high resource values at the Keystone Ski Area. If approved, the final order will incorporate the existing withdrawal made by Public Land Order No. 6625 with this land and withdraw a total of 6,442.01 acres of National Forest System land for 20 years.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with this proposal may present their views in writing to the Colorado State Director.

A public meeting will be scheduled and held on this proposed action as required by regulation and will be conducted in accordance with the Bureau of Land Management Manual, section 2351.16B. A notice of the date, time and place of the meeting will be published in the **Federal Register** at least 30 days prior to the meeting.

This application will be processed in accordance with the regulations set forth in 43 CFR Part 2310.

For a period two years from the date of publication of this notice in the **Federal Register**, the land will be segregated from the mining laws as specified above unless the application is denied or cancelled or the withdrawal is approved prior to that date. During this period the Forest Service will continue to manage these lands.

Dated: September 25, 1992.

Robert S. Schmidt,

Chief, Branch of Realty Programs.

[FR Doc. 92-23823 Filed 9-30-92; 8:45 am]

BILLING CODE 4310-JB-M

[CO-930-4214-10; C-43908]

Proposed Withdrawal; Opportunity for Public Meeting; Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Agriculture, Forest Service, proposes to withdraw approximately 280 acres of National Forest System land and add it to the existing withdrawal for protection of facilities at the Breckenridge Ski Area near Breckenridge, Colorado. This proposal would amend Public Land Order No. 6684 to include this land for the duration of that withdrawal. This order will close this land to location and entry under the mining laws for up to two years. The land has been and remains open to such forms of disposition as may by law be made of National Forest System lands and to mineral leasing. This notice also cancels the existing application for expansion of Public Land Order No. 6684, appearing as **Federal Register** Document No. 90-19574.

DATES: Comments on this proposed withdrawal or requests for public meeting must be received on or before December 30, 1992.

ADDRESSES: Comments and requests for a meeting should be sent to the Colorado State Director, BLM, 2850 Youngfield Street, Lakewood, Colorado 80215-7076.

FOR FURTHER INFORMATION CONTACT: Bob Barbour, 303-239-3708.

SUPPLEMENTARY INFORMATION: On September 9, 1992, the Department of Agriculture, Forest Service, filed an application to amend their existing withdrawal for the Breckenridge Ski Area, to include the following described land:

Sixth Principal Meridian

Arapaho National Forest

T. 6 S., R. 78 W.,
Sec. 34, Nominal W½W½; (Protraction Diagram No. 9, accepted 4/26/1985)
T. 7 S., R. 78 W.,
Sec. 3, Nominal N½NW¼ and N½S½N W¼. (Protraction Diagram No. 45, accepted 8/20/1986)

The area described contains approximately 280.00 acres in Summit County. The purpose of this amendment is to protect additional facilities at the Breckenridge Ski Area. This would add the 280 acres to the existing withdrawal made by Public Land Order 6684 for a total of 1,720 acres. The entire withdrawal will expire June 14, 2038.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or obligations in connection with this proposal, or to request a public meeting, may present their views in writing to the Colorado State Director. If the authorized officer determines that a meeting should be held, the meeting will be scheduled and conducted in accordance with the Bureau of Land Management Manual, § 2351.16B.

This application will be processed in accordance with the regulations set forth in 43 CFR part 2310.

For a period two years from the date of publication of this notice in the **Federal Register**, the land will be segregated from the mining laws as specified above unless the application is denied or cancelled or the withdrawal is approved prior to that date. During this period the Forest Service will continue to manage this land.

Dated: September 25, 1992.

Robert S. Schmidt,

Chief, Branch of Realty Programs.

Receipt of Applications for Permit

The following applicants have applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, *as amended* (16 U.S.C. 1531, *et seq.*):

PRT-722075

Applicant: The Hawthorn Corporation, Grayslake, IL.

The applicant requests amendment of an existing permit to export and re-import five male and eight female captive-born tigers (*Panthera tigris*) for enhancement of survival through educational exhibitions.

PRT-766841

Applicant: The Great American Circus, Sarasota, FL.

The applicant requests a permit to purchase in interstate commerce two female Asian elephants (*Elephas maximus*) from Gary Johnson, Perris, CA, for the purpose of enhancement of survival of the species through education.

PRT-770623

Applicant: International Ctr. for Gibbon Studies, Santa Clarita, CA.

The applicant requests a permit to import 1 male Hooloch gibbon (*Hylobates hooloch leuconedys*) taken from the wild in 1978, one male captive-bred moloch gibbon (*Hylobates moloch*),

and one female captive-bred light-cheeked gibbon (*Hylobates concolor leucogenys*) for captive-breeding.

PRT-772084

Applicant: Sunrise Nursery, Leander, TX.

The applicant requests a permit to sell in interstate commerce artificially propagated endangered & threatened cactus species to enhance the propagation & survival of the species. Species include Tobusch fishhook (*Ancistrocactus tobuschii*), Nellie cory (*Coryphantha minima*), Bunched cory (*C. ramillosa*), Cochise pincushion (*C. robbinsorum*), Lee pincushion (*C. sneedii* var. *leei*), Sneed pincushion (*C. sneedii* var. *sneedii*), Chisos Mountain hedgehog (*Echinocereus chisosensis* var. *chisosensis*), kuenzler hedgehog (*E. fendleri* var. *kuenzleri*), Lloyd's hedgehog (*E. lloydii*), Black lace (*E. reichenbachii* var. *albertii*), and Davis' green pitaya (*E. viridiflorus* var. *davisii*).

PRT-770846

Applicant: Paul C. Kao, Northridge, CA.

The applicant requests a permit to import two male Palawan peacock pheasant (*Syrmaticus mikado*) from Hong Kong Zoo, Hong Kong, for enhancement of propagation.

Written data or comments should be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203 and must be received by the Director within 30 days of the date of this publication.

Documents and other information submitted with these applications are available for review by any party who submits a written request for a copy of such documents to, or by appointment during normal business hours (7:45–4:15) in, the following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203. Phone: (703/358–2104); FAX: (703/358–2281).

Dated: September 25, 1992.

National Park Service

Niobrara Scenic River Advisory Commission Meeting

AGENCY: National Park Service, Interior.

ACTION: Notice of meeting.

SUMMARY: This notice sets the schedule for the forthcoming meeting of the Niobrara Scenic River Advisory Commission. Notice of this meeting is required under the Federal Advisory Committee Act (Pub. L. 92–463).

The Commission was established pursuant to Public Law 102–50, section 5. The purpose of the Commission is to consult with the Secretary of the Interior, or his designee, on matters pertaining to the development of a management plan, and on the management and operation of the 40-mile and 30-mile segments of the Niobrara River designated by section 2 of Public Law 102–50 which lie outside the boundary of the Fort Niobrara National Wildlife Refuge and that segment of the Niobrara River from its confluence with Chimney Creek to its confluence with Rock Creek.

Meeting Date and Time: October 2, 1992, 1:30 p.m.

Address: City Hall Council Chambers, Ainsworth, Nebraska.

Agenda:

1. Responsibilities of Federal Advisory Commissions
2. Administrative procedures
3. Need for standard operating procedures and/or bylaws
4. Public participation in meetings
5. Proposed agenda, date of the next Commission meeting

The meeting is open to the public. Interested persons may make oral/written presentations to the Commission or file written statements. Requests for time for making presentations may be made to the Superintendent prior to the meeting or to the Chairman at the beginning of the meeting. In order to accomplish the agenda for the meeting the Chairman may want to limit or schedule public presentations.

FOR FURTHER INFORMATION CONTACT: Warren Hill, Superintendent, Niobrara/Missouri National Scenic Riverways, P.O. Box 591, O'Neill, Nebraska 68763–0591, (402) 336–3970.

Dated: August 13, 1992.

William W. Schenk,

Acting Regional Director, Midwest Region.

Sudbury, Assabet and Concord Rivers Study Committee Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770, 5 U.S.C. App. I s 10), that there will be a meeting of the Sudbury, Assabet and Concord Rivers Study Committee on Thursday, October 22, 1992.

The Committee was established pursuant to Public Law 101–628. The purpose of the Committee is to consult with the Secretary of the Interior and to advise the Secretary in conducting the study of the Sudbury, Assabet and Concord River segments specified in section 5(a) (110) of the Wild and Scenic Rivers Act. The Committee shall also advise the Secretary concerning management alternatives, should some or all of the river segments studied be found eligible for inclusion in the National Wild and Scenic Rivers System.

The meeting will convene at 7:30 p.m. in the Sudbury Town Hall Sudbury, Massachusetts (Sudbury Town Hall is located on the north side of Route 27, east of the intersection of Route 27 and Concord Road. From the east, take Route 27 west from Route 20 in Wayland. Town Hall is on the right approximately 1.5 mile past the causeway over the Sudbury River. From the north, take Concord Road or Pantry Brook Road south off Route 117. Turn left at Route 27. Town Hall is on the left just past the intersection).

Agenda

I. Welcome, introductions, and comments—Bill Sullivan
II. Approval of minutes from 9/17 meeting
III. Subcommittee Reports—Subcommittee Chairs
  A. River Conservation Planning Subcommittee
  B. Instream Flow Study Subcommittee
  C. Public Participation Subcommittee
IV. Discussion—Issues of Local Concern
V. Opportunity for public comment
VI. Other Business
  A. Next meeting dates and locations

Dated: August 21, 1992.

Steven H. Lewis,

Acting Regional Director.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–341]

Certain Static Random Access Memories, Components Thereof and Products Containing Same; Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on August 27, 1992, under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, on behalf of SGS-Thomson Microelectronics, Inc., 1310 Electronics

Drive, Carrollton, Texas 75006. Letters supplementing the complaint were filed on September 1, September 4, September 15 and September 16, 1992. The complaint, as supplemented, alleges violations of section 337 in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain static random access memories, component thereof and products containing same, by reason of alleged infringement of claims 1 and 4 of U.S. Letters Patent 4,125,854 and claims 1, 2, 3, 6, 7, 8, 11, 12, 15, and 17 of U.S. Letters Patent 4,251,876, and that an industry in the United States exists or is in the process of being established as required by subsection (a)(2) of section 337.

The complainant requests that the Commission institute an investigation and, after a full investigation, issue a permanent exclusion order and permanent cease and desist order.

ADDRESSES: The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., room 112, Washington, DC 20436, telephone 202–205–1802. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810.

FOR FURTHER INFORMATION CONTACT: Thomas L. Jarvis, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, telephone 202–205–2568.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and in § 210.12 of the Commission's Interim Rules of Practice and Procedure, 19 CFR 210.12.

SCOPE OF INVESTIGATION: Having considered the complaint, the U.S. International Trade Commission, on September 24, 1992, *Ordered that*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain static random access memories, components thereof or products containing same by reason of alleged infringement of claim 1 or 4 of U.S. Letters Patent 4,125,854, or claims 1, 2, 3, 6, 7, 8, 11, 12, 15, or 17 of U.S. Letters Patent 4,251,876, and whether an industry exists in the United States or is in the process of being established as required by subsection (a)(2) of section 337.

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is—SGS-Thomson Microelectronics, Inc., 1310 Electronics Drive, Carrollton, Texas 75006.

(b) The respondents are the following companies alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Micro-Comp Industries, 3350 Scott Boulevard, Building No. 57, Santa Clara, California 95054; United States Microelectronics Corp., 3 Industrial East 3rd Road, Science-Based Industrial Park, Hsinchu, Taiwan 30077.

(c) Thomas L. Jarvis, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, 500 E Street, SW., room 401J, Washington, DC 20436, who shall be the Commission investigative attorney, party to this investigation; and

(3) For the investigation so instituted, Janet D. Saxon, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding Administrative Law Judge.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with § 210.21 of the Commission's Interim Rules of Practice and Procedure, 19 CFR 210.21. Pursuant to §§ 201.16(d) and 210.21(a) of the Commission's Rules (19 CFR 201.16(d) and 210.21(a)), such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting responses to the complaint will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to such respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings, and may result in the issuance of a limited exclusion order or a cease and desist order or both directed against such respondent.

Issued: September 25, 1992.

By order of the Commission.

Paul R. Bardos,

Acting Secretary.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 32152]

Eastern Shore Railroad, Inc.—Trackage Rights Exemption—Norfolk and Western Railway Co.

Norfolk and Western Railway Company (NW) has agreed to grant overhead trackage rights to Eastern Shore Railroad, Inc. (ES) over that part of an NW line at Norfolk, VA, lying between a junction with Norfolk Southern Railway at or near milepost A 1.3 and an interchange track owned by NW at Portlock Yard at or near milepost 2.5, a distance of approximately 4.2 miles. ES will use these trackage rights to reach a point of interchange in Norfolk with NW to facilitate the through movement of loaded and empty freight cars over ES and NW. The proposed trackage rights will be effective on a date mutually agreed upon by the parties, but not before October 6, 1992.

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: Robert C. Oliver, Esq., P.O. Box 818, Eastville, VA 23347.

As a condition to the use of this exemption, any employees adversely affected by the trackage rights will be protected under Norfolk and Western Ry, Co.—Trackage Rights—BN, 354 I.C.C. 605 (1978), as modified in Mendocino Coast Ry., Inc.—Lease and Operate, 360 I.C.C. 653 (1980).

Dated: September 24, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 32153]

Union Pacific Railroad Company—Trackage Rights Exemption—The Atchison, Topeka and Santa Fe Railway Co.

The Atchison, Topeka and Santa Fe Railway Company (Santa Fe) has agreed to grant overhead trackage rights to Union Pacific Railroad Company (Union Pacific) over a 10.4-mile segment of Santa Fe's line, between Pittsburg (milepost 1154.10) and Port Chicago (milepost 1164.50), in Contra Costa County, CA. The trackage rights will be used in connection with existing trackage rights that Union Pacific holds over Santa Fe's line of railroad between Pittsburg and Stockton, CA. The trackage rights transaction will be consummated on or after September 18, 1992.

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: Joseph D. Anthofer, 1416 Dodge Street, room 830, Omaha, NE 68179.

As a condition to the use of this exemption, any employees adversely affected by the trackage rights will be protected under *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Dated: September 24, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

BILLING CODE 7035-01-M

[Docket No. AB-227 (Sub-No. 2X)]

The Wheeling & Lake Erie Railway Co.; Abandonment Exemption; In Stark, Wayne, and Medina Counties, OH

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: Under 49 U.S.C. 10505, the Commission exempts from the prior approval requirements of 49 U.S.C. 10903-10904 the abandonment by the Wheeling & Lake Erie Railway Company (WLE) of its line of railroad between Milepost 133.0 at Brewster, OH, and Milepost 93.6 at Spencer, OH, including the 1.3-mile Massillon Branch between Milepost 0.0 at Orrville Jct., and Milepost 1.3 at Orrville, OH, a total distance of approximately 40.7 miles in Stark, Wayne, and Medina Counties, OH. We will grant the petition subject to the standard employee protective conditions and certain environmental conditions.

DATES: Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on October 31, 1992. Formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2) [1] must be filed by October 11, 1992. Petitions to stay must be filed by October 16, 1992. Petitions to reopen must be filed by October 26, 1992. Requests for public use conditions must be filed by October 21, 1992.

ADDRESSES: Send pleadings, referring to Docket No. AB-227 (Sub-No. 2X) to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423, and

(2) Petitioner's representative: Thomas J. Healey, Two Illinois Center, 233 North Michigan Avenue, Suite 2400, Chicago, IL 60601.

FOR FURTHER INFORMATION CONTACT: Richard B. Felder, (202) 927-5610; [TDD for hearing impaired: (202) 927-5721].

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone (202) 289-4357/4359. [Assistance for the hearing impaired is available through TDD services (202) 927-5721.]

Decided: September 29, 1992.

By the Commission, Chairman Philbin, Vice Chairman McDonald, Commissioners Simmons, Phillips, and Emmett.

Sidney L. Strickland, Jr.,

Secretary.

DEPARTMENT OF JUSTICE

Information Collections Under Review

The Office of Management and Budget (OMB) has been sent the following collection(s) of information proposals for review under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories, with each entry containing the following information:

(1) The title of the form/collection;

(2) The agency form number, if any, and the applicable component of the Department sponsoring the collection;

(3) How often the form must be filled out or the information is collected;

(4) Who will be asked or required to respond, as well as a brief abstract;

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond;

(6) An estimate of the total public burden (in hours) associated with the collection; and,

(7) An indication as to whether Section 3504(h) of Public Law 96-511 applies.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the OMB reviewer, Ms. Lin Liu on (202) 395-7340 and to the Department of Justice's Clearance Officer, Mr. Don Wolfrey, on (202) 514-4115. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should notify the OMB reviewer and the DOJ Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr. Don Wolfrey, DOJ Clearance Officer, SPS/JMD/5031 CAB, Department of Justice, Washington, DC 20530.

Reinstatement of a Previously Approved Collection for Which Approval Has Expired

(1) Petition for Alien Relative.

(2) I-130. Immigration and Naturalization Service.

(3) On occasion.

(4) Individuals or households. The I-130 information is used to determine eligibility of petitioner and beneficiary for immediate relative status and admission to the U.S.

(5) 825,000 annual responses at .5 hours per response.

(6) 412,500 annual burden hours.

(7) Not applicable under 3504(h).

Public comment on these items is encouraged.

NW., Washington, DC 20001, (telephone: (202) 307–0467)).

United States of America, Plaintiff, v. *Hospital Association of Greater Des Moines, Inc.; Broadlawns Medical Center; Des Moines General Hospital Company; Iowa Lutheran Hospital; Iowa Methodist Medical Center; Mercy Hospital Medical Center, Des Moines, Iowa*, Defendants.

Civil Action No. 4–92–70648.

Filed: 9/22/92. Judge Vietor.

Stipulation

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

1. The parties consent that a Final Judgment in the form attached may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. 16), and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on defendants and by filing that notice with the Court;

2. In the event plaintiff withdraws its consent or the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever and the making of this Stipulation shall be without prejudice to any party in this or any other proceeding.

Dated: September 22, 1992.

Final Judgment

United States of America, Plaintiff v. *Hospital Association of Greater Des Moines, Inc.; Broadlawns Medical Center; Des Moines General Hospital Company; Iowa Lutheran Hospital; Iowa Methodist Medical Center, Mercy Hospital Medical Center, Des Moines, Iowa*, Defendants.

Civil Action No. 4–92–70648, Judge Vietor.

Filed: 9/22/92

Plaintiff, United States of America, having filed its Complaint on September 22, 1992, and plaintiff and defendants, by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law, and without this Final Judgment constituting any evidence against or an admission by any party with respect to any such issue;

Now, therefore, before the taking of any testimony and without trial or adjudication of any issue of fact or law, and upon consent of the parties, it is hereby

Ordered, adjudged and decreed:

I.

This Court has jurisdiction of the subject matter of this action and of each of the parties consenting to this Final Judgment. The Complaint states a claim upon which relief may be granted against each defendant under section 1 of the Sherman Act, 15 U.S.C. 1.

II.

This Final Judgment applies to each defendant and to each of their officers, directors, agents, employees, successors, and assigns and to all other persons in active concert or participation with any of them who receive actual notice of this Final Judgment by personal service or otherwise.

III.

As used in this Final Judgment:

(A) "Des Moines area" means Polk County, Iowa.

(B) "Management Employee" means any employee who supervises the preparation of or approves any price, charge, or discount schedule; any wage, salary, or employee benefit schedule; any budget or financial plan; any marketing or advertising plan; any long range or strategic plan; or any plan to acquire materials, equipment, or services. This definition includes but is not limited to the chief executive officer and/or administrator, the chief financial officer, vice presidents and/or assistant administrators, and the individuals who head the divisions or departments responsible for human resources, materials management, strategic and financial planning, marketing, public relations, and advertising.

IV.

Each defendant is enjoined and restrained from entering into, directly or indirectly, any contract, agreement, understanding, arrangement, plan, program, or course of action with any other hospital in the Des Moines area or any Des Moines area hospital association to limit or regulate the types or amounts of advertising by any hospital in the Des Moines area.

V.

Nothing in this Final Judgment shall prohibit any defendant from advocating, in accordance with the doctrine established in *Eastern Railroad Presidents Conference* v. *Noerr Motor Freight, Inc.*, 365 U.S. 127 (1961) and its progeny, legislation, regulatory actions, or governmental policies or actions, relating to the practices identified in Section IV above.

VI.

Each defendant is ordered to maintain an antitrust compliance program which shall include:

(A) Distributing, within 60 days from the entry of this Final Judgment, a copy of this Final Judgment to all directors, officers, and management employees;

(B) Notifying, within 60 days from the entry of this Final Judgment, all directors, officers, and management employees that the defendant will not be bound by the Hospital Association of Greater Des Moines Guidelines on Advertising, dated October 26, 1989;

(C) Distributing in a timely manner a copy of this Final Judgment to any person who succeeds to a position as director, officer, or management employee;

(D) Holding a briefing annually for all directors, officers, and management employees on (1) the meaning and requirements of this Final Judgment including the consequences of non-compliance with this Final Judgment; and (2) the application of the antitrust laws to the defendant's activities including potential antitrust concerns raised by hospitals (a) engaging in agreements or arrangements to allocate services, equipment or facilities or any other joint activities, and (b) exchanging competitive information such as contemplated or expected changes in prices or employees' salaries or benefits; and

(E) Maintaining for inspection by plaintiff a record of the directors, officers, and management employees who attend each annual briefing.

VII.

(A) Within 75 days after the entry of this Final Judgment, each defendant shall certify to the plaintiff whether it has made the distribution of this Final Judgment and the notification in accordance with Section VI above.

(B) For 10 years after the entry of this Final Judgment, on or before its anniversary date, each defendant shall certify annually to the Court and the plaintiff whether that defendant has complied with the provisions of Section VI above.

VIII.

(A) For the sole purpose of determining or securing compliance with this Final Judgment, and subject to any legally recognized privilege, from time to time, duly authorized representatives of the Department of Justice shall, upon written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to any defendant, be permitted:

(1) Access during office hours of such defendant to inspect and copy all records and documents in the possession or under the control of such defendant, who may have counsel present, relating to any matters contained in this Final Judgment; and

(2) Subject to the reasonable convenience of such defendant and without restraint or interference from it, to interview officers, employees or agents of such defendant, who may have counsel present, regarding any such matters.

(B) Upon the written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division made to any defendant, such defendant shall submit such written reports, under oath if requested, relating to any of the matters contained in this Final Judgment as may be requested.

(C) No information or documents obtained by the means provided in this Section shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party, or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

IX.

Jurisdiction is retained by this Court to enable any of the parties to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction or implementation of this Final Judgment, for the enforcement, modification, or termination of any of its provisions, and for the punishment of any violation hereof.

X.

This Final Judgment shall expire ten (10) years from the date of entry.

XI.

Entry of this Final Judgment is in the public interest.

Dated: _____.

United States District Judge.

Competitive Impact Statement

United States District Court for the Southern District of Iowa, Central Division

United States of America, Plaintiff v. *Hospital Association of Greater Des Moines, Inc.; Broadlawns Medical Center; Des Moines General Hospital Company; Iowa Lutheran Hospital; Iowa Methodist Medical Center; Mercy Hospital Medical Center, Des Moines, Iowa*, Defendants.

Civil Action No. 4–92–70648, Judge Vietor.

Filed: 9/22/92.

Pursuant to section 2(b) of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h), the United States submits this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry in this civil antitrust proceeding.

I.

Nature and Purpose of the Proceeding

On September 22, 1992, the United States filed a civil antitrust complaint alleging that defendants named above conspired unreasonably to restrain competition among themselves, by agreeing to limit the types and amounts of advertising in which they would engage, in violation of section 1 of the Sherman Act, 15 U.S.C. 1. This conspiracy diminished competition between these hospitals for patients, physician referrals, and third-party contracts, and deprived patients, physicians, and third-party payers of information necessary for them to make informed choices on the selection of hospitals and of the benefits of free and open competition in the sale of hospital services.

The Complaint alleges that, beginning at least as early as October 26, 1989, and continuing until the date of the Complaint, defendants violated the Sherman Act by agreeing that each hospital could limit its advertising expenditures to ⅓ of 1% of its respective previous year's operating expenses, and would refrain from engaging in certain types of competitive advertising about the quality of services provided by its hospital. Specifically, each hospital agreed to refrain from engaging in advertising that included quality comparisons or that would be considered image building or self-aggrandizement. This agreement was set out in a document entitled "Guidelines on Advertising" which was adopted by the defendants on October 26, 1989. The Complaint further alleges that defendants agreed that each hospital would establish and adhere to an internal operating policy in conformance with the guidelines' provisions limiting advertising expenditures and restricting the use of certain types of competitive advertising.

The relief sought in the Complaint is to enjoin defendants for a period of 10 years from continuing or renewing their agreement or from engaging in any other agreement or arrangement having a similar purpose or effect. The Complaint also seeks to require defendants to institute a compliance program to ensure that defendants do not enter into or participate in any plan, program, or other arrangement having the purpose or effect of unreasonably restraining competition among the hospitals in Polk County.

Entry of the proposed Final Judgment will terminate the action, except that the Court will retain jurisdiction over the matter for further proceedings which

may be required to interpret, enforce, or modify the judgment, or to punish violations of any of its provisions.

II.

Description of the Practices Involved in the Alleged Violation

At trial, the Government would have contended the following:

1. Hospital Association of Greater Des Moines, Inc., ("HAGDM") was incorporated in 1976 and is a trade association for general and specialty hospitals located in Polk County, Iowa. HAGDM is a nonprofit corporation located in Des Moines, Iowa, whose current membership includes six of the seven acute-care hospitals located in Polk County, including the other defendants named herein and the Department of Veterans Affairs Medical Center in Des Moines.

2. Broadlawns Medical Center ("Broadlawns") is a 214-bed, county public hospital located in the downtown section of Des Moines, Iowa. Broadlawns is a member of HAGDM and its Chief Executive Officer ("CEO") serves as a director of HAGDM.

3. Des Moines General Hospital Company ("DMGHC") is a nonprofit corporation that operates Des Moines General Hospital ("DMGH"). DMGH is a 150-bed, acute-care, osteopathic hospital located in Des Moines, Iowa. DMGH is currently managed by Quorum Health Resources, Inc., which is located in Nashville, Tennessee. The management agreement with Quorum Health Resources is scheduled to expire in 1993. DMGH is a member of HAGDM and its COO serves as a director of HAGDM.

4. Iowa Lutheran Hospital ("ILH") is a 333-bed, acute-care, nonprofit hospital corporation located in Des Moines, Iowa. Fairview Hospital & Healthcare Services, Inc., which is located in Minneapolis, Minnesota, is the sole member of ILH. ILH is a member of HAGDM and its CEO serves as a director of HAGDM.

5. Iowa Methodist Medical Center ("IMMC") is a 680-bed, acute-care, nonprofit hospital corporation located in Des Moines, Iowa. Iowa Methodist Health System, Inc., which is located in Des Moines, Iowa, is the sole member of IMMC. IMMC is a member of HAGDM and its CEO serves as a director of HAGDM.

6. Mercy Hospital Medical Center ("Mercy") is a 520-bed, acute-care, nonprofit hospital corporation located in Des Moines, Iowa. Mercy Health Center of Central Iowa, Inc. which is located in Des Moines, Iowa, is the sole member of Mercy. Mercy is a member of HAGDM and its CEO serves as a director of HAGDM.

7. The five above-named hospitals [hereinafter referred to as defendant hospitals] are or operate general acute-care hospitals in Polk County, Iowa, that provide a variety of services in connection with the diagnoses, care, and treatment of patients. These defendant hospitals compete with each other for patients residing in Polk County and nearby areas. With the exception of one small hospital and the Department of Veterans Affairs Medical Center, the defendant hospitals are or operate the only general acute-care hospitals in Polk County.

8. General acute-care hospitals, including defendant hospitals, compete for patients on the basis of price, quality, and services. Such hospitals endeavor to increase admissions by attempting to influence patients in their choice of facility, by trying to persuade physicians to refer patients to their facility, and by contracting with third-party payers who can influence hospital utilization of their enrollees. General acute-care hospitals strive to increase admissions, in part, by using advertising to inform patients, physicians, and third-party payers about the price, quality, and range of services offered by their hospital.

9. Consumers of inpatient hospital services often have limited information about hospitals and, therefore, rely in part on advertising to learn about the quality, price, and range of services offered by hospitals in their geographic area. Hospital advertising is increasingly being used to provide this information in a format that consumers can understand. When information is made available to consumers, they can more easily select, or assist their physician in selecting, the hospital that best meets their needs. Hospitals are thereby encouraged to compete to provide the types and quality of services that consumers and physicians desire at a reasonable price.

10. Beginning at least as early as October 26, 1989, defendants have combined and conspired to restrain competition in violation of section 1 of the Sherman Act. The combination and conspiracy consists of a continuing agreement, understanding, and concert of action among defendants whereby each defendant hospital is to limit the types and amount of advertising in which it engages, thus diminishing competition between the defendant hospitals for patients, physician referrals, and third-party contracts. On October 26, 1989, the defendant hospital adopted the "Guidelines on Advertising," a document prepared under the auspices of HAGDM. In adopting these guidelines, defendant hospitals agreed to limit their advertising expenditures ⅛ of 1% of their respective previous year's operating expenses, and to refrain from engaging in certain types of competitive advertising, including quality comparisons, claims of prominence, image building, or self-aggrandizement.

11. In furtherance of this combination and conspiracy, defendants also agreed that each defendant hospital would establish and adhere to an internal operating policy limiting its advertising expenditures and restraining it from engaging in those types of advertising prohibited by the agreement. The actions of defendants far exceeded any reasonable limited undertaking to restrain false and deceptive advertising.

12. This combination and conspiracy had the effect of unreasonably restraining price and quality competition among defendant hospitals for the sale of hospital services to patients and third-party payers, and for physician referrals. The combination and conspiracy deprived patients, physicians, and third-party payers in Polk County of information needed by them to make informed choices on the selection of hospitals and of the benefits of free and open competition in the sale of hospital services.

III.

Explanation of the Proposed Final Judgment

The United States and defendants have stipulated that the Court may enter the proposed Final Judgment after compliance with the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h). The proposed Final Judgment provides that its entry does not constitute any evidence against or admission by any party with respect to any issue of fact or law.

Under the provisions of section 2(e) of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(e), the proposed Final Judgment may not be entered unless the Court finds that such entry is in the public interest. Section XI of the proposed Final Judgment sets forth such a finding.

The proposed Final Judgment is intended to ensure that defendant hospitals reach independent decisions regarding the amount each defendant hospital expends to advertise its hospital services and the types of such advertising each defendant utilizes, and that defendant HAGDM does not act as a conduit to encourage joint agreements on advertising.

A. Prohibitions and Obligations

Under Section IV of the proposed Final Judgment, each defendant is enjoined and restrained from entering into, directly or indirectly, any contract, agreement, understanding, arrangement, plan, program, or course of action with any hospital in the Des Moines area or any Des Moines area hospital association to limit or regulate the types or amounts of advertising by any hospital in the Des Moines area. The "Des Moines area" is defined in Section III as Polk County, Iowa.

Section V provides that nothing in the Final Judgment prohibits any defendant from exercising rights permitted under the First Amendment to the United States Constitution to petition any federal or state government executive agency, legislative body, or other governmental agency concerning legislation, regulatory actions, or governmental policies or actions relating to advertising by hospitals.

Section VI requires each defendant to maintain an antitrust compliance program. Section VI provides that this program at a minimum shall include: (A) Distributing, within 60 days from the entry of the Final Judgment, a copy of the Final Judgment to all directors, officers, and management employees; (B) notifying, within 60 days from the entry of the Final Judgment, all directors, officers, and management employees that the defendant will not be bound by HAGDM's "Guidelines on Advertising," dated October 28, 1989; (C) distributing in a timely manner a copy of the Final Judgment to any person who succeeds to a position as director, officer, or management employee; (D) holding a briefing annually for all directors, officers, and management employees on certain topics related to the Final Judgment and the antitrust laws; and (E) maintaining for inspection by plaintiff a record of the directors, officers, and management employees who attend each annual briefing. The annual briefing will be held to educate them on (1) the meaning and requirements of the Final Judgment including the consequences of noncompliance with the Final Judgment and (2) the application of the antitrust laws to the defendnt's activities including potential antitrust concerns raised by hospitals (a) engaging in agreements or arrangements to allocate services, equipment, or facilities or any other joint activities, and (b) exchanging of competitive information such as contemplated or expected changes in prices or employees' salaries or benefits. "Management employee," as defined in Section III, includes any employee who supervises the preparation of or approves any price, rate, or discount schedule; any wage, salary, or employee benefit schedule; any budget or financial plan; any marketing or advertising plan; any long range or strategic plan; or any plan to acquire materials, equipment, or services.

Section VII requires various certifications of defendants. Section VII(A) requires each defendant to certify to plaintiff within 75 days after the entry of the Final Judgment whether defendant has made the distribution and notification required by Section VI of the Final Judgment. Section VII(B) requires each defendant to certify to plaintiff annually for 10 years after the entry of the Final Judgment whether defendant has complied with the provisions of Section VI of the Final Judgment.

Section VIII(A) provides that an authorized representative of the Department of Justice may visit defendants' offices, after providing reasonable notice, to review their records and to conduct interviews regarding any matters contained in the Final Judgment. Defendants may also be required to submit written reports, under oath, pertaining to the Final Judgment.

b. Scope of the Proposed Final Judgment

Section II of the Final Judgment provides that the Final Judgment shall apply to each defendant and to each of its officers, directors, agents, employees, successors, and assigns and to all other persons in active concert or participation with any of them who receive actual notice of the Final Judgment by personal service or otherwise.

Section X of the proposed Final Judgment provides that the Final Judgment shall remain in effect for 10 years.

C. Effect of the Proposed Judgment on Competition

The relief in the proposed Final Judgment is designed to ensure that each defendant hospital, using its independent judgment, decides unilaterally the amount it expends on advertising and the types of advertising it utilizes, and that neither HAGDM nor the defendant hospitals undertake any collective activity or arrangement to limit or regulate such advertising. It is also designed to ensure that patients, physicians, and third-party payers have the opportunity to receive information necessary for them to make informed choices on the selection of hospitals and to benefit from lower prices or increased quality that would result from competition among the hospitals.

The Department of Justice believes that the proposed Final Judgment contains adequate provisions to prevent further violations of the type upon which the Complaint is based and to remedy the effects of the alleged agreement.

IV.

Remedies Available to Potential Private Litigants

Section 4 of the Clayton Act, 15 U.S.C. 15, provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages suffered, as well as costs and reasonable attorney's fees. Entry of the proposed Final Judgment will neither impair not assist the bringing of such actions. Under the provisions of section 5(a) of the Clayton Act, 15 U.S.C. 16(a), the judgment has no *prima facie* effect in any subsequent lawsuits that may be brought against defendants in this matter.

V.

Procedures Available for Modification of the Proposed Judgment

As provided in section 2(d) of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(d), any person believing that the proposed Final Judgment should be modified by submit written comments to Robert E. Bloch, Chief, Professions and Intellectual Property Section, U.S. Department of Justice, Antitrust Division, 555 4th Street, NW., room 9903, Judiciary Center Building, Washington, DC 20001, within the 60-day period provided by the Act. These comments, and the Department's responses, will be filed with the Court and published in the **Federal Register**. All comments will be given due consideration by the Department of Justice, which remains free to withdraw its consent to the proposed Final Judgment at any time prior to entry. Section IX of the proposed Final Judgment provides that the Court retains jurisdiction over this action, and the parties may apply to the Court for any order necessary or appropriate for the modification, interpretation, or enforcement of the Final Judgment.

VI.

Alternative to the Proposed Final Judgment

The alternative to the proposed Final Judgment would be a full trial of the case. In the view of the Department of Justice, such a trial would involve substantial cost to the United States and is not warranted since the proposed Final Judgment provides the relief that

the United States sought in its Complaint.

VII.

Determinative Materials and Documents

No materials and documents of the type described in section 2(b) of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b), were considered in formulating the proposed Final Judgment.

Respectfully submitted,

Nancy M. Goodman,
Karen L. Gable,
John B. Arnett, Sr.,
Attorneys, U.S. Department of Justice, Antitrust Division, 555 4th Street, NW., Washington, DC 20001. Telephone: (202) 307–0798.

BILLING CODE 4410–01–M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

Utah State Standards; Approval

Background

Part 1953 of title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667), (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated to a State Plan which has been approved in accordance with section 18(c) of the Act and 29 CFR part 1902.

On January 10, 1973, notice was published in the **Federal Register** (38 FR 1178) of the approval of the Utah State Plan and the adoption of subpart E to part 1952 containing the decision. Utah was granted final approval on section 18(e) of the Act on July 16, 1985. By law (Section 63–46a–16 Utah Code), the Utah Administrative Rulemaking Procedure is the authorized compilation of the administrative law of Utah and "shall be received in all the courts, and by all the judges, public officers, commissioners, and departments of the State government as evidence of the administrative law of the State of Utah * * *." The Utah Occupational Safety and Health Division revised its Administrative Rulemaking Act (chapter 46a, title 63, Utah annotated, 1953) which became effective on April 29, 1985. On May 6, 1985, a State Plan Supplement was submitted to the Occupational Safety and Health Administration (OSHA) for approval and publication in the **Federal Register** of Utah's revised Administrative Rulemaking Act. The plan supplement was published in the **Federal Register** (53 FR 43688) on October 28, 1988. The supplement provides for adoption of Federal standards by reference through the publication of standards in the Utah State Digest. Utah now adopts Federal OSHA standards by reference using the OSHA numbering system.

Following the publication date, the agency shall allow at least 30 days for public comment on the rule. During the public comment period the agency may hold a hearing on the rule. Except as provided in statutes 63–46a–6 and 63–46a–7, a proposed rule becomes effective on any date specified by the agency which is no fewer than 30 nor more than 90 days after the publication date. The agency shall provide written notification of the rule's effective date to the office. Notice of the effective date shall be published in the next issue of the bulletin.

OSHA regulations (29 CFR 153.22 and .23) require that States respond to the adoption of new or revised permanent Federal Standards by State promulgation of comparable standards within six months of OSHA publication in the **Federal Register**, and within 30 days for emergency temporary standards. Although adopted State Standards or revisions to standards must be submitted for OSHA review and approval under procedures set forth in Part 1953, they are enforceable by the State prior to Federal review and approval.

The State submitted statements along with copies of the Utah States Digest, to verify the adoption of standards by reference from the Code of Federal Regulations. The Industrial Commission of Utah, Occupational Safety and Health Division adopted by reference on May 6, 1992, the Federal Standard, Process Safety Management of Highly Hazardous Chemicals, Explosives and Blasting Agents; Final Rule of 29 CFR 1910 as published in 57 FR 6856. The effective date of the State Rule was June 1, 1992.

Decision

The statement of incorporation of the aforementioned Federal Standard by reference has been printed in the Utah Administrative Code. The code contains the statement of the incorporation of Federal Standards by reference as compiled by the Occupational Safety and Health Division of the Industrial Commission of Utah. Copies of the Utah Administrative Code have been reviewed and verified at the Regional Office. OSHA has determined that the Federal Standards incorporated by reference from 29 CFR 1910 and 29 CFR 1926 are identical to Federal Standards with no differences and therefore approves the Utah Standards.

Location of Supplement for Inspection and Copying

A copy of the standards along with the approved plan may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Room 1576 Federal Office Building 1961 Stout Street, Denver, Colorado 80294; Utah State Industrial Commission, UOSH Offices at 160 East 300 South, Salt Lake City, Utah 84151; and the Director, Federal-State Operations, room N3700, 200 Constitution Avenue, NW., Washington, DC 20210.

Public Participation

Under 29 CFR 1953.2 (c), the Assistant Secretary may prescribe alternative procedures, or show any other good cause consistent with applicable laws, to expedite the review process. The Assistant Secretary finds that good cause exists for not publishing the supplements to the Utah State Plan as proposed change and makes the Regional Administrator's approval effective upon publication for the following reason(s): The Standards were adopted in accordance with the procedural requirements of State law which include public comment, and further public participation would be repetitious. This decision is effective October 1, 1992.

Authority: Sec. 18, Public Law 91–596, 84 Stat. 1608 [29 U.S.C. 667]. Signed at Denver, Colorado this 2nd day of September, 1992.

Byron R. Chadwick,

Regional Administrator, VIII.

BILLING CODE 4510–26–M

LIBRARY OF CONGRESS

American Folklife Center; Board of Trustees Meeting

AGENCY: Library of Congress.

ACTION: Notice of meeting.

SUMMARY: This notice announces a meeting of the Board of Trustees of the American Folklife Center. This notice also describes the functions of the

Center. Notice of this meeting is required in accordance with Public Law 94–463.

DATES: Saturday, October 10, 1992, 9 a.m. to 1 p.m.

ADDRESSES: San Jose Hotel Meeting Room, San Jose, California 95053.

FOR FURTHER INFORMATION CONTACT: Raymond L. Dockstader, Deputy Director, American Folklife Center, Washington, DC 20540.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public. It is suggested that persons planning to attend this meeting as observers contact Raymond Dockstader at (202) 707–6590.

The American Folklife Center was created by the U.S. Congress with passage of Public Law 94–201, the American Folklife Preservation Act, in 1976. The Center is directed to "preserve and present American folklife" through programs of research, documentation, archival preservation, live presentation, exhibition, publications, dissemination, training, and other activities involving the many folk cultural traditions of the United States. The Center is under the general guidance of a Board of Trustees composed of members from Federal agencies and private life widely recognized for their interest in American folk traditions and arts.

The Genter is structured with a small core group of versatile professionals who both carry out programs themselves and oversee projects done by contract by others. In the brief period of the Center's operation it has energetically carried out its mandate with programs that provide coordination, assistance, and model projects for the field of American folklife.

Rhoda W. Canter,

Associate Librarian for Management.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Opera-Musicial Theater Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92–463), as amended, notice is hereby given that a meeting of the Opera-Musical Theater Advisory Panel (New American Works: Musical Evaluation Section) to the National Council on the Arts will meet on October 21–23, 1992 from 9 a.m.–5:30 p.m. in room 716 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

This meeting is for the purpose of application evaluation, under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the Agency by grant applicants. In accordance with the determination of the Chairman of November 20, 1991, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of title 5, United States Code.

Further information with reference to this meeting can be obtained form Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

Dated: September 25, 1992.

Yvonne M. Sabine,

Director, Panel Operations, National Endowment for the Arts.

BILLING CODE 7537-01-M

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Astronomical Sciences; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting.

Date and Time: October 22 and 23, 1992 8:30 a.m.—5 p.m.

Place: National Science Foundation, 1110 Vermont Avenue, NW., Washington, DC, room 500D.

Type of Meeting: Open.

Contact Person: Dr. M. Kent Wilson, Director, Division of Astronomical Sciences, Room 615, National Science Foundation, 1800 G St. NW., Washington, DC 20550. Telephone: (202) 357–9486.

Minutes: May be obtained from the contact person listed above.

Purpose of Meeting: To provide advice and recommendations concerning research programs, proposals, and projects in NSF-funded astronomy with the objective of achieving the highest quality forefront research for the funds allocated. To provide advice and recommendations concerning short-range and long-range plans in astronomy, including a recommendation of relative priorities.

Agenda

Thursday, October 22, 1992

9 am Discussion on Future of NSF
10:30 am Budget and Planning Discussion
1 pm Discussion of Gemini Telescopes Project
2 pm Presentation of U/MA Millimeter Array Project
2:30 pm Discussion of Roles of National Astronomy Centers and University Facilities

Friday, October 23, 1992

8:30 am Budget Discussion
9:30 am Discussion on Size of Astronomy Community—Designers of Instrumentation
10:30 am Infrastructure Discussion
2 pm Meeting with NSF Director

Dated: September 28, 1992.

M. Rebecca Winkler,

Committee Management Officer.

Special Emphasis Panel in Cross Disciplinary Activities; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting.

Date and Time: October 20, 1992; 8:30 a.m. to 5 p.m.

Place: Latham Hotel, 3000 M Street NW., Washington, DC 20007–3701.

Type of Meeting: Closed.

Contact Person: Forbes Lewis, Program Director, CISE/CDA, room 436, National Science Foundation, 1800 G. St. NW., Washington, DC 20550. Telephone: (202) 357–7349.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate CISE Instrumentation proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

Dated: September 28, 1992.

BILLING CODE 7555-01-M

Advisory Panel for Neuroscience; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting.

Date and Time: October 21–23, 1992; 9 a.m. to 5 p.m.

Place: Vacation Village, Laguna Beach, California.

Type of Meeting: Part-Open.

Contact Person: Dr. Kathie L. Olsen, Program Director, Integrative Biology and Neuroscience, rm. 321, National Science Foundation, 1800 G St. NW., Washington, DC 20550. Telephone: (202) 357–7040.

Minutes: May be obtained from the contact person listed above.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: Open session: October 23, 1992; 9:15 a.m. to 11:45 a.m.—To discuss research trends and opportunities in Neuroendocrinology.

Closed session: October 21–22, 1992; 9 a.m. to 5 p.m. and October 23, 11:45 a.m. to 5 p.m.—To review and evaluate Neuroendocrinology proposals as part of the selection process for awards.

Date and Time: November 9–11, 1992; 9 a.m. to 5 p.m.

Place: Room 1243, 1800 G Street NW., Washington, DC.

Type of Meeting: Closed.

Contact Person: Dr. Sanya Springfield, Program Director, Integrative Biology and Neuroscience, rm. 321, National Science Foundation, 1800 G St. NW., Washington, DC 20550. Telephone: (202) 357–7471.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate Neuronal and Glial Mechanisms proposals as part of the selection process for awards.

Date and Time: November 12–14, 1992; 9 a.m. to 5 p.m.

Place: Room 500D, 1110 Vermont Avenue NW., Washington, DC.

Type of Meeting: Part-Open.

Contact Person: Dr. Donald Edwards, Program Director, Integrative Biology and Neuroscience, rm. 321, National Science Foundation, 1800 G St. NW., Washington, DC 20550. Telephone: (202) 357–7040.

Minutes: May be obtained from the contact person listed above.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: Open session: November 13, 1992; 2 p.m. to 4 p.m.—To discuss research trends and opportunities in Neural Mechanisms of Behavior and Cognitive, Computational, and Theoretical Neurobiology (CCTN).

Closed session: November 12 and 14, 1992; 9 a.m. to 5 p.m. and November 13, 9 a.m. to 2 p.m. and—To review and evaluate Neural Mechanisms of Behavior and CCTN proposals as part of the selection process for awards.

Date and Time: November 18–20, 1992; 9 a.m. to 5 p.m.

Place: Room 500D, 1110 Vermont Avenue NW., Washington, DC.

Type of Meeting: Part-Open.

Contact Person: Dr. Steven C. McLoon, Program Director, Integrative Biology and Neuroscience, rm. 321, National Science Foundation, 1800 G St. NW., Washington, DC 20550. Telephone: (202) 357–7042.

Minutes: May be obtained from the contact person listed above.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: Open session: November 19, 1992; 9:15 a.m. to 11:45 a.m.—To discuss research trends and opportunities in Developmental Neuroscience.

Closed session: November 18 and 20, 1992; 9 a.m. to 5 p.m. and November 19, 11:45 a.m. to 5 p.m.—To review and evaluate Developmental Neuroscience proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c)(4) and (6) of the Government in the Sunshine Act.

Dated: September 28, 1992.

BILLING CODE 7555–01–M

Advisory Committee for Physics; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting.

Date and Time: October 18, 1992, 10 a.m.—5:30 p.m., October 19, 1992, 8:30 a.m.—5:30 p.m., October 20, 1992, 8:30 a.m.—4:30 p.m.

Place: Room 540, National Science Foundation, 1800 G Street, NW. Washington, DC 20550.

Type of Meeting: Part-Open.

Contact Person: Dr. Robert A. Eisenstein, Director, Division of Physics, room 341, National Science Foundation, 1800 G Street, NW. Washington, DC 20550, (202) 357–7985.

Minutes: May be obtained from the contact person listed above.

Purpose of Meeting: To advise the National Science Foundation on its programs in physics.

Agenda: Open session.

- Proposed New Directions for NSF
- Public Comment (*)
- FY 1993 Budget
- Physics Program Issues

Closed session: October 19, 1992, 1:30 p.m.—5:30 p.m. To review and evaluate proposals and to formulate recommendations on Division priorities.

Reason for Closing: In the formulation of Division priorities, proposals will be reviewed which include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. Knowledge of the priorities discussed could significantly frustrate the Foundation's implementation of grant proposals. These matters are exempt under 5 U.S.C. 552b(c)(4), (6) and (9)(B) of the Government in the Sunshine Act.

(*) Persons wishing to speak should make arrangements through the Contact Person identified above.

Dated: September 28, 1992.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Meeting Agenda

In accordance with the purposes of sections 29 and 182 b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards will hold a meeting on October 8–10, 1992 in room P–110, 7920 Norfolk Avenue, Bethesda, Maryland. Notice of this meeting was published in the **Federal Register** on August 20, 1992.

Thursday, October 8, 1992

8: 30 a.m.—8:45 a.m.: Opening Remarks by ACRS Chairman (Open)—The ACRS Chairman will make opening remarks regarding conduct of the meeting and comment briefly regarding items of current interest.

8:45 a.m.—9:45 a.m.: Boiling Water Reactor Stability (Open/Closed)—The Committee will hear a report on and discussion of the proposed resolution of boiling water reactor core power oscillations which can occur under certain operating conditions and the impact of an ATWS during such an event. Information may be presented relating to General Electric Company analysis of reactor stability under these conditions. Representatives of the NRC staff and the nuclear industry will participate, as appropriate.

Portions of this session will be closed as necessary to discuss Proprietary Information related to this matter.

9:45 a.m.—10:45 a.m.: Environmental Qualification of Safety-Grade Digital Computer Protection and Control Systems (Open)—The Committee will hear a briefing on and prepare a report as appropriate regarding the NRC sponsored research program on environmental qualification of safety-grade digital computer protection and control systems.

Representatives of the NRC staff and the Nuclear industry will participate, as appropriate.

10:45 a.m.—11:45 a.m.: Preparation of ACRS Reports (Open)—The Committee will discuss a proposed Committee report on NRC staff action with respect to ITAAC for the GE ABWR.

11:45 a.m.—12 Noon: Prioritization of ACRS Reports (Open)—The Committee will discuss priorities for preparation of ACRS reports during this meeting.

1 p.m.—2:30 p.m.: Environmental Qualification of Electric Equipment for License Renewal (Open)—The Committee will review and report on a proposed NRR Branch Technical Position on environmental qualification of electric equipment for license renewal.

Representatives of the staff and the nuclear industry will participate, as appropriate.

2:45 p.m.—4:45 p.m.: Form and Content of a Design Certification Rule (Open)—The Committee will review and comment on SECY–92–287, "Form and Content for a Design Certification Rule."

Representatives of the NRC staff and the nuclear industry will participate, as appropriate.

4: 45 p.m.—5:30 p.m.: ACRS Future Activities (Open)—The Committee will discuss the report of the ACRS Planning and Procedures Subcommittee regarding matters proposed for consideration by the full Committee.

5:30 p.m.—6 p.m.:—Reconciliation of ACRS Recommendations (Open)—The Committee will discuss NRC staff responses to ACRS comments and recommendations.

Friday, October 9, 1992

8:30 a.m.—10 a.m.: Maintenance of Nuclear Power Plants (Open)—The Committee will review and comment on a proposed Regulatory Analysis and a draft Regulatory Guide, "Monitoring the Effectiveness of Maintenance at Nuclear Power Plants," and an associated NUMARC document 93–01, Revision 2A, "Industry Guideline for Monitoring the Effectiveness of Maintenance at Nuclear Power Plants."

Representatives of the NRC staff and the nuclear industry will participate, as appropriate.

10:15 a.m.—10:45 a.m.: Preparation of ACRS Reports (Open)—The Committee will discuss the scope and content of reports to be considered during this meeting.

10:45 a.m.—11:15 a.m.: Training and requalification of Nuclear Power Plant Operators (Open)—The Committee will hear a briefing, discuss, and report as appropriate on results of the NRC pilot simulator examination program and proposed changes to NRC rule (10 CFR part 55) regarding recertification of nuclear power plant operators.

Representatives of the NRC staff and the nuclear industry will participate, as appropriate.

11:15 a.m.—12:15 p.m.: Use of PRA in the Regulatory Process (Open)—The Committee will hear a briefing by representatives of the NRC Working Group on the status of tasks related to use of PRA in the NRC regulatory process.

1:15 p.m.—3:15 p.m.: Design Acceptance Criteria (Open)—The Committee will review and comment on proposed Design Acceptance Criteria (DAC) in the areas of man/machine interface and control and protection systems.

Representatives of the NRC staff and the nuclear industry will participate, as appropriate.

3:15 p.m.—4:15 p.m.: Yankee Rowe Nuclear Power Plant (Open)—The Committee will hear a briefing by representatives of the NRC staff regarding lessons learned from the review and evaluation of the Yankee Rowe nuclear plant reactor pressure vessel integrity.

Representatives of the NRC staff and the licensee will participate, as appropriate.

4:15 p.m.—5 p.m.: Subcommittee Activities (Open)—The Committee will discuss the report and recommendations of the ACRS Planning and Procedures Subcommittee regarding conduct of Committee business.

5 p.m.—5:15 p.m.: Election of ACRS Officer (Closed)—The Committee will discuss qualifications of candidates nominated for Member-at-Large of the Planning and Procedures Subcommittee.

This session will be closed to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy.

5:15 p.m.—6:30 p.m.: Preparation of ACRS Reports (Open)—The Committee will discuss proposed ACRS reports regarding matters considered during this meeting.

Saturday, October 10, 1992

8:30 a.m.—12 Noon: Preparation of ACRS Reports (Open)—The Committee will discuss proposed ACRS reports regarding matters considered during this meeting.

1 p.m.—2 p.m.: Appointment of ACRS Members (Closed)—The Committee will discuss qualifications of candidates proposed for appointment as members of the Committee.

This session will be closed to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy.

2 p.m.—2:30 p.m.—Miscellaneous (Open)—The Committee will complete discussions of items considered during this meeting and matters which were not completed at previous meetings as time and availability of information permit.

Portions of this session will be closed as necessary to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy.

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 1, 1991 (56 FR 49800). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those open portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and staff. Persons desiring to make oral statements should notify the ACRS Executive Director, Mr. Raymond F. Fraley, as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture, and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the ACRS Executive Director prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with Subsection 10(d) Public Law 92–463 that it is necessary to close portions of this meeting noted above to discuss Proprietary Information applicable to the matters being considered in accordance with 5 U.S.C. 552(c)(4) and information the release of which would represent a clearly unwarranted invasion of personal privacy per 5 U.S.C. 552(c)(6).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 301–492–8049), between 8 a.m. and 4:30 p.m. EST.

Dated: September 25, 1992.
John C. Hoyle,
Advisory Committee Management Officer.

BILLING CODE 7590-01-M

[Docket No. 40-8768

Rio Algom Mining Corp.; Final Finding of no Significant Impact Regarding the Termination of a Source Material License of Rio Algom Mining Corp.; O-Sand In Situ Leach Mine Project, Converse County, Wyoming

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of final finding of no significant impact.

1. Proposed Action

The proposed administration action is to terminate the source and byproduct material license authorizing Rio Algom Mining Corp. (Rio Algom) to operate the O-Sand uranium ISL research and development (R&D) facility located 12 miles north of Glenrock, Converse County, Wyoming. The Commission has determined an environmental assessment specific to this administrative action is not required.

2. Reasons for Final Finding of No Significant Impact

The R&D project initiated leaching activities in the Q-Sand well field in October 1981. NRC authorized additional mining in the O-Sand well field during July 1984. Rio Algom ceased mining in the Q-Sand and conducted an aquifer restoration demonstration, completed and approved by NRC, in August 1987. Meanwhile, O-Sand mining continued until September 1991, when Rio Algom placed the R&D project on standby status. At this time, Rio Algom is maintaining the site in standby while its commercial mining plant is under construction. Future commercial mining will create new well fields which include the O-Sand pilot well field.

On January 10, 1992, NRC issued a final Environmental Assessment (EA) regarding issuing the commercial license. The EA discussed environmental and radiological monitoring requirements to be implemented for the commercial project. In the meantime, Rio Algom proposed a monitoring and sampling program for the interim period prior to commercial operations. The program was approved by License Amendment No. 4 to the R&D Source Material License SUA-1387. Further, these requirements are included as preoperational conditions in the commercial Source Material License No. SUA-1548.

NRC intends to terminate the R&D license concurrently with review and approval of the commercial financial surety arrangement. Based on the reviews cited above and conditions to be contained in the commercial license, the Commission has determined that no significant impact will result from the proposed administrative action. The following statements support the final finding of no significant impact and summarize the conclusions resulting from the environmental evaluations.

A. The license has demonstrated that ground-water quality can be stabilized and restored to class-of-use standards determined by the Wyoming Department of Environmental Quality.

B. Remaining and future facilities and operations at the site shall be regulated by the commercial license.

In accordance with 10 CFR 51.34(a), the Director, Uranium Recovery Field Office (URFO), made the determination to issue a final finding of no significant impact in the **Federal Register**. Source Material License SUA-1387 for the Rio Algom O-Sand R&D Project will be terminated upon approval of the commercial surety.

The environmental evaluations setting forth the basis for the finding are available for public inspection and copying at the Commission's Uranium Recovery Field Office at 730 Simms Street, Golden, Colorado, and at the Commission's Public Document Room at 2120 L Street, NW., Washington, DC

Dated at Denver, Colorado, this 22 day of September, 1992.
For the Nuclear Regulatory Commission.
Ramon E. Hall,
Director.

BILLING CODE 7590-01-M

[Docket No. 40-8452]

Union Pacific Resources-Minerals; Finding of No Significant Impact Regarding Issuance of an Amendment to Source Material License SUA-1310 for the Union Pacific Resources-Minerals, Bear Creek Mill, to Incorporate Reclamation Schedule, Converse County, Wyoming

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of a finding of no significant impact.

1. Proposed Action

The administrative action is issuance of a license amendment to incorporate an enforceable reclamation schedule for the Bear Creek Mill in Converse County, Wyoming.

2. Reasons for Finding of No Significant Impact

The proposed amendment is administrative, incorporating reclamation milestones into the license in accordance with the Memorandum of Understanding (MOU) between the Environmental Protection Agency (EPA) and the NRC which was published in the **Federal Register** on October 25, 1991. The Notice of Intent to Amend Source Material License SUA-1310 for the Bear Creek Mill to incorporate reclamation schedules was published in the **Federal Register** on May 14, 1992. The NRC accepted comments on this proposed licensing action for 45 days. No comments were received. In accordance with 10 CFR 51.22(c)(11), the Commission has determined that no environmental analysis need be performed since no significant impacts will result from the proposed licensing actions.

3. Action

The Commission action is to amend Source Material License SUA-1310 upon publication of this Notice. The action is based on this Finding of No Significant Impact and no comments being received to the Notice of Intent published on May 14, 1992.

This Notice, together with the Notice of Intent to Amend Source Material License SUA-1310, is available for public inspection and copying at the Commission's Uranium Recovery Field Office at 730 Simms Street, Golden, Colorado, and at the Commission's Public Document Room at 2120 L Street, NW., Washington, DC 20555.

Dated at Denver, Colorado, this 22 day of September 1992
Ramon E. Hall,
Director.

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the Railroad Retirement Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of Proposal(s)

(1) *Collection title:* Pay Rate Report.
(2) *Form(s) submitted:* UI–1e.
(3) *OMB Number:* 3220–0097.
(4) *Expiration date of current OMB clearance:* Three years from date of OMB approval.
(5) *Type of request:* Extension of the expiration date of a currently approved collection without any change in the substance or in the method of collection.
(6) *Frequency of response:* On occasion.
(7) *Respondents:* Individuals or households, Businesses or other for-profit.
(8) *Estimated annual number of respondents:* 1,500.
(9) *Total annual responses:* 1,500.
(10) *Average time per response:* .0833 hours
(11) *Total annual reporting hours:* 125
(12) *Collection description:* Under the RUIA, the daily benefit rate for unemployment and sickness benefits depends on the employee's last daily rate of pay. The reports obtain information from the employee and verification from the employer of the claimed rate of pay for use in determining whether an increase in the benefit rate is due.

ADDITIONAL INFORMATION OR COMMENTS: Copies of the form and supporting documents can be obtained from Dennis Eagan, the agency clearance officer (312–751–4693). Comments regarding the information collection should be addressed to Ronald J. Hodapp, Railroad Retirement Board, 844 N. Rush Street, Chicago, Illinois 60611–2092 and the OMB reviewer, Laura Oliven (202–395–7316), Office of Management and Budget, room 3002, New Executive Office Building, Washington, DC 20503.

Dennis Eagan,

Clearance Officer.

Agency Forms Submitted for OMB Review

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the Railroad Retirement Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of Proposal(s)

(1) *Collection title:* Statement Regarding Contributions and Support.
(2) *Form(s) submitted:* G–134.
(3) *OMB Number:* 3220–0099.
(4) *Expiration date of current OMB clearance:* Three years from date of OMB approval.
(5) *Type of request:* Extension of the expiration date of a currently approved collection without any change in the substance or in the method of collection.
(6) *Frequency of response:* On occasion.
(7) *Respondents:* Individuals or households.
(8) *Estimated annual number of respondents:* 400.
(9) *Total annual responses:* 400.
(10) *Average time per response:* .292 hours.
(11) *Total annual reporting hours:* 117.
(12) *Collection description:* Dependency on the employee for one-half support at the time of the employee's death can be a condition affecting eligibility for a survivor annuity provided for under section 2 of the Railroad Retirement Act. One-half support is also a condition which may negage the public service pension offset in Tier I for a spouse or widow(er).

ADDITIONAL INFORMATION OR COMMENTS: Copies of the form and supporting documents can be obtained from Dennis Eagan, the agency clearance officer (312–751–4693). Comments regarding the information collection should be addressed to Ronald J. Hodapp, Railroad Retirement Board, 844 N. Rush Street, Chicago, Illinois 60611–2092 and the OMB reviewer, Laura Oliven (202–395–7316), Office of Management and Budget, room 3002, New Executive Office Building, Washington, DC 20503.

Dennis Eagan,

Clearance Officer.

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IC–18972; 811–3862]

Carnegie-Cappiello Trust; Application

September 23, 1992.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of application for deregistration under the Investment Company Act of 1940 (the "1940 Act").

APPLICANT: Carnegie-Cappiello Trust.

RELEVANT 1940 ACT SECTION: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company under the 1940 Act.

FILING DATE: The application on Form N–8F was filed on September 10, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on October 19, 1992, and should be accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, 1100 Halle Building, 1228 Euclid Avenue, Cleveland, Ohio 44115–1831.

FOR FURTHER INFORMATION CONTACT: Felice R. Foundos, Staff Attorney, (202) 272–2190, or Barry D. Miller, Special Senior Counsel, (202) 272–3018 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end, diversified management company organized as an Ohio business trust. On October 4, 1983, applicant (formerly known as Carnegie-Cappiello Growth Trust) filed a registration statement pursuant to section 8(b) of the 1940 Act. On that date, applicant also filed a registration statement pursuant to the Securities Act of 1933, which registered an indefinite number of shares of beneficial ownership. The registration statement became effective on December 9, 1983.

2. On September 25, 1985, applicant amended its registration statement changing its name to Carnegie-Cappiello Trust which consisted of the Growth Series and Total Return Series. The registration of these series became effective on November 30, 1985. On September 25, 1989, applicant amended its registration statement adding the Emerging Growth Series and Diversified High Income Series to the Trust. The registration of these series became effective on November 30, 1989.

3. At a meeting held on March 12, 1992, applicant's board of trustees approved a proposal to reorganize applicant and recommend its approval by applicant's shareholders. Under the proposed reorganization, applicant would transfer its assets to the Fortis Funds (defined below) in return for shares of these funds. Applicant distributed proxy materials relating to the reorganization to its shareholders beginning on approximately April 20, 1992. Copies of such materials were filed with the Commission on April 22, 1992. Shareholders approved the reorganization at a special shareholders meeting held on June 1, 1992.

4. On June 5, 1992, applicant consummated the reorganization pursuant to which all the assets and liabilities of applicant's Diversified High Income Series, Total Return Series, Emerging Growth Series, and Growth Series ("Carnegie Series") were transferred, respectively, to the High Yield Portfolio, Asset Allocation Portfolio, and Capital Appreciation Portfolio of the Fortis Advantage Portfolios, Inc. and Fortis Growth Fund, Inc. (the "Fortis Funds"). In return for its assets, each Carnegie Series received shares of the respective Fortis Fund having a net asset value equal to the value of the assets less the value of the liabilities transferred. Subsequently, each Carnegie Series liquidated and distributed the respective Fortis Fund shares received in the exchange to its shareholders on a *pro rata* basis. No brokerage commissions were incurred in this reorganization.

5. The expenses incurred in connection with the liquidation and dissolution of applicant were borne by the investment adviser to applicant, Carnegie Capital Management Company ("CCMC"). No expenses were incurred by applicant in connection with its liquidation and dissolution.[1]

6. On September 3, 1992, applicant filed Articles of Dissolution with the Secretary of State of Ohio.

7. As of the date of the application, the applicant had no assets, debts or liabilities, and was not a party to any litigation or administrative proceeding.

8. Applicant is neither engaged in nor proposes to engage in any business activities other than those necessary for the winding up of its affairs.

[1] Pursuant to a letter dated September 22, 1992, applicant clarified that not only the liquidation expenses, but also the merger costs incurred in connection with the reorganization, have been borne by CCMC and by Fortis Advisers, Inc., investment adviser to the Fortis Funds.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-18974; File No. 812-8022]

Phoenix Edge Series Fund et al; Application

September 24, 1992.

AGENCY: Securities and Exchange Commission ("Commission" or "SEC").

ACTION: Notice of application for an order under the Investment Company Act of 1940 (the "Act").

APPLICANTS: Phoenix Edge Series Fund ("Phoenix Fund") and Home Life Equity Fund, Inc. ("Home Equity Fund").

RELEVANT 1940 ACT SECTIONS: Order requested under Section 17(b) for exemption from Section 17(a).

SUMMARY OF APPLICATION: Applicants seek an order permitting the transfer of the assets of Home Equity Fund to the Growth Series of the Phoenix Fund in exchange for shares of the Growth Series.

FILING DATE: The application was filed on July 29, 1992 and amended on September 18, 1992.

HEARING OR NOTIFICATION OF HEARING: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on the application or ask to be notified if a hearing is ordered. Any requests must be received by the Commission by 5:30 p.m. on October 19, 1992. Request a hearing in writing, giving the nature of your interest, the reason for your request, and the issues you contest. Serve Applicants with the request, either personally or by mail, and also send a copy to the Secretary of the Commission, along with proof of service by affidavit or, in the case of an attorney-at-law, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicants, Phoenix Edge Series Fund and Home Life Equity Fund, Inc., c/o Phoenix Home Life Mutual Insurance Company, One American Row, Hartford, Connecticut 06115.

FOR FURTHER INFORMATION CONTACT: Thomas E. Bisset, Senior Attorney, at (202) 272-2058, or Wendell M. Faria, Deputy Chief, at (202) 272-2060, Office of Insurance Products, Division of Investment Management.

SUPPLEMENTARY INFORMATION: Following is a summary of the application. The complete application is available for a fee from the SEC's Public Reference Branch.

Applicants' Representations

1. The Phoenix Fund was organized on February 18, 1986, as a Massachusetts business trust and is registered under the Act on Form N-1A (Registration No. 811-4642) as an open-end, diversified management investment company. The Phoenix Fund is currently comprised of six separate investment series ("Series"). A separate class of shares of beneficial interest is issued in connection with each Series and the Phoenix Fund has registered those shares under the Securities Act of 1933 (the "1933 Act").

2. The Growth Series is a separate, managed investment portfolio of the Phoenix Fund. The primary investment objective of the Growth Series is to achieve intermediate and long-term growth of capital, with income as a secondary consideration. The Growth Series seeks to achieve its primary investment objective by investing principally in common stocks of corporations believed to offer growth potential over both the intermediate and the long-term.

3. To date, the Growth Series of the Phoenix Home has sold shares only to (i) the Phoenix Home Life Variable Accumulation Account (the "VA Account"), a separate account of Phoenix Home Life Mutural Insurance Company ("Phoenix Home") established to fund variable annuity contracts issued by Phoenix Home, and (ii) the Phoenix Home Life Variable Universal Life Account (the "VUL Account"), also a separate account of Phoenix Home established to fund flexible premium variable life insurance policies issued by Phoenix Home. Both the VA Account and the VUL Account are registered under the Act as unit investment trusts.

4. Home Equity Fund is an open-end, diversified management investment company. Home Equity Fund was organized as a Maryland corporation on June 3, 1970 and is registered under the Act (Registration No. 811-2172). Shares of Home Equity Fund are registered under the 1933 Act on Form N-1A.

5. The principal investment objective of Home Equity Fund is the long-term growth of capital through the appreciation of portfolio securities and the reinvestment of capital gains and income, with an equal emphasis on the preservation of capital. Home Equity Fund invests primarily in the equity securities of selected companies.

6. Home Equity Fund currently sells its shares only to Phoenix Home Life Separate Account B ("Separate Account B"), Phoenix Home Life Separate Account C ("Separate Account C") and Phoenix Home Life Separate Account D ("Separate Account D"), each of which is a separate account of Phoenix Home established to receive and invest premiums paid under retirement annuity benefit or other insurance contracts. Separate Account C and Separate Account D are registered under the Act as unit investment trusts.

7. The assets of Separate Account B are derived solely from contributions under "H.R. 10 Plans." Separate Account B is not registered under the Act in reliance on Section 3(c)(11) of the Act. However, the variable contracts offered through Separate Account B are registered under the 1933 Act on Form N–4.

8. Phoenix Home is a mutual insurance company organized under the laws of the state of New York. Phoenix Home is principally engaged in the offering of ordinary and group life and health insurance policies and annuity contracts. Phoenix Home is the depositor of the VA Account, VUL Account, Separate Account C and Separate Account D and is the issuer of the variable life insurance policies and annuity contracts (the "Contracts") offered through the foregoing separate accounts.

9. Phoenix Investment Counsel, Inc. (the "Adviser") serves as investment adviser to Home Equity Fund and each of the Series of the Phoenix Fund under the general supervision of the Board of Directors of Home Equity Fund and the Board of Trustees of the Phoenix Fund, respectively. As compensation for its services as investment adviser to Home Equity Fund, the Adviser is paid a monthly advisory fee, accrued daily, currently at an annual rate of 0.30% of the average daily net asset value of Home Equity Fund. For its services with respect to the Growth Series, the Adviser is entitled to an advisory fee, payable monthly, at an annual rate of 0.5% of the first $500 million, 0.45% of the next $500 million and 0.4% of the excess over $1 billion of the average of the aggregate daily net asset value of the Growth Series.

10. The Trustees of the Phoenix Fund, including a majority of those Trustees who are not "interested persons" of the Phoenix Fund ("disinterested Trustees") and the Board of Directors of Home Equity Fund, including a majority of those Directors who are not "interested persons" of Home Equity Fund ("disinterested Directors"), have unanimously approved an Agreement and Plan of Reorganization and Liquidation (the "Plan").

11. The proposed Plan provides that Home Equity Fund will convey, transfer and deliver to the Growth Series all of the existing assets of Home Equity Fund. In consideration thereof, the Phoenix Fund agrees to cause the Growth Series (a) to assume and pay all of the obligations and liabilities of Home Equity Fund to the extent that they exist on or after the effective time of the reorganization and (b) to deliver to Home Equity Fund full and fractional shares of beneficial interest of the Phoenix Fund representing shares of the Growth Series ("Growth Series Shares") equal to that number of full and fractional Growth Series Shares as determined based on the relative net asset value per share of Home Equity Fund and Growth Series as of the close of the New York Stock Exchange on the last business day immediately preceding the reorganization in accordance with the provisions of section 22(c) of the Act and rule 22c–1 thereunder.

12. The Plan provides that Home Equity Fund will liquidate and distribute pro rata to its shareholders the growth Series Shares received by Home Equity fund pursuant to the reorganization. Simultaneously Home Equity Fund shares held by such shareholders shall be canceled. The Phoenix Fund will register the shares of the Growth Series issued pursuant to this reorganization under the 1933 Act on Form N–14. The aggregate value of Growth Series Shares to be issued under the Plan will exactly equal the aggregate value of Home Equity Fund shares held by Separate Account B, Separate Account C and Separate Account D immediately prior to the reorganization. Further, the aggregate value of outstanding units of interests in such Accounts will not change on the effective date of the reorganization as a result of the share exchange program.

13. Home Equity Fund will submit the proposed reorganization and the related Plan to shareholders for approval at a Special meeting called for that purpose. Two-thirds of the outstanding shares of Home Equity Fund will be required to approve the Plan and the reorganization contemplated therein. Phoenix Home will vote shares attributable to Separate Account C and Separate Account D in accordance with instructions received from Contract owners with Contract value allocated to those Separate Accounts. Home Equity Fund shares held in Separate Account C and Separate Account D for which no voting instructions are received will be voted by the management of Home Equity Fund in proportion to the voting instructions that are received from Contract owners. Shares of the Home Equity Fund held in Separate Account B will be voted by Phoenix Home in direct proportion to the votes of Contract owners with Contract value allocated to Separate Account C and Separate Account D. Separate Account B owns approximately eighty-five percent of the outstanding shares of Home Equity Fund.

14. Phoenix Fund and Home Equity Fund will receive an opinion of tax counsel to the effect that the reognization will qualify as a tax-free reorganization under the Internal Revenue Code of 1986, as amended, and not result in the recognition of any gain or loss to Phoenix Fund/Growth Series or Home Equity Fund, or to any shareholders thereof.

Applicants' Legal Analysis

1. Section 17(a)(1) of the Act, in relevant part, prohibits any affiliated person of a registered investment company, or any affiliated person of such person, acting as principal, from knowingly selling any security or other property to that company. Section 17(a)(2) of the Act, generally, prohibits the persons described above, acting as principals, from knowingly purchasing any security or other property from the registered investment company.

2. Section 2(a)(3) of the Act defines the term "affiliated person", in relevant part, as:

(A) any person directly or indirectly owning, controlling, or holding with power to vote, 5 per centum or more of the outstanding voting securities of such other person; (B) any person 5 per centum or more of whose outstanding voting securities are directly or indirectly owned, controlled, or held with power to vote, by such person; (C) any person directly or indirectly controlling, controlled by, or under common control with, such other person; * * *

3. Because Phoenix Home, through Separate Account B, Separate Account C and Separate Account D, owns 100% of the outstanding shares of Home Equity Fund and may itself vote approximately eighty-five percent of the outstanding shares of the Home Equity Fund, it is an affiliate of Home Equity Fund. Because Phoenix Home, through the VA Account and the VUL Account, owns 100% of the outstanding shares of the Phoenix Fund and, therefore, 100% of the outstanding shares of the Growth Series, it is a "5% affiliate" of the Phoenix Fund and Growth Series. Home Equity Fund and the Phoenix Fund/Growth Series are, therefore, affiliated

persons of an affiliated person and transactions between Home Equity Fund and the Phoenix Fund/Growth Series are subject to the prohibition of section 17(a) of the Act. An affiliation between Home Equity Fund and the Phoenix Fund may also arise as a result of the Funds being deemed under "common control" of Phoenix Home since all the voting shares of each of Home Equity Fund and the Phoenix Fund are owned by Phoenix Home. Accordingly, the transfer of assets of Home Equity Fund in exchange for shares of Growth Series may entail the purchase and sale of securities or other property in contravention of section 17(a).

4. Section 17(b) of the Act provides, in pertinent part, that the Commission may grant an order exempting any transaction from the prohibitions of section 17(a) if the terms of the proposed transaction are reasonable and fair and do not involve overreaching on the part of any person concerned, and the proposed transaction is consistent with the policy of each registered investment company concerned, and with the general purposes of the Act.

5. Applicants represent that the terms of the proposed reorganization as set forth in the Plan, including the consideration to be paid and received, are reasonable and fair and do not involve overreaching on the part of any person concerned. Applicants also represent that the proposed reorganization of Home Equity Fund and the Growth Series is consistent with the investment policies of Home Equity Fund and the Growth Series as recited in the current registration statements of Home Equity Fund and the Phoenix Fund, other reports filed by Home Equity Fund and the Phoenix Fund under the Act and with the general purposes of the Act.

6. The Board of Trustees of the Phoenix Fund, including a majority of the disinterested Trustees, and the Board of Directors of the Home Equity Fund, including a majority of the disinterested Directors have reviewed and approved the terms of the proposed reorganization as set forth in the Plan, including the consideration to be paid or received by all parties. The Directors of Home Equity Fund also have independently determined that the proposed reorganization, as set forth in the Plan, would be in the best interests of the shareholders of Home Equity Fund and of the Contract owners who have indirectly allocated Contract value through Separate Account C and Separate Account D to Home Equity Fund, and that the consummation of the proposed reorganization will not result in the dilution of the current interests of any such shareholder or Contract owner. The Trustees of Phoenix Fund also have determined that the proposed reorganization, as set forth in the Plan, will be in the best interests of shareholders of the Phoenix Fund/Growth Series and of the Contract owners who have indirectly allocated Contract value through the VA and VUL Accounts to the Phoenix Fund/Growth Series, and that the consummation of the proposed reorganziation will not result in the dilution of the current interests of any such shareholder or Contract owner. Phoenix Home will pay all the direct and indirect expenses of the proposed reorganization, including any brokerage fees relating to transactions resulting from the reorganization.

7. The proposed reorganization will result in an increase in the asset size of Home Equity Fund and the Growth Series. The larger aggregate net assets should enable the combined entities to realize significant benefits associated with economies of scale, increased investment opportunities and enhanced portfolio diversification and liquidity. The Directors and Trustees have considered the relative investment performance of Home Equity Fund and the Growth Series. For the six month period following Home Equity Fund's last fiscal year (September 30, 1991 through March 31, 1992), the Growth Series' total return was 11.99% and the Home Equity Fund's total return was 6.55%. The Directors believe performance and investment flexibility could be enhanced if the assets of Home Equity Fund and the Growth Series are combined.

8. Although the advisory fee applicable to shareholders of Home Equity Fund will increase as a result of the reorganization, the Directors of Home Equity Fund have determined that shareholders and Contract owners with Contract value allocated to Separate Account C and Separate Account D will ultimately benefit from the services of the Adviser. Further, the Directors of Home Equity Fund have determined that Home Equity Fund could not continue to retain the Adviser under the terms of the current Management Agreement or obtain the services of a comparable investment adviser at the rate currently applicable to Home Equity Fund. Moreover, while the Adviser presently bears substantially all expenses of Home Equity Fund, it is possible that, in the future, Home Equity Fund would be required to bear a greater portion or all of its expenses. In such event, the consummation of the reorganization would result in cost savings for Contract owners with Contract value allocated to Separate Account C and Separate Account D by virtue of the economies of scale associated with a larger asset base.

9. The investment objectives and policies of Home Equity Fund and the Growth Series are, in the opinion of the Directors and Trustees, compatible. The principal differences are as follows: (i) Home Equity Fund's investment objective is long-term growth of capital while the Growth Series' objective is intermediate and long-term growth of capital; (ii) not more than 2% of Home Equity Fund's assets can be invested in rights and warrants to purchase common stocks while Growth Series can invest up to 20% of its total assets in such rights and warrants to purchase common stock; (iii) Home Equity Fund is restricted to borrowing money in the aggregate of an amount not exceeding 5% of the value of its assets while the Growth Series can borrow money in an amount equaling up to 50% of the net asset value of the Series; and (iv) the investment restrictions applicable to the Growth Series permit it to engage in a wider range of investment techniques and strategies designed to "hedge" against market risks and enhance income than is permissible under Home Equity Fund's investment restrictions.

The Directors of Home Equity Fund believe that shareholders will be protected and benefited under the investment objectives, policies and restrictions of the Growth Series. The Directors of Home Equity Fund have considered the differences between the investment objectives of Home Equity Fund and the Growth Series and determined that the investment objective of the Growth Series is consistent with the objective of a shareholder seeking growth of capital through an equity portfolio. The Directors concluded that the Growth Series has investment objectives, policies and restrictions comparable to those of Home Equity Fund, and to the extent there are differences, the Directors of Home Equity Fund believe that such differences are of no practical significance and are often advantageous to Home Equity Fund shareholders.

10. Rule 17a–8 under the Act exempts from Section 17(a) of the Act, mergers, consolidations, purchases or sales of substantially all of the assets involving registered investment companies which may be affiliated persons, or affiliated persons of affiliated persons, solely by reason of having a common investment adviser, common directors and/or common officers. Because Home Equity

Fund and the Growth Series are affiliates of each other for reasons other than having a common investment adviser, they can not rely on Rule 17a–8. However, the Applicants submit that the share exchange phase of the proposed transaction will comply with all of the conditions that Rule 17a–8 of the Act requires for the protection of investment companies and their shareholders. The Applicants agree to the grant of the order requested being specifically conditioned on the Board of Trustees of Phoenix Home and the Board of Directors of Home Equity Fund having made the requisite determinations that the participation of the Growth Series and Home Equity Fund, respectively, in the proposed reorganization is in the best interests of the Growth Series and Home Equity Fund and that such participation will not dilute the interests of shareholders of Growth Series or Home Equity Fund or Contract owners that are or will become indirectly invested in the Growth Series.

11. The Applicants submit that the proposed reorganization is consistent with the general purposes of the Act as stated in the Findings and Declaration of Policy in Section 1 of the Act. The Applicants further submit that the plan does not present any of the conditions or abuses that the Act was designed to mitigate or eliminate. In particular, section 1(b)(6) of the Act states that the national public interest and the interest of investors are adversely affected when investment companies are reorganized without the consent of their security holders. As described above, the Plan must receive the approval of two-thirds of the outstanding shares of Home Equity Fund. Contract owners with Contract value allocated to Separate Account C and Separate Account D will receive a proxy statement containing all material disclosures, including a description of all material aspects of the Plan and a copy thereof. Therefore, the Applicants assert, the proposed reorganization is consistent with the general purposes of the Act.

Conclusion

For the reasons stated above, the Applicants believe that the terms of the proposed reorganization satisfy the standards of section 17(b). Accordingly, the applicants assert that it is appropriate for the Commission to issue an order pursuant to section 17(b) exempting the proposed transaction from the provisions of section 17(a) of the Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

DEPARTMENT OF STATE

[Public Notice 1706]

United States Organization for the International Telegraph and Telephone Consultative Committee (CCITT) National Committee Meeting

The Department of State announces that the United States Organization for the International Telegraph and Telephone Consultative Committee (CCITT) National Committee will meet on October 27, 1992 at 9:30 a.m. in room 1207 at the Department of State, 2201 C Street NW., Washington, DC 20520.

The agenda for the meeting will include a debrief of the latest meeting of the World Telecommunications Advisory Council; the report of the joint CCIR/CCITT National Committee meeting, and continue the current work, or to receive reports, of the various sub-committees established by the USNC to prepare the U.S. delegation for the upcoming CCITT Xth Plenary Assembly to be held in Helsinki, March 1993.

Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chair. Admittance of public members will be limited to the seating available. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. Persons who plan to attend should advise the Office of Earl Barbely, Department of State, (202) 647–0201, FAX (202) 647–7407. The above includes government and non-government attendees. Public visitors will be asked to provide their date of birth and Social Security number at the time they register their intention to attend and must carry a valid photo ID with them to the meeting in order to be admitted. All attendees must use the C Street entrance.

Please bring 60 copies of documents to be considered at this meeting. If the document has been mailed, bring only 10 copies.

Dated: September 15, 1992.

Earl Barbely,

Director, Telecommunications and Information Standards, Chairman U.S. CCITT National Committee.

[FR Doc. 92–23813 Filed 9–30–92; 8:45 am]

BILLING CODE 4710–45–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: Walworth Co, WI

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an Environmental Impact Statement (EIS) will be prepared for a proposed highway project in Walworth County, Wisconsin.

FOR FURTHER INFORMATION CONTACT: James Zavoral, Federal Highway Administration, 4502 Vernon Boulevard, Madison, Wisconsin 53705–4906, Telephone: (608) 264–5944. Additional information can be obtained through Ms. Carol Cutshall, Director, Office of Environmental Analysis, Wisconsin Department of Transportation, 4802 Sheboygan Avenue, Madison, Wisconsin 53707, Telephone: (608) 266–9626.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Wisconsin Department of Transportation, will prepare an Environmental Impact Statement (EIS) on a proposal to improve U.S. Highway 12 (USH 12) in Walworth County, Wisconsin. The proposed improvement would involve the construction of a four lane freeway bypass of the City of Whitewater for a distance of about 10 miles.

Improvements to the corridor are considered necessary to provide for the compatibility with the regional function of USH 12, and also to provide for the safety and traffic demand of this highway.

Alternatives under consideration include (1) taking no action; (2) constructing a divided four lane freeway to either the north or south of the city. Incorporated into and studied with each of the building alternatives will be design variations of grade and alignment location.

Letters describing the proposed action and soliciting comments will be sent to the appropriate Federal, State and local agencies, and to private organizations and citizen groups who have previously

expressed or are known to have an interest in this proposal. A series of public meetings will be held in the City of Whitewater between October 1992 and August 1993. In addition, a public hearing will be held in the Fall of 1994. Public notice will be given of the time and place of the meetings and hearings. The draft EIS will be available for public and agency review and comment prior to the public hearing. The scoping process will continue through the duration of the project.

To ensure that the full range of issues related to this proposed action are addressed and that all significant issues are identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. This document is being prepared in conformance with 40 CFR part 1500 and the FHWA regulations. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.

Issued on: September 21, 1992.

Robert W. Cooper P.E.,

District Engineer, Madison, Wisconsin.

BILLING CODE 4910-81-M

National Highway Traffic Safety Administration

Intermodal Surface Transportation Efficiency Act of 1991; Electronic Access to Informal Implementation Guidance Via the Federal Highway Administration (FHWA) Electronic Bulletin Board System

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice of availability.

SUMMARY: The Intermodal Surface Transportation Efficiency Act (ISTEA) enacted several new highway safety provisions that are being administered by the National Highway Traffic Safety Administration (NHTSA). Several new programs have been established and changes have been made in some existing programs. In order to inform the public about these changes, NHTSA has placed a read-only listing on the Federal Highway Administration (FHWA) Electronic Bulletin Board System (FEBBS). This notice announces the availability of this material and instructs the public on how to access it.

ADDITIONAL INFORMATION: NHTSA is making informal ISTEA-related information and guidance available on the FEBBS to assist in the implementation of the Act. Information on the bulletin board is organized into major subject or information areas called "conferences." The information provided in the ISTEA conference of FEBBS shall be considered only as preliminary guidance on the implementation of the ISTEA and is subject to change. Members of the public may now dial into the FEBBS ISTEA information conference using a microcomputer and modem and view informal information on how NHTSA is implementing the provisions of the ISTEA. This read-only facility is especially intended for use by State and local transportation agencies, vehicle manufacturers, special interest groups, and safety advocacy groups. The telephone number for FEBBS is Area Code 202-366-3764. While the system supports 300, 1200 and 2400 baud line speeds, and a variety of terminal types and protocols, setting the modem for 2400 baud, 8 data bits, full duplex and no parity will give optimal performance. Once a connection has been established, a first-time caller will be required to enter <R> to register. Registration will consist of entering the caller's name, location, computer information and finally specification of a password. After registering, callers will view the "Main Menu" for FEBBS. Callers can then enter the main ISTEA conference menu by selecting <Q>uestions and Answers on ISTEA. From this menu, the caller can then access NHTSA's ISTEA conference menu by selecting <N>HTSA. This conference has information related to the agency's efforts to meet the ISTEA provisions.

FOR TECHNICAL ASSISTANCE CONTACT: FHWA Computer Help Desk, HMS 40, room 4401, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-1120.

FOR FURTHER INFORMATION CONTACT: Mr. Chris Hoidal, NPP-32, room 5208, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-2572. Office hours are from 7:30 a.m. to 4:00 p.m. e.t., Monday through Friday.

Issued on September 25, 1992.

Donald C. Bischoff,

Associate Administrator for Plans and Policy.

[FR Doc. 92-23783 Filed 9-30-92; 8:45 am]

BILLING CODE 4910-59-M

[Docket No. 92-50; Notice 1]

Autokraft Limited; Receipt of Petition for Temporary Exemption From Federal Motor Vehicle Safety Standard No. 208

Autokraft Limited of Weybridge, Surrey, England, has petitioned for a temporary exemption from paragraph S4.1.4 of Federal Motor Vehicle Safety Standard No. 208, Occupant Crash Protection. The basis of the petition is that compliance would cause it substantial economic hardship.

Notice of receipt of the petition is published in accordance with agency regulations on the subject (49 CFR part 555), and does not represent any judgment of the agency on the merits of the petition.

Petitioner seeks a two-year exemption for its A.C. Mark IV ("MkIV" herein) passenger car. The basis for the petition is that immediate compliance with the automatic restraint requirements of Standard No. 208 will cause the petitioner substantial economic hardship, within the meaning of 49 CFR 555.6(a). petitioner's total motor vehicle production in the 12 months preceding the filing of the petition was 45 units. It projects sales of 50 vehicles per year.

The Autokraft A.C. MkIV, according to petitioner, "is the only Cobra-like vehicle which is produced from original Cobra tooling. The original A.C. Cobras, both 289 and 427 versions, manufactured by A.C. Cars in Thames Ditton, Surety, England, are no longer in production." Further, "Because of public interest, the A.C. Cobra is reported to be the most duplicated vehicle of all time." In August 1991, the petitioner decided to

introduce the MkIV into the American market. In the year since, it has expended approximately 1,200 man hours and 64,000 Pounds Sterling on the project. It has examined both automatic belt systems and air bags in its review of Standard No. 208, and has been unable to identify any automatic belt system that it could install in the MkIV that would allow it to conform to the automatic restraint requirements. It has also examined available air bag systems because designing a proprietary system is cost and time prohibitive.

The modifications required to adapt an existing air bag system to the MkIV are estimated to total in cost $790,000. The components of this cost are modifications to the steering column ($50,000), modifications to the underhood packaging, etc. ($40,000), design and development of a knee bolster system and tooling, and dashboard modifications ($200,000), and all relevant testing costs ($500,000). In order not to duplicate its costs, the petitioner wishes to develop a passenger-side air bag system at the same time, at an estimated additional cost of $300,000. These costs are said to be prohibitive without the sale of vehicles to fund the development program. The two-year period requested will provide time for Autokraft to develop and implement its fully-complying air bag systems, and to generate sufficient income to fund the project. In the interim, the MkIV will be equipped "with a four point belt system on the driver and passenger side of the vehicle." In substantiation of its hardship argument, petitioner submitted its balance sheets and income statements for the past three fiscal years, plus the first six months of 1992. It reports a net loss of 186,318 Pounds Sterling in the first half of 1992 (or $348,415 at a rate of $1.87 to 1 Pound), a net profit of 604,487 Pounds Sterling in 1991 (or $1,130,391 at the same rate), and a cumulative net profit as of June 30, 1992, of 1,073,752 Pounds Sterling (or $2,007,916).

According to the petitioner, a temporary exemption would be in the public interest because it would allow sale of a vehicle that is "the only true alternative" to the original Cobra vehicles, and result "in the establishment of dealer and service networks which would increase stateside employment and generate tax revenues." An exemption would be consistent with the objectives of the National Traffic and Motor Vehicle Safety Act "since they meet all FMVSS and NHTSA standards, except for the passive restraint portion of standard 208 and are equipped with a superior four point seat belt system which ensures the safety of the driver and passenger."

NHTSA wishes to observe that Standard No. 208, through its incorporation by reference of Standard No. 209, specifies requirements for two and three points non-automatic occupant restraint systems, but does not include the four point system that the petitioner installs in the MkIV. Thus, any exemption would be from Standard No. 208 in its entirety, not just paragraph S4.1.4. NHTSA has invited the petitioner to comment on the extent to which its four point system and its installation may otherwise conform to the requirements of Standard No. 208 and Standard No. 209.

Interested persons are invited to submit comments on the petition described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, room 5109, Seventh Street, SW., Washington, DC 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the closing date indicated above will be considered and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Comment closing date: November 2, 1992.

Authority: 15 U.S.C. 1410; delegations of authority at 49 CFR 1.50, and 501.8.

Issued on September 25, 1992.

Barry Felrice,

Associate Administrator for Rulemaking.

BILLING CODE 4910-59-M

Denial of Motor Vehicle Defect Petition

This notice sets forth the reasons for the denial of a petition submitted to the National Highway Traffic Safety Administration (NHTSA) under section 124 of the National Traffic and Motor Vehicle Safety Act of 1966, 15 U.S.C. 1410a.

Mrs. Karin I. Gibbons petitioned the agency on June 6, 1992 to make a determination that 1988 and 1989 Renault/Eagle Medallions contain safety-related defects. The petition enumerates a number of diverse problems that the petitioner and other owners have reported on these vehicles. As stated in the petition, the principal complaint concerns "premature, repeated brake wear." The petition cites the need for frequent replacement of brake pads and brake shoes on the subject vehicles. It further alleges that accidents have been caused by "repeated brake failure in Renault Eagle/Medallions."

In its consideration of the petition, NHTSA reviewed actions concerning the subject vehicles that were taken by their manufacturer, Chrysler Corporation, as well as consumer complaint information in the agency's files.

Available records indicate that Chrysler issued newsletters or technical service bulletins to its dealers on five separate occasions concerning the servicing and repair of the brake system on the 1988 Medallion. Two of these advised of procedures to diagnose and correct brake noise. The remaining advisories concerned proper rear brake bleeding techniques, the availability of a new front brake pad, and repairs for a broken front brake pad wear sensor warning light wire. Additionally, the company issued a recall notification in March 1988 concerning the replacement of front brake pads to correct a brake noise condition on the 1988 Medallion. This recall was conducted for the purpose of customer satisfaction, and not to correct a safety-related defect.

NHTSA has received a number of complaints from owners of the subject vehicles concerning excessive brake wear and the need for frequent replacement of brake pads and brake shoes. However, the brake wear described in these reports is not likely to cause sudden brake failure, and should produce sufficient noise to alert consumers to the existence of a problem before it creates an adverse impact on safety. NHTSA's files also contain reports of two brake-related accidents for the 1988 model year Medallion, and one for the 1989 model year. None of these accidents were alleged to have resulted in injuries and no failed components were identified in any of the accident reports. Moreover, in each instance the driver complained of brake problems occurring prior to the alleged accident.

Previously, NHTSA received a petition concerning brake problems for the 1988 model year Medallion from Mr. and Mrs. Tim Barnes. That petition was denied on September 17, 1991, based primarily on insufficient numbers of reports of brake failure and insufficient data to indicate the existence of a safety-defect trend. The additional

information submitted by Mrs. Gibbons is not sufficient to cause NHTSA to reach a different decision on her petition.

The remaining problems with 1988 and 1989 model year Medallions cited by the petitioner principally concern customer satisfaction issues. These include excess tire wear, leaking and noisy struts, premature muffler failure, poor engine performance (as evidenced by sputtering, stalling, poor hot idling, rough idling, and hot running), excess speedometer needle fluctuation, acceleration beyond speed set on cruise control, difficulty in moving gear shift lever when vehicle is parked on an incline, heater and air conditioner malfunctions, inoperative interior lights and clock, creaking body structure, and sticking door latches. None of these problems constitute safety-related defects. The only remaining safety issue raised in the petition concerned rear seat belts that at one time were allegedly difficult to unfasten. The petition states that this problem was alleviated by applying a lubricant to the belt buckle.

In consideration of the foregoing, NHTSA has concluded that there is not a reasonable possibility that an order for the notification and remedy of a safety-related defect would be issued at the conclusion of an investigation concerning the problems that the petition has alleged. Under these circumstances, further commitment of agency resources does not appear to be warranted. Therefore, the petition is denied.

Authority: Sec. 124, Pub. L. 93-492; 88 Stat. 1470 (15 U.S.C. 1410a); delegations of authority at 49 CFR 1.50 and 501.8.

Issued on: September 23, 1992.

William A. Boehly,

Associate Administrator for Enforcement.

Research and Special Programs Administration

International Standards on the Transport of Dangerous Goods by Air; Public Meeting

AGENCY: Research and Special Programs Administration (RSPA), Department of Transportation.

ACTION: Notice of public meeting.

SUMMARY: This notice is to advise persons that RSPA will conduct a public meeting to exchange views on proposals submitted to the Working Group meeting of the International Civil Aviation Organization's (ICAO) Dangerous Goods Panel (DGP) to be held in Edinburgh, Scotland and October 12-16, 1992.

DATES: October 8, 1992 at 2:30 p.m.

ADDRESSES: Department of Transportation, Nassif Building, room 4432, 400 Seventh Street SW., Washington, DC 20590-0001.

FOR FURTHER INFORMATION CONTACT: Frits Wybenga, (202) 366-0656, International Standards Coordinator for Hazardous Materials Safety, RSPA, Department of Transportation Washington, DC 20590-0001.

SUPPLEMENTARY INFORMATION: This meeting will be held in preparation for the ICAO Dangerous Goods Panel Working Group meeting. The primary purpose of the Working Group meeting will be to discuss proposed amendments to the ICAO Technical Instructions for the Safe Transport of Dangerous Goods by Air (the Technical Instructions for the Safe Transport of Dangerous Goods by Air (the Technical Instructions). The Working Group will consider possible amendments to resolve problems encountered with the use of the Technical Instructions, and future amendments to the Technical Instructions on the basis of revisions to the United Nations Recommendations on the Transport of Dangerous Goods (UN Recommendations). The public is invited to attend without prior notification.

Documents

Documents submitted to the working group of the ICAO DGP may be reviewed between the hours of 8:30 a.m. and 5 p.m. in RSPA's Dockets Unit located in room 8419 of the Nassif Building, 400 Seventh Street, SW., Washington, DC 20590. Copies of documents may be obtained from RSPA for a nominal fee. A listing of these documents is available on the Hazardous Materials Information Exchange (HMIX), RSPA's computer bulletin board. Documents may be ordered by filling out an online request form on the HMIX or by contacting RSPA's Dockets Unit (202-366-4453). For more information on the use of the HMIX system, contact the HMIX information center; 1-800-PLANFOR 782-6367); in Illinois 1-800-367-9592; Monday through Friday, 8:30 a.m. to 5 p.m. Central time.

After the meeting, a summary of the public meeting will also be available from the Hazardous Materials Advisory Council (HMAC), suite 250, 1110 Vermont Ave., NW., Washington, DC 20005; telephone number (202) 728-1460.

Issued in Washington, DC, on September 22, 1992.

Alan I. Roberts,

Associate Administrator for Hazardous Materials Safety.

Privacy Act of 1974; Amendment of System of Records

AGENCY: Department of Veterans Affairs.

ACTION: Notice; publication of notice of proposed new routine uses.

SUMMARY: As required by the Privacy Act of 1974, 5 U.S.C. 552a(e), notice is hereby given that the Department of Veterans Affairs (VA) is considering amending the system of records entitled "Patient Medical Records—VA" (24VA136) which is set forth on page 889 of the **Federal Register** publication, "Privacy Act Issuances, 1989 Compilation, Volume II, and amended at 55 FR 5112, February 13, 1990; 55 FR 37604, September 12, 1990; 55 FR 42534, October 19, 1990; 56 FR 1054, January 10, 1991; and 57 FR 28003, June 23, 1992.

DATES: Interested persons are invited to submit written comments, suggestions, or objections regarding the proposed routine uses to the Secretary, Department of Veterans Affairs (271A), 810 Vermont Avenue, NW, Washington, DC 20420. All relevant material received before November 2, 1992, will be considered. All written comments received will be available for public inspection only in room 170 of the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until November 10, 1992. If no comment is received during the 30-day review period allowed for public comment or unless otherwise published in the **Federal Register** by VA, the routine uses in the system are effective November 2, 1992.

FOR FURTHER INFORMATION CONTACT: Celia Winter, Program Specialist, Medical Administration Service (161B), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 535-7658.

SUPPLEMENTARY INFORMATION: Public Law 99-272, The Veterans' Healthcare Amendments of 1986, established an income-based means test for determining eligibility for hospital, nursing home, and outpatient medical care in VA facilities for nonservice-connected veterans. Veterans with incomes in excess of the means test income levels may obtain care in VA facilities if resources and facilities are available and if they agree to pay a copayment to VA. Veterans with incomes in excess of the means test income levels who do not agree to pay copayments to the VA are not eligible for VA medical care and may be treated only on the basis of a humanitarian emergency.

Public Law 101-508, the Omnibus Budget Reconciliation Act of 1990, authorized VA to use IRS (Internal Revenue Service) and SSA (Social Security Administration) income tax return information to verify incomes for certain nonservice-connected veterans who have applied for VA medical care. Proposed routine use number 39 will permit the disclosure of the individual identifiers for these nonservice-connected veterans to IRS and SSA. Income data will be provided to VA which will be compared with the incomes reported by the veterans and used to verify or determine their eligibility for medical care.

Proposed routine use number 40 will allow VA to release identifying information to SSA including social security numbers of individuals who are receiving benefits under Title 38, United States Code. The information may be released only upon an official written agreement between VA and SSA. The agreement will follow requirements of the Privacy Act of 1974.

This release of information will permit the validation of social security numbers maintained in VA records and facilitate determination and verification of eligibility for medical care.

Proposed routine use number 41 is added at this time to incorporate the VA policy of releasing the patient name and relevant treatment information to the Food and Drug Administration, Department of Health and Human Services, for purposes of reporting adverse drug reactions (ADR's) for quality of care monitoring functions.

Approved: September 22, 1992.
Edward J. Derwinski,
Secretary of Veterans Affairs.

Notice of System of Records

In the system identified as 24VA136, "Patient Medical Records—VA" appearing on page 889 of the Federal Register publication, "Privacy Act Issuances, 1989 Compilation, Volume II" and amended at 55 FR 5112, February 13, 1990; 55 FR 37604, September 12, 1990; 55 FR 41534, October 19, 1990; 56 FR 1054, January 10, 1991; and 57 FR 28003, June 23, 1992, the following routine uses are added:

24VA136

SYSTEM NAME:

Patient Medical Records—VA.

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

* * * * *

39. Identifying information, including social security number, concerning veterans and the dependents of veterans, may be disclosed to other Federal agencies for purposes of conducting computer matches to obtain information to determine or verify eligibility of certain veterans who are receiving VA medical care under Title 38, United States Code.

40. The name and social security number of a veteran, spouse and dependent, and other identifying information as is reasonably necessary may be disclosed to the Social Security Administration, Department of Health and Human Services, for the purpose of conducting a computer match to obtain information to validate the social security numbers maintained in VA records.

41. The patient name and relevant medical record treatment information concerning an adverse drug reaction of a patient may be disclosed to the Food and Drug Administration, Department of Health and Human Services for purposes of quality of care management including detection, treatment, monitoring, reporting, analysis and follow-up actions relating to adverse drug reactions

Sunshine Act Meetings

Federal Register
Vol. 57, No. 191
Thursday, October 1, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

AFRICAN DEVELOPMENT FOUNDATION

Board of Directors Meeting

TIME: 4:00–5:00 p.m.

PLACE: Department of State.

DATE: Tuesday, October 6, 1992.

STATUS: Open.

Agenda

1. Selection of next Board meeting date.
2. Delegation of Authority.

If you have any questions or comments, please direct them to Ms. Janis McCollim, Executive Assistant to the President, who can be reached at (202) 673–3916.

Gregory Robeson Smith,
President.
[FR Doc. 92–23976 Filed 9–29–92; 2:47 pm]
BILLING CODE 6116–01–M

FARM CREDIT ADMINISTRATION

Farm Credit Administration Board; Special Meeting

SUMMARY: Notice is hereby given, pursuant to the Government in the Sunshine Act (5 U.S.C. 552b(e)(3)), of the special meeting of the Farm Credit Administration Board (Board).

DATE AND TIME: The special meeting of the Board was held at the offices of the Farm Credit Administration in McLean, Virginia, on September 18, 1992, from 11:55 a.m. until such time as the Board concluded its business.

FOR FURTHER INFORMATION CONTACT: Curtis M. Anderson, Secretary to the Farm Credit Administration Board, (703) 883–4003, TDD (703) 883–4444.

ADDRESS: Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102–5090.

SUPPLEMENTARY INFORMATION: This meeting of the Board was open to the public (limited space available). The matter considered at the meeting was:

Open Session

A. New Business

1. Request from National Bank for Cooperatives to Temporarily Exceed its Lending Limit to One Borrower.

Dated: September 28, 1992.

Curtis M. Anderson,
Secretary, Farm Credit Administration Board.
[FR Doc. 92–23913 Filed 9–28–92; 4:50 pm]
BILLING CODE 6705–01–M

FARM CREDIT ADMINISTRATION

Farm Credit Administration Board; Special Meeting

SUMMARY: Notice is hereby given, pursuant to the Government in the Sunshine Act (5 U.S.C. 552b(e)(3)), of the forthcoming special meeting of the Farm Credit Administration Board (Board).

DATE AND TIME: The special meeting of the Board will be held at the offices of the Farm Credit Administration in McLean, Virginia, on October 1, 1992, from 10:00 a.m. until such time as the Board concludes its businesses.

FOR FURTHER INFORMATION CONTACT: Curtis M. Anderson, Secretary to the Farm Credit Administration Board, (703) 883–4003, TDD (703) 883–4444.

ADDRESS: Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102–5090.

SUPPLEMENTARY INFORMATION: Parts of this meeting of the Board will be open to the public (limited space available), and parts of this meeting will be closed to the public. The matters to be considered at the meeting are:

Open Session

Approval of Minutes

A. New Business

1. Regulations

a. Conservatorship and Receivership (Final);
b. Release of Information (Proposed);

2. Other

a. Proposed Reporting Mechanisms for OSMO;

Closed Session*

A. New Business

1. Enforcement Actions.

Dated: September 28, 1992.

Curtis M. Anderson,
Secretary, Farm Credit Administration Board.
[FR Doc. 92–23914 Filed 9–28–92; 4:50 pm]
BILLING CODE 6705–01–M

* Session closed to the public—exempt pursuant to 5 U.S.C. 552b(c) (8) and (9).

Corrections

Federal Register
Vol. 57, No. 191
Thursday, October 1, 1992

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF DEFENSE

48 CFR Parts 202, 204, 208, 210, 214, 215, 216, 219, 223, 225, 226, 227, 228, 231, 232, 236, 237, 239, 242, 245, 252, 253

[Defense Acquisition Circular (DAC) 91-3]

Acquisition Regulations; Miscellaneous Amendments; Interim Rules

Correction

In rule document 92-21665 beginning on page 42626 in the issue of September 15, 1992, in the first column, under **DATES** in the eighth line, "30 days from publication" should read "October 15, 1992."

BILLING CODE 1505-01-D

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Federal Preemption of State, Local, and Indian Tribe Requirements Under the Hazardous Materials Transportation Act; Notice

DEPARTMENT OF TRANSPORTATION

[Notice No. 92-10]

Federal Preemption of State, Local, and Indian Tribe Requirements Under the Hazardous Materials Transportation Act

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Notice.

SUMMARY: This Notice publishes a subject-matter index and table summarizing RSPA inconsistency rulings, non-preemption determinations, and a waiver of preemption determination, and all court decisions which discuss preemption issues under the Hazardous Materials Transportation Act (HMTA) (Pub. L. 93-633), 88 Stat. 2156 (1975), as amended by the Hazardous Materials Transportation Uniform Safety Act (HMTUSA) (Pub. L. 101-615, 104 Stat. 3244 (1990)), and the Hazardous Materials Regulations (HMR) (49 CFR parts 171-180) issued thereunder. With its passage in 1990, HMTUSA significantly amended HMTA, particularly in the area of Federal preemption of State, local government, and Indian tribe requirements. The publication of this information is intended to facilitate better public understanding and awareness of the judicial and administrative precedents concerning preemption under HMTA. It may be particularly useful to State, local, or tribal officials considering the regulation or restriction of hazardous materials transportation.

FOR FURTHER INFORMATION CONTACT: Edward H. Bonekemper, III, Assistant Chief Counsel for Hazardous Materials Safety, Office of the Chief Counsel, Research and Special Programs Administration, Department of Transportation, Washington, DC 20590-0001 [Tel. (202) 366-4400].

SUPPLEMENTARY INFORMATION: The HMTA generally preempts "* * * any requirement of a State or political subdivision thereof or Indian tribe" when compliance with both the local regulation and HMR "is not possible", when the local regulation "creates an obstacle to the accomplishment and execution" of the HMTA or the HMR, or when the local regulation concerns one or more of five "covered subjects" and the local regulation is not "substantively the same" and HMTA or HMR. 49 app. U.S.C. 1804(a), 1811(a). The "dual compliance" (or "impossibility") test and the "obstacle" test were the regulatory criteria used by RSPA and the courts even prior to 1990; HMTUSA's passage gave them statutory status.

These express preemption provisions make it evident that Congress did not intend that the HMTA and the HMR completely occupy the field of transportation so as to preclude all State, local, or Indian tribe action. However, Congress did give the Department of Transportation (DOT) the authority to promulgate uniform national standards, and Congress intended, to the extent possible, to make State, local, and Indian tribe action unnecessary. HMR's comprehensiveness severely restricts the scope of historically permissible state, local, and Indian tribe activity.

Section 1804(a)(4) preempts any provision, not otherwise authorized by Federal law, concerning a "covered subject" which is not "substantively the same" as any HMTA or HMR provision. "Covered subjects" are the: (1) Designation, description, and classification of hazardous materials; (2) packing, repacking, handling, labeling, marking, and placarding of hazardous materials; (3) preparation, execution, and use of shipping documents pertaining to hazardous materials and requirements respecting the number, content, and placement of such documents; (4) written notification, recording, and reporting of the unintentional release in transportation of hazardous materials; and (5) design, manufacture, fabrication, marking, maintenance, reconditioning, repair, or testing of a package or container which is represented, marked, certified, or sold as qualified for use in the transportation of hazardous materials.

In these five covered subject areas, national uniformity is critical. In those areas, DOT has determined what requirements are necessary for the safe transportation of hazardous materials. Any additional requirements in excess of the Federal requirements would not be "substantively the same" and would be preempted. Therefore, "substantively the same" is defined in the HMR to mean that the non-Federal requirement conforms in every significant respect to the Federal requirement. Editorial and other similar *de minimis* changes are permitted. 49 CFR 107.202, 57 FR 20428 (May 13, 1992).

Section 1804(b)(4) provides that, beginning two years after the issuance of Federal highway routing standards, State and Indian tribe highway routing designations, limitations, and requirements relating to hazardous materials will be preempted unless they meet Federal procedural and substantive requirements. The Federal Highway Administration will issue regulations and preemption determinations on highway routing of hazardous materials. 49 CFR 1.48(ii), 56 FR 31343 (July 10, 1991).

In addition, section 1819 states that, after DOT enacts regulations with regard to motor carrier registration forms for states that register persons who transport hazardous materials by motor vehicle, "no State shall establish, maintain, or enforce any requirement which relates to the subject matter of such regulation unless such requirement is the same as such regulation."

The HMTA also provides that the Secretary of Transportation (Secretary) may waive preemption of a State, local, or Indian tribe regulation, in response to an application that "acknowledges" preemption, upon a determination that the State, local, or Indian tribe requirement: "(1) Affords an equal or greater level of protection to the public than is afforded by the requirements of [the HMTA] or the regulations issued under [the HMTA], and (2) does not unreasonably burden commerce." 49 app. U.S.C. 1811(d).

The Secretary delegated to RSPA the authority to decide applications for a determination of preemption and for a waiver of preemption, except for those concerning highway routing, which were delegated to the Federal Highway Administration. 49 CFR 1.53(b); 56 FR 31343 (July 10, 1991). RSPA's procedures for deciding applications for preemption determinations and waiver of preemption determinations are set forth at 49 CFR 107.201-107.227 (including amendments of February 28, 1991 (56 FR 8616), April 17, 1991 (56 FR 15510), and May 13, 1992 (57 FR 20424)).

Any person "aggrieved" by RSPA's decision on an application for a preemption determination or waiver may file a petition for reconsideration. 49 CFR 107.223(a). A party to a waiver of preemption proceeding may also seek judicial review of the Secretary's decision "by the appropriate district court of the United States." 49 app. U.S.C. 1811(e).

Prior to HMTUSA, Congress had utilized a more general preemption standard ("inconsistent"). Only the question of statutory preemption under the HMTA was considered in DOT's inconsistency rulings. A court might have found a non-Federal requirement preempted for other reasons, such as statutory preemption under another Federal statute, preemption under State law, or preemption by the Commerce Clause and the Supremacy Clause of the U.S. Constitution because of an undue burden on interstate commerce. However, RSPA did not make such

determinations in an inconsistency ruling proceeding. It had incorporated into its procedures the dual compliance/impossibility and obstacle tests for determining whether a State or local requirement was consistent with, and thus not preempted by, HMTA. These tests were based upon and supported by U.S. Supreme Court decisions on preemption, including *Hines* v. *Davidowitz*, 312 U.S. 52 (1941); *Florida Lime & Avocado Growers, Inc.* v. *Paul*, 373 U.S. 132 (1963); and *Ray* v. *Atlantic Richfield Co.*, 435 U.S. 151 (1978).

All of RSPA's inconsistency rulings, its non-preemption determination, and its waiver of preemption determination (including all relevant **Federal Register** citations) are summarized in a detailed table accompanying this Notice; those rulings and determinations also are summarized in the index accompanying this Notice. In contrast to DOT's advisory inconsistency rulings, its preemption determinations and waiver of preemption determinations are legally binding on parties and affected governments unless reversed on judicial review. Court decisions on HMTA preemption issues are legally binding upon parties to those cases and may constitute binding precedents within the geographical area of each court's jurisdiction. Relevant opinions, published and unpublished, are summarized in the index accompanying this Notice.

Issued in Washington, DC on September 23, 1992, under authority delegated in 49 CFR part 106, appendix A.

Alan I. Roberts,

Associate Administrator for Hazardous Materials Safety.

Index to Preemption of State and Local Laws and Regulations Under the Hazardous Materials Transportation Act (HMTA)

(49 App. U.S.C. 1801–1819)

The following is an alphabetized subject matter index of issues arising under the preemption provisions of the HMTA. This index summarizes the implementation of the HMTA's preemption provisions by DOT and the courts.

Abbreviations Used in this Document

CFR—Code of Federal Regulations
DOT—U.S. Department of Transportation
FR—**Federal Register**
HM-XXX—Hazardous Materials Regulations Docket of RSPA (e.g., HM-181)
HMR—Hazardous Materials Regulations (49 CFR parts 171–180) issued by DOT under HMTA
HMTA—Hazardous Materials Transportation Act, 49 app. U.S.C. 1801–1819.
HMTUSA—Hazardous Materials Transportation Uniform Safety Act of 1990, Public Law 101–615
HRCQ—Highway route controlled quantities (of RAM)
IR-XX—Inconsistency Ruling issued by DOT (e.g., IR–18)
IR-XX(A)—Decision on Appeal re Inconsistency Ruling IR–XX (e.g., IR–18(A))
IRA-XX—Inconsistency Ruling Application filed with DOT (e.g., IRA–44)
LNG—Liquified natural gas
LPG—Liquefied petroleum gas
"Nine-pack"—Group of nine inconsistency rulings (*IR–7 through *IR–15) issued by RSPA on 11/27/84 (49 FR 46632 *et seq.*)
NRC—Nuclear Regulatory Commission
OHMS—Office of Hazardous Materials Safety, RSPA
RAM—Radioactive materials
RSPA—Research and Special Programs Administration, DOT

An asterisk (*) denotes a case, IR or other provision involving only RAM.

A cross-hatch (#) denotes a case, IR or other provision involving both RAM and other hazardous materials.

Accident/Incident Reporting Requirements (Also see "covered subjects" discussion on pp. 1–2.)

• Requirements for immediate, oral accident/incident reports for emergency response purposes generally are consistent. IR–2; IR–3; #IR–28; #IR–31; #IR–32; *National Tank Truck Carriers, Inc.* v. *Burke*, 535 F. Supp. 509 (D.R.I. 1982), *aff'd*, 698 F.2d 559 (1st Cir. 1983).

• Incident reporting requirements concerning irradiated reactor fuel incidents are inconsistent because of redundancy and possible conflict with NRC rules incorporated into HMR. *IR–8, #IR–28; IR–32. However, such requirements may be consistent where they are clear and not in conflict with the NRC rule (incorporated into the HMR) requiring shippers to arrange with local law enforcement agencies for emergency response. #IR–31.

• Requirements for written accident/incident reports are redundant with Federal requirements, tend to undercut compliance with them, and thus are inconsistent. IR–2; IR–3; IR–3(A); #IR–31. See "covered subjects" discussion on pp. 1–2.

Advance Notice—See "Notice Requirements" and "Delays of Transportation."

Approval Requirements (Also see "Permit Requirements.")

• Transportation approval requirements identical to Federal are consistent. *IR–14; *IR–15.

• Transportation approval requirements different from Federal are inconsistent. *IR–8; *IR–8(A); *IR–10; *IR–11; *IR–12; *IR–13; *IR–15; *IR–15(A); #IR–19; #IR–19(A).

• Transportation approval requirements may not include inconsistent provisions: "A requirement for compliance with an inconsistent provision is itself inconsistent." *IR–8(A), 52 FR 13000, 13006.

• Unfettered discretion to approve or disapprove transportation is inconsistent. *IR–8(A); *IR–15(A); *IR–18; #IR–20.

• "In light of the virtually total occupation of the field of radioactive materials transportation by the HMTA and the HMR, State or local provisions requiring approval or authorizing conditions to be established for the transportation of radioactive materials (other than compliance with Federal regulations) constitute unauthorized prior restraints on shipments that are presumptively safe based on their compliance with Federal regulations and are inconsistent with the HMTA and the HMR." *IR–15(A), 52 FR 13062, 13063; quoted and followed, #IR–19.

Approvals—See "Exemptions and Approvals."

Bans on Hazardous Materials Transportation—See "Prohibitions of Hazardous Materials Transportation."

Bonding Requirements—See "Insurance or Indemnification Requirements."

Certification Requirements—See "Information/Documentation Requirements", "Packaging Design and Construction Requirements" and "Shipping Paper Requirements."

Civil Penalties—See "Penalties."

Classification of Hazardous Materials—See "covered subjects" discussion on pp. 1–2.

Communication Requirements

• Requirement that motor vehicles carrying LPG or natural gas use two-way radio communications is consistent. IR–2.

• RAM communications requirements which are different from, or authorized to be different from, Federal requirements are inconsistent. *IR–8; *IR–8(A).

• City requirements that vehicles carrying hazardous waste have and monitor CB radio is consistent except as to radioactive materials. #IR–32.

Confidentiality Requirement

• Requirements to keep RAM shipment information confidential which are same as Federal are consistent. *IR–8; *IR–15.

Container Design and Certification Requirements—See "covered subjects" discussion on pp. 1–2 and "Packaging Design and Construction Requirements."

Curfew—See "Time Restrictions."

Definitions—See "Hazard Class and Hazardous Materials Definitions."

Delays of Transportation (Also see "Routing Requirements" and "Time Restrictions.")

• State and local requirements likely to cause unreasonable transportation delays are inconsistent. IR–2; IR–3; IR–3(A); IR–6; IR–16; #IR–19; #IR–19(A); #IR–20; *IR–21; *IR–21(A); IR–22; #IR–28; *IR–30.

• "The manifest purpose of the HMTA and the Hazardous Materials Regulations is safety in the transportation of hazardous materials. Delay in such transportation is incongruous with safe transportation." IR–2, 44 FR 75566, 75571.

• "The mere threat of delay may redirect commercial hazardous materials traffic into other jurisdictions that may not be aware of or prepared for a sudden, possibly permanent, change in traffic patterns." IR–3, 46 FR 18919, 18921, #IR–20; *IR–21(A).

• Local highway routing requirements for hazardous materials through-traffic not based on complete safety analysis and consultations with all affected jurisdictions are inconsistent with § 177.853(a) of the HMR. IR–3; IR–3(A); IR–23.

• "Since safety risks are 'inherent in the transportation of hazardous materials in commerce' [49 U.S.C. 1801], an important aspect of transportation safety is that transit time be minimized. This precept has been incorporated in the HMR at 49 CFR 177.853, which directs highway shipments to proceed without unnecessary delay, and at 49 CFR 174.14, which directs rail shipments to be expedited within a stated time frame." IR–6, 49 FR 760, 765; see also *IR–16, 50 FR 20872, 20879; quoted, #IR–19, 52 FR 24404, 24409.

• Acute delays at State border inevitably resulting from State imposing documentary prerequisites upon non-domiciliaries for transport of hazardous materials render those requirements inconsistent with 49 CFR 177.853. #IR–26.

• State fees for hazardous materials transport not causing unnecessary transportation delays are consistent. *IR–17; *IR–17(A); *IR–27; # *New Hampshire Motor Transport Ass'n* v. *Flynn*, 751 F.2d 43 (1st Cir. 1984); **Colorado Pub. Utilities Comm'n* v. *Harmon*, No. 88–Z–1524 (D. Colo. 1989), *rev'd on other grounds*, 951 F.2d 1571 (10th Cir. 1991).

• Time-consuming state permitting process with no definite decision date creates possibility of transportation delay and thus is inconsistent. #IR–19, #IR–19(A); *IR–21; *IR–21(A).

• Two-hour advance approval requirement not shown to serve any purpose causes delay and is inconsistent. #IR–20; *IR–21; *IR–21(A).

• City 20-car limitation on unloaded and loaded butane railcars at a site will cause delays and temporary storage elsewhere and thus is inconsistent. *Consolidated Rail Corp.* v. *City of Bayonne*, 724 F. Supp. 320 (D.N.J. 1989). "The obvious conclusion is that the more frequently hazardous material is handled during transportation, the greater the risk of mishap. Accordingly, these [HMR] provisions require that the material reach its destination as quickly as possible, with the least amount of handling and temporary storage." *Ibid.* at 330.

• Additional switching, handling and delays of hazardous materials caused by state requirement for caboose on certain trains carrying hazardous materials create obstacle, and requirement is inconsistent. *Missouri Pacific R.R. Co.* v. *Railroad Commission of Texas*, 671 F. Supp. 466 (W.D. Tex. 1987), *aff'd on other grounds*, 850 F.2d 264 (5th Cir. 1988), *cert. denied*, 109 S. Ct. 794 (1989).

• State statute providing three days for a permit issuance decision re each RAM shipment is inconsistent. *IR–21; *IR–21(A). Local ordinance requiring 45 days' prenotification of RAM shipments is inconsistent. *IR–30. Prohibition on permit applications more than one day prior to scheduled shipment also is inconsistent. *IR–21; *IR–21(A).

• RAM requirements unnecessarily delaying transportation are inconsistent. *IR–8(A), *IR–18; *IR–18(A); *IR–21; *IR–21(A); #IR–26, *IR–30.

• City tank truck regulations causing delays for cargo transfers, vehicle permit inspections and obtaining specifications, certifications and affidavits, are inconsistent. IR–22.

• City truck regulations, requiring bulk gases to be transported around City unless no practical alternative route exists and the fire commission authorizes trip, promote safety, do not cause "unnecessary delay" under 49 CFR 177.853(a), and thus are consistent. *City of New York* v. *Ritter Transp., Inc.*, 515 F. Supp. 663 (S.D. N.Y. 1981), *aff'd, National Tank Truck Carriers, Inc.* v. *City of New York*, 677 F.2d 270 (2d Cir. 1982).

• "While states do have a role in effectuating the safe transportation of radioactive materials, it does not follow that they have unfettered discretion to take actions which have the effect of restricting or delaying transportation being conducted in compliance with Federal law." *IR–8(A), 52 FR 13000 at 13003; quoted in #IR–19, 52 FR 24404, 24409.

Designation/Description of Hazardous Materials—See "covered subjects" discussion on pp. 1–2.

Documentation—See "Information/Documentation Requirements."

Drivers' Licenses—See "Information/Documentation Requirements" and "Training Requirements."

Effect of Requirements (Also see "Language of Requirements.")

• "* * * it is the effect, both actual and potential, not the intent of state or local rules which determines their consistency with the HMTA and the HMR." IR–8(A), 52 FR 13000, 13003.

Emergency Response

• "Although the Federal Government can regulate in order to avert situations where emergency response is necessary, and can aid in local and state planning and preparation, when an accident does occur, response is, of necessity, a local responsibility." IR–2, 44 FR 75565, 75568.

• Inadequacy of emergency response capabilities cannot provide basis for prohibiting transportation. *IR–18; *IR–18(A). Thus, non-Federal emergency response-related information requirements, such as a cleanup plan or vehicle equipment failure plan, cannot be used as a prerequisite to hazardous materials transportation. #IR–19; *IR–27; #IR–28. **Colorado Pub. Utilities Comm'n* v. *Harmon*, 951 F.2d 1571 (10th Cir. 1991), *reversing* No. 88–Z–1524 (D. Colo. 1989).

• "* * * RSPA's emergency response information requirements for hazardous materials transportation, including the loading, unloading, or storage incidental to such transportation exclusively occupy that field. Therefore, state and local requirements not identical to these HMR provisions will cause confusion concerning the nature of such requirements, undermine compliance with the HMR requirements, constitute obstacles to the implementation of these provisions, and thus be inconsistent and preempted." #IR–28.

Emergency Requirements (Also see "Loading and Unloading")

Enforcement and Violations Provisions (Also see "Penalties.")

• Enforcement and violations provisions (such as criminal or civil sanctions, private attorney general

lawsuits, injunctions, cease-and-desist orders, cut-off of city services, etc.) are consistent with HMTA and HMR if used to enforce consistent provisions. *IR–3; #IR–31.

• Enforcement and violations provisions (such as criminal or civil sanctions, private attorney general lawsuits, injunctions, cease-and-desist orders, cut-off of city services, etc.) are inconsistent with HMTA and HMR if used to enforce inconsistent provisions. *IR–18; *IR–18(A); *IR–30; #IR–31.

Equipment Requirements (Also see "covered subjects" discussion on pp. 1–2 and "Packaging Design and Construction Requirements.")

• Cargo containment-related equipment requirements, including those vesting discretionary approval authority in state or local officials, are inconsistent. IR–2; *IR–8; *IR–8(A); *IR–15; IR–22; *Nat'l Paint & Coatings Ass'n. et al.* v. *City of New York,* Index No. CV 84–4525 (ERK) (E.D. N.Y. Oct. 18, 1991).

• "In summary, RSPA, OHMT and their predecessor agencies have established in a series of inconsistency rulings issued during the past decade the principle that the HMR provisions concerning hazardous materials transportation cargo containment systems, equipment, accessories and packagings, and the certification, marking, testing and permitting of same, have fully occupied that regulatory field. Those subjects are the exclusive province of the Federal Government. As a result, state or local requirements concerning those subjects detract from and create confusion concerning the Federal requirements, are inconsistent with the HMTA and the HMR, and, therefore, are preempted under section 112(a) of the HMTA. Similarly, these rulings have demonstrated RSPA's position that permitting systems and information or documentation requirements relating to or containing such requirements likewise are inconsistent with the HMTA and the HMR and, therefore, preempted." IR–22, 52 FR 46574, 46582.

• "Headlights on" requirement is consistent. IR–2; IR–3; #IR–32 (with reasonable notice); *National Tank Truck Carriers, Inc.* v. *Burke,* 535 F. Supp. 509 (D.R.I. 1982), *aff'd,* 698 F.2d 559 (1st Cir. 1983); * *Colorado Pub. Utilities Comm'n* v. *Harmon,* No. 88–Z–1524 (D. Colo. 1989), *rev'd on other grounds,* 951 F.2d 1571 (10th Cir. 1991).

• RAM transportation requirement for mobile telephone equipped with multiple channels is consistent. **Colorado Pub. Utilities Comm'n* v. *Harmon,* No. 88–Z–1524 (D. Colo. 1989), *rev'd on other grounds,* 951 F.2d 1571 (10th Cir. 1991).

• State requirement for caboose on certain trains carrying hazardous materials would cause additional switching, handling and delays of hazardous materials and thus is inconsistent. *Missouri Pacific RR Co.* v. *Railroad Commission of Texas, supra.*

• Requirement for illuminated rear bumper signs conflicts with DOT lighting regulations and would divert attention from DOT placards and thus is inconsistent. IR–2.

• Requirement for frangible shank-type lock on tank trailers carrying LNG or LPG is inconsistent since DOT comprehensively regulates cargo tank containment. IR–2.

• City 20-car limitation on unloaded or loaded butane railcars at a site is inconsistent. *Consolidated Rail Corp.* v. *City of Bayonne,* 724 F. Supp. 320 (D. N.J. 1989).

• "* * * a state or local rule which grants an official discretionary authority to set equipment requirements for carriers engaged in interstate commerce impedes the Congressional purposes of increased safety and regulatory uniformity underlying the HMTA." IR–8(A), 52 FR 13000, 13003.

• Vehicle equipment requirements which might conflict with those provisions of the Federal Motor Carrier Safety Regulations (FMCSR), 49 CFR parts 390–397, which are incorporated in the HMR only by 49 CFR 177.804, must only meet the "dual compliance" test, not the "obstacle" test. IR–3; 43 FR 4858 (Feb. 6, 1978); *National Paint & Coatings Ass'n, Inc.* v. *City of New York,* No. CV–4525 (ERK) (E.D. N.Y. 1985); 52 FR 18668–9 (May 18, 1987); IR–22. However, those FMCSR requirements specifically incorporated into the HMR by other HMR regulations must meet both tests. IR–22.

• Waiver of preemption denied with regard to tank truck design and capacity requirements for flammable and combustible liquids and gases, because they do not provide an equal level or greater level of protection to the public as the Federal requirements, and they unreasonably burden commerce. In this specific case, there is no evidence that local design requirements and capacity limits increase the level of safety by a sufficient amount to offset an expected reduction in deaths, injuries, and property damage, when larger-capacity trucks allow fewer trips. WPD–1.

Escort Requirements

• RAM transportation front and rear escort requirements identical to DOT/NRC standards are consistent, *IR–14, as are notice requirements facilitating escorts under the DOT/NRC requirements. *IR–17.

• Requirements for additional or special escorts re RAM transportation not required by DOT/NRC regulations are inconsistent, *IR–11; *IR–13; *IR–15(A); *IR–18; *IR–18(A); *IR–21.

• Requirements for carriers to delay for escorts re RAM transportation other than those in NRC standards are inconsistent. *IR–15.

• Escort requirements linked to inconsistent equipment requirements are inconsistent. IR–22; IR–23.

• Temporary restraining order and later a permanent injunction were imposed against State escort requirement for chlorine and oleum shipments, because of the high degree of likelihood that such a requirement would not be upheld upon court review. *Chlorine Institute* v. *California Highway Patrol et al.,* No. CIV–S–92 396 DFL/JFM (E.D. Ca. 1992).

Exemptions and Approvals

• "A state must implicitly or explicitly recognize the validity of OHMT's exemptions and approvals; a state may not establish its own exemptions and approvals program." #IR–31, 55 FR 25572, 25581.

Federal Motor Carrier Safety Regulations (FMCSR)

• 49 CFR parts 390–397 (FMCSR) were not made relevant to HMTA preemption by adoption of 49 CFR 177.804. They are relevant only insofar as specifically incorporated by reference in other HMR provisions. IR–22; IR–23; #IR–32.

Federal Requirements (Also see "Standing.")

• Only conflicts with Federal requirements under the HMTA and the HMR are cognizable in inconsistency proceedings (not Commerce Clause issues or preemption issues under other Federal statutes or regulations), but OHMT may address these HMTA/HMR conflict issues even if not clearly raised in the application. IR–17(A).

• Absence of a Federal regulation addressing the same subject as a challenged state or local requirement is not determinative of the issue of that requirement's consistency. *IR–17(A).

• Requiring compliance with Federal requirements is consistent. IR–3; *IR–7.

• State or local requirements identical to Federal ones are consistent. *IR–8.

• Adequacy of Federal requirements is irrelevant. *IR–8(A).

Fee Requirements

• Fees on hazardous materials transportation must be equitable and used for purposes related to hazardous materials transportation, including enforcement and planning, development

and maintenance of emergency response capability. 49 app. U.S.C. 1811(b).

• Reasonable fees to fund consistent activities are consistent. *IR–17; *IR–17(A); *IR–27; #*New Hampshire Motor Transport Ass'n* v. *Flynn*, 751 F.2d 43 (1st Cir. 1984).

**Colorado Pub. Utilities Comm'n* v. *Harmon*, No. 88–Z–1524 (D. Colo. 1989), *rev'd on other grounds*, 951 F.2d 1571 (10th Cir. 1991).

• Fees which are unreasonably high or are related to inconsistent activities are inconsistent. *IR–11; *IR–13; *IR–15; *IR–18(A); #IR–19; *IR–27; *IR–30; #*New Hampshire Motor Transport Ass'n* v. *Flynn, supra.*

• State's $1,000 per cask fee for spent nuclear fuel transportation to fund inspection, enforcement, State escorts and emergency response, not related to inconsistent provisions, and not causing transportation delays or diversions is consistent. *IR–17; *IR–17(A). Similar State RAM shipment fees are consistent. *IR–27.

• State's $25/year or $15/trip fee for hazardous materials transportation to fund transportation and environmental programs and related to a minimal delay licensing system is consistent. #*New Hampshire Motor Transport Ass'n* v. *Flynn, supra.*

• State's $1,000 per shipment fee for spent nuclear fuel transportation apparently to fund inconsistent state monitoring activities is inconsistent. *IR–15. State's RAM permit fee is inconsistent. *IR–27.

• State's $500 annual permit fee and $200 shipment fee for RAM transportation are consistent. **Colorado Pub. Utilities Comm'n* v. *Harmon*, No. 88–Z–1524 (D. Colo. 1989), *rev'd on other grounds*, 951 F.2d 1571 (10th Cir. 1991).

• State preliminarily enjoined from depositing the proceeds of a $25 per truck annual hazardous materials transportation license fee and a related $15 single trip fee into the State treasury, and ordered to place these monies in an escrow account pending final disposition of court case challenging validity of the fees under the Commerce clause, because plaintiffs established the likelihood of their success on the merits. *American Trucking Associations et al.* v. *New Hampshire*, No. 89–E–00405–B (Sup. Ct. NH 1989).

• State's hazardous materials license fee of $25 per vehicle or $15 per trip per vehicle found to be a "flat tax", failed Commerce clause "internal consistency" test as required by *Armco* v. *Hardesty* (467 U.S. 644 (1994)), and therefore was an undue burden on interstate commerce. *American Trucking Assn's* v. *Diamond, et al.*, No. CV–90–195 (Sup. Ct. Maine 1990).

• The imposition and use of an "equitable fee" as part of a City's permit and inspection system for purposes related to the transportation of hazardous materials is not preempted. WPD–1.

Findings

• Findings regarding hazardous materials transportation are not "requirements" subject to preemption under the HMTA. *IR–18.

Forms—See "Motor Carrier Registration and Permitting Forms."

Handling of Hazardous Materials—See "covered subjects" discussion on pp. 1–2.

Hazard Class and Hazardous Materials Definitions (Also see "covered subjects" discussion on pp. 1–2.)

• State and local hazard class and hazardous materials definitions differing from those in the HMR and used to regulate hazardous materials transportation are inconsistent because the Federal role is exclusive. *IR–18; *IR–18(A); #IR–19; #IR–19(A); #IR–20; *IR–21; #IR–26; #IR–28; IR–29; *IR–30; #IR–31; #IR–32; *Missouri Pacific R.R. Co.* v. *Railroad Commission of Texas, supra.*

• State and local hazardous materials definitions and classifications which result in regulating the transportation, including loading, unloading or storage incidental thereto, of more, fewer or different hazardous materials than the HMR are obstacles to uniformity in transportation regulation and thus are inconsistent. IR–5; IR–6; #IR–28; IR–29; #IR–31; #IR–32.

• Application of state requirements to selected DOT hazardous materials can contribute to the overall inconsistency of a series of interrelated regulations. #IR–19.

• "The key to hazardous materials transportation safety is precise communication of risk. The proliferation of differing State and local systems of hazard classification is antithetical to a uniform, comprehensive system of hazardous materials transportation safety regulations." IR–6, 48 FR 760, 764.

• "State government or political subdivisions may not regulate—let along prohibit—the transportation or radioactive or other hazardous materials specifically excepted from regulation under the HMTA or the HMR. The determination of what hazardous materials may or may not be regulated in the transportation field is the essence of DOT's exclusive authority to define and classify hazardous materials." #IR–20, 52 FR 24396, 24401.

• "Radioactive Material" definitions different from HMR definitions are inconsistent. *IR–8; *IR–12, *IR–15; *IR–16; *IR–18; *IR–21; *IR–30; **Northern States Power Co.* v. *Prairie Island Mdewakanton Sioux Indian Community*, Civ. 3–9–783 (D. Minn., Dec. 23, 1991) (enjoining enforcement of ordinance), *appeal docketed* (8th Cir. 1992). But essentially identical definitions are consistent. *IR–18.

• "If every jurisdiction were to assign additional requirements on the basis of independently created and variously named subgroups of radioactive materials, the resulting confusion of regulatory requirements would lead directly to the increased likelihood of reduced compliance with the HMR and subsequent decrease in public safety." *IR–12, 49 FR 46650, 46651.

• City definitions of RAM and flammable materials differed from HMTA definitions and thus were preempted and their use enjoined. *Union Pac. R.R. Co.* v. *City of Las Vegas*, No. LV–85–932 HDM (D. Nev. 1986).

• City definition of "hazardous waste" consisting of ambiguous and subjective standards and including non-HMR materials is inconsistent. #IR–32.

• *Hazard Warning Requirements*—See "Placarding and Other Hazard Warning Requirements."

• *Hazardous Substances and Wastes* (Also see "covered subjects" discussion on pp. 1–2.)

• Dicta in footnotes indicate that State's hazardous substances transportation regulations appeared to be valid under the HMTA because they regulated only transportation from points in Maryland [but decision overlooked RSPA's 1980 amendment of 49 CFR 171.1 applying HMR to intrastate transportation of hazardous substances and wastes]. *Browning-Ferris, Inc.* v. *Anne Arundel County, Maryland*, 292 Md. 136, 438 A.2d 269, 274 (1981).

• City requirement that driver transporting hazardous waste carry a hazardous waste manifest is same as HMR and is consistent. #IR–32.

• City definition of hazardous waste consisting of ambiguous and subjective standards and including non-HMR materials is inconsistent. #IR–32.

• City definition of hazardous gases different from that in HMR does not afford as much protection to the public and unreasonably burdens commerce, and therefore waiver of preemption is denied. WPD–1.

• *Incident Reporting*—See "Accident/Incident Reporting Requirements."

Inconsistency Rulings

• Local government need not obtain an RSPA inconsistency ruling before enforcing a local requirement. *National Tank Truck Carriers, Inc.* v. *Burke*, 608 F.2d 819, 821–2 (1st Cir. 1979); *City of New York* v. *Ritter Transportation, Inc.*, 515 F. Supp. 663, 668 (S.D. N.Y. 1981), *aff'd sub nom. National Tank Truck Carriers, Inc.* v. *City of New York*, 677 F.2d 270 (2d Cir. 1982); *Seaboard System R.R., Inc.* v. *Bankester, et al.*, 254 Ga. 455, 330 S.E. 2d 700, 705 (1985). *Contra* (based on doctrine of primary jurisdiction): *Consolidated Rail Corp.* v. *City of Dover*, 450 F. Supp. 966, 974 (D. Del. 1978).

• "Because the DOT authored the HMR, its determination of what constitutes an obstacle to the accomplishment or execution of those regulations is deserving of substantial deference." *Southern Pac. Transp. Co.* v. *Public Serv. Comm'n of Nevada*, 909 F.2d 352, 359 (9th Cir. 1990).

• DOT improperly issued an FR policy statement which had the effect of determining that Ohio's radioactive materials prenotification requirement was inconsistent with the HMTA—without affording Ohio the protections of the IR regulations. **State of Ohio* v. *U.S. Dept. of Transportation*, No. C81–1394 (N.D. Ohio Oct. 5, 1989).

Incorporation by Reference

• NRC regulations incorporated by reference in HMR provide basis for consistency comparison with state and local requirements. *IR–8(A).

• DOT encourages State adoption or incorporation by reference of the HMR as State law—and enforcement thereof. *IR–17; #IR–19; #IR–31; WPD–1.

• State and local requirements which incorporate by reference specific superseded Federal regulations are inconsistent. *IR–8; *IR–8(A); *IR–18. However, state and local governments may incorporate by reference specific CFR volumes of the HMR for a reasonable time (up to two years) after their publication, although a later-published HMR rule would control over an inconsistent state or local requirement. #IR–19.

• *Indemnification Requirements*—See "Insurance or Indemnification Requirements."

Indian Tribe Requirements

÷ HMTA likely preempts significant portions (if not all) of an Indian tribe ordinance requiring license for transport of "radioactive substances," broadly defining those substances, requiring 180-day advance application and a $1,000 fee, and providing broad discretion to Tribal Council whether to issue or deny the license. **Northern States Power Co.* v. *Prairie Island Mdewakanton Sioux Indian Community*, Civ. 3–91–783 (D. Minn. Dec. 23, 1991) (enjoining enforcement of ordinance), *appeal docketed* (8th Cir. Nos. 92–1240, 92–1476 1992). However, another court has held that Indian tribes are immune from suit in U.S. district court for actions allegedly preempted by the HMTA. **Public Serv. Co. of Colorado* v. *Shoshone-Bannock Tribes* (D. Idaho, No. 91–440–E EJL, Jan. 9, 1992), *appeal docketed* (9th Cir. No. 92–35206 1992].

• *Information/Documentation Requirements* (Also see "covered subjects" discussion at pp. 1–2 and "Shipping Paper Requirements," "Notice Requirements," and "Placarding and Other Warning Requirements.")

• Requirements for information or documentation in excess of Federal requirements create potential delay, constitute an obstacle to execution of the HMTA and the HMR, and thus are inconsistent. IR–2; IR–6; *IR–8; *IR–8(A); *IR–15; *IR–15(A); *IR–18; *IR–18(A); #IR–19; #IR19(A); *IR–21; #IR–26; *IR–27; #IR–28; *IR–30; **Chem-Nuclear Systems, Inc.* v. *City of Missoula*, No. 80–18–M (D. Mont. 1984); #*Southern Pac. Transp. Co.* v. *Public Serv. Comm'n of Nevada*, 909 F.2d 352 (9th Cir. 1990), *reversing* No. CV–N–86–444–BRT (D. Nev. 1988); **Colorado Pub. Utilities Comm'n* v. *Harmon*, 951 F.2d 1571 (10th Cir. 1991), *reversing* No. 88–Z–1524 (D. Colo. 1989). There is no *de minimis* exception to the "obstacle" test because thousands of jurisdictions could impose *de minimis* information requirements. *IR–8(A).

• "In summary, the HMTA and HMR provide sufficient information and documentation requirements for the safe transportation of hazardous materials; state and local requirements in excess of them constitute obstacles to implementation of the HMTA and HMR and thus are inconsistent with them." #IR–19, 52 FR 24404 at 24408. Quoted in #IR–28.

• Preliminary injunction was granted against City requirements to have decal and carry copy of permit. *American Trucking Ass'ns, Inc.* v. *City of Boston*, No. 81–628–MA, Fed. Carr. Cas. ¶82,938 (CCH) (D. Mass. 1981).

• Emergency response-related information requirements cannot be used as a prerequisite to hazardous materials transportation. #IR–19; *IR–27.

• State may require, as prerequisite to motor vehicle transport of hazardous materials, a driver's license or documentary evidence of hazardous materials training from its own domiciliaries but not from non-domiciliaries—except, on or after April 1, 1992, from non-domiciliaries not having hazardous materials endorsements on their commercial drivers' licenses. #IR–26; #IR–31; #IR–32.

• "DOT and NRC have determined what information and documentation requirements are needed for the safe transportation of radioactive materials, and state and local requirements going beyond them create confusion, impose burdens on transporters, are obstacles to the accomplishment of the HMTA's objectives, and thus are inconsistent." *IR–8(A), 52 FR 13000, 13004; quoted in *IR–27; quoted and applied to non-RAM in #IR–19, 52 FR 24404, 24408; see also *IR–15(A).

• "No matter what the form, any state or local requirement that asks for an additional piece of paper that supplies the same information as is required to be on the DOT shipping paper would be inconsistent with the requirements contained in the Hazardous Materials Regulations." IR–2, 44 FR 75566, 75571. Requirements for multiple submissions of same information are inconsistent. *IR–8(A).

• Requirements for RAM transportation route plans or other shipment-specific documentation or information are inconsistent. *IR–21. Also inconsistent are requirements for RAM shipment information on possible alternate routes, proposed means of conveyance, estimated date and time of departure, emergency response or recovery plans, attestations re safety inspections, certification of compliance with laws and regulations (latter being same as required on DOT shipping papers), telephone numbers, inspection reports, state permits, proof of driver training, proof of insurance, and equipment replacement or repair plans. *IR–8(A); *IR–15; *IR–15(A); *IR–27; **Colorado Pub. Utilities Comm'n* v. *Harmon*, 951 F.2d 1571 (10th Cir. 1991), *reversing* No. 88–Z–1524 (D. Colo. 1989).

• RAM information requirements identical to NRC's are consistent, but requirement for submission to state of NRC approvals and licenses is inconsistent. *IR–8; *IR–8(A); *IR–15; *IR–15(A).

• Requirement to carry proof of insurance is inconsistent. *IR–27; #IR–32; **Colorado Pub. Utilities Comm'n* v. *Harmon*, 951 F.2d (10th Cir. 1991), *reversing* No. 88–Z–1524 (D. Colo. 1989).

• Mere requirement in permit application of some information required on DOT shipping papers may not require preemption. Dicta in *National Tank Truck Carriers, Inc.* v.

Burke, 535 F. Supp. 509 (D. R.I. 1982), *aff'd*, 698 F.2d 559 (1st Cir. 1983).

• "The Secretary's regulations contain hundreds of information and documentation requirements, all of which have been established by the Secretary to ensure the health and safety of citizens in every jurisdiction. Congress specifically found that additional documentation and information requirements in one jurisdiction create "unreasonable hazards in other jurisdictions" and could confound "shippers and carriers which attempt to comply with multiple and conflicting regulations." 49 U.S.C. app. 1801. Colorado's regulations clearly exceed the information and documentation requirements set forth in the Secretary of Transportation's regulations governing the transportation of radioactive materials. The enactment of separate information and documentation requirements in even a few of the thousands of local jurisdictions across the country would lead to the multiplicitous regulations Congress sought to avoid by enacting the HMTUSA. Because Colorado's regulation forces transporters of hazardous materials to generate and maintain additional documentation and information, we conclude that it is likely to confound shippers and carriers and to increase the potential for hazards in other jurisdictions. Colorado's regulations simply do not further the Federal purpose of promoting safety through uniformity. Therefore, we hold that NT–8 is preempted. * * * In addition to obstructing Congress' objective that safety be achieved through uniformity, the expense of burdensome documentation and information requirements also is contrary to Congress' intent that regulation of hazardous materials transportation be as cost-effective as possible." **Colorado Pub. Utilities Comm'n* v. *Harmon*, 951 F.2d 1571 (10th Cir. 1991), *reversing* No. 88–Z–1524 (D. Colo. 1989).

Inspection Requirements (Also see "Permit Requirements")

• Inspection requirements relating to Federal and consistent requirements are encouraged by RSPA and are consistent. IR–2; *IR–6; *IR–15; *IR–17; #IR–20; *IR–27; #IR–31; **Colorado Pub. Utilities Comm'n* v. *Harmon*, No. 88–Z–1524 (D. Colo. 1989), *rev'd on other grounds*, 951 F.2d (10th Cir. 1991).

• Inspection requirements relating to inconsistent requirements are themselves inconsistent. #IR–20; *IR–21; *IR–21(A); *IR–27, *IR–30; #IR–31.

• State may not require carrier to retain inspection report in vehicle. Such an additional documentation requirement could create confusion and increase hazards. **Colorado Pub. Utilities Comm'n* v. *Harmon*, 951 F.2d 1571 (10th Cir. 1991), *reversing* No. 88–Z–1524 (D. Colo. 1989).

• Annual inspections for tank trucks hauling flammable and combustible liquids and compressed gasses, to determine the vehicles' general safety levels, are not preempted. However, waiver of preemption was denied with respect to inspections to enforce vehicles' conformity to local design requirements (truck size and tank design and capacity). WPD–1.

Insurance or Indemnification Requirements

• Hazardous materials transportation indemnification, bonding or insurance requirements differing from Federal requirements are inconsistent. *IR–10; *IR–11; *IR–15; *IR–15(A); *IR–18; *IR–18(A); #IR–25; #IR–31. (See also *IR–13; *IR–14.) State may not require proof of insurance meeting the Federal requirements. **Colorado Pub. Utilities Comm'n* v. *Harmon*, 951 F.2d (10th Cir. 1991), *reversing* No. 88–Z–1524 (D. Colo. 1989).

• The absence of a bonding, insurance, or indemnity requirement in the HMR "is a reflection of OHMT's determination that no such requirement is necessary and that any such requirement imposed at the state or local level is inconsistent with the HMR." #IR–25, 54 FR 16308, 16311. "[N]o such requirement is necessary—particularly because 49 CFR 387.7 and 387.9 already require insurance or surety bonds of between $1,000,000 and $5,000,000 for motor carriers transporting hazardous wastes, hazardous substances and other hazardous materials." *Ibid.*

• "The indemnification level established through the HMR, coupled with the indemnification provisions of the Price-Anderson Act (42 U.S.C. 2210), provides the exclusive standard for radioactive materials transportation indemnification. They have totally occupied that field, and any state or local bond, insurance or indemnification requirement not identical to the HMR requirement is an obstacle to the accomplishment of the objectives of the HMTA and the HMR." *IR–15(A), 52 FR 13062, 13063.

• Requirement to carry proof of insurance is inconsistent. #IR–32.

Labeling of Hazardous Materials—See "covered subjects" discussion on pp. 1–2.

Land Use Restrictions

• Regulations which apply only to transportation activities are not types of non-transportation land use restrictions which might be consistent. #IR–19; see IR–16.

Language of Requirements (Also see "Effect of Requirements.")

• Actual language of state and local requirements, rather than later statements of intent, are controlling. *IR–8(A), IR–16, #IR–19(A), unless there is a demonstrated actual practice to the contrary. *IR–17.

Licensing—See "Information/Documentation Requirements."

Loading and Unloading (Also see "covered subjects" discussion on pp. 1–2 and "Smoking limitations".)

• State and local requirements for hazardous materials loading and unloading incidental to transportation (including loading and unloading by consignors and consignees) must be consistent with the HMTA and HMR. Such requirements are inconsistent if they differ from, or add to, the HMR requirements—particularly if they are subjective. #IR–19; #IR–19(A); #IR–28; #*Southern Pac. Transp. Co.*, v. *Public Serv. Comm'n of Nevada*, 909 F.2d 352 (9th Cir. 1990), *reversing* No. CV–N–86–444–BRT (D. Nev. 1988).

• Despite DOT's extensive regulation of loading, unloading, transfer and storage incidental to the transportation of hazardous materials, the Nevada regulations require a carrier to obtain an annual permit prior to engaging in these activities within the state of Nevada. The Nevada regulations, thus, create a separate regulatory regime for these activities, fostering confusion and frustrating Congress' goal of developing a uniform, national scheme of regulation. The resulting confusion is exacerbated by the fact that the Nevada regulations only apply to some of the hazardous materials covered by the HMTA and HMR and not to others." #*Southern Pac. Transp. Co.*, v. *Public Serv. Comm'n of Nevada*, 909 F.2d 352, 358 (9th Cir. July 18, 1990), *reversing* No. CV–N–86–444–BRT (D. Nev. 1988).

• Waiver of preemption was granted as to a local transfer requirement, which restricted the emergency transfer of flammable or combustible liquids from a tank or platform truck to vehicles with Fire Department permits or to those otherwise authorized and when authorized by a Fire Department representative. WPD–1.

• Waiver of preemption was granted for a local requirement that gasoline be discharged by gravity into underground tanks, because such a requirement affords an equal or greater level of protection to the public as the HMR and does not unreasonably burden commerce. However, waiver of

preemption was denied as to other flammable liquids and to the discharge of gasoline into tanks which are not underground. WPD–1.

Marking of Hazardous Materials—See "covered subjects" discussion on pp. 1–2.

Mode or Means of Transportation—See "Prohibitions of Hazardous Materials Transportation."

Monitoring of Shipments (Also see "Inspection Requirements.")

• Monitoring of hazardous materials shipments by state officials in consistent. *IR–17. However, a carrier cannot be required to stop and wait for state officials assigned to monitor shipments. *IR–15.

Motor Carrier Registration and Permitting Forms—See discussion of section 1819 on p. 2.

Non-Regulatory Actions—See "Statements of Intent to Regulate."

Notice Requirements (Also see "Accident/Incident Reporting Requirements", "Delays of Transportation", and "Information/ Documentation Requirements.")

• Advance notice requirements of hazardous materials transportation generally are inconsistent. IR–6; *IR–8(A); *IR–16; #IR–28; *IR–30; #IR–32.

• "Through its rulemaking process and related studies, DOT has determined what prenotification (including information, documentation and certification) requirements are necessary for the safe transportation of radioactive materials. In the process of analyzing rulemaking comments and studies it has commissioned or examined, DOT has determined what prenotification requirements are not necessary. This field has been totally occupied by the HMR. State and local provisions either authorizing less prenotification or requiring greater prenotification than the HMR, therefore, constitute obstacles to the accomplishment and execution of the objectives of the HMTA and the HMR, are inconsistent, and are preempted." *IR–8(A), 52 FR 13000, 13005.

• Local requirements for advance notice of hazardous materials transportation have potential to delay and redirect traffic and thus are inconsistent. IR–6; #IR–32.

• Notice requirements re RAM shipment schedule changes identical to NRC regulations (incorporated by HMR) are consistent. *IR–8.

• Notice requirements re RAM shipment schedule or changes thereto different from NRC regulations (incorporated by HMR) are inconsistent. *IR–14; *IR–15, *IR–16; *IR–18; *IR–18(A); *IR–27; *IR–30; #IR–32; *Chem-Nuclear Systems, Inc. v. City of Missoula, No. 80–18–M (D. Mont. 1984).

• "The State's prenotification requirements differ from, and are more burdensome than, the radioactive materials prenotification requirements in §§ 173.22 and 117.825 of the HMR and 10 CFR 71.97 and 73.97 (NRC regulations incorporated by reference in § 173.22 of the HMR). [Its rule] requires more information about more shipments and thereby creates confusion and undermines the likelihood of proper compliance with the HMR prenotification requirements. Therefore, [it] is inconsistent with the HMR to the extent that it exceeds NRC requirements by requiring greater prenotification concerning non-spent fuel HRCQ radioactive materials shipments." *IR–27, 54 FR 16328, 16331. *Affirmed* in *Colorado Pub. Utilities Comm'n v. Harmon, 951 F.2d 1571 (10th Cir. 1991), *reversing* No. 88–Z–1524 (D. Colo. 1989).

• "Congress expressly found that state 'notification' requirements that 'vary from Federal laws and regulations' create 'unreasonable hazards' and pose a 'serious threat to public health and safety.' 49 U.S.C. app. 1801. Colorado's prenotification requirement varies from Federal law, poses a threat to uniformity, and thereby threatens public safety and obstructs the purpose and objective of Congress and the Secretary." *Colorado Pub. Utilities Comm'n v. Harmon, 951 F.2d 1571 (10th Cir. 1991), *reversing* No. 88–Z–1524 (D. Colo. 1989).

"Otherwise Authorized by Federal Law"

• A State requirement is not "otherwise authorized by Federal law"—and thus not preempted under section 1811(a) of the HMTA—merely because it is not preempted by another Federal statute. *Colorado Pub. Utilities Comm'n v. Harmon, 951 F.2d 1571 (10th Cir. 1991), *reversing* No. 88–Z–1524 (D. Colo. 1989).

Operations Suspension/ Requirements—See "Traffic Controls/ Regulations."

Packaging Design and Construction Requirements (Also see "covered subjects" discussion on pp. 1–2.)

• Packaging and cargo containment design, construction, testing, accessories, equipment, certification and permit requirements, including those vesting discretionary authority in state or local officials, are inconsistent. IR–2, *IR–8; *IR–8(A); *IR–18; *IR–18(A); IR–22; *National Paint & Coatings Ass'n, Inc. v. City of New York*, No. CV–4525 (ERK) (E.D. N.Y. 1985).

• "State and local governments may not issue requirements that differ from or add to Federal ones with regard to packaging design, construction and equipment for hazardous materials shipments subject to Federal regulations." IR–2, 44 FR 75566 at 75568.

• Hazardous gas container-testing requirements are inconsistent. *National Tank Truck Carriers, Inc. v. City of New York*, 677 F.2d 270 (2d Cir. 1982).

• RAM container testing and certification requirements are inconsistent. *IR–8; *IR–8(A); *IR–15.

• Requirement for frangible shank-type lock on tank trailers carrying LNG or LPG is inconsistent since DOT comprehensively regulates cargo tank containment. IR–2.

• Initially, plaintiffs failed to demonstrate "obstacle" test violations or to obtain summary judgment enjoining city cargo containment system regulations, including requirements that flammable liquid cargo tanks be constructed of steel, not aluminum, and contain compartments and baffles, that flammable liquids not be transported in semi-trailers nor gases or combustible liquids in full trailers, and that trucks be inspected annually and carry a permit evidencing that inspection and imposing capacity limits on tank truck shipments. *National Paint & Coatings Ass'n, Inc. v. City of New York*, No. CV 4525 (ERK) (E.D. N.Y. 1985). However, those requirements were preempted by the packaging "covered subject" provision of HMTUSA. *Ibid.*, Oct. 18, 1991; WPD–1.

Penalties (Also see "Enforcement and Violations Provisions.")

• Penalties (such as fines, imprisonment or civil penalties) for violating consistent state or local rules are consistent unless they are so extreme or arbitrarily applied to reroute or delay shipments; mere differences in amount do not undermine consistency. IR–3; *IR–27, #IR–28.

• Penalties (such as fines, imprisonment or civil penalties) for violating inconsistent state or local rules are themselves inconsistent. *IR–18; *IR–18(A); *IR–27; #IR–28; *IR–30; *Jersey Cent. Power & Light Co. v. Township of Lacey, 772 F.2d 1103 (3d Cir. 1985), *cert. denied*, 475 U.S. 1013 (1986).

• The absence of a "knowingly" requirement for imposition of a civil penalty is inconsistent because it promotes strict or absolute liability.

Packing/Repacking of Hazardous Materials See "covered subjects" discussion on pp. 1–2.

Permit Requirements (Also see "covered subjects" discussion on pp. 1–2, "Approval Requirements", "Fee Requirements", and "Inspection Requirements")

• Permit *per se* is not inconsistent; its consistency depends upon its requirements. IR–2; IR–3; #IR–20; #IR–28; *New Hampshire Motor Transport Ass'n* v. *Flynn*, 751 F.2d 43 (1st Cir. 1984); **Colorado Pub. Utilities Comm'n* v. *Harmon*, No. 88–Z–1524 (D. Colo. 1989), *rev'd on other grounds*, 951 F.2d 1571 (10th Cir. 1991).

• State permitting system which prohibits or requires certain transportation activities depending upon whether a permit has been issued (regardless of whether the activity is in compliance with the HMTA), applies to selected hazardous materials, involves extensive information and documentation requirements and contains considerable discretion as to permit issuance, is inconsistent. "Cumulatively, these factors constitute unauthorized prior restraints on shipments of nonradioactive hazardous materials that are presumptively safe based on their compliance with Federal regulations." #IR–19, 52 FR 24404, 24407. Affirmed in #IR–19(A) and #*Southern Pac. Transp. Co.* v. *Public Serv. Comm'n of Nevada*, 909 F.2d 352 (9th Cir. 1990), *reversing* No. CV–N–88–444–BRT (D. Nev. 1988).

• Local permit for hazardous materials storage is inconsistent with respect to storage incidental to transportation because of its burdensome information and documentation requirements, its discretionary nature, and its delay-inducing tendencies. #IR–28.

• Certain over-the-phone permits for transportation of hazardous gases are consistent. *National Tank Truck Carriers, Inc.* v. *City of New York*, 677 F.2d 270 (2d Cir. 1982).

• Permit requirements for each shipment involving application 4 hours to 2 weeks prior to shipment, carrying of permit on vehicle and "an additional piece of paper that supplies the same information as is required to be on the DOT Shipping paper" involve high probability of transportation delay and thus are inconsistent. IR–2.

• Local RAM transportation permit was consistent—prior to DOT's issuance of HM–164 re routing of certain RAM. *IR–1.

• Requirements implementing, inextricably related to, or "fleshing out," inconsistent permitting requirements are themselves inconsistent. *IR–21; *IR–21(A).

• If permit system is consistent, requirements to carry permit and display decal are consistent. IR–3. *But* requirement to display permit decal was held inconsistent. *American Trucking Ass'ns* v. *City of Boston*, C.A. 81–628–MA, Fed. Carr. Cas. ¶82,938 (CCH) (D. Mass. 1981).

• Since HMTA and HMR have almost completely occupied the field of RAM transportation safety, state and local requirements are limited to: (1) Traffic control or restrictions applying to all traffic, (2) designation of preferred routes under 49 CFR 177.825, (3) adoption of Federal or consistent requirements, (4) enforcement of consistent requirements or those for which preemption has been waived, and (5) imposition of reasonable transit fees to finance those enforcement activities and emergency response preparedness. Thus, RAM transportation permits generally are inconsistent. *IR–8; *IR–8(A); *IR–10; *IR–11; *IR–12; *IR–13; *IR–15; IR–18; *IR–18(A); #IR–19; #IR–19(A); #IR–20; *IR–21; *IR–21(A); *IR–27. **Colorado Pub. Utilities Comm'n* v. *Harmon*, 951 F.2d 1571 (10th Cir. 1991), *reversing* No. 88–Z–1524 (D. Colo. 1989).

• HMTA likely preempts significant portions (if not all) of an Indian tribe ordinance requiring license for transport of "radioactive substances," broadly defining those substances, requiring 180-day advance application and a $1,000 fee, and providing broad discretion to Tribal Council whether to issue or deny the license. **Northern States Power Co.* v. *Prairie Island Mdewakanton Sioux Indian Community*, Civ. 3–91–783 (D. Minn. Dec. 23, 1991) (enjoining enforcement of ordinance), *appeal docketed* (8th Cir. 1992).

• Permit requirement calling for annual inspections to determine trucks' general safety levels is not preempted, but waiver of preemption was denied with regard to the enforcement of preempted local tank truck design and capacity requirements. WPD–1.

Persons Subject to Requirements (Also see "Transportation Subject to Requirements.")

• Definitions of persons subject to state or local requirements which include fewer persons than HMR minimize inconsistency possibilities and are themselves consistent. *IR–18.

Placarding and Other Hazard Warning Requirements (Also see "covered subjects" discussion on pp. 1–2.)

• Placarding and other hazard warning requirements are inconsistent if they are in addition to or different from Federal placarding requirements. IR–2; IR–3; IR–24; *IR–30; *Kappelmann* v. *Delta Air Lines, Inc.*, 539 F.2d 165 (D.C. Cir. 1976), *cert. denied*, 429 U.S. 1061 (1977); *National Tank Truck Carriers Inc.* v. *City of New York*, 677 F.2d 270 (2d Cir. 1982). Such requirements are consistent if they do not differ from the HMR. #IR–31; #IR–32.

• "Hazard warning systems are another area where [OHMT] perceives the Federal role to be exclusive. * * * Additional, different requirements imposed by States or localities detract from the DOT systems and may confuse those to whom the DOT systems are meant to impart information." IR–2, 44 FR 75565, 75568.

• Requirement for illuminated rear bumper sign conflicts with DOT lighting regulations, would divert attention from DOT placards and this is inconsistent. IR–2.

• Requirements for placards and identification of products are inconsistent. IR–3; *American Trucking Ass'ns* v. *City of Boston, supra.*

• Requirement to display permit decal is inconsistent. *American Trucking Ass'ns* v. *City of Boston, supra.*

• "It is OHMT's view that the HMR placarding provisions do completely occupy the field and, therefore, preempt all state and local placarding and warning sign requirements for hazardous materials transportation which are not identical to the Federal requirements. This is true with respect to requirements applying solely to pickups and deliveries, as well as to requirements applying to through-traffic, because all such non-identical requirements create confusion and undermine the uniform system of hazard communication necessary for the safe transportation of hazardous materials. Transportation viewed as being a mere pickup or delivery by one jurisdiction actually may be just the beginning or end of multi-state transportation through numerous local jurisdictions." IR–24, 53 FR 19848, 19850.

• But plaintiffs, prior to IR–24, failed to obtain summary judgment or make sufficient showing that Federal placarding regulations were intended to occupy field and preempt city hazard warning sign requirements with respect to local deliveries. *National Paint & Coatings Ass'n, Inc.* v. *City of New York*, No. 84–4525 (E.D. N.Y. 1985).

• Waiver of preemption was denied for local requirement mandating color and size of permanent "GASOLINE" lettering on trucks used to transport gasoline. Although not in conflict with the HMR, the requirement would mandate the maintenance of a separate fleet of trucks to transport gasoline and lead to an increase in the number of trips required. Further, the requirement would unreasonably burden commerce while not affording a greater level of public protection. WPD–1.

Prenotification Requirements—See "Notice Requirements."

Prohibitions of Hazardous Materials Transportation (Also see "Permit Requirements.")

• Prohibitions of hazardous materials transportation generally are inconsistent. IR–3; IR–3(A); IR–10; *IR–16; #IR–20.

• Power to ban, rather than to channel or guide, hazardous materials traffic is exclusively Federal. "A unilateral local ban is a negation, rather than an exercise, of local responsibility, since it isolates the local jurisdiction from the risks associated with the commercial life of the nation." IR–3(A), 47 FR 18457, 18458 (Apr. 29, 1982).

• Town order requiring railroad to remove its railcars containing vinyl chloride from Town is inconsistent. *Consolidated Rail Corp.* v. *Hancock*, No. 79–0983–MA (D. Mass. 1979).

• City ban on hazardous materials pickups and deliveries by non-city-permitted vehicles is inconsistent. Likewise inconsistent is a City ban on fueling or stopping of hazardous materials through-traffic. IR–23.

• "A State or local government may not resolve the problem by effectively exporting it to another jurisdiction." *"Nine-Pack" Preamble, citing *Kassel* v. *Consolidated Freightways*, 4 50 U.S. 662 (1981) and IR–3.

• But local prohibition on liquefied gases transportation through city unless no practical alternative route existed is consistent. *National Tank Truck Carriers, Inc.* v. *City of New York*, 677 F.2d 270 (2d Cir. 1982), *aff'g City of New York* v. *Ritter Transportation, Inc.*, 515 F. Supp. 663 (S.D. N.Y. 1981).

• Prohibition of RAM or explosives transportation, including storage incidental thereto, is inconsistent. *IR–16; #IR–20; *IR–30.

• *De Facto* prohibitions are inconsistent. *IR–10.

• Prohibition of RAM transportation which RSPA has excepted from HMR requirements is inconsistent. #IR–20.

• Inadequacy of emergency response capabilities cannot provide basis for prohibiting transportation. *IR–18; *IR–18(A).

• To the extent it prohibits rail, air or water transportation of fireworks, State regulation allowing fireworks delivery by motor vehicle is inconsistent and thus is preempted. *South Dakota Dep't of Public Safety ex rel: Melgaard* v. *Haddenham*, 339 N.W.2d 786 (S.D. 1983).

• Similarly, City requirement that it determine the safest means of transportation constitutes an inconsistent ban on transportation by other modes of transportation. *IR–30. The HMTA does not require or authorize the mandatory selection of a single "safest" mode of transportation. *City of New York* v. *U.S. Department of Transportation*, 715 F.2d 732 (2d Cir. 1983), *cert. denied*, 465 U.S. 1055 (1984); *IR–30.

• But an otherwise consistent requirement is not inconsistent because it applies only to certain modes of transportation. *IR–18.

• County ordinance prohibiting spent fuel or radioactive waste transportation into County for storage on nuclear power plant sites is inconsistent and thus preempted. **Jersey Cent. Power & Light Co.* v. *Township of Lacey*, 772 F.2d 1103 (3d Cir. 1985), *cert. denied*, 475 U.S. 1013 (1986).

Radio Requirements—See "Communications Requirements."

Railroad-Related Requirements

• State or local hazardous materials railroad transportation requirements may be preempted under the Federal Railroad Safety Act (FRSA), 49 U.S.C. app. 434, without consideration of whether they might be consistent under the HMTA. *CSX Transportation, Inc.* v. *City of Tallahoma*, No. 4–87–47 (E.D. Tenn. 1988); *CSX Transportation, Inc.* v. *Public Utilities Comm'n of Ohio*, 701 F. Supp. 608 (D. Ohio 1988), affirmed, 901 F.2d 497 (6th Cir. 1990), *cert. den.* 111 S. Ct. 781 (1991). Court decisions exclusively concerning FRSA preemption are irrelevant to HMTA preemption issues. #IR–31.

• State definition of "train" which results in regulation of transportation specifically exmpted from regulation by the HMR is inconsistent. #IR–31.

Reporting Requirements—See "Accident/Incident Reporting Requirements."

Ripeness of IR Application (Also see "Standing To Apply for IR.")

• Pendency of a judicial proceeding concerning the same issues as are in an IR application does not bar the issuance of an IR but instead increases possible usefulness of an IR. *IR–27; *IR–30.

Routing Requirements (Also see highway routing discussion on p. 2 and "Delays of Transportation," "Prohibitions of Hazardous Materials Transportation" and "Traffic Controls/ Regulations.")

• Without adequate safety justification and appropriate coordination with, and concern for safety of people in, adjoining affected jurisdictions, routing restrictions (including time and weather restrictions) are inconsistent—particularly if they result in increased transit times. *IR–1; IR–2; IR–3; IR–3(A); *IR–10; *IR–11; *IR–14; *IR–16, #IR–20; IR–23; #IR–32.

• Local routing restrictions prohibiting transport of liquefied gases through city except to areas for which no practical interstate or major highway alternative route exists are consistent. *National Tank Truck Carriers, Inc.* v. *City of New York*, 677 F.2d 270 (2d Cir. 1982), *aff'g City of New York* v. *Ritter Transportation, Inc.*, 515 F. Supp. 663 (S.D. N.Y. 1981).

• State preferred route designations for highway route controlled quantity RAM are consistent if in accordance with 49 CFR 177.825(b).

• "* * * the Department, through promulgation of 49 CFR 177.825, has established a near total occupation of the 'field of routing * * * requirements relating to the transportation of radioactive materials. Thus, state and local radioactive materials transportation routing * * * requirements other than (1) those identical to Federal requirements or (2) state designated alternate routes under 49 CFR 177.825(b), are likely to be inconsistent and thus preempted under section 112(a) of the HMTA." *IR–8(a), 52 FR 13000, 13003.

• Local routing restrictions re RAM are inconsistent if they prohibit transportation on routes authorized by 49 CFR part 177 or authorized by a state routing agency consistent with that part. *IR–18; *IR–18(A); #IR–20.

• Suspension or regulation of spent nuclear fuel shipments on *non*-Interstate highways (not needed for access to or from Interstate or preferred routes) is consistent. *IR–7.

• Routing restrictions on highway route controlled quantity RAM not in accordance with 49 CFR 177.825(b), which authorizes State (not local) designation of certain preferred routes, are inconsistent. *IR–8(A); *IR–16; *IR–18; *IR–18(A); IR–20; *IR–21; *IR–30; #IR–32; **Jersey Cent. Power Light Co.* v. *State of New Jersey*, No. 84–5883 (D. N.J., Dec. 27, 1984), *appeal dismissed as moot*, 772 F.2d 35 (3d Cir. 1985).

• Routing restrictions re non-highway route controlled quantity RAM required by 49 CFR part 172 to be placarded are inconsistent unless identical to 49 CFR 177.825(a). *IR–18; *IR–18(A); *IR–21; *IR–30; #IR–32.

• Local highway routing restrictions on other types of RAM are inconsistent. *IR–30; #IR–32

• Non-highway routing restrictions on RAM are inconsistent. *IR–30.

• "* * * Congress' dual purposes in enacting the HMTA were: (1) To protect the Nation against the risks inherent in hazardous materials transportation; and (2) to prevent a patchwork of varying and conflicting State and local regulations. Commissioners' Ordinance No. 0–31–80 impedes both purposes. By delaying hazardous materials shipments

and causing traffic to be diverted from established routes, the Ordinance increases exposure to the risks inherent in hazardous materials transportation; and to the extent that the Ordinance results in the diversion of hazardous materials traffic into adjacent jurisdictions, it constitutes a routing requirement adopted without consideration of the safety impacts on other affected jurisdictions. To the extend that the Ordinance creates a precedent for the establishment of independent and uncoordinated local prenotification systems, it contributes to the creation of the regulatory patchwork which Congress intended to preclude." IR–6, 48 FR 760, 766.

• Routing requirements linked to inconsistent equipment requirements are inconsistent. IR–22; IR–23.

Sanctions—See "Enforcement and Violations Provisions" and "Penalties."

Segregation and Separation Requirements—See "Storage Provisions."

Shipping Paper Requirements (Also see "covered subjects" discussion on pp. 1–2 and "Information/Documentation Requirements.")

• "Shipping papers" and "shipping documents" are interchangeable terms. **Colorado Pub. Utilities Comm'n* v. *Harmon*, 951 F.2d 1571 (10th Cir. 1991), *reversing* No. 88–Z–1524 (D. Colo. 1989).

• Virtually identical shipping paper requirements (to those of the HMR) generally are consistent. #IR–31.

• Additional or different shipping paper requirements generally are inconsistent. IR–4, IR–4(A). State shipping document requirements not substantively the same as HMR are preempted. **Colorado Pub. Utilities Comm'n* v. *Harmon*, 951 F.2d 1571 (10th Cir. 1991), *reversing* No. 88–Z–1524 (D. Colo. 1989).

• Requirement for red or red-bordered shipping papers for intrastate hazardous materials shipments is an obstacle to uniform national system and thus is inconsistent. IR–4.

• Requirements for certification to state of shipment's compliance with law are redundant, constitute obstacles to HMTA, and thus are inconsistent. *IR–8; *IR–15; *IR–21.

• Requirement to carry State Patrol phone number with shipping papers is not "substantively the same" and is preempted. **Colorado Pub. Utilities Comm'n* v. *Harmon*, 951 F.2d 1571 (10th Cir. 1991), *reversing* No. 88–Z–1524 (D. Colo. 1989).

Smoking Limitations

• Local smoking ban in vicinity of motor vehicle carrying flammable or combustible liquids or flammable gases, which is more extensive than the HMR, is not preempted. WPD–1.

Speed Limit—*See* "Traffic Controls/Regulations."

Standing To Apply for IR (Also see "Ripeness of IR Application.")

• OHMS liberally construes its IR application threshold requirements and applies a broad interpretation of the "person affected" standard for requesting IR's, which are intended to resolve HMTA preemption issues expeditiously and inexpensively. *IR–21; #IR–32. Signing of contract to comply with local requirements does not preclude applying for inconsistency ruling. #IR–28.

Statements of Purpose or of Intent To Regulate

• State or local statements of purpose or of intent to regulate are consistent. *IR–9; *IR–12; *IR–15; *IR–18; *IR–30.

State Requirements

• Local requirements for compliance with otherwise consistent state requirements are consistent. IR–3.

Storage Provisions

• State or local prohibition of hazardous materials storage incidental to transportation without a state or local permit at places where, and for times when, the HMR allow such storage is inconsistent. #IR–19; #IR–19(A); #IR–28; #*Southern Pac. Transp. Co.* v. *Public Serv. Comm'n of Nevada*, 909 F.2d 352 (9th Cir. 1990), *reversing* No. CV–N–86–444–BRT (D. Nev. 1988).

• City prohibition of hazardous waste storage is inconsistent as applied to storage incidental to transportation. #IR–32.

• City 20-car limitation on unloaded or loaded butane railcars at a site is inconsistent. *Consolidated Rail Corp.* v. *City of Bayonne*, 724 F. Supp. 320 (D. N.J. 1989).

• "In summary, the HMR contain a comprehensive series of regulations relating to the storage of hazardous materials incidental to transportation by rail. These regulations authorize or prohibit specific types of hazardous materials storage under specified circumstances. Creation by the PSC of a separate regulatory regime for rail transport-related storage of hazardous materials raises the spectre of widespread confusion. The PSC regulations are so open-ended and discretionary that they authorize the PSC to approve storage prohibited by the HMR or prohibit storage authorized by the HMR." #IR–19, 52 FR 24404, 24410.

• "State or local imposition of containment or segregation requirements for the storage of hazardous materials incidental to the transportation thereof different from, or additional to those in, § 177.848(f) of the HMR create confusion concerning such requirements and the likelihood of noncompliance with § 177.848(f)." #IR–28, 55 FR 8894, 8893.

• "Despite DOT's extensive regulation of loading, unloading, transfer and storage incidental to the transportation of hazardous materials, the Nevada regulations require a carrier to obtain an annual permit prior to engaging in these activities within the state of Nevada. The Nevada regulations, thus, create a separate regulatory regime for these activities, fostering confusion and frustrating Congress' goal of developing a uniform, national scheme of regulation. The resulting confusion is exacerbated by the fact that the Nevada regulations only apply to some of the hazardous materials covered by the HMTA and HMR and not to others." #*Southern Pac. Transp. Co.*, v. *Public Serv. Comm'n of Nevada*, 909 F.2d 353 (9th Cir. 1990), *reversing* No. CV–N–86–444–BRT (D. Nev. 1988).

Time Restrictions (Also see "Routing Requirements" and "Delays of Transportation.")

• Time restrictions are a subset of routing restrictions. IR–3. Thus, without adequate safety justification and appropriate coordination with adjoining affected jurisdictions, time restrictions, except as to in-city pickup and deliveries, are inconsistent. IR–3(A); IR–23; #IR–32.

• Statewide prohibition on hazardous materials carriage between 7–9 a.m. and 4–6 p.m. on weekdays resulted in delay and are inconsistent. IR–2; *National Tank Truck Carriers, Inc.* v. *Burke*, 535 F. Supp. 509 (D. R.I. 1982) *aff'd*, 698 F.2d 559 (1st Cir. 1983). Also inconsistent is statewide prohibition on RAM transportation other than during non-holiday weekdays from 9 a.m. to 4 p.m. *IR–21.

• Citywide rush-hour curfew (no transport between 6–10 a.m. and 3–7 p.m.) on liquefied gas transportation is consistent. *National Tank Truck Carriers, Inc.* v. *City of New York*, 677 F.2d 270 (2d Cir. 1982), *aff'g City of New York* v. *Ritter Transportation Co.*, 515 F. Supp. 663 (S.D. N.Y. 1981).

• City prohibition of hazardous materials transportation in downtown area between 6 a.m. and 8 p.m. on weekdays is consistent insofar as it applies to in-city pickups and deliveries. IR–3.

• No decision on consistency of 6–10 a.m. and 3–7 p.m. bridge and tunnel

prohibition is possible without information on safety justification, coordination with other jurisdictions, and delays or diversions of hazardous materials. #IR–20.

• Restriction of RAM transportation to May-October period and prohibition of holiday or inclement weather shipments is inconsistent. *IR–14.

• County's assertion of unfettered authority to change dates, routes and times of hazardous materials shipments is inconsistent. *IR–18.

• Time restrictions linked to inconsistent routing requirements are inconsistent. IR–22; IR–23.

• City restriction of hazardous materials through-traffic on weekdays to 10 a.m.–3 p.m. and 7 p.m.–6 a.m. for explosives and "prohibited materials" and to 9 a.m.–4 p.m. and 6 p.m.–7 a.m. for other "hazardous cargo" is inconsistent because not based on adequate safety analysis or preceded by consultations with all affected jurisdictions. IR–23. City prohibition of hazardous waste transportation between 6:30 a.m. and 8:30 a.m. and 2 and 3 p.m. is inconsistent for same reason. #IR–32.

Traffic Controls/Regulations (Also see "Routing Requirements.")

• So long as reasonably administered on a case-by-case basis, the local authority to restrict or suspend operations when road, weather, traffic or other hazardous conditions or circumstances warrant is consistent. IR–3; *IR–15(a); #IR–20; *American Trucking Ass'ns* v. *City of Boston, supra; National Tank Truck Carriers, Inc.* v. *Burke*, 535 F. Supp. 509 (D.R.I. 1982), *aff'd*, 698 F.2d 559 (1st Cir. 1983).

• Local traffic controls are presumed to be valid. #IR–20; IR–23; #IR–32. This includes speed limits. #IR–32.

• "To the extent that nationwide regulations do not adequately address a particular local safety hazard, state and local governments can regulate narrowly for the purpose of eliminating or reducing the hazard." IR–2, 44 FR 75565, 75568.

• Radioactive materials may not be singled out for different types of control than hazardous materials generally, nor may controls conflict with carrier discretion and responsibility provided by the HMR. *IR–15(A).

• Requirement to comply with lawful orders, instructions and directives of authorized bridge personnel is consistent. #IR–20.

• Local "rules of road" restrictions on vehicles carrying hazardous materials are consistent. Thus, requirements for separation distances between moving or parked vehicles carrying hazardous materials which do not create hazards or unreasonable delays are consistent. IR–3; #IR–20; #IR–32.

• Local provision that carriers must use major city thoroughfares and that otherwise Federal motor carrier safety routing rules (49 CFR 397.9(a)) apply is consistent. IR–3. Likewise consistent is a local regulation requiring hazardous materials through-traffic to avoid congested areas so far as practicable and to use highway exits as close as possible to final destination. IR–23.

• Weight restriction applying only to hazardous materials and their containers, not to entire vehicles and contents, is not a *bona fide* traffic control measure and is inconsistent. #IR–20.

• State order prohibiting railroad cars carrying hazardous materials from being cut off in motion, struck by other cars moving under their own momentum or coupled into with unnecessary force is inconsistent and preempted by the HMTA, HMR, and the Federal Railroad Safety Act. *Atchison, Topeka and Santa Fe R.R. Co.* v. *Illinois Commerce Comm'n*, 453 F. Supp. 920 (N.D. Ill. 1977).

• Traffic controls linked to inconsistent equipment requirements are inconsistent. IR–22; IR–23.

Training Requirements

• "[S]tate may impose more stringent training requirements [than HMR] on motor carrier operators so long as those requirements do not directly conflict with the HMR requirements and apply only to individuals domiciled in that state and on or after April 1, 1992 to individuals domiciled in other states who do not have hazardous materials endorsements on their CDL's [commercial drivers' licenses]." #IR–26, 54 FR 16314, 16322. This principle applies to RAM and other hazardous materials. *Ibid.*

• "* * * the Department, through promulgation of 49 CFR 177.825, has established a near total occupation of the field of training requirements relating to the transportation of radioactive materials. Thus, state and local radioactive materials transportation * * * training requirements other than * * * those identical to Federal requirements * * * are very likely to be inconsistent and thus preempted under section 112(a) of the HMTA." *IR–8(A), 52 FR 13000, 13003; quoted and relied upon in *IR–27 and **Colorado Pub. Utilities Comm'n* v. *Harmon*, 951 F.2d 1571 (10th Cir. 1991), *reversing* No. 88–Z–1524 (D. Colo. 1989). However, see preceding paragraph.

• State requirement for submission of company's driver training program, including provisions for RAM and mountain driving training, as prerequisite to certain RAM transportation is inconsistent. *IR–27; **Colorado Pub. Utilities Comm'n* v. *Harmon*, 951 F.2d 1571 (10th Cir. 1991), *reversing* No. 88–Z–1524 (D. Colo. 1989).

Transportation Subject to Requirements (Also see "Persons Subject to Requirements.")

• Where a specific decision has been made in the HMR that certain transportation in commerce of hazardous materials should not be subject to the general requirements of the HMR, state or local regulation of that transportation is inconsistent with the HMR under the 'obstacle' test * * *" #IR–31, 55 FR 25572, 25581.

Tunnel Restrictions

• Except for RAM, State and local regulations regarding the kind, character or quantity of hazardous material permitted to be carried through any urban vehicular tunnel used for mass transportation are consistent. 49 CFR 177.810. But prohibition on RAM transportation through a tunnel is inconsistent. #IR–20.

Unloading—See "covered subjects" discussion on pp. 1–2 and "Loading and Unloading."

Waiver of Preemption

• Under HMTA prior to amendment by HMTUSA, if non-Federal requirement afforded an equal or greater level of protection to the public than the HMTA or HMR, and the requirement did not unreasonably burden commerce, such requirement was not preempted. Therefore, RSPA was obliged to issue a "non-preemption determination" if those two tests were met. **New York City* v. *U.S. Department of Transportation*, 87 Civ. 1443 (MGC) (S.D.N.Y. 1988).

• After amendment by HMTUSA, DOT has discretion to grant a waiver of preemption where the non-Federal requirement affords an equal or greater level of protection to the public than HMTA or HMR, and the requirement does not unreasonably burden commerce. 49 app. U.S.C. 1811(b); WPD–1.

Weight Restrictions—See "Traffic Controls/Regulations."

INCONSISTENCY RULINGS

Ruling	Applicant	Subject	Disposition	Summary
IR-1	Associated Universities, Inc.	New York City health code restrictions on radioactive materials (RAM).	Public Notice: 8/15/77 (42 FR 41204); Ruling: IR-1, 4/20/78 (43 FR 16954).	City ordinance effectively banning shipment of radioactive materials in or through city was *consistent* with HMTA or HMR—[prior to issuance of Fed. highway routing rule HM-164].
IR-2	R.I. Div. of Public Utilities & Carriers.	R.I. restrictions on transportation of bulk flammable gas by highway.	Public Notice: 3/12/79 (44 FR 13617); Ruling: IR-2, 12/20/79 (44 FR 75566); Appeal Filed: 1/21/78; Perfected 6/24/78; Ruling on Appeal: 10/30/80 (45 FR 71881); Upheld: 535 F. Supp. 508 (D. R.I. 1982) and 698 F.2d 559 (1st Cir. 1983).	State regulations re two-way radio communications, immediate notification to State Police of any accident, use of headlights at all times, vehicle inspections and definitions were *consistent*. But requirements re written notification to state agencies of accidents, illuminated rear bumper signs, frangible shank-type locks on trailers, permit requirements for each shipment and prohibitions on travel in rush hours were *inconsistent*. Affirmed on appeal and in court.
IR-3	Hazardous Materials Advisory Council (HMAC), Mass. Motor Transport Assn., American Trucking Associations, Inc. (ATA).	City of Boston regulations on routing, time of day, and other requirements re hazardous materials transportation.	Public Notice: 3/24/80 (45 FR 19110); Ruling: IR-3, 3/26/81 (46 FR 18918); Appeal filed; 7/10/81; Ruling on Appeal: 4/29/82 (47 FR 18457).	City regulations re immediate reporting of accidents to local officials, requiring use of major roads except for pickups and deliveries, assessing penalties for violations of valid local regulations, requiring use of headlights, specifying separation distances between vehicles and vehicle operating requirements, and adopting Federal and State motor carrier safety regulations were *consistent*. But, City regulations re marking vehicles to identify products, requiring written accident reports, restricting travel during a.m. rush hours, and restricting use of certain streets were *inconsistent*. No decision rendered on undefined permit system. On appeal, written accident reports still found *inconsistent*, but routing restrictions inconsistency finding was rescinded with no conclusion as to their validity.
IR-4	National Tank Truck Carriers, Inc. (NTTC)	Washington State shipping papers requirements.	Public Notice: 11/3/80 (45 FR 72855); Ruling: IR-4, 1/11/82 (47 FR 1231); Appeal filed: 1/28/82; Ruling on Appeal: 8/2/82 (47 FR 33357); Corrected 8/5/82 (47 FR 34074).	State law requiring intrastate shipments of hazardous materials carried by motor vehicles to be accompanied by red or red bordered shipping papers was *inconsistent*.
IR-5	Ritter Transportation Nat'l LP-Gas Assn. Propane Corp. of America & 7 other companies.	New York City Fire Dept. regulations re hazardous gases.	Public Notice: 4/6/81 (46 FR 20662); Ruling: IR-5, 11/18/82 (47 FR 51991).	City regulations re gas under pressure, combustible or flammable gas, combustible mixture and inflammable mixture had definitions different from DOT's and thus were *inconsistent*.
IR-6	General Battery Corp.	City of Covington, KY prenotification ordinance.	Public Notice: 8/26/82 (47 FR 37737); Ruling: IR-6, 1/6/83 (48 FR 760).	City ordinance extending scope of hazardous materials regulated and requiring advance notice of rail, barge and truck transport of dangerous and hazardous materials within city was found *inconsistent*.
IR-7	Nuclear Assurance Corp.	Governor of New York Order suspending shipments of spent fuel.	Public Notice: 5/12/83 (48 FR 21496); Correction: 5/26/83 (48 FR 23747); Ruling: IR-7, 11/27/84 (49 FR 46632).	Governor's letter advising company to suspend spent nuclear fuel shipments of 2 non-interstate highway routes was *consistent* because it required compliance with Federal regulations requiring use of Interstate Highway System.
IR-8	Nuclear Assurance Corp.	Michigan regulations re radioactive materials (RAM) transportation.	Public Notice: 5/12/83 (48 FR 21496); Correction: 5/26/83 (48 FR 23747); Ruling: IR-8, 11/27/84 (49 FR 46637); Appeal Filed: 12/20/84; Ruling on appeal: 4/20/87 (52 FR 13000); Correction: 6/11/87 (52 FR 22416).	State RAM regulations re confidentiality standards, inspection requirements (relating to valid regulations), incorporation of Federal regulations, and notification of shipment schedule changes (identical to Federal) were *consistent*. But state regulations re RAM definition, application for approval of shipments, application approval criteria (including container testing and certification requirements) different from Federal regulations, written notification of approvals, communications requirements, and notifications of delays and emergency plan implementation were *inconsistent*.
IR-9	Nuclear Assurance Corp.	Governor of Vermont's letters suspending shipments of spent nuclear fuel.	Public Notice: 5/12/83 (48 FR 21496); Correction: 5/26/83 (49 FR 23747); Ruling: IR-9, 11/27/84 (49 FR 46644).	Governor's letter advising that spent nuclear fuel shipments would not be permitted until Federal agencies established a national policy on them was found not to be state "requirement" and thus was not subject to an inconsistency determination.

INCONSISTENCY RULINGS—Continued

Ruling	Applicant	Subject	Disposition	Summary
IR-10	Nuclear Assurance Corp	New York State Thruway Authority regulations re RAM transportation.	Public Notice: 5/12/83 (48 FR 21496); Correction: 5/26/83 (48 FR 23747); Ruling: IR-10, 11/27/84 (49 FR 46645); Correction: 3/12/85 (50 FR 9939).	Thruway Authority regulation prohibiting RAM transportation except under its procedures, which generally resulted in approval of low-level RAM shipments and disapproval of shipments of highway route controlled quantities of RAM, was *inconsistent*.
IR-11	DOT (Under 49 CFR 107.209(b).	Ogdensburg Bridge and Port Authority regulations re RAM transportation.	Public Notice: 5/12/83 (48 FR 21496); Correction: 5/26/83 (48 FR 23747); Ruling: IR-11, 11/27/84 (49 FR 46647).	Bridge and Port Authority regulations specifying international bridge crossing times; requiring escort, compensation therefor, and evidence of unquantified "proper" insurance, and incorporating county requirements were *inconsistent* as applied to non highway route controlled RAM quantities. Bridge was not part of Interstate Highway system.
IR-12	DOT (Under 49 CFR 107.209(b)).	St. Lawrence County (N.Y.) law re RAM transportation.	Public Notice: 5/12/83 (48 FR 21496); Correction: 5/26/83 (49 FR 23747); Ruling IR-12, 11/27/84 (49 FR 46650.	County law regulating RAM transport on non-Interstate highways, as it applied to non-highway route controlled quantities of RAM, was *consistent* in its non-regulatory and non-obligatory policy statement, but was *inconsistent* in its permit requirements and hazard class definitions (different from Federal).
IR-13	DOT (under 49 CFR 107.209(b)).	Thousand Islands Bridge Authority regulations re hazardous materials (including RAM) transportation.	Public Notice: 5/12/83 (48 FR 21496); Correction: 5/26/83 (49 FR 23747); Ruling IR-13, 11/27/84 (49 FR 46653.	Bridge authority regulations re permit, fee and escort requirements as applied to vehicle carrying highway route controlled quantities of radioactive materials over Interstate Highway System bridge were *inconsistent*.
IR-14	DOT (under 49 CFR 107.209(b)).	Jefferson County (N.Y.) ordinance re RAM highway transportation.	Public Notice: 5/12/83 (48 FR 21496); Correction: 5/26/83 (49 FR 23747); Ruling IR-14, 11/27/84 (49 FR 46656).	County ordinance regulating transportation of highway route controlled quantities of RAM in area including Interstate highway was *consistent* insofar as it contained front and rear escort requirements identical to NRC standards but was *inconsistent* in requiring 24-hour prenotification, limiting transport to May-October period, and prohibiting holiday and inclement weather shipments.
IR-15	DOT (under 49 CFR 107.209(b)).	Vermont regulations re RAM transportation.	Public Notice: 8/4/83 (48 FR 35590); Ruling: IR-15, 11/27/84 (49 FR 46660); Appeal Filed: 12/19/84; Ruling on Appeal: 4/20/87 (52 FR 13062); Correction: 5/15/87 (52 FR 18492)..	State regulations re highway, rail and water transport of irradiated reactor fuel and nuclear waste were *consistent* as to statement of intent, information requirements identical to NRC's, confidentiality standards same as Federal, and inspection requirements (as applied to consistent rules); but were *inconsistent* re application to Federally-regulated highway route controlled quantity radioactive materials, submission of application for shipment approval (including identification, fee and container certification requirements), criteria for approvals, written notice of approval by Vermont, notice requirements for schedule changes and delays, and monitoring of shipments by state officials.
IR-16	Arizona DOT	City of Tucson ordinance re RAM transportation.	Public Notice: 12/12/83 (48 FR 55387); Ruling: IR-16, 5/20/85 (49 FR 20872).	City ordinance establishing different (from Federal) RAM definitions, prohibiting certain transportation within or through City, and requiring prenotification was *inconsistent*.
IR-17	Wisconsin Electric Power Co	Illinois statutory fee on spent nuclear fuel transportation.	Public Notice: 10/30/85 (50 FR 45186); Ruling: IR-17, 6/9/86 (51 FR 20826); Appeal Filed 8/3/86; Public Notice: 9/29/86 (51 FR 34527); Correction: 10/8/86 (51 FR 36125); Ruling on Appeal: 9/25/87 (52 FR 36200); Correction: 11/6/87 (52 FR 37399).	State law imposing fee of $1,000 per cask of spent nuclear fuel transported through state used to fund consistent inspection and emergency response programs was *consistent*.
IR-18	Prince George's County (MD)	Prince George's County (Md.) regulations re RAM transportation.	Public Notice: 10/4/84 (49 FR 39260); Ruling IR-18, 1/2/87 (52 FR 200); Appeal Filed: 1/20/87; Ruling on Appeal: 7/29/88 (53 FR 22850).	County Regulations re RAM transportation were *inconsistent* re statement of intent, findings, essentially identical hazardous materials definitions, penalties, and permit, advance notice, information, time, routing, escort, and bonding requirements.
IR-19	Southern Pacific Transportation Company.	Nevada regulations re railroad-related loading, unloading transfer and storage of RAM, explosives and other hazardous materials.	Public Notice: 11/25/86 (51 FR 42808); Ruling: IR-19, 6/30/87 (52 FR 24404); Correction: 8/7/87 (52 FR 29468); Appeal Filed 7/26/87; Ruling on Appeal: 4/7/88 (53 FR 11600).	State regulations containing burdensome and discretionary permitting system for railroad-related loading, unloading, transfer and storage of hazardous materials were *inconsistent*.

INCONSISTENCY RULINGS—Continued

Ruling	Applicant	Subject	Disposition	Summary
IR-20	Citizens Against Nuclear Trucking (CANT).	Triborough Bridge and Tunnel Authority regulations re RAM and explosives transportation.	Application Amended: 10/8/86; Public Notice: 10/20/86 (51 FR 37248); Correction: 11/5/86 (51 FR 40294); Ruling: IR-20, 6/30/87 (52 FR 24396); Correction: 8/7/87 (52 FR 29468).	Authority regulations effectively prohibiting transportation of most RAM and explosives through tunnels and across bridges were *inconsistent.* Unfettered discretion to ban transportation was *inconsistent.* But traffic controls, inspections, vehicle separation distances, and requirements to comply with lawful orders were *consistent.*
IR-21	Citizens Against Nuclear Trucking (CANT).	Connecticut statute and regulations re RAM Transportation.	Public Notice: 9/29/86 (51 FR 34524); Correction: 10/8/86 (51 FR 36125); Ruling: IR-21, 10/2/87 (52 FR 37072); Appeal Filed 11/2/87; Public Notice: 1/15/88 (53 FR 1089); Ruling on Appeal: 11/11/88 (53 FR 46735).	State statute and regulations re RAM transportation permitting, information documentation, certification, time restriction, routing, escort requirements and related definition were *inconsistent.* OHMT applies a broad interpretation of the "person affected" standing requirement for inconsistency ruling applications.
IR-22	American Trucking Assns., Inc. (ATA) & National Tank Truck Carriers, Inc (NTTC).	New York City Fire Dept. Directives re tank truck carriage of hazardous liquids and gases.	Public Notice: 5/18/87 (52 FR 18668); Ruling: IR-22, 12/8/87 (52 FR 46574); Correction: 12/29/87 (52 FR 49107); Appeal Filed 2/1/88; Public Notice: 2/24/88 (53 FR 5538); Ruling on Appeal: 6/23/89 (54 FR 26698).	City regulations re cargo containment systems, equipment and related areas were *inconsistent* because they involved exclusively Federal areas and caused delays.
IR-23	American Trucking Assns., Inc. (ATA) & National Tank Truck Carriers, Inc. (NTTC).	New York City routing and time restrictions.	Public Notice: 5/18/87 (52 FR 18668); Ruling IR-23, 5/11/88 (53 FR 16840); Appeal Filed 6/20/88; Public Notice: 8/23/88 (53 FR 32184); Appeal dismissed as moot: 9/9/92 (57 FR 41165).	City routing and time restrictions on through-traffic hazardous materials transportation were *inconsistent* because of absence of determination of effect on overall public safety and consultations with other affected jurisdictions.
IR-24	McGill Specialized Carriers, Inc.	City of San Antonio, TX regulations re placarding of small quantities of explosives.	Public Notice: 11/6/87 (52 FR 43016); Ruling: IR-24, 5/31/88 (53 FR 19848).	City regulation adopting vague explosives placarding requirement of 1979 Uniform Fire Code was *inconsistent* because placarding is exclusively Federal area and City regulation required placarding where HMR forbid it.
IR-25	City of Maryland Heights, MO	City of Maryland Heights Ordinance requiring $1,000 bond for each waste-hauling vehicle.	Public Notice: 6/6/88 (53 FR 20736); Ruling: IR-25, 4/21/89 (54 FR 16308); Correction: 5/10/89 (54 FR 20235).	City ordinance requiring a $1,000 bond for highway transportation of hazardous wastes was *inconsistent* insofar as it applied to hazardous materials regulated under the HMTA
IR-26	California Dept. of Motor Vehicles.	California administrative Code regulations re training for highway transportation of hazardous materials.	Public Notice: 11/6/87 (52 FR 43830); Extension: 12/29/87 (52 FR 49107); Ruling: IR-26, 4/21/89 (54 FR 16314); Correction: 5/18/89 (54 FR 21526).	State regulations requiring training for operators of motor vehicles carrying hazardous materials generally were *consistent* with respect to domiciliaries of that state but *inconsistent* with respect to non-domiciliaries. However, after April 1, 1992, they would be *consistent* with respect to non-domiciliaries not having a hazardous material endorsement on their commercial drivers' licenses (CDL's)
IR-27	Department of Energy (DOE)	Colorado law and regulations re RAM transport.	Public Notice: 8/11/88 (54 FR 30418); Ruling: IR-27, 4/21/89 (54 FR 16326); Correction, 5/9/89 (54 FR 20001).	State regulations concerning permits, training, prenotifi- cation, information, documentation, and permit fee requirements for transportation of RAM, as well as civil penalty provisions relating to them, were *inconsistent.* But inspection, civil penalty and shipping fee requirements not related to inconsistent State activities were *consistent*
IR-28	Yellow Freight System, Inc	City of San Jose, CA ordinance re hazardous materials storage.	Public Notice: 10/5/88 (53 FR 39196). Ruling: IR-28, 3/8/90 (54 FR 8884); Appeal Filed: 4/5/90; Public Notice: 6/5/90 (55 FR 22986); Appeal dismissed as moot: 9/9/92 (57 FR 41165).	City ordinance re hazardous materials storage was *inconsistent* as applied to transportation (including storage, loading and unloading incidental thereto) with respect to hazardous materials definition; permitting, information and documentation, storage, loading, unloading and certain incident reporting requirements; and related civil penalty provisions. But most incident reporting requirements and related civil penalty provisions were *inconsistent*
IR-29	Reichhold Limited	Maine statutes and regulations re hazardous materials transportation permit and fee.	Public Notice: 9/12/89 (54 FR 37764); Ruling: IR-29, 3/12/90 (55 FR 9304).	State statutes and regulation re hazardous materials transportation materials transportation permit and fee were *inconsistent* insofar as they were "triggered" but SARA Title III list of hazardous substances instead of HMR's Hazardous Materials Table

INCONSISTENCY RULINGS—Continued

Ruling	Applicant	Subject	Disposition	Summary
IR-30	Department of the Navy	City of Oakland, CA Nuclear Free Zone Act re RAM transport.	Public Notice: 6/27/89 (54 FR 27104); Extension: 9/25/89 (54 FR 39253); Ruling: IR-30, 3/14/90 (55 FR 9876).	City ordinance re RAM Transport was *inconsistent in all respects:* Definitions, 45-day prenotification, routing and mode requirements, placarding, prohibition of transportation and related activities, information requirements, and inspection enforcement and fee provisions
IR-31	State of Louisiana	Louisiana statutes and regulations adopting 49 CFR parts 171-180 with respect to rail carriers and shippers.	Public Notice: 9/27/89 (54 FR 39622); Ruling: IR-31, 6/21/90 (55 FR 25571); Appeal Filed: 7/2/90; Public Notice: 9/6/90 (55 FR 36735); Appeal dismissed as moot: 9/9/92 (57 FR 41165).	State statutes and regulations adopting HMR generally *consistent*. However, the following were *inconsistent*: Different hazardous materials definitions, different definition of "train" insurance requirements, written incident reports, civil penalties for other than "knowing" violations, and penalty and enforcement provisions insofar as related to inconsistent substantive provisions
IR-32	Chemical Waste Transportation Council.	City of Montevallo, AL ordinance re hazardous waste transportation.	Public Notice: 1/23/89 (54 FR 3177); Ruling IR-32, 9/6/90 (55 FR 36736). Appeal Filed 9/27/90. Public Notice: 10/17/91 (56 FR 52154); Appeal dismissed as moot: 9/9/92 (57 FR 41165).	City code re hazardous waste transportation was *consistent* re speed limit, separation distance, "headlights-on," hazardous waste manifest-carriage and placarding requirements; CB radio requirement except relating to radioactive materials; and immediate accident reporting requirement except relating to irradiated reactor fuel. Code was *inconsistent* re hazardous waste definitions; routing, time, weather, prenotification, and liability insurance requirements; CB radio requirement relating to radioactive materials; immediate accident reporting requirement relating to irradiated reactor fuel; and prohibition on transportation-related hazardous waste storage

NON-PREEMPTION DETERMINATIONS

Ruling	Applicant	Subject	Disposition	Summary
N/A	Commonwealth of Mass. on behalf of Town of Framingham.	Massachusetts statute and Town of Framingham by-law restricting storage of vinyl chloride.	Public Notice: 10/5/81; Public Hearing: 12/15/81; Suspended: 4/15/83.	Application for nonpreemption determination cannot be acted upon until inconsistency determination has been made as to provisions at issue.
NPD-1	City of New York	City of New York Health Code provision establishing permit requirements for each shipment into or through City of specified radioactive materials, thereby effectively banning transportation of most radioactive materials.	Public Notice: 1/15/85 (50 FR 2528); Ruling: NPD-1, 9/12/85 (50 FR 37308); Appeal Filed: 10/8/85; Ruling on Appeal: 12/30/86 (51 FR 47182): Reversed and remanded, *City of New York* v. *U.S. Dept. of Transportation*, 87 Civ. 1443 (MGC) (S.D.N.Y. 12/8/88); Public Notices: 3/28/89 (54 FR 12732), Correction: 4/4/89 (54 FR 13606), 7/16/90 (55 FR 28982), 9/15/90 (55 FR 36380); Superseded by WPDA-2: 7/2/92 (57 FR 29556).	Denying City's application, OHMT and RSPA stated that requests for nonpreemption determinations would be considered only if applicant could demonstrate that its inconsistent requirement is necessary, in light of exceptional local circumstances, to assure the adequate level of safety intended by the HMTA. However, Federal district court held that HMTA does not authorize requirement of a threshold showing of exceptional circumstances, reversed the denial of City's application, and remanded to DOT to determine whether application meets the two statutory criteria. RSPA has published notices reopening the docket and inviting public comment to update and supplement the docket.
WPD-1	City of New York	City of New York Fire Dept. Regulations re capacity, construction, etc. of tank trucks transporting flammable and combustible liquids and compressed gases.	Public Notices: 11/15/91 (56 FR 58126) Feb. 27, 1992 (57 FR 6767) 4/8/92 (57 FR 11964); Denial of Temporary Stay of Preemption: 3/23/92 (57 FR 10057); Ruling: WPD-1, 6/2/92 (57 FR 23278).	RSPA has no authority under the HMTA to grant a temporary stay of preemption. Denial of waiver on tank truck design and construction requirements; dismissal of application on compressed gases regulations; grant of waiver on emergency transfer; no preemption on inspection and permit as general safety measures.

Infectious Substances; Correction and Extension of Compliance Date; Final Rule

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Part 171

[Docket No. HM-181; Amendment No. 171-112]

RIN 2137-AA01

Infectious Substances; Correction and Extension of Compliance Date

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Final rule; correction and extension of compliance date.

SUMMARY: RSPA is revising the transition period applicable to infectious substances, including regulated medical wastes, under a final rule published in the Federal Register on December 20, 1991 (56 FR 66124). The compliance date for classification and hazard communication requirements applicable to infectious substances is delayed from October 1, 1992, to April 1, 1993. The compliance date for packaging requirements for infectious substances, which was inadvertently omitted from the December 20, 1991 final rule, is extended in this document to April 1, 1993. The delay in the compliance date is necessary to provide additional time for RSPA to conclude its evaluation and respond to two petitions for reconsideration and a number of related comments and requests for clarification addressed to infectious substances, particularly regulated medical wastes. RSPA anticipates publication of its response in the near future.

DATES: These amendments are effective on October 1, 1992.

FOR FURTHER INFORMATION CONTACT: Ms. Eileen Martin, Office of Hazardous Materials Standards, Research and Special Programs Administration, 400 Seventh St., SW., Washington, DC 20590-0001, telephone: (202) 366-4488.

SUPPLEMENTARY INFORMATION: On January 3, 1991, RSPA adopted a final rule under Docket HM-142A (56 FR 197) which: (1) Revised the definition of "etiologic agent," (2) removed the 50 milliliter (ml) exception from regulation for etiologic agents, and (3) clarified quantity limitations for etiologic agents transported aboard aircraft. On December 21, 1990, RSPA issued a final rule under Docket HM-181 (55 FR 52402) which comprehensively revised the Hazardous Materials Regulations (HMR) with respect to hazard communication, classification, and packaging requirements and incorporated the HM-142A provisions with minor changes. A document making editorial and substantive revisions to the December 1990 final rule was published on December 20, 1991 (56 FR 66124) under Docket HM-181. The revisions contained in the latter document were primarily in response to over 250 petitions for reconsideration received on the December 21, 1990 final rule.

Following issuance of the December 1991 rule, RSPA received two petitions for reconsideration and numerous comments and requests for clarification concerning the provisions on infectious substances and regulated medical waste. RSPA is nearing completion of its evaluation of these petitions and comments which address a wide range of issues. RSPA anticipates publication of a document which responds to these petitions in the near future. However, that document will not be ready for publication prior to October 1, 1992, the date on which new requirements for infectious substances, including regulated medical wastes, would become mandatory. Therefore, in this document RSPA is extending the compliance date in 49 CFR 171.14(b), for classification and hazard communication requirements applicable to infectious substances, from October 1, 1992, to April 1, 1993.

RSPA is also correcting an error and extending the compliance date for packaging requirements for infectious substances, from October 1, 1992, to April 1, 1993. The January 3, 1991 rule had an effective date of February 19, 1991, which was extended to September 30, 1991 (56 FR 7312), and extended again to October 1, 1992 (56 FR 49830). Although the preamble language of the December 1991 final rule indicated an October 1, 1992 compliance date for new packaging requirements, this date was inadvertently omitted from the regulatory text of the final rule.

Because the amendments adopted herein correct a certain provision in the HMR, extend the compliance date of certain regulations, and impose no new regulatory burden on any person, notice and public procedure are unnecessary. For these same reasons, these amendments are being made effective without the usual 30-day delay following publication.

Rulemaking Analyses and Notices

Executive Order 12291

This final rule has been reviewed under the criteria specified in section 1(b) of Executive Order 12291 and is determined not to be a major rule. Although the December 20, 1991 final rule is significant under the regulatory procedures of the Department of Transportation (44 FR 11034), this document is not significant because it does not impose additional requirements, has the effect of extending a compliance date, and is similar in effect to an extension of effective date. A regulatory evaluation for the December 20, 1991 final rule is available for review in the docket.

Executive Order 12612

This action has been analyzed in accordance with Executive Order 12612 on Federalism. It has no substantial direct effect on the States, the current Federal-State relationship, or the current distribution of power and responsibilities among levels of government. Therefore, no Federalism Assessment is required.

Regulatory Flexibility Act

Based on information concerning the size and nature of entities likely to be affected by this rule, I certify that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Paperwork Reduction Act

This amendment does not impose information collection or recordkeeping requirements.

Regulation Identifier Number

A regulation identifier number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN numbers contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

List of Subjects in 49 CFR Part 171

Exports, Hazardous materials transportation, Hazardous waste, Imports, Incorporation by reference, Reporting and recordkeeping requirements.

In consideration of the foregoing, 49 CFR part 171 is amended as follows:

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

1. The authority citation for part 171 continues to read as follows:

Authority: 49 App. U.S.C. 1802, 1803, 1804, 1805, 1806, 1815, 1818; 49 CFR Part 1.

2. In § 171.14, paragraph (b)(2) is revised; paragraphs (b)(3), (b)(4) and (b)(5) are redesignated as (b)(4), (b)(5)

and (b)(6), respectively; and a new paragraph (b)(3) is added to read as follows:

§ 171.14 Transitional provisions for implementing requirements based on the UN Recommendations.

* * * * *

(b) * * *

(2) *October 1, 1992.* For materials poisonous by inhalation (see § 173.132 of this subchapter), the hazard communication requirements of part 172 of this subchapter, including placarding requirements of subpart F of part 172, are effective on October 1, 1992.

(3) *April 1, 1993.* For Division 6.2 materials (infectious substances, including regulated medical wastes), all applicable regulatory requirements, including those pertaining to classification (see § 173.134 of this subchapter), hazard communication, and packaging, are effective on April 1, 1993.

* * * * *

Issued in Washington, DC on September 25, 1992, under authority delegated in 49 CFR part 1.

Douglas B. Ham,

Acting Administrator.

Hazardous Materials Regulations; Editorial and Technical Revisions; Final Rule

DEPARTMENT OF TRANSPORTATION

49 CFR Parts 107, 171, 172, 173, 174, 176, 177, 178, 179, and 180

[Docket Nos. HM-181, HM-189, Amdt. Nos. 107-23, 171-111, 172-123, 173-224, 174-68, 176-30, 177-78, 178-97, 179-45, and 180-3]

Editorial and Technical Revisions

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Final rule.

SUMMARY: This final rule corrects editorial errors and makes minor regulatory changes to title 49 of the Code of Federal Regulations (CFR), parts 100–199, revised as of December 31, 1991. The 1991 version contained provisions of a final rule issued on December 21, 1990 and revised on December 20, 1991 which comprehensively amended the Hazardous Materials Regulations (HMR) with respect to hazard communication, classification and packaging requirements. The intended effect of this final rule is to promote accuracy through editorial and technical corrections to the CFR. This rule will not impose any new requirements on persons subject to the HMR.

DATES: *Effective:* October 1, 1992.

Applicability: Because of the transition period provisions in 49 CFR 171.14, the provisions of § 172.101(l)(1)(ii), which allows up to one year after a change in the Hazardous Materials Table (HMT) to use up stocks of preprinted shipping papers and to ship packages that were marked prior to the change, do not apply to these amendments.

FOR FURTHER INFORMATION CONTACT: John Gale or Beth Romo, telephone (202) 366–4488, Office of Hazardous Materials Standards, or Charles Hochman, telephone (202) 366–4545, Office of Hazardous Materials Technology, Research and Special Programs Administration, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590–0001.

SUPPLEMENTARY INFORMATION:

Background

The Research and Special Programs Administration (RSPA) published a final rule on December 21, 1990 [Docket HM–181; 55 FR 52402] which comprehensively revised the Hazardous Materials Regulations (HMR; 49 CFR parts 171 to 180) with respect to hazard communication, classification, and packaging requirements based on the UN Recommendations. A document responding to petitions for reconsideration and containing editorial and substantive revisions to the final rule was published on December 20, 1991 [56 FR 66124]. That document included revisions to a January 3, 1991 final rule under HM–142A and to the 1990 49 CFR parts 106–180, under HM–189.

The 1991 49 CFR parts 100–199 incorporated the revised final rule issued December 20, 1991 as well as all other revisions published prior to December 31, 1991. This document makes editorial and technical corrections to the 1991 49 CFR parts 107–180.

This document does not include revisions to requirements for infectious substances or regulated medical waste. A separate rulemaking is forthcoming which will respond to petitions for reconsideration concerning regulated medical waste and will address other issues concerning infectious substances and regulated medical waste.

These amendments in Docket HM–181 clarify and revise certain provisions of the final rule in response to petitions for reconsideration. These amendments in Docket HM–189 clarify and correct other provisions of the HMR. In both cases, these changes impose no new regulatory burden on any person and provide relief from existing requirements. Notice and public comment are unnecessary and good cause exists to make these amendments effective less than 30 days following publication.

Regulatory Review Comments

In response to the President's January 28, 1992, announcement of a federal regulatory review, DOT published a notice on February 7, 1992 [57 FR 4744] soliciting public comments on the Department's regulatory programs. In response to that notice, RSPA received numerous comments to the HMR as revised under Docket HM–181. All comments to the regulatory review have been considered in preparing this document. Based on the merit of comments received during the regulatory review, RSPA is revising certain provisions of the regulations. These revisions are discussed in detail in the section-by-section review.

Section-by-Section Review

Part 107: Hazardous Materials Program Procedures

Section 107.315. Paragraph (c) is revised and paragraph (d) is added to set forth different procedures for payment of civil penalties, based on the amount of the penalty.

Part 171: General Information, Regulations and Definitions

Section 171.8. The definition for "NRC (non-reusable container)" was inadvertently removed in the final rule. Because a specification DOT 39 cylinder is non-reusable, and because other non-reusable packagings may be authorized in the future, RSPA is reinstating this definition.

The definition for "bulk packaging" is revised to clarify that for solids, the packaging must have a maximum net mass of greater than 400 kg (882 pounds) *and* a maximum capacity greater than 450 L (119 gallons). Therefore, a packaging having a maximum net mass of greater than 882 pounds must also have a maximum capacity greater than 119 gallons to be considered a bulk packaging for solids.

The definition for "non-bulk packaging" is revised to clarify that for liquids, the maximum capacity of the packaging must be less than 450 L (119 gallons) *and* for solids the maximum net mass of the packaging must be less than 400 kg or a maximum capacity of less than 450 L.

In addition, the definition for "oxidizer" is revised to correct a section reference to "§ 173.127" and the second definition of oxidizer is removed.

Section 171.12. Paragraph (b)(7) is revised for clarity.

Section 171.12a. Paragraph (b) is revised to clarify provisions for shipments of hazardous materials transported to or through the United States which have been prepared in accordance with Canadian regulations.

Section 171.14. Paragraphs (a) and (b) are revised to clarify the applicable transition dates for the final rule as revised December 20, 1991 and by this document. Language is added to paragraph (a) clarifying that other rules issued during the transition periods may implement requirements earlier or later than the transition dates.

In paragraph (c)(2), RSPA is permitting the use, for highway transportation only, until October 1, 2001, of pre-October 1991 placards or placards specified in the December 21, 1990 final rule (which contains minor deviations from the placards adopted in the December 20, 1991 rule) in place of the placards adopted in the December 20, 1991 rule. This extended conversion period applies to highway transportation only and does not include intermodal shipments. The extension will minimize the impact of converting to the new placarding system and responds to petitions from motor carriers.

Part 172: Hazardous Materials Table, Special Provisions, Hazardous Materials Communications Requirements and Emergency Response Information Requirements

Section 172.101: The Hazardous Materials Table (The Table). The Table is amended as follows:

a. The entries "Azido hydroxy tetrazole (mercury and silver salts)" and "Dinitroglycoluril" are removed. The entry "Sodium hydrogen sulfate, solid" is removed because the material in its solid state does not meet any hazard class definition.

b. The "Asbestos" entries referencing blue or brown asbestos and white asbestos are removed and a generic "Asbestos" entry is added for domestic transportation only, which will allow the use of either the domestic shipping name or the international shipping name for the transportation of all forms of asbestos in the US.

c. The entry "Acrolein, inhibited" is corrected by removing the "+" in Column (1).

d. The entry "Aerosols, poison, each not exceeding 1 L capacity" is revised by removing Special Provision 3 from Column (7) because the provision is not consistent with the hazard class and only Division 6.1 Packing Group III materials are authorized in aerosols.

e. The entry "Aircraft hydraulic power unit fuel tank (containing a mixture of anhydrous hydrazine and monomethyl hydrazine (M86 fuel)." is revised by removing the "D" in Column (1) and revising the identification number in Column (4) to read "UN 3165" for consistency with international requirements.

f. The entry "Alcoholic beverages" is revised by adding a Packing Group II entry in Column (5). This addition is necessary because many alcoholic beverages fall within the Packing Group II level for Class 3.

g. The entry "Alkali metal alloys" is revised by adding Special Provision B48 in Column (7) to except portable tanks in sodium metal service from hydrostatic testing requirements.

h. The domestic entry "Ammonia anhydrous liquefied or Ammonia solutions" is revised by adding commas to read: "Ammonia, anhydrous, liquefied *or* Ammonia solutions".

i. The entry "Ammonium nitrate, liquid (hot concentrated solution)" is revised by removing Special Provision B17 in Column (7). The purpose of this change is to remove the requirement that bulk packagings must be made from aluminum.

j. The entry "Barium peroxide" is corrected by removing the "2" in Column (8C) and replacing it with "242".

k. The entry "Blue asbestos (Crocidolite) or Brown asbestos (amosite, mysorite)" is revised by adding an "I" in Column (1).

l. In Column (9A), for the entry "Bombs, *with bursing charge*" in Division 1.1F, the spelling of "Forbidden" is corrected.

m. Based on the merit of petitions, Special Provision 19 is added in Column (7) for "Butane *or* Butane mixtures" and "Butylene" to permit the use of the identification number "UN1075" as an alternative to the identification number assigned, as long as the identification number is consistent on package markings, shipping papers and emergency response information.

n. The entries "Carbon dioxide and nitrous oxide mixtures" and "Carbon monoxide" are corrected by revising Column (8C) of each entry to read "314, 315".

o. The entry for "Combustible liquid, n.o.s." is moved to its proper alphabetical sequence.

p. The entries "Corrosive solids, self heating, n.o.s." and "Corrosive solids, which in contact with water emit flammable gases, n.o.s." are revised by removing "241" from Column (8C) and replacing it with "243". This revision is necessary in order to provide packagings that are equivalent to other materials in the same hazard classes.

q. The entry "Diethylaminopropylamine" is revised by removing the "AW" in Column (1) to correspond with § 173.154 for consistency.

r. The entry "Dimethylhydrazine, unsymmetrical" is revised by removing Special Provision B58 and adding Special Provision B74 in Column (7) to provide consistency with requirements imposed on other materials poisonous by inhalation in Hazard Zone B.

s. The entry "Fish meal or Fish scrap stabilized" is editorially revised by changing the proper shipping name to read "Fish meal, stabilized *or* Fish scrap, stabilized" and by removing Special Provision A1 from Column (7).

t. The entry for "Fusee" is moved to its proper alphabetical sequence.

u. The entries "Hydrochloric acid, solution" and "Sulfuric acid" are revised by changing Special Provision B2 to B3 in Column (7) to prohibit the use of DOT 57 portable tanks. Special Provision B2 was amended in the December 20, 1991 revised final rule to permit the use of DOT 57 portable tanks, and Special Provision B3 was added which prohibited the use of these portable tanks. In the revised final rule, for hydrochloric acid and sulfuric acid, Special Provision B3 should have replaced B2 to reflect this prohibition. This is consistent with pre-HM-181 requirements which authorized DOT 57 portable tanks only for cleaning compounds, not hydrochloric acid solutions or sulfuric acid.

v. Special Provision B35 is added in Column (7) for the entry "Hydrogen cyanide, anhydrous, stabilized" to authorize an alternative shipping name "Hydrocyanic acid" to be marked on a tank car.

w. The entry for "Hydrogen peroxide, aqueous solutions", containing between 40% and 60% hydrogen peroxide, is editorially revised by correcting Special Provision "BB53" to read "B53".

x. The entry "Hydroxylamine sulfate" is revised by removing the "AW" in Column (1) to correspond with § 173.154 for consistency.

y. A cross reference "Isobutane or Isobutane mixtures see also Petroleum gases, liquefied" is added to clarify that either name may be used as a proper shipping name. In addition, Special Provision 19 is added in Column (7) for "Isobutane" to permit the use of the identification number "UN1075", as an alternative to the identification number assigned as long as the identification number is consistent on package markings, shipping papers and emergency response information.

z. The entry "Isophoronediamine" is revised by removing the "AW" in Column (1) to correspond with § 173.154 for consistency.

aa. The entry "Lead compounds, soluble, n.o.s." is editorially revised by changing the packing group in Column (5) to read "III" and by revising Column (6) to read "KEEP AWAY FROM FOOD".

bb. The entry "Metal powders, flammable, n.o.s" in Packing Group III is editorially revised to correct the bulk packaging authorization in Column (8C) to read "240".

cc. The entry "Methanol or Methyl alcohol" is editorially revised to correct the bulk packaging authorization in Column (8C) to read "242".

dd. The entry "Methylhydrazine" is editorially revised to correct the non-bulk packaging authorization in Column (8B) to read "226".

ee. The entries "Nitrating acid mixtures with not more than 50 per cent nitric acid" and "Nitrating acid mixtures with 50 per cent or more nitric acid" are revised by adding Special Provision B47 in Column (7).

ff. The entry "PCB see Polychlorinated biphenyls" is revised by removing the "D" in Column 1 and adding "AW" for

non-bulk packagings; and (2) materials corrosive only to steel are not regulated when transported by rail or highway in bulk packagings. These exceptions apply only if the offeror has determined that the packaging is compatible with the lading, as specified in § 173.24(e).

Section 173.156. In the December 20, 1991 revised final rule, RSPA accepted two petitions to allow domestic-only shipments of ORM–D materials unitized in stretch-wrapped floor display stands or wire-bound shrouded pallets to exceed the 30-kg gross weight limit. RSPA did not address the petitioners' request that, based on current industry practices, this exception be broadened to apply to shipments going directly from a manufacturer to a distribution center or retail outlet or returning. Commenters to the regulatory review asked RSPA to revise § 173.156 to remove the 66-pound weight limit on ORM–Ds to allow shipment of display packs without shipping papers. Alternatively, commenters suggested RSPA should remove any limitation on exclusive use by common carrier and allow transportation by highway carrier from any point of origin to any point of destination. RSPA already had removed the weight limit for ORM–D but not limited quantity shipments. RSPA disagrees with petitions requesting that either unitized ORM–D shipments be allowed to be transported by common carrier not under exclusive use or that RSPA waive the 30-kg (66-pound) gross weight limit for limited quantity shipments. RSPA believes safety could be compromised by the intermixing of shipments of this type with LTL traffic normally handled by common carriers. Therefore, RSPA will not permit non-exclusive use by common carrier, nor will it lift the 30-kg (66-pound) weight limit on limited quantity shipments. However, RSPA is broadening points of origin and destination to include manufacturers and return shipments. RSPA is revising paragraph (b) to include these types of activities in the exception for unitized shipments and clarifies that a box would be an acceptable overpack.

Section 173.159. UN standard 1D plywood drums, 1G fiber drums, 1H2 plastic drums, 3H2 plastic jerricans, and 4H2 solid plastic boxes are added as authorized packagings in new paragraphs (b)(3) through (b)(6) to correct an earlier oversight. In addition, the word "articles" is corrected to read "materials" in paragraph (c).

Section 173.183. Paragraph (d) is revised to except methyl bromide from the requirements of § 173.40.

Section 173.211. Paragraph (c) is editorially revised to correct authorizations for 6HA1 and 6HA2 composite packagings.

Section 173.225. Authorization for use of DOT 412 cargo tanks has been added in paragraph (e)(2), and paragraphs (e)(3) and (e)(4) have been restructured to more accurately reflect their applicability.

Section 173.227. The introductory text in paragraph (b) is editorially revised to specify that a 1H1 plastic drum or 6HA1 composite packaging must be further packed in a 1A2 or 1H2 drum.

Section 173.244. The section heading is revised by adding a reference to Division 4.3 (dangerous when wet) materials.

Sections 173.302 and 173.304. Paragraph (a)(5)(iii) in § 173.302 is editorially revised to correct reference to Federal Specification RR–C–901c. In addition, paragraph (h) in § 173.302 and paragraph (g) in § 173.304 are revised to limit conformance with § 173.40 Division 2.3 materials in Hazard Zone A.

Section 173.304. In paragraph (f)(1), references to DOT Specification fiberboard and wooden boxes are removed and replaced with an authorization for use of strong, tight packagings.

Section 173.314. In the December 20, 1991 revised final rule, RSPA amended § 173.24b(a)(3) to apply a five percent outage requirement to all materials poisonous by inhalation. RSPA subsequently has received several inquiries concerning the applicability of the five percent outage requirement for anhydrous ammonia. One company stated that a five percent outage requirement or anhydrous ammonia would be inconsistent with RSPA's earlier position, noting that:

> [t]hroughout the rulemaking proceeding, DOT has clearly stated their intention to improve the hazard communication for anhydrous ammonia with the "Inhalation Hazard" making requirement, not to increase the transportation costs of the product.

RSPA initially proposed classification criteria for poisonous gases in Notice 87–4 (May 5, 1987; 52 FR 16482) which resulted in significant controversy over the proposed reclassification of anhydrous ammonia from a Division 2.2 (non-flammable gas) to a Division 2.3 (poisonous gas) material. Commenters to this proposal stated that the reclassification would impose severe economic constraints and impose unwarranted increased transportation charges and insurance rates. Based on a regulatory analysis, RSPA eventually withdrew its proposal to reclassify anhydrous ammonia and retained the Division 2.2 (non-flammable gas) classification for domestic transportation.

In other previous rules, RSPA has recognized the need for improved packagings for materials posing acute health risks, such as anhydrous ammonia and other materials poisonous by inhalation. Such packaging improvements would include crashworthiness (packaging survivability) in accidents. In addition, RSPA and the Federal Railroad Administration (FRA) consider it necessary to require sufficient outage in tank cars so that, even under extreme but credible scenarios, there will be no release of a hazardous material from the expansion of the lading.

In response to the recent inquiries, RSPA and FRA have calculated the permissible filling limits for anhydrous ammonia under both the pre-HM–181 regulations and the new requirements. Based on these calculations, RSPA is authorizing a two percent outage calculated at the reference temperature of 41°C for insulated tank cars and 46°C for non-insulated tank cars to assure a level of safety commensurate with public interest. For example, the revised requirements in paragraph (c) will allow 4,870 pounds more for an insulated tank car and 4,793 pounds more for a non-insulated tank car for a hypothetical tank capacity of 33,625 gallons loaded in the summer. Prior to publication of the final rule, the basis for the filling limits was developed from limited empirical data. In developing provisions for filling limits in the Docket HM–181 final rule, RSPA considered seasonal factors because of the broad temperature ranges in the United States. For example, in the months of November through March, shippers may load anhydrous ammonia in non-insulated tank cars so that the tanks would become "liquid full" at about 35.5°C (96°F). For this reason, the provisions in revised paragraph (c) will not allow as much anhydrous ammonia in tank cars filled in the winter months as with previously authorized under the pre-HM–181 regulations. RSPA also is changing the filling limits for other Division 2.3 Zone D materials consistent with those limits for anhydrous ammonia.

Recent inquiries did not address the filling limits of anhydrous ammonia in DOT 106 multi-unit-tank cars. Calculations indicate that even at a five percent outage, more anhydrous ammonia is allowed in the multi-unit tank cars under the new requirements than under the pre-HM–181 regulations. Since the pre-HM–181 regulations were unusually restrictive, RSPA and FRA

will not change the reference in Note 21 at this time.

In addition, use of a 109A tank car for ammonia solutions between 35 and 50 percent ammonia by mass is authorized. This authorization was inadvertently omitted in the December 21, 1990, final rule.

Section 173.315. Notes 3, 11, and 16 in paragraph (a) are editorially revised for clarity. Paragraphs (d) and (i)(12) are revised to correct section references.

Section 173.336. The section heading and introductory text are editorially revised to reflect the correct proper shipping names specified in the § 172.101 HMT.

Part 174: Carriage by Rail

Section 174.25. In the § 174.25 Table, the placard endorsement for a Division 1.6 material is changed from "Dangerous" to "None".

Section 174.55. Paragraph (c) is editorially revised to reference new orientation markings.

Section 174.61. Paragraph (c) is revised to reflect a change in the Federal Railroad Administration's approval authority.

Section 174.81. The Segregation Table and paragraph (e)(5) are revised to allow ammonium nitrate fertilizer to be loaded or stored with Division 1.5 (blasting agents) material. In addition, in the revised final rule, an "O" correctly appeared at the intersection of the row entitled "Flammable liquids" and the column entitled "5.1", but the "O" did not appear in the reverse intersection. In this document, the Segregation Table is editorially revised to add an "O" at the intersection of the row entitled "Oxidizers" and the column entitled "3". Paragraph (f) also is corrected to allow the shipment of detonators and high explosives in accordance with § 177.835(g).

Section 174.82. Paragraph (a) is revised to except Division 1.6 (explosive) materials from handling requirements.

Section 174.85. Paragraph (b) is editorially revised to clarify that Class 7 materials also must conform with the train position requirements of paragraph (d).

Part 176: Carriage by Vessel

Section 176.83. The text of paragraphs (c)(2)(i)(A) and (c)(2)(i)(B) is switched to indicate the correct meaning of each pictorial display.

Section 176.600. The phrases "Poison A" and "Poison B" are replaced with UN hazard class terminology.

Part 177: Carriage by Public Highway

Section 177.805. The section is editorially revised by removing the paragraph (a) designation.

Section 177.848. The Segregation Table and paragraph (e)(5) are revised to allow ammonium nitrate fertilizer to be loaded or stored with Division 1.5 (blasting agents) material. In addition, in the revised final rule, an "O" correctly appeared at the intersection of the row entitled "Flammable liquids" and the column entitled "5.1", but the "O" did not appear in the reverse intersection. In this document, the Segregation Table is editorially revised to add an "O" at the intersection of the row entitled "Oxidizers" and the column entitled "3". Paragraph (f) also is corrected to allow the shipment of detonators and high explosives in accordance with § 177.835(g).

Part 178: Specifications for Packagings

Section 178.44–15. Paragraph (a)(2) is reserved.

Section 178.45–7. Paragraph (c)(2) is reserved.

Section 178.270–5. Paragraphs (a), (c), and (d) are corrected by removing the wording "deka newtons" and replacing it with "decanewtons".

Section 178.337–1. A section reference in paragraph (b) is corrected.

Section 178.337–11. A date in paragraph (a)(4)(i)(B) is corrected.

Section 178.345–2. A reference to an ASTM standard in paragraph (a)(2) is corrected.

Section 178.345–11. Paragraph (a) is revised to remove inference that a loading/unloading outlet may not be used for other purposes. Changes are made to paragraph (b)(2) to clarify that the lading is discharged into the cargo tank *through internal piping* situated above the maximum liquid level of the tank. Prior to publication of a June 17, 1991 final rule (Docket HM–183, 56 FR 27877), former § 178.345–11(b)(2) stated that any loading/unloading connection extending beyond the prescribed stop valve which is part of a self-closing system "must be fitted with another stop-valve or other leak-tight closure at the end of such connection" (55 FR 37062, September 7, 1990). In the June 17 final rule, § 178.345–11 was reorganized for clarity and paragraph (b)(2) was revised and redesignated as paragraph (c). Through an oversight, the wording "or other leak-tight closure" was omitted in the revised rule and is corrected herein.

In addition, the phrase "Poison B liquids" is replaced with UN hazard class terminology.

Section 178.507. Paragraph (a) is corrected by removing "ID" and replacing it with "1D".

Section 178.601. In paragraph (h), a reference is corrected to include § 178.504.

Section 178.603. Paragraph (a) has been revised to specify that for other than flat drops, the center of gravity of the test packaging must be vertically over the point of impact. The UN Recommendations, as well as the ICAO Technical Instructions and the IMDG Code, require that the center of gravity be vertically over the point of impact. RSPA had originally specified only that a packaging be dropped "diagonally." However, based on petitions for reconsideration and comments to the amendments and corrections of December 20, 1991, RSPA recognizes that a drop with the center of gravity vertically over the point of impact is the most severe test. To permit drops in other orientations is inconsistent with the international requirements, and could allow certification of packagings which do not provide the desired structural integrity. While RSPA had previously stated a belief that a drop test with the center of gravity over the point of impact would be difficult to achieve, RSPA now believes that such an orientation can be and is being achieved in testing of all types of packagings. In addition, there has been some confusion over the number of samples which must be used for performance of the drop test. The intent of paragraph (a) is to require that six sample drums be drop tested, and five sample boxes be tested, etc. One sample cannot be tested five or six times to meet the requirements of this section. Therefore, the heading of the second column of the table in paragraph (a) has been changed to clarify this requirement.

Section 178.606. The requirement in paragraph (d) for the assessment of a packaging's stacking stability has been misinterpreted. The intent of this provision is that, in instances such as guided load tests where stacking stability cannot be assessed during the stacking test, an additional stacking stability assessment must be performed. This additional stacking stability assessment consists of stacking two identically filled packages on the test packaging, and having them maintain their position for one hour. Since this is part of the actual test procedure, paragraph (c) has been modified to specifically require that the stacking stability assessment procedure be performed whenever a guided load test is used. Reference to this stacking

stability assessment procedure has been removed from paragraph (d). Where the stacking test is performed using actual stacked packages, the stacking stability assessment procedure is not required.

Appendix B to Part 178. In the amendments and corrections published December 20, 1991, the alternative leak test procedure known as the "T-zone" test was added for metal drums. This test procedure is intended to be used only as a production testing method, not as a design qualification test. However, by placing the "T-zone" test in appendix B to part 178 without qualification, RSPA inadvertently authorized this test as an alternative for design qualification as well as production testing. Paragraph (4) of appendix B has been changed to limit the use of the alternative test procedure known as the "T-zone" test to other than design qualification testing.

Part 179: Specifications for Tank Cars

Section 179.101–1. The appropriate footnotes for each minimum plate thickness entry for Class DOT cars are moved to follow each entry to clarify that they are footnotes. In addition, for Class DOT 111A200W cars, the footnote "1" is removed as it is inconsistent with footnote "3", which remains.

Section 179.200. Paragraph (b)(4), which requires tank cars equipped with non-closing pressure relief devices to be marked "NOT FOR FLAMMABLE OR POISONOUS LIQUIDS", is removed as it is inconsistent with the marking requirement in § 173.31(a)(15), which allows certain poisonous liquids in tank cars with a non-closing pressure relief device. Part 179 requires tank cars equipped with non-closing pressure relief devices to have the marking "NOT FOR FLAMMABLE OR POISONOUS LIQUIDS" applied to the tank; whereas, part 173 allows certain poisonous liquids in tank cars with a non-closing pressure relief device. Since this marking applies only to rail transportation, is inconsistent with other modes of transport, and is applied for the sole use of the shipping community, § 179.200–18(b)(4) is removed for regulatory consistency thereby leaving the marking requirement to the private sector if the need arises.

Part 180: Continuing Qualification and Maintenance of Packaging

Section 180.403. A section reference in the definition for "corrosive to the tank/valve" a section reference is corrected.

Section 180.405. A section reference in paragraph (g)(2) is corrected.

Section 180.407. Paragraph (d)(2)(vii) states that, as part of the periodic external visual inspection, a cargo tank motor vehicle must conform to parts 393 and 396 of the Federal Motor Carrier Safety Regulations (FMCSR) and, where appropriate, part 571 of the Federal Motor Vehicle Safety Standards (FMVSS). This provision is redundant with § 177.834 which requires motor carriers and other persons subject to part 177 to comply with the FMCSR. Part 571 of the FMVSS applies to newly manufactured vehicles and not to the continuing qualification of a vehicle. For these reasons, paragraph (d)(2)(vii) is removed and reserved.

Section 180.409. Paragraph (b) is revised to clarify that an employee, who is not a Registered Inspector, may perform hydrostatic or pneumatic pressure tests under certain specified conditions, but external and internal visual inspections must be done by a Registered Inspector.

Section 180.413. In a final rule published on September 7, 1990, at 55 FR 37069, the amendatory language to § 180.413 incorrectly stated that paragraph "(d)(1)(v)" was revised instead of stating "(d)(2)(v)" was revised. The revised text allowing the use of a supplemental specification plate on stretched or rebarrelled cargo tanks appears in the September 7 publication but not in the 1991 edition of the CFR. The CFR contains an editorial note following the section stating that RSPA would publish a document in the Federal Register to clarify the agency's intent. The error is corrected herein.

Section 180.415. Paragraph (b) pertaining the display of periodic test and inspection markings on cargo tank motor vehicles is revised to clarify that the date must be readily identifiable with the applicable test or inspection and to permit other arrangements other than the date followed by the type of test or inspection. In the last sentence in paragraph (c), the wording "constructed to different intervals" is revised to read "constructed to different specifications, which are tested and inspected at different intervals." This wording was inadvertently omitted in a June 17, 1991 final rule (Docket HM–183, 56 FR 27877, also see Federal Register publication dated September 7, 1990, page FR 37062).

Rulemaking Analyses and Notices

A. Executive Order 12291

This final rule has been reviewed under the criteria specified in section 1(b) of Executive Order 12291 and is determined not to be a major rule. Although the underlying rule was considered to be "significant" under the regulatory procedures of the Department of Transportation, this document is considered to be "non-significant" because it clarifies and corrects provisions of the final rule and provides consistency. This final rule does not impose additional requirements and, in fact, provides relief in some areas. The net result is that costs imposed under the final rule published in the Federal Register on December 21, 1990 are reduced, but without a reduction in safety [55 FR 52402]. The original regulatory evaluation of the final rule was reexamined but was not modified because the changes made under this rule provide limited relief and thus will result in minimal economic impact on industry.

B. Executive Order 12612

This action has been analyzed in accordance with Executive Order 12612 ("Federalism"). The HMTA contains an express preemption provision which RSPA is implementing at the minimum level necessary to achieve the objectives of the statute. Therefore, preparation of a Federalism Assessment is not warranted.

C. Impact on Small Entities

Based on limited information concerning size and nature of entities likely to be affected by this rule, I certify this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A regulatory flexibility analysis is available for review in the docket.

D. Paperwork Reduction Act

This amendment imposes no changes to the information collection and recordkeeping requirements contained in the December 21, 1990 final rule, which was approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. chapter 35.

E. Regulation Identification Number (RIN)

A regulation identification number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN numbers contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

F. National Environmental Policy Act

This final rule has been reviewed under the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) and does not require an environmental impact statement.

List of Subjects

49 CFR Part 107

Administrative practice and procedure, Hazardous materials transportation, Packaging and containers, Penalties, Reporting and recordkeeping requirements.

49 CFR Part 171

Exports, Hazardous materials transportation, Hazardous waste, Imports, Incorporation by reference, Reporting and recordkeeping requirements.

49 CFR Part 172

Hazardous materials transportation, Hazardous waste, Labeling, Packaging and containers, Reporting and recordkeeping requirements.

49 CFR Part 173

Hazardous materials transportation, Packaging and containers, Radioactive materials, Reporting and recordkeeping requirements, Uranium.

49 CFR Part 174

Hazardous materials transportation, Radioactive materials, Railroad safety.

49 CFR Part 176

Hazardous materials transportation, Maritime carriers, Radioactive materials, Reporting and recordkeeping requirements.

49 CFR Part 177

Hazardous materials transportation, Motor carriers, Radioactive materials, Reporting and recordkeeping requirements.

49 CFR Part 178

Hazardous materials transportation, Motor vehicle safety, Packaging and containers, Reporting and recordkeeping requirements.

49 CFR Part 179

Hazardous materials transportation, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 180

Hazardous materials transportation, Motor carriers, Motor vehicle safety, Packaging and containers, Reporting and recordkeeping requirements.

In consideration of the foregoing, 49 CFR Chapter I is amended as follows:

PART 107—HAZARDOUS MATERIALS PROGRAM PROCEDURES

1. The authority citation for part 107 continues to read as follows:

Authority: 49 App. U.S.C. 1421(c), 1802, 1804, 1805, 1808, 1808–1811, 1815; Public Law 89–670, 80 Stat. 933 (49 App. U.S.C. 1653(d), 1655); 49 CFR 1.45 and 1.53 and app. A of 49 CFR part 1.

2. In § 107.315, paragraph (c) is revised and paragraph (d) is added, to read as follows:

§ 107.315 Admission of violations.

* * * * *

(c) Payment of a civil penalty, when the amount of the penalty exceeds $10,000, must be made by wire transfer, through the Federal Reserve Communications System (Fedwire), to the account of the U.S. Treasury. Detailed instructions on making payments by wire transfer may be obtained from the Salary and Expenses Branch (M–86.2), Accounting Services Division, Office of the Secretary, room 9112, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590–0001 (Tel. No. 202–366–5760). A photocopy of the electronic funds transfer receipt should be sent to the Office of the Chief Counsel (DCC–1), RSPA, room 8405, at the same address.

(d) Payment of a civil penalty, when the amount of the penalty is $10,000 or less, must be made either by wire transfer, as set forth in paragraph (c) of this section, or certified check or money order payable to "U.S. Department of Transportation" and submitted to the Salary and Expenses Branch (M–86.2), Accounting Services Division, Office of the Secretary, room 9112, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590–0001. A photocopy of that check or money order should be sent to the Office of the Chief Counsel (DCC–1), RSPA, room 8405, at the same address.

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

3. The authority citation for part 171 continues to read as follows:

Authority: 49 App. U.S.C. 1802, 1803, 1804, 1805, 1808, 1815, 1818; 49 CFR Part 1.

4. In § 171.8, the following definitions are added, revised, or removed, as indicated, in appropriate alphabetical order:

§ 171.8 Definitions and abbreviations.

* * * * *

[Add:]

* * * * *

NRC (non-reusable container) means a packaging (container) whose reuse is restricted in accordance with the provisions of § 173.28 of this subchapter.

* * * * *

[Revise:]

* * * * *

Bulk packaging means a packaging, other than a vessel or a barge, including a transport vehicle or freight container, in which hazardous materials are loaded with no intermediate form of containment and which has:

(1) A maximum capacity greater than 450 L (199 gallons) as a receptacle for a liquid;

(2) A maximum net mass greater than 400 kg (882 pounds) and a maximum capacity greater than 450 L (119 gallons) as a receptacle for a solid; or

(3) A water capacity greater than 454 kg (1000 pounds) as a receptacle for a gas as defined in § 173.115 of this subchapter.

* * * * *

Non-bulk packaging means a packaging which has:

(1) A maximum capacity less than 450 L (119 gallons) as a receptacle for a liquid;

(2) A maximum net mass less than 400 kg (882 pounds) and a maximum capacity less than 450 L (119 gallons) as a receptacle for a solid; or

(3) A water capacity greater than 454 kg (1000 pounds) or less as a receptacle for a gas as defined in § 173.115 of this subchapter.

* * * * *

Oxidizer. See § 173.127 of this subchapter.

* * * * *

§ 171.8 [Amended]

5. In addition, in § 171.8, the second definition of "Oxidizer" is removed.

6. In § 171.12, paragraph (b)(7) is revised to read as follows:

§ 171.12 Import and export shipments.

* * * * *

(b) * * *

(7) A Class 1 material must be classed and approved under the procedures in subpart C of part 173 of this subchapter and conform to the requirements of 172.320 and part 178 of this subchapter.

* * * * *

7. In § 171.12a, the first sentence of paragraph (b) introductory text is revised to read as follows:

§ 171.12a Canadian shipments and packagings.

* * * * *

(b) *Conditions and limitations.* Notwithstanding the requirements of parts 172, 173, and 178 of this subchapter, and subject to the limitations of paragraph (a) of this section, a hazardous material that is classed, marked, labeled, placarded, described on a shipping paper, and packaged in accordance with the Transportation of Dangerous Goods

(TDG) Regulations issued by the Government of Canada may be offered for transportation and transported to or through the United States by motor vehicle or rail car. * * *

* * * * *

8. In § 171.14, the section heading, paragraph (a), the introductory text of paragraph (b), and the introductory text of paragraph (c)(2) preceding the Placard Substitution Table are revised to read as follows:

§ 171.14 Transitional provisions for implementing requirements based on the UN Recommendations.

(a) *General.* The transitional provisions of this section are subject to the following conditions and limitations:

(1) *Purpose.* A rule published in the **Federal Register** on December 21, 1990, effective October 1, 1991, resulted in a comprehensive revision of this subchapter based on the UN Recommendations. Final rules published in the **Federal Register** on December 20, 1991, effective October 1, 1991, and on October 1, 1992 in the **Federal Register**, effective October 1, 1992, further revised the December 21, 1990 final rule. The purpose of the provisions of this section is to provide an orderly transition to the new requirements, so as to minimize any burdens associated with them:

(2) *Scope.* Except as provided in paragraph (a)(3) of this section, during a transition period as provided in paragraphs (b) and (c) of this section, a person may elect to comply with either the applicable requirements of this subchapter in effect on September 30, 1991, or the requirements of this subchapter appearing in the December 20, 1990 rule, as revised in final rules published in the **Federal Register** on December 20, 1991, and October 1, 1992.

(3) *Applicability.* Final rules issued subsequent to the December 21, 1990 rule may implement different time requirements than the transitional provisions in this section. When the effective date section or regulatory text of a final rule imposes a compliance date earlier or later than that which would be required under this section, the transition date in this section does not apply.

(b) *Transition dates.* Except as provided in paragraph (a) of this section, the following transition dates apply only to requirements in the December 21, 1990 rule, as revised in the December 20, 1991 and October 1, 1992. final rules:

* * * * *

(c) * * *

(2) *Transitional placarding provisions.* Until October 1, 2001, placards which conform to specifications for placards in effect on September 30, 1991 or placards specified in the December 21, 1990 final rule may be used, for highway transportation only, in place of the placards specified in subpart F of part 172 of this subchapter, in accordance with the following table:

* * * * *

PART 172—HAZARDOUS MATERIALS TABLE, SPECIAL PROVISIONS, HAZARDOUS MATERIALS COMMUNICATIONS, EMERGENCY RESPONSE INFORMATION, AND TRAINING REQUIREMENTS

9. The authority citation for part 172 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, and 1808; 49 CFR part 1, unless otherwise noted.

§ 172.101 [Amended]

10. In § 172.101, in the Hazardous Materials Table, the following changes are made:

a. For the entry "Acrolein, inhibited", the "+" is removed in Column (1), and, in Column (7), Special Provision "T45" is revised to read "T44".

b. For the entry "Aerosols, *poison, each not exceeding 1 L capacity*", in Column (7), Special Provision "3" is removed.

c. For the entry "Alkali metal alloys, liquid, n.o.s.", in Column (7), Special Provision "B48," is added in appropriate alpha-numeric order.

d. For the second entry for "Ammonia anhydrous liquefied *or* Ammonia solutions" commas are added to read "Ammonia, anhydrous, liquefied *or* Ammonia solutions".

e. For the entry "Ammonium nitrate, liquid *(hot concentrated solution)*, Special Provision "B17," is removed.

f. The first entry for "*Azido hydroxy tetrazole (mercury and silver salts)*" is removed.

g. For the entry "Barium peroxide", in Column (8C), "2" is removed and replaced with "242".

h. For the entry "Blue Asbestor *Crocidolite) or* Brown asbestos *(amosite, mysorite)*", in Column (1), an "I" is added and in Column (2), the words "Blue Asbestos" are revised to read "Blue asbestos".

i. For the first entry for "Bombs, *with bursting charge*," in Division 1.1F, in Column (9A), the word "Forbiden" is revised to read "Forbidden".

j. For the entry "Butane *or* Butane mixtures *see also* Petroleum gases, liquefied", in Column (7), Special Provision "19" is added.

k. For the entry "Butylene *see also* Petroleum gases, liquefied", in Column (7), Special Provision "19" is added.

l. For the entry "Carbon dioxide and nitrous oxide mixtures", the Column (8C) section reference "244" is revised to read "314, 315".

m. For the entry "Carbon monoxide", the Column (8C) section reference "302" is revised to read "314, 315".

n. For the entry "Combustible liquid, n.o.s.", the entry is amended by moving it to its correct alphabetical sequence following "*Collodion, see* Nitrocellulose *etc.*"

o. For the entry "Corrosive solids, self heating, n.o.s." in Packing Group I, in Column (8C), the section reference "241" is revised to read "243".

p. For the entry "Corrosive solids, which in contact with water emit flammable gases, n.o.s." in Packing Group I, in Column (8C), the section reference "241" is revised to read "243"

q. For the entry "Diethylaminopropylamine", in Column (1), "AW" is removed.

r. For the entry "Dimethylhydrazine, unsymmetrical", in Column (7), Special Provision "B58," is removed and Special Provision "B74," is added in appropriate alpha-numeric order.

s. For the entry "Fusee", the entry is amended by moving it to its correct alphabetical sequence following "Fuse, safety".

t. For the entry "Hexachlorocyclopentadiene", in Column (7), Special Provision "T44" is revised to read "T45".

u. For the entry "Hydrochloric acid, solution", in Column (7), Special Provision "B2" is revised to read "B3".

v. For the entry "Hydrogen cyanide, anhydrous, stabilized", in Column (7), Special Provision "B35," is added in appropriate alpha-numeric order.

w. For the entry "Hydrogen peroxide, aqueous solutions *with more than 40 per cent but not more than 60 per cent hydrogen peroxide (stabilized as necessary)*", in Column (7), Special Provision "BB53" is revised to read "B53".

x. For the entry "Hydroxylamine sulfate", in Column (1), "AW" is removed.

y. For the entry "Isophoronediamine", in Column (1), "AW" is removed.

z. For the entry " Lead compounds, soluble, n.o.s.", the Column (5) packing group reference "II" is revised to read "III" and the Column (6) label "POISON" is revised to read "KEEP AWAY FROM FOOD".

aa. For the entry "Metal powders, flammable, n.o.s." in Packing Group III, in Column (8C), the section reference "140" is revised to read "240".

bb. For the entry "Methanol, *or* Methyl alcohol", in Column (8C), the

section reference "243" is revised to read "242".

cc. For the entry "Methylhydrazine", in Column (8B), the section reference "227" is revised to read "226".

dd. For the entries "Nitrating acid mixtures *with not more than 50 per cent nitric acid*" and "Nitrating acid mixtures *with 50 per cent or more nitric acid*", in Column (7), Special Provision "B47," is added in appropriate alpha-numeric order.

ee. For the entry "PCB *see* Polychlorinated biphenyls", in Column (1), "D" is removed and replaced with "AW".

ff. For the entry "Phosphorus pentasulfide, *free from yellow or white phosphorus*", in Column (8C), the section reference "243" is revised to read "242".

gg. For the entry "Propane *see also* Petroleum gases, liquefied", in Column (7), Special Provision "19" is added.

hh. For the entry "Silicon tetrachloride", in Column (7), Special Provision "N41," is removed.

ii. For the entry "Sodium", in Column (7), Special Provisions "B48," and ",T46" are added in appropriate alpha-numeric order and Special Provision "T28," is removed.

jj. For the entry "*Sodium bisulfate, solid or solution, see* Sodium hydrogen sulfate, solid *or* solution", in Column (2), the proper shipping name is revised to read "*Sodium bisulfate, solution, see* Sodium hydrogen sulfate, solution".

kk. For the entry "Substances which in contact with water emit flammable gases, solid n.o.s." in Packing Group III, in Column 8(C) the section reference "242" is revised to read "241" and the proper shipping name in Column (2) is amended by inserting a comma after the word "solid".

ll. For the entry "Sulfuric acid", in Column (7), Special Provision "B2" is revised to read "B3".

mm. For the entry "Sulfuric acid, fuming *less than 30 percent free sulfur trioxide*", in Column (6), the ", POISON" label is removed.

nn. For the entry "Sulfuryl chloride", in Column (7), Special Provision "B32" is revised to read "B30".

oo. For the entry "Tars, liquid *including road asphalt and oils bitumen and cut backs*", in Packing Groups II and III, in Column (7), Special Provision "B13," is added in appropriate alpha-numeric order.

pp. For the entry "Titanium tetrachloride", in Column (7), Special Provision "B77," is added in appropriate alpha-numeric order.

qq. For the entry "(mono-(Trichloro) tetra-(monopotassium dichloro)- penta-s-triazinetrione, dry (*containing over 39% available chlorine*)", in Column (2), the proper shipping name is amended by removing the first parenthesis preceding "mono-(Trichloro)".

rr. For the entry "Vanadium trichloride", in Column (1), "AW" is removed.

11. In addition, the Hazardous Materials Table is amended by removing, adding, or revising, in appropriate alphabetical sequence, the following entries:

§ 172.101 HAZARDOUS MATERIALS TABLE

Symbols	Hazardous materials descriptions and proper shipping names	Hazard class or division	Identification numbers	Packing group	Label(s) required (if not excepted)	Special provisions	(8) Packaging authorizations (§ 173.***)			(9) Quantity limitations		(10) Vessel stowage requirements

§ 172.101, App. [Amended]

12. In the Appendix to § 172.101, in paragraph 2., the reference "§ 172.101(c)(9)" is revised to read "§ 172.101(c)(8)".

13. In § 172.102, the following special provisions are added, revised, or removed as indicated:

a. In paragraph (c)(1), Special Provisions 19 and 21 are added.

b. In paragraph (c)(3), Special Provisions B13, B35, and B47 are added and Special Provisions B14 and B69 are revised.

c. In paragraph (c)(7)(ii), T28 is redesignated as T46 and moved to its proper alpha-numeric order and Special Provisions T28, T39 and T43 are added.

§ 172.102 Special provisions.

* * * * *

(c) * * *

(1) * * *

Code/Special Provisions

* * * * *

19. For domestic transportation only, the identification number "UN1075" may be used in place of the identification number specified in Column (4) of the § 172.101 Table. The identification number used must be consistent on package markings, shipping papers and emergency response information.

* * * * *

21. This material must be stabilized by appropriate means (e.g., addition of chemical inhibitor, purging to remove oxygen) to prevent dangerous polymerization (see § 173.21(f) of this subchapter).

* * * * *

(3) * * *

Code/Special Provisions

B13. A nonspecification cargo tank motor vehicle authorized in § 173.247 of this subchapter must be at least equivalent in design and in construction to a DOT 406 cargo tank or MC 306 cargo tank (if constructed before September 1, 1993), except as follows:

a. Packagings equivalent to MC 306 cargo tanks are excepted from §§ 178.340–10, certification; 178.341–4, vents; and 178.341–5, emergency flow control.

b. Packagings equivalent to DOT 406 cargo tanks are excepted from §§ 178.345–14, marking; 178.345–15, certification; 178.346–10, pressure relief; and 178.346–11, outlets.

c. Packagings are excepted from the design stress limits at elevated temperatures, as described in the ASME Code. However, the design stress limits may not exceed 25 per cent of the stress, as specified in § 178.65–5(b) of this subchapter, for 0 temper at the maximum design temperature of the cargo tank.

B14. Each tank, except a multi-unit tank car tank, must be insulated with at least 100 mm (3.9 inches) of cork or other suitable insulation material of sufficient thickness that the overall thermal conductance at 15.5 °C (60 °F) is not more than 1.533 kilojoules per hour per square meter per degree Celsius (0.075 Btu per hour per square foot per degree Fahrenheit) temperature differential. Insulation systems must not promote corrosion to steel when wet. Tank and jacket protective coatings are required. Additionally, all tank car tanks constructed after October 1, 1988 and tanks repaired after October 1, 1993, where the entire jacket is removed during the repair, must have tank and jacket protective coatings. The jacket must be flashed around all openings so as to be weather tight.

* * * * *

B35. Tank cars containing hydrogen cyanide may be alternatively marked "Hydrocyanic acid, liquefied" if otherwise conforming to marking requirements in subpart D of this part.

* * * * *

B47. A safety relief device with a start-to-discharge pressure setting of 310 kPa (45 psig) is permitted.

* * * * *

B69. Dry sodium cyanide or potassium cyanide may be shipped in sift-proof weather-resistant metal covered hopper cars, covered motor vehicles, portable tanks or non-specification bins. Bins must be approved by the Associate Administrator for Hazardous Materials Safety. Flexible intermediate bulk containers (FIBCs) may also be used under conditions approved by the Associate Administrator for Hazardous Materials Safety.

* * * * *

(7) * * *

(ii) * * *

Code/Special Provisions

* * * * *

T28. See entry for T26 in the IM Tank Configuration Table in paragraph (c)(70(i) of this section.

* * * * *

T39. See entry for T39 in the IM Tank Configuration Table in paragraph (c)(7)(i0 of this section.

* * * * *

T43. See entry for T43 in the IM Tank Configuration Table in paragraph (c)(7)(i) of this section.

* * * * *

§ 172.102 [Amended]

14. In addition, in § 172.102, the following changes are made:

a. In paragraph (c)(1), in Special Provision 4, the wording "Hazard Zone C" is revised to read "Hazard Zone D".

b. In paragraph (c)(1), in Special Provision 12, the word "comply" is revised to read "conform".

c. In paragraph (c)(1), in Special Provision 28, the word "dihydrated" is revised to read "dehydrated"

d. In paragraph (c)(1), in Special Provision 31, the word "nonhazardous" is revised to read "non-hazardous".

e. In paragraph (c)(3), in Special Provisions B2, B3, B4, and B10, the wording "MC 306" is revised to read "MC 300, MC 301, MC 302, MC 303, MC 305, and MC 306".

f. In paragraph (c)(3), in Special Provision B24, the wording "shall be" is revised to read "must be".

g. In paragraph (c)(3), in Special Provision B26, the last two sentences are revised to read "In addition, the material also must be covered with an inert gas or the container must be filled with water to the tank's capacity. After unloading, the residual material also must be covered with an inert gas or the container must be filled with water to the tank's capacity.".

h. In paragraph (c)(3), in Special Provision B68, the wording "2069 kPa" is revised to read "2,069 kPa".

i. In paragraph (c)(3), in Special Provision B80, the wording "shall have" is revised to read "must have".

j. In paragraph (c)(3), in Special Provision B90, the wording "equivalent or" is revised to read "equivalent to"

§ 172.203 [Amended]

15. In § 172.203, in paragraph (m)(1), the wording "is not disclosed in the shipping name" is revised to read "is not disclosed in the shipping name or class entry".

§ 172.312 [Amended]

16. In § 172.312, in paragraph (a)(2), a second sentence is added at the end of the paragraph to read "Depicting a rectangular border around the arrows is optional.".

§ 172.330 [Amended]

17. In § 172.330, in paragraph (a), the paragraph heading "*Shipping name.*" is revised to read *"Shipping name and identification number."*.

§ 172.405 [Amended]

18. In § 172.405, in paragraph (a) introductory text, the wording "is not required on a label when" is revised to read "is not required on a primary or subsidiary label when".

19. In § 172.422, paragraph (a) is revised to read as follows:

§ 172.422 SPONTANEOUSLY COMBUSTIBLE label.

(a) Except for size and color, the SPONTANEOUSLY COMBUSTIBLE label must be as follows:

BILLING CODE 4910-60-M

BILLING CODE 4910-60-C

* * * * *

20. In § 172.504, the introductory text of paragraph (c) and paragraphs (f)(1) and (f)(4) are revised, and paragraphs (f)(9) and (f)(10) are added to read as follows:

§ 172.504 General placarding requirements.

* * * * *

(c) *Exception for less than 454 kg (1,001 pounds).* Except for bulk packagings and hazardous materials subject to § 172.505, when hazardous materials covered by Table 2 of this section are transported by highway or rail, placards are not required on—

* * * * *

(f) * * * (1) When more than one division placard is required for Class 1 materials on a transport vehicle, rail car, freight container or unit load device, only the placard representing the lowest division number must be displayed.

* * * * *

(4) OXIDIZER placards are not required for Division 5.1 materials on freight containers, unit load devices, transport vehicles or rail cars which also contain Division 1.1 or 1.2 materials and which are placarded with EXPLOSIVES 1.1 or 1.2 placards, as required.

* * * * *

(9) For domestic transportation, a Class 9 placard is not required. A bulk packaging containing a Class 9 material must be marked on each side and each end with the appropriate identification number displayed on an orange panel or a white-square-on-point display configuration are required by subpart D of this part.

(10) For domestic transportation of Division 6.1, PG III materials, a POISON placard may be used in place of a KEEP AWAY FROM FOOD placard.

* * * * *

21. In § 172.505, paragraph (a) is revised to read as follows:

§ 172.505 Placarding for subsidiary hazards.

(a) Each transport vehicle, freight container, portable tank and unit load device that contains a poisonous material subject to the "Poison-Inhalation Hazard" shipping description of § 172.203(m)(3) must be placarded with a POISON or POISON GAS placard, as appropriate, on each side and each end, in addition to any other placard required for that material in § 172.504. Duplication of the POISON or POISON GAS placard is not required.

* * * * *

22. In § 172.510, paragraph (e) is revised to read as follows:

§ 172.510 Special placarding provisions: Rail.

* * * * *

(e) *Chemical ammunition.* Each rail car containing Division 1.1 or 1.2 (explosive) ammunition which also meets the definition of a material poisonous by inhalation (see § 171.8 of this subchapter) must be placarded EXPLOSIVES 1.1 or EXPLOSIVES 1.2 and POISON GAS or POISON.

§ 172.510 [Amended]

23. In addition, in § 172.510, in paragraph (c), in the second sentence, the wording "§ 172.505(c)" is revised to read "§ 172.505".

§ 172.519 [Amended]

24. In § 172.519, in paragraph (b)(3), the wording "For other than Class 7," is revised to read "For other than Class 7 or the OXYGEN placard,".

§ 172.526 [Amended]

25. In § 172.526, in paragraph (a)(4), in the first sentence, "172.540," is added in its appropriate numerical sequence.

26. In § 172.560, paragraph (b) is revised to read as follows:

§ 172.560 CLASS 9 placard.

* * * * *

(b) In addition to conformance with § 172.519, the background on the CLASS 9 placard must be white with seven black vertical stripes on the top half extending from the top of the placard to one inch above the horizontal centerline. The black vertical stripes must be spaced so that, visually, they appear equal in width to the six white spaces between them. The space below the vertical lines must be white with the class number 9 underlined and centered at the bottom.

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

27. The authority citation for part 173 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 1806, 1807, 1808, 1817; 49 CFR part 1, unless otherwise noted.

§ 173.2 [Amended]

28. In the § 173.2 Table, for the entry "Oxidizer", in the fourth column the entry "§ 173.128" is removed and replaced with "§ 173.127".

§ 173.22 [Amended]

29. In § 173.22, in paragraph (a)(4), the reference "§ 178.2(d)" is revised to read "§ 178.2(c)".

§ 173.23 [Amended]

30. In § 173.23, in paragraph (c), the wording "i.e." is revised to read "e.g.".

§ 173.24a [Amended]

31. In § 173.24a, in paragraph (c)(1)(iii), the wording "Corrosive materials" is revised to read "Corrosive materials (except ORM–D)".

32. § 173.28, a new paragraph (e) is added to read as follows:

§ 173.28 Reuse, reconditioning and remanufacture of packagings.

* * * * *

(e) *Non-reusable containers.* A packaging marked as NRC according to the DOT specification or UN standard requirements of part 178 of this subchapter may be reused for the shipment of any material not required by this subchapter to be shipped in a DOT specification or UN standard packaging.

§ 173.31 [Amended]

33. In § 173.31, in paragraph (c), the following changes are made:

a. In Note 1 following Retest Table 1, the wording "Associate Director for HMR" is revised to read "Associate Administrator for Hazardous Materials Safety".

b. In Note n following Retest Table 1, the reference "§ 179.102–11 of this chapter" is revised to read "§ 173.314(i)".

§ 173.32 [Amended]

34. In § 173.32, the following changes are made:

a. In paragraph (a)(1), the words "comply with" are revised to read "conform to".

b. In paragraph (a)(3), the reference "§ 173.300" is revised to read "§ 173.115" and the words "complying with" are revised to read "conforming to".

c. In paragraph (a)(5), the reference "§ 172.101(c)(7)" is revised to read "§ 172.102(c)(7)".

d. In paragraph (c), the reference "(e)(3), (4), and (5)" is revised to read "(e)(3) and (4)".

35. In § 173.32c, a new paragraph (r) is added to read as follows:

§ 173.32c Use of Specification IM portable tanks.

* * * * *

(r) Hazardous materials authorized for transport in a tank fitted with bottom outlets having two serially mounted closures are also authorized for transport in a tank fitted with three serially mounted closures and in tanks fitted with no bottom outlets. Similarly, hazardous materials authorized for transport in tanks fitted with bottom outlets having three serially mounted closures are also authorized for transport in tanks fitted with no bottom outlets.

§ 173.32c [Amended]

36. In addition, in § 173.32c, in paragraph (f), the reference "§ 178.270–11(d)" is corrected to read "§ 178.270–11(d)."

§ 173.33 [Amended]

37. In § 173.33, the following changes are made:

a. In paragraph (c)(1)(iii), the reference "§ 173.119(a)(17)(iii)" is revised to read "Special Provision B33 in § 172.102(c)(3) of this subchapter".

b. In paragraph (c)(5), the wording "Poison B material" is revised to read "Division 6.1 (poisonous liquid) material".

c. In paragraph (e), the wording "Poison B liquid" is revised to read "Division 6.1 (poisonous liquid) material".

§ 173.115 [Amended]

38. In § 173.115, in paragraph (b)(1), the wording "or greater" is added immediately following "280 kPa (41 psia)" and before "at 20 °C".

§ 173.120 [Amended]

39. In § 173.120, in paragraphs (b)(1) and (b)(2), the wording ", except Class 9," is removed both places it appears.

40. In § 173.124, paragraph (a)(3)(ii) is revised to read as follows:

§ 173.124 Class 4 Divisions 4.1, 4.2 and 4.3—Definitions.

(a) * * *

(3) * * *

(ii) Show a burning rate faster than 2.2 mm (0.087 inches) per second when tested in accordance with paragraph 2.c.(2) of appendix E to this part; or

* * * * * *

41. In § 173.133, in paragraph (a)(2)(ii), the introductory text is republished and Figure 1 is revised to read as follows:

§ 173.133 Assignment of packing group and hazard zones for Division 6.1 materials.

(a) * * *

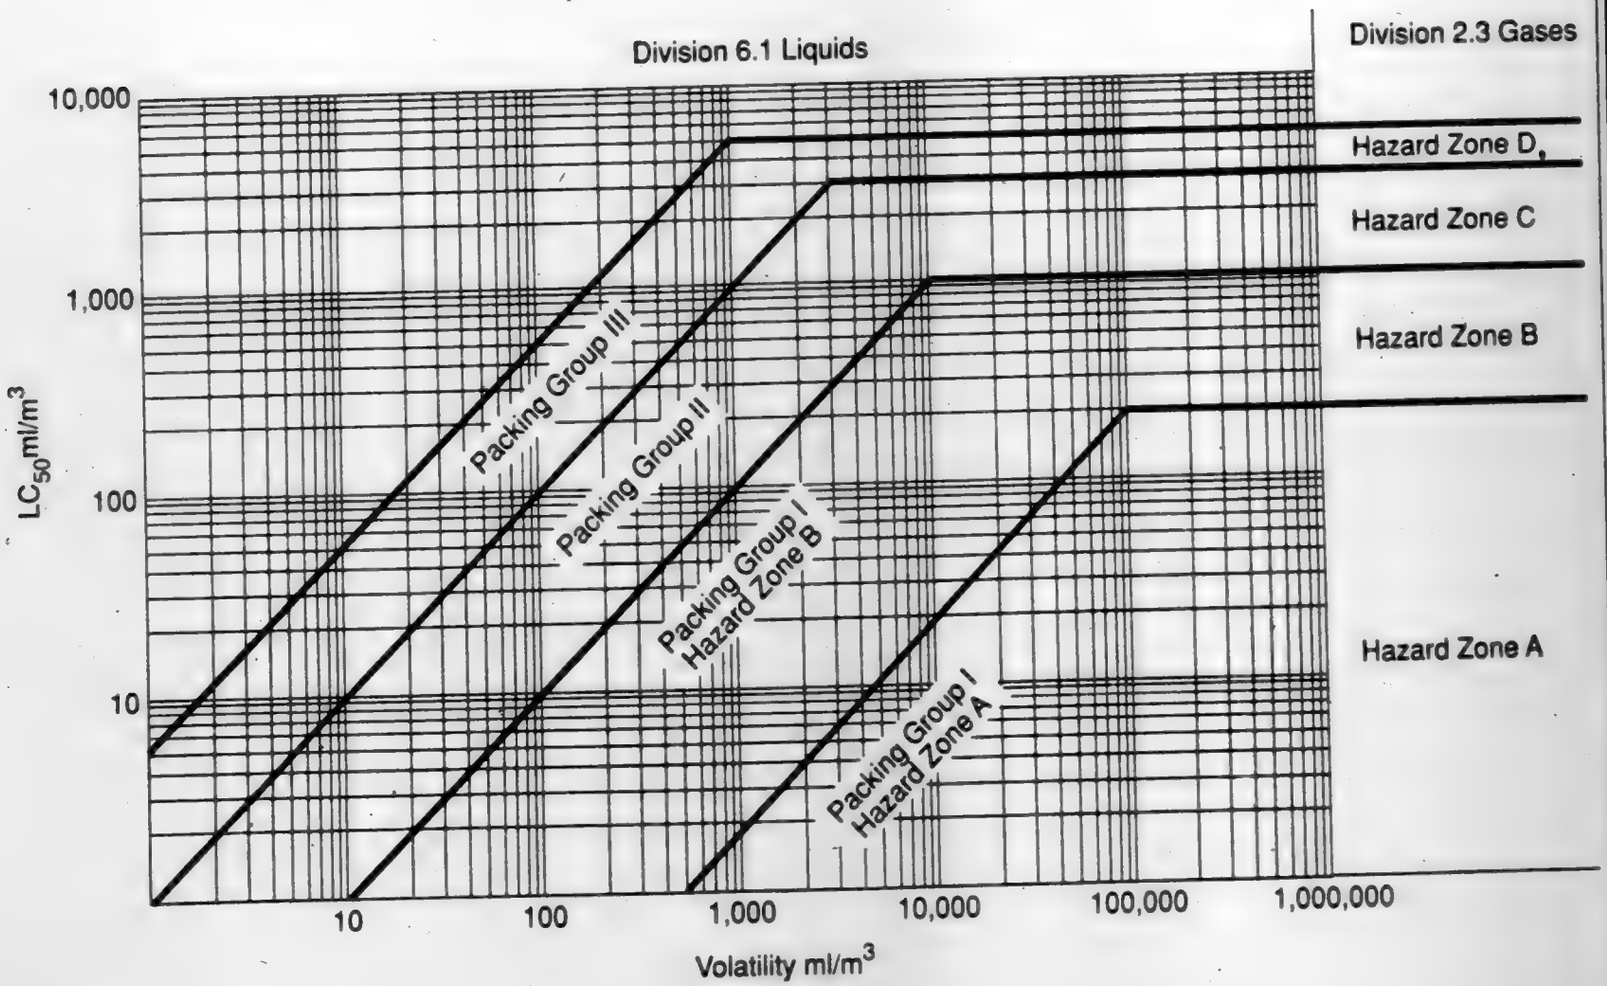
(2) * * *

(ii) These criteria are represented graphically in Figure 1:

BILLING CODE 4910-60-M

Figure 1

Inhalation Toxicity: Packing Group and Hazard Zone Borderlines



BILLING CODE 4910-60-C

* * * * *

§ 173.133 [Amended]

42. In addition, in § 173.133, the following changes are made:

a. In the paragraph (a)(1) table, in column 4, "<0.5<2" is revised to read to ">0.5<2".

b. In paragraph (a)(2)(i), in column 1 of the table, add "II" and "III", respectively, for the entries in column 2 beginning "V>LC_{50};" and "V>.2LC_{50};", respectively.

43. Section 173.140 is revised to read as follows:

§ 173.140 Class 9—Definitions.

For the purposes of this subchapter, "miscellaneous hazardous material" (Class 9) means a material which presents a hazard during transportation but which does not meet the definition of any other hazard class. This class includes:

(a) Any material which has an anesthetic, noxious or other similar property which could cause extreme annoyance or discomfort to a flight crew member so as to prevent the correct performance of assigned duties; or

(b) Any material which meets the definition in § 171.8 of this subchapter for an elevated temperature material, a hazardous substance or a hazardous waste.

§ 173.150 [Amended]

44. In § 173.150, the following changes are made:

a. In paragraphs (a) and (f), the wording ", except Class 9" is removed.

b. In paragraph (f)(3)(vii), the word "comply" is revised to read "conform".

45. In § 173.154, paragraph (d) is revised to read as follows:

§ 173.154 Exceptions for Class 8 (corrosive materials).

* * * * *

(d) *Materials corrosive to aluminum or steel only.* Except for a hazardous substance or a hazardous waste, a material classed as a Class 8, Packing Group III, material solely because of its corrosive effect—

(1) On aluminum is not subject to any other requirements of this subchapter when transported by motor vehicle or rail car in a packaging constructed of materials that will not react dangerously with or be degraded by the corrosive material; or

(2) On steel is not subject to any other requirements of this subchapter when transported by motor vehicle or rail car in a bulk packaging constructed of materials that will not react dangerously with or be degraded by the corrosive material.

§ 173.156 [Amended]

46. In § 173.156, in paragraph (b), in the second sentence, the wording "unitized in cages, carts or similar overpacks" is revised to read "unitized in cages, carts, boxes or similar overpacks" and the wording "from a distribution center to a retail outlet" is revised to read "from a manufacturer to a distribution center, from a manufacturer or a distribution center to a retail outlet, or return".

47. In § 173.159, new paragraphs (b)(3), (b)(4), (b)(5), and (b)(6) are added to read as follows:

§ 173.159 Batteries, wet.

* * * * *

(b) * * *

(3) 1D plywood drums.

(4) 1G fiber drums.

(5) 1H2 and 3H2 plastic drums and jerricans.

(6) 4H2 plastic boxes.

* * * * *

§ 173.159 [Amended]

48. In addition, in § 173.159, in paragraph (c) introductory text, the word "articles" is revised to read "materials".

§ 173.193 [Amended]

49. In § 173.193, in paragraph (d), the wording", except those containing methyl bromide," is added to immediately follow the word "Cylinders".

§ 173.211 [Amended]

50. In § 173.211, in paragraph (c), for the entry "Plastic receptacle in steel, aluminum, plywood, fiber or plastic drum:" the wording "6HA2" is revised to read "6HA1"; and for the entry "Plastic receptacle in steel, aluminum, wooden, plywood or fiberboard box:" the wording "6HA1" is revised to read "6HA2".

§ 173.225 [Amended]

51. In § 173.225, the following changes are made:

a. In paragraph (e)(2), the wording "MC 310, MC 311 and MC 312 cargo tank motor vehicles" is revised to read "MC 310, MC 311, MC 312 and DOT 412 cargo tank motor vehicles".

b. In paragraph (e)(3), the introductory text and paragraphs (e)(3)(i) through (e)(3)(iii) are redesignated as paragraphs (e)(3)(i) introductory text and (e)(3)(i)(A) through (e)(3)(i)(C), respectively; paragraph (e)(3)(v) is redesignated as new paragraph (e)(3)(ii); and paragraph (e)(3)(iv) is redesignated as paragraph (e)(4).

§ 173.227 [Amended]

52. In § 173.227, in paragraph (b) introductory text, in the first sentence the phrase "or 1H1 drums further packed in a 1A2 or 1H2 drum or a 6HA1 composite" is revised to read "or 1H1 drum or 6HA1 composite further packed in a 1A2 or 1H2 drum".

53. In § 173.244, the section heading is revised to read as follows:

§ 173.244 Bulk packaging for certain pyrophoric liquids (Division 4.2), dangerous when wet (Division 4.3) materials, and poisonous liquids with inhalation hazards (Division 6.1).

* * * * *

54. In § 173.302, paragraph (h) is revised to read as follows:

§ 173.302 Charging of cylinders with non-liquefied compressed gases.

* * * * *

(h) *Poisonous mixtures.* Cylinders containing mixtures meeting Division 2.3 *Hazard Zone A* must conform to the requirements of § 173.40 of this part.

§ 173.302 [Amended]

55. In addition, in § 173.302, in paragraph (a)(5)(iii), the reference "RR-C-901b" is corrected to read "RR-C-901c" each place it appears.

56. In § 173.304, paragraph (g) is revised to read as follows:

§ 173.304 Charging of cylinders with liquefied compressed gas.

* * * * *

(g) *Poisonous mixtures.* Cylinders containing mixtures meeting Division 2.3 *Hazard Zone A* must conform to the requirements of § 173.40 of this part.

§ 173.304 [Amended]

57. In addition, in § 173.304, in paragraph (f)(1), in the second sentence, the wording "packaged in Spec. 12B (§ 178.205 of this subchapter) fiberboard boxes equipped with top and bottom pads which will provide three complete thicknesses of fiberboard on top and bottom of each box, or Spec. 15A, 15B, 15C, 19A, or 19B (§ § 178.168, 178.169, 178.170, 178.190, 178.191 of this subchapter) wooden boxes" is revised to read "packaged in strong, tight packagings".

58. In § 173.314, the introductory text of paragraph (c) is revised to read as follows:

§ 173.314 Requirements for compressed gases in tank car tanks.

* * * * *

(c) *Authorized gases, filling limits for tank cars.* A person may load and offer a tank car containing a compressed gas

for transportation only in accordance with the following table:

* * * * *

§ 173.314 [Amended]

59. In addition, in § 173.314, the following changes are made:

a. In the table in § 173.314(c), for the entry "Ammonia, anhydrous, or ammonia solutions >50 percent ammonia", in Column 2, the first "Note 21" is revised to read "Note 25".

b. In the table in § 173.314(c), for the entry "Ammonia, solutions with >35 percent <50 percent ammonia by mass", Column 3 is amended by adding "109A," immediately after "105A," and before "112A".

c. In the table in § 173.314(c), for the entry "Division 2.3, Hazard Zone D, materials not specifically identified in this table", in Column 2, the first "Note 21" is revised to read "Note 25"; in Column 3, "105J300W, 109A, 112J340W, 112T340W, 114J340W, 114T340W" is revised to read "105A300W, 109A, 112S340W, 114S340W"; and in Column 4, ",24" is added immediately following "15".

d. In the Notes following the § 173.314(c) table, Notes 21 and 22 are revised and Note 25 is added to read as follows:

Notes:

* * * * *

[21] The requirements of § 173.24(b) of this subchapter apply.

[22] The requirements of § 173.245 of this subchapter apply.

* * * * *

[25] The liquefied gas must be loaded so that the outage is at least two percent of the total capacity of the tank at the reference temperature of 46 °C (115 °F) for non-insulated tanks and 41 °C (105 °F) for insulated tanks.

* * * * *

§ 173.315 [Amended]

60. In § 173.315, the following changes are made:

a. In paragraph (a), in the table, in Notes 3, 11, and 16, the words "comply with" are revised to read "conform to".

b. In paragraphs (d) and (i)(12), the reference "paragraph (a)(1)" is revised to read "paragraph (a)".

61. In § 173.336, the section heading and introductory text are revised to read as follows:

§ 173.336 Nitrogen dioxide, liquefied, or dinitrogen tetroxide, liquefied.

Nitrogen dioxide, liquefied, or dinitrogen tetroxide, liquefied, must be packaged in specification cylinders as follows:

* * * * *

PART 174—CARRIAGE BY RAIL

62. The authority citation for part 174 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1806; 49 CFR 1.53(e), 1.53(e), app. A to part 1.

§ 174.25 [Amended]

63. In § 174.25, in the paragraph (a)(2) table, for the entry "Division 1.6", in Column 3, the word "Dangerous" is removed and replaced with "(None)".

§ 174.55 [Amended]

64. In § 174.55, in paragraph (c), the wording "bearing markings 'THIS SIDE UP' or 'THIS END UP' " is revised to read "bearing package orientation markings, as prescribed in § 172.312(a) of this subchapter".

§ 174.61 [Amended]

65. In § 174.61, in paragraph (c), the wording "the Federal Railroad Administrator" is revised to read "the Associate Administrator for Safety, FRA".

66. In § 174.81, the paragraph (f) compatibility table is revised to read as follows:

§ 174.81 Segregation of hazardous materials.

* * * * *

(f) * * *

COMPATIBILITY TABLE FOR CLASS 1 (EXPLOSIVE) MATERIALS.

Compatibility group	A	B	C	D	E	F	G	H	J	K	L	N	S

§ 174.81 [Amended]

67. In addition, in § 174.81, the following changes are made:

a. In the Segregation Table in paragraph (d), in the column "Notes", for the entry "Very insensitive explosives.", the letter "A" is added.

b. In paragraph (e)(5), the wording "Division 1.1 (Class A explosive) materials" is revised to read "Division 1.1 (Class A explosive) or Division 1.5 (blasting agents) materials."

§ 174.82 [Amended]

68. In § 174.82, in paragraph (a), the wording "Division 1.6," is added immediately after "contain" and before "combustible liquids".

§ 174.85 [Amended]

69. In § 174.85, in paragraph (b), the wording "must comply with train positioning requirements of paragraph (d) of this section and" is added immediately following " 'RADIOACTIVE' ".

PART 176—CARRIAGE BY VESSEL

70. The authority citation for part 176 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 1806; 49 CFR 1.53, App. A to part 1.

71–72. In § 176.83, in paragraphs (c)(2)(i) (A) and (B), the text preceding the illustrations is revised to read as follows:

§ 176.83 Segregation.

§ 177.848 [Amended]

77. In addition, in § 177.848, the following changes are made:

a. In the Segregation Table in paragraph (d), in the column "Notes", for the entry "Very insensitive explosives.", the letter "A" is added.

b. In paragraph (e)(5), the wording "Division 1.1 (Class A explosive) materials" is revised to read "Division 1.1 (Class A explosive) or Division 1.5 (blasting agents) materials".

PART 178—SPECIFICATIONS FOR PACKAGINGS

78. The authority citation for part 178 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 1806, 1808; 49 CFR part 1.

§ 178.44–15 [Amended]

79. In § 178.44–15, paragraph (a)(2) is added and reserved.

§ 178.45–7 [Amended]

80. In § 178.45–7, paragraph (c)(2) is added and reserved.

§ 178.270–5 [Amended]

81. In § 178.270–5, in paragraph (a), the word "deka-newtons" is revised to read "decanewtons" and in paragraphs (c) and (d), the wording "deka newtons" is revised to read "decanewtons".

§ 178.337–1 [Amended]

82. In § 178.337–1, in paragraph (b), the reference "§ 173.315(a)(1)" is revised to read "§ 173.315(a)".

§ 178.337–11 [Amended]

83. In § 178.337–11, in paragraph (a)(4)(i)(B), the date "May 16, 1973" is revised to read "May 16, 1969".

§ 178.345–2 [Amended]

84. In § 178.345–2, in paragraph (a)(2), the designation "ASTM B–209 Alloy 5654" is revised to read "ASTM B–209 Alloy 5652".

85. In § 178.345–11, in the first sentence in paragraph (a), the word "exclusively" is removed, and paragraphs (b)(2) and (c) are revised to read as follows:

§ 178.345–11 Tank outlets.

* * * * *

(b) * * *

(2) Bottom loading outlets which discharge lading into the cargo tank through fixed internal piping above the maximum liquid level of the tank need not be equipped with a self-closing system.

(c) Any loading/unloading outlet extending beyond an internal self-closing stop-valve, or beyond the innermost external stop-valve which is part of a self-closing system, must be fitted with another stop-valve or other leak-tight closure at the end of such connection.

* * * * *

§ 178.345–11 [Amended]

86. In addition, in § 178.345–11, in paragraph (b)(1)(iii), the wording "Poison B liquids" is revised to read "Division 6.1 (poisonous liquid) materials".

§ 178.507 [Amended]

87. In § 178.507, in paragraph (a), the wording "ID" is revised to read "1D".

§ 178.601 [Amended]

88. In § 178.601, in paragraph (h), the reference "§§ 178.505–178.523" is revised to read "§§ 178.504–178.523".

§ 178.603 [Amended]

89. In § 178.603, in paragraph (a), the following changes are made:

a. In the text preceding the table, a new sentence is added after the first sentence to read "For other than flat drops, the center of gravity of the test packaging must be vertically over the point of impact."

b. In the paragraph (a) table, the heading of the second column is revised to read "No. of tests (samples)".

§ 178.606 [Amended]

90. In § 178.606, the following changes are made:

a. In paragraph (c)(1), three new sentences are added at the end of the paragraph to read "In guided load tests, stacking stability must be assessed after completion of the test by placing two filled packagings of the same type on the test sample. The stacked packages must

maintain their position for one hour. Plastic packagings must be cooled to ambient temperature before this stacking stability assessment."

b. The fourth sentence in paragraph (d) is removed.

Appendix B [Amended]

91. In appendix B to part 178, in the first sentence of paragraph (4), he wording "For drums, the following test may be used:" is revised to read "For other than design qualification testing, the following test may be used for metal drums:"

PART 179—SPECIFICATIONS FOR TANK CARS

92. The authority citation for part 179 continues to read as follows:

Authority: 49 App. U.S.C. 1803, 1804, 1805, 1808, 1808; 49 CFR part 1, unless otherwise noted.

§ 179.101–1 [Amended]

93. In § 179.101–1, in paragraph (a), in the second table, for the entry "Minimum plate thickness, inches, shell and heads", in the column "112A200W [2]", footnote 1 is removed.

§ 179.200–18 [Amended]

94. In § 179.200–18, paragraph (b)(4) is removed.

PART 180—CONTINUING QUALIFICATION AND MAINTENANCE OF PACKAGINGS

95. The authority citation for part 180 continues to read as follows:

Authority: 49 App. U.S.C. 1803; 49 CFR part 1.

§ 180.403 [Amended]

96. In § 180.403, in the definition "Corrosive to the tank/valve", the section reference "§ 173.346" is revised to read "§ 173.136".

§ 180.405 [Amended]

97. In § 180.405, in paragraph (g)(2), the wording "the hydrostatic testing requirements in § 178.354–5(b)" is revised to read "the hydrostatic testing requirements in § 178.345–5(b)".

§ 180.407 [Amended]

98. In § 180.407, paragraph (d)(2)(vii) is removed and reserved and a semicolon is added at the end of (d)(2)(viii) in place of the period.

99. In § 180.409, the introductory text of paragraph (b) is revised to read as follows:

§ 180.409 Minimum qualifications for inspectors and testers.

* * * * *

(b) A motor carrier or cargo tank owner who meets the requirements of paragraph (a) of this section may use an employee who is not a Registered Inspector to perform a portion of the pressure retest required by § 180.407(g). External and internal visual inspections must be accomplished by a Registered Inspector, but the hydrostatic or pneumatic pressure test, as set forth in § 180.407(g)(1)(viii) and (ix), respectively, may be done by an employee who is not a Registered Inspector provided that—

* * * * *

100. In § 180.413, as amended at 55 FR 37069, September 7, 1990, an error was contained in the amendatory language, which incorrectly stated that paragraph (d)(1)(v) was revised. Instead it should have stated that paragraph (d)(2)(v) was revised. Therefore, paragraph (d)(2)(v) is correctly revised to read as follows:

§ 180.413 Repair, modification, stretching, or rebarrelling of cargo tanks.

* * * * *

(d) * * *

(2) * * *

(v) Change the existing specification plate to reflect the cargo tank as modified, attach a supplemental specification plate noting appropriate changes that have been made to the cargo tank, or remove the existing specification plate and attach a new specification plate to the cargo tank;

* * * * *

101. In § 180.415, the first two sentences of paragraph (b) are removed and three new sentences are added in their place and the last sentence in paragraph (c) is revised to read as follows:

§ 180.415 Test and inspection markings.

* * * * *

(b) Each cargo tank must be durably and legibly marked, in English, with the date (month and year) and the type of test or inspection performed. The date must be readily identifiable with the applicable test or inspection. The marking must be in letters and numbers at least 32 mm (1.25 inches) high, on the tank shell near the specification plate or anywhere on the front head. * * *

(c) * * * For a cargo tank motor vehicle composed of multiple cargo tanks constructed to different specifications, which are tested and inspected at different intervals, the test and inspection markings must appear in the order of the cargo tank's corresponding location, from front to rear.

Issued in Washington, DC on September 17, 1992 under authority delegated in 49 CFR part 1.

Douglas B. Ham,

Acting Administrator, Research and Special Programs Administration.

Part V

Department of Housing and Urban Development

Office of the Secretary

24 CFR Part 888

Section 8 Housing Assistance Payments Program, Fair Market Rent Schedules; Final Rule

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Part 888

[Docket No. N-92-3426; FR-3233-N-02]

Section 8 Housing Assistance Payments Program; Fair Market Rent Schedules for Use in the Rental Certificate Program, Loan Management and Property Disposition Programs, Moderate Rehabilitation Program and Rental Voucher Program

AGENCY: Office of the Secretary, HUD.

ACTION: Final fair market rents.

SUMMARY: Section 8(c)(1) of the United States Housing Act of 1937 requires the Secretary to publish Fair Market Rents (FMRs) periodically, but not less frequently than annually, to be effective on October 1 of each year. The Department published proposed FY 1993 FMRs for the Section 8 Rental Certificate program on April 30, 1992 (57 FR 18684) and solicited public comments. Today's notice announces final FY 1993 FMR schedules for the Section 8 Rental Certificate program (part 882, subparts A and B), including space rentals by owners of manufactured homes under the Section 8 Rental Certificate program (part 882, subpart F); the Section 8 Moderate Rehabilitation program (part 882, subparts D and E); and Section 8 housing assisted under part 886, subparts A and C (Section 8 Loan Management and Property Disposition programs). FMRs are also used to determine payment standard schedules in the Rental Vouchers program.

EFFECTIVE DATE: The FMRs published in this notice are effective on October 1, 1992.

FOR FURTHER INFORMATION CONTACT: Shirley C. Stone, Rental Assistance Division, Office of Elderly and Assisted Housing, telephone (202) 708-0477. For technical information on the development of schedules for specific areas or the method used for the rent calculations, contact Michael R. Allard, Economic and Market Analysis Division, Office of Economic Affairs, telephone (202) 708-0577. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: Section 8 of the United States Housing Act of 1937 (the Act) (42 U.S.C. 1437f) authorizes a housing assistance program to aid lower income families in renting decent, safe, and sanitary housing. Assistance payments are limited by Fair Market Rents (FMRs) (or payment standards based on FMRs in the Housing Voucher Program) established by HUD for different areas. In general, the FMR for an area is the amount that would be needed to rent privately owned, decent, safe, and sanitary rental housing of a modest (non-luxury) nature with suitable amenities.

Section 8(c) of the Act requires the Secretary of HUD to publish FMRs periodically, but not less frequently than annually, to be effective on October 1 of each year. The FMRs must reflect changes based on the most recent available data, so FMRs will be current for the year in which they apply. The Department's regulations provide that HUD will develop FMRs by publishing proposed FMRs for public comment, analyzing the public comment, and publishing final FMRs. (See 24 CFR 888.115). On April 30, 1992 (57 FR 18684), the Department proposed FMRs for Section 8 rental certificates for FY 1993. Today's notice contains an analysis and response to public comments and makes appropriate revisions to the proposed FMRs.

The FMRs for 1993 announced in this notice govern the following Section 8 Housing Assistance Payments programs: The Section 8 Rental Certificate program under part 882 (subparts A and B), including space rentals by owners of manufactured homes (subpart F), the Moderate Rehabilitation program under part 882 (subparts D and E), the Section 8 Housing Assistance program for projects with HUD-insured or HUD-held mortgages under part 886 (subpart A), as well as for existing housing under the Section 8 Housing Assistance program for the disposition of HUD-owned projects under part 886 (subpart C). In addition, FMRs are used to establish payment standards for the Rental Voucher program.

Proposed Fair Market Rents

The proposed FY 1993 FMRs published on April 30, 1992 reflected estimated rent levels projected forward to April 1, 1993. The criteria and methodology used by HUD in developing the proposed FMRs appear at 24 CFR part 888, subpart A, and have been in use since 1983.

The criteria used by HUD in developing FMRs are: (1) The 45th percentile rent (that is, the rent below which 45 percent of the standard quality) rental housing units are distributed); (2) rents based on units occupied by recent movers (households who moved within two years before the date of the survey data used in these calculations); and (3) exclusion from the data base of public housing units and recently completed housing (units built within two years of the survey dates). (See 24 CFR 888.113.) The FMRs for manufactured home spaces are based on the 45th percentile rent for manufactured home spaces. (See 24 CFR 888.113(a).)

In establishing the proposed FMRs, HUD used the most accurate data available. In addition to 1980 Census data, data used to compute the FY 1993 FMRs include the Consumer Price Indices (CPI) for rental housing and utilities, post-1980 American Housing Survey (AHS) data, statistically reliable area specific data submitted by public commenters, and data from the Random Digit Dialing (RDD) telephone surveys of HUD Regions and selected FMR areas. (The use of the RDD survey was described in the April 30 notice of proposed FMRs.)

The proposed FY 1993 FMRs published on April 30, 1992 reflected estimated rent levels trended forward to April 1, 1993. As in past years, the FMR estimates are based primarily on decennial Census and American Housing Survey (AHS) data. This year, for the first time, the Department is incorporating the results of Random Digit Dialing (RDD) telephone surveys to update FMRs in areas not covered by CPI metropolitan surveys. It is also using these surveys to revise FMRs for selected areas.

RDD surveys were conducted in 37 individual FMR areas for use in revising local FMRs. Twenty other surveys were conducted to obtain rent updating factors for 1991. These latter surveys were conducted in the metropolitan and nonmetropolitan parts of the 10 HUD Regions not covered by CPI area-specific surveys. The Regional RDD surveys will be repeated each year to determine the annual rent change factors.

The individual FMR areas selected for RDD surveys include 33 areas that had been recommended by the HUD field offices and four areas by an Office of Inspector General audit. The areas recommended by the HUD field offices were areas with suspected FMR problems, most of which were thought to have FMRs that were too high. The areas recommended were reviewed to determine, on the basis of the number of Section 8 program units, that it would be cost effective to conduct an RDD survey. The survey results generally supported the HUD field office concerns. Of the 37 areas surveyed, 29 were subsequently proposed for FMR reductions. Eight areas were proposed for FMR increases, including four with increases larger than the normal inflation adjustment.

Administrative Fees

The FMRs published for effect will be used to calculate the PHA ongoing administrative fee. For a PHA administering a Section 8 program in an area where the two-bedroom FMR has increased, the PHA's administrative fee will be adjusted as of October 1, 1992. For a PHA administering a Section 8 program in an area where the two-bedroom FMR is decreased, the PHA's administrative fee will be adjusted as of the first day of the PHA's fiscal year that begins after October 1, 1992.

Public Comments

In response to the request for public comments on proposed FY 1993 FMRs, HUD received 1989 comments covering 64 FMR areas. This total included over 100 letters from individuals in Massachusetts expressing concerns about the proposed decrease in the FMRs in the Boston and surrounding metropolitan areas.

The Department carefully evaluated all comments, and has modified FMRs where the survey data were acceptable or where deficiencies could be corrected. Based on this evaluation, the FMRs for 13 areas are being increased. The FMRs for one area are being retained at last year's levels at the request of the area's major program sponsor. No rental housing survey data were submitted with the comments for 25 FMR areas. The information submitted for the remaining 24 FMR areas was not adequate to provide a basis for revising the FMRs.

The Department received comments for 24 of the 29 FMR areas recommended for proposed decreases on the basis of RDD surveys. As a result of these comments, the final FMRs for Tucson, AZ, Richland-Kennewick-Pasco, WA, Boston, MA, Salt Lake City, UT, and Mendocino County, CA have been revised.

This year's FMRs also incorporated the results of the 1990 metropolitan AHS surveys covering 8 FMR areas. Two of these areas, Anaheim-Santa Ana, CA and San Antonio, TX, had proposed decreases based on the survey data. Comments were submitted from these areas, but did not provide a sufficient basis for revising the proposed FMRs.

Miami, Florida FMRs: In response to the extensive losses and damage to the housing inventory in Dade County, Florida, caused by Hurricane Andrew, the Department is publishing final FMRs for the Miami PMSA that have been increased 10 percent above the proposed FMRs. This increase recognizes the impact on local rent levels of demand pressures and repair costs directly related to the hurricane. The Department will continue to monitor rent levels in this area in the near future and will respond with adjusted FMRs as necessary.

Several commenters raised questions concerning the reliability of the RDD survey approach. Answers to three of the most frequently asked questions are provided here.

Issue: Several comments expressed concern about the reliability of the RDD survey method and about the small sample sizes used.

Response: This technique has been independently tested and found to be reliable in market areas where extensive Bureau of the Census rental data are available. The RDD survey method produces both an FMR estimate and a measurement of the reliability of this estimate. The statistical reliability of sample survey estimates is primarily dependent on the extent to which the sample used approximates a pure random sample representatively covering all parts of the FMR area. A relatively small ramdon sample (e.g., one or two hundred cases) can provide reliable information about a characteristic for a large population. In contrast, a sample of five or ten thousand cases in a large metropolitan area, would provide little reliable information on a population characteristic if the sample had a significant bias (e.g., contained only relatively new rental units in large apartment complexes). Based on an analysis of surveys conducted to date, a 400 two-bedroom unit sample size generally will provide enough two-bedroom units to permit estimates that have a 95 percent likelihood of being withing 4 percent of the true 45th percentile rent.

Issue: The Department received several comments that contended that a telephone survey of individual units could not make a determination of the quality of these units.

Response: The RDD survey produces a 45th percentile rent estimate that is a very close approximation of what would be produced by a random sample of all renters with telephones. The 45th percentile rent estimates produced by this approach has two biases with respect to its use for setting FMRs. One is the upward bias on survey rent estimates caused by excluding non-telephone households who, as a group, have lower than average incomes and rents. The other is the downward bias on rents from surveying households that live in rental units that do not meet HUD housing quality standards.

Both biases are relatively small in terms of their impacts on 45th percentile rents. Analysis of the size and impact of these biases has been done using Census and American Housing Survey data. This analysis indicates that there is a relationship between units not covered and substandard units. It also showed that the upward bias caused by excluding non-telephone households was almost exactly offset by the downward bias from including substandard units.

The 45th percentile rent for units with telephones is, on average, 2 percent higher than for all units. On average, the inclusion of substandard and public housing units produces a 45th percentile rent estimate that is 2 percent lower than the intended FMR standard. In areas where larger percentages apply, such as the rural South, both percentages are larger but they remain off-setting. Based on this analysis, it has been concluded that the FMRs developed using the RDD survey methodology are representative of rental units that meet HUD's housing quality standards.

Issue: Some comments expressed concern about the way HUD was converting the rents of one-bedroom units to two-bedroom equivalent rents.

Response: One-bedroom units are included in the FMR RDD survey to increase the effective size of the sample, and thereby improve the accuracy of the rent estimates generated. HUD has found that there is a consistent relationship between 45th percentile one- and two-bedroom rents. This means that a more accurate two-bedroom FMR can be obtained with a given sample size by including information on one-bedroom rents. HUD adjusts the one-bedroom rents, however, before combining them with rents for two-bedroom units. One-bedroom rents are increased by the average two-bedroom to one-bedroom ratio to convert them into two-bedroom equivalent rents.

Rental Housing Survey Instrument

The Department continues to announce the availability of a FMR survey it had developed. This survey, which is based on a Random Digit Dialing (RDD) telephone, provides a statistically reliable means for obtaining FMR estimates. The RDD survey technique is based on a sampling procedure that uses computers to select a statistically random sample of rental housing, dial and keep track of the telephone numbers, and process the responses.

Because of its complexity and the large number of calls required, a survey contractor with specialized knowledge

and equipment is required to conduct one of these surveys. To assist interested parties, the "PHA Guide to Conducting a Fair Market Rent (FMR) Telephone Survey" is available from HUD USER by calling 1–800–245–2691. This guide is intended for local governments or PHAs that believe their FMRs are too high, or too low, and wish to obtain the data needed to revise them. The information contained in the guide provides a full explanation of how to decide whether to use the survey and step-by-step instructions on how to proceed with the contract. Interested PHAs concerned about the accuracy of their FMRs may wish to begin now, since it takes about two to three months to receive the survey results.

The Department recommends the RDD survey as the preferred method for testing FMR accuracy for areas where there is a sufficient number of section 8 units to justify the survey cost of approximately $15,000 to $20,000. HUD intends to use this technique in the future as an improved method for obtaining rent change factors for the metropolitan and nonmetropolitan portions of the ten HUD Regions. RDD surveys will be conducted annually by HUD in selected areas identified as having potential FMR problems.

Other Matters

A Finding of No Significant Impact with respect to the environment as required by the National Environmental Policy Act (42 U.S.C. 4321–4374) is unnecessary, since the Section 8 Rental Certificate program is categorically excluded from the Department's National Environmental Policy Act procedures under 24 CFR 50.20(d).

The undersigned, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), hereby certifies that this notice does not have a significant economic impact on a substantial number of small entities, because FMRs do not change the rent from that which would be charged if the unit were not in the Section 8 program.

The General Counsel, as the Designated Official under Executive Order No. 12606, The Family, has determined that this notice will not have a significant impact on family formation, maintenance, or well-being. The notice amends Fair Market Rent schedules for various Section 8 assisted housing programs, and does not affect the amount of rent a family receiving rental assistance pays, which is based on a percentage of the family's income.

The General Counsel, as the Designated Official under section 6(a) of Executive Order No. 12611, Federalism, has determined that this notice will not involve the preemption of State law by Federal statute or regulation and does not have Federalism implications. The Fair Market Rent schedules do not have any substantial direct impact on States, on the relationship between the Federal government and the States, or on the distribution of power and responsibility among the various levels of government.

The Catalog of Federal Domestic Assistance program number is 14.156, Lower-Income Housing Assistance Program (section 8).

Accordingly, the Fair Market Rent Schedules, which will not be codified in 24 CFR part 888, are amended as follows:

Dated: September 28, 1992.

Jack Kemp,

Secretary.

Section 8 Fair Market Rent Schedules for Use in the Existing Housing Certificate Program, Loan Management and Property Disposition Programs, Moderate Rehabilitation Program and Housing Voucher Program Schedules B and D—General Explanatory Notes

1. Geographic Coverage

a. FMRs for Existing Housing (Schedule B) are established for all Metropolitan Statistical Area (MSAs), Primary Metropolitan Statistical Areas (PMSAs), nonmetropolitan counties and county equivalents in the United States, District of Columbia, Puerto Rico, the Virgin Islands, and Guam. FMRs also are established for nonmetropolitan parts of counties in the New England states.

b. FMRs for Manufactured Home spaces in the Section 8 Certificate Program (Schedule D) are established for all MSAs, PMSAs, selected nonmetropolitan counties, and the residual nonmetropolitan portion of each State.

c. The current 339 MSAs and PMSAs are those established by the Office of Management and Budget effective in June 1988.

2. Arrangement of FMR Areas and Identification of Constituent Parts

a. The FMR areas in Schedules B and D are listed alphabetically by MSA–PMSA and nonmetropolitan county within each State.

b. The constituent counties (and New England towns and cities) included in each MSA and PMSA are listed immediately following the listings of the FMR dollar amounts. All of the constituent parts of an MSA that are in more than one State can be identified by consulting listings for each applicable State.

c. Two non-metropolitan counties are listed alphabetically on each line of the nonmetropolitan county listings.

d. The New England towns and cities included in a non-metropolitan part of a county are listed immediately following the county name.

e. The FMRs are listed by dollar amount on the first line beginning with the FMR area name.

Department of Health and Human Services

Health Care Financing Administration

Medicare Program; Update of Ambulatory Surgical Center Payment Rates; Notice

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

[BPD-760-NC]

RIN 0938-

Medicare Program; Update of Ambulatory Surgical Center Payment Rates

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice with comment period.

SUMMARY: This notice implements section 1833(i)(2)(A) of the Social Security Act, which requires that the payment rates for ambulatory surgical center (ASC) services be reviewed and updated annually, and responds to the public comments we received concerning the ASC payment rate update notice with comment published on December 31, 1991 (56 FR 67666), except for those concerning payment amounts for lithotripsy, which will be addressed in another **Federal Register** document.

DATES: *Effective date*: The payment rates contained in this notice are effective for services furnished on or after October 1, 1992.

Comments date: Comments will be considered if we receive them at the appropriate address, as provided below, by 5 p.m. on November 30, 1992.

ADDRESSES: Mail comments to the following address:

Health Care Financing Administration, Department of Health and Human Services, Attention: BPD-760-NC, P.O. Box 26676, Baltimore, MD 21207.

If you prefer, you may deliver your written comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201, or

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland 21207.

Due to staffing and resource limitations, we cannot accept comments submitted by facsimile (FAX) transmission. In commenting, please refer to file code BPD-760-NC. Comments received timely will be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, in room 309-G of the Department's offices at 200 Independence Avenue SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone: (202) 690-7890).

FOR FURTHER INFORMATION CONTACT: Joan Sanow, (410) 966-5723.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1832(a)(2)(F)(i) of the Social Security Act (the Act) provides that benefits under the Medicare Supplementary Medical Insurance program (Part B) include services furnished in connection with those surgical procedures that, under section 1833(i)(1)(A) of the Act, are specified by the Secretary and are performed on an inpatient basis in a hospital but that also can be performed safely on an ambulatory basis in an ambulatory surgical center (ASC) or in a hospital outpatient department. To participate in the Medicare program as an ASC, a facility must meet the standards specified under section 1832(a)(2)(F)(i) of the Act and 42 CFR 416.25.

Generally, there are two elements in the total charge for a surgical procedure—a charge for the physician's professional services for performing the procedure and a charge for the facility's services (for example, use of an operating room). Section 1833(i)(2)(A) of the Act authorizes the Secretary to pay ASCs a prospectively determined rate for facility services associated with covered surgical procedures. ASC facility services are subject to the usual Medicare Part B deductible and coinsurance requirements. Therefore, participating ASCs are paid 80 percent of the prospectively determined rate adjusted for regional wage variations. This rate is intended to represent HCFA's estimate of a fair payment that takes into account the cost incurred by ASCs generally in providing the services that are furnished in connection with performing the procedure. Currently, this rate is a standard overhead amount that does not include physician fees and other medical items and services (for example, durable medical equipment) for which separate payment may be authorized under other provisions of the Medicare program.

We have grouped procedures into nine groups for purposes of ASC payment rates. The ASC facility payment for all procedures in each group is established at a single rate adjusted for geographic variation. The rate is a standard overhead amount that covers the cost of services such as nursing, supplies, equipment, and use of the facility. (For an indepth discussion of the methodology and rate setting procedures, we refer the reader to a document we published on February 8, 1990 on these subjects entitled "Updates of Ambulatory Surgical Center Payment Rates" (55 FR 4577).)

Statutory Provisions

- Under section 1833(i)(3)(A) of the Act, the aggregate payment to hospital outpatient departments for covered ASC procedures is equal to 80 percent of the lesser of the following two amounts:
  - + The amount paid for the same services that would be paid to the hospital under section 1833(a)(2)(B) of the Act (that is, the lower of the hospital's reasonable costs or customary charges); or
  - + The amount determined under section 1833(i)(3)(B)(i) of the Act based on a blend of the lower of the hospital's reasonable costs or customary charges and the amount that would be paid to a freestanding ASC in the same area for the same procedures.
- Under section 1833(i)(3)(B)(i) of the Act, the blend amount for cost reporting periods is the sum of the hospital cost proportion and the ASC cost proportion.
- Under section 1833(i)(3)(B)(ii) of the Act, the hospital cost proportion and the ASC cost proportion for portions of cost reporting periods beginning on or after January 1, 1991 are 42 and 58 percent, respectively.
- Section 1833(i)(2)(A) of the Act requires the Secretary to review and update standard overhead amounts annually.
- Section 1833(i)(2)(A)(ii) of the Act requires that the ASC facility payment rate result in substantially lower Medicare expenditure than would have been paid in the same procedure was performed on an inpatient basis in a hospital.
- Section 1833(i)(2)(A)(iii) of the Act requires that payment for insertion of an intraocular lens (IOL) include payment that is reasonable and related to the cost of acquiring the class of lens involved.
- Section 4151(c)(3) of the Omnibus Budget Reconciliation Act of 1990 (OBRA 90) (Pub. L. 101-508) froze the allowance for IOLs furnished by an ASC at $200 through December 31, 1992.

Implementation

Since September 7, 1982, when we first implemented the ASC benefit, we have expanded the number of covered procedures from 54 to nearly 2400 as of December 31, 1991 and classified the procedures into nine groups. We started updating rates in 1987 on an annual basis; the latest up-date was effective for services furnished on or after December 31, 1991. In the latest update notice, published December 31, 1991, in addition to adding nearly 900 services to be subject to the ASC payment rates, we established that the annual ASC update

would be concurrent with the annual update of the hospital inpatient wage index (56 FR 67666).

On March 12, 1992, the United States District Court for the District of Columbia issued an order that stayed Medicare Part B payment for extracorporeal shock wave lithotripsy (ESWL) as an ASC service until the Secretary publishes all material information relevant to the setting of the ESWL rate, receives comments, and publishes a subsequent final notice.

II. Provision of the Notice

The purpose of this notice is to (a) state the new rates for the ASC services for which there are ASC payment rates; (b) explain the basis of the new rates; (c) discuss the allowance for IOLs furnished by ASCs and (d) discuss the new survey we are conducting.

a. New Rates

As of October 1, 1992, the ASC facility group rates are:

Group 1—$295
Group 2—$395
Group 3—$453
Group 4—$558
Group 5—$637
Group 6—$800 ($600 + $200)
Group 7—$883
Group 8—$930 ($730 + 200)

(There is no rate for Group 9 as it is only for ESWL services and the court stay prohibits us from paying for these services under the ASC benefit at this time. ESWL payment rates are the subject of a separate **Federal Register** notice.)

b. Basis of Rates

We have based the rates on (1) the CPI–U (Consumer Price Index—All Urban Consumers) projected rate of change and (2) data from a survey conducted in 1986.

1. As in 1987, 1989, 1990 and 1991, the rate of change is based on the consumer price index for all urban consumers, which is a generalized index that reflects prices paid for a representative market basket of goods and services. The CPI–U is based on forecasts by Data Resources, Inc.

For the 12-month period beginning April 1, 1992 (the midpoint of the rate period that began October 1, 1991) and ending March 31, 1993 (the midpoint of the rate period that begins October 1, 1992) the projected rate of change is a 3.5 percent increase.

We will use the hospital inpatient wage index that goes into effect October 1, 1992 to calculate payments to individual ASCs. Appended as Addendum A are the wage index for urban areas, the wage index for rural areas and wage index values for certain counties that are deemed urban and whose wage index is computed as a separate urban area.

Below are two examples of how the applicable wage index value is applied to the portion of the ASC payments rate that is attributable to labor costs (34.45 percent) in order to standardize payment amounts for variation across geographical areas.

Example 1

The following is an example of how the payment is determined for a procedure in Group 4 ($558) for an ASC located in Kalamazoo, Michigan. The appropriate hospital wage index value is 1.1709. The labor-related portion is 34.45 percent and the nonlabor-related portion is 65.55 percent.

Wage Adjusted Rate
= [($558 × .3445) × 1.1709] + ($558 × .6555)
= ($192.23 × 1.1709) + $365.77
= $225.08 + $365.77
= $590.85

The steps set forth in this example are used for calculating payment rates for Groups 1 through 5 and Group 7. These are the groups whose payment rates do not include an allowance for IOLs.

Example 2

The following is an example of how payment is determined for two procedures in Group 8 ($930) performed in an ASC located in Kalamazoo, Michigan. The steps set forth in this example are also used in calculating the payment amount for the procedures in Group 6.

Since the IOL allowance is not subject to the labor adjustment, the $200 allowance must be subtracted from the composite payment rate ($930) before adjusting for labor variation.

Wage Adjusted Rate
= [{($930 − 200) × .3455) × 1.1709] + [(930 − $200) × .6555]
= [($730 × .3445) × 1.1709] + ($730 × .6555)
= ($251.49 × 1.1709) + $478.52
= $294.47 + $478.52
= $772.99

Composite Adjusted Rate
= $772.99 + $200
= $972.99

c. IOL Rates

The allowance for IOLs furnished in a Medicare participating ASC is part of the ASC facility payment rate for services provided in conjunction with four surgical IOL insertion procedures:

- CPT codes 66985 and 66986 in payment group 6; and
- CPT codes 66983 and 66984 in payment group 8.

Groups 6 and 8 include only procedures related to the insertion of IOLs. We are increasing the rate of payment for the services involving the insertion of the lens, but the allowance for the lens itself will remain $200.

We set the IOL allowance at $200 in the final **Federal Register** notice we published on February 8, 1990 (55 FR 4526) that implemented a new ASC payment methodology and paid for IOLs furnished by ASCs as a facility service effective March 12, 1990. We based the amount of the allowance on the findings of an Office of Inspector General report issued in March 1988 entitled "Medicare Certified Ambulatory Surgical Centers, Cataract Surgery Costs and Related Issues."

Congress implicitly ratified the $200 allowance that we established in the February 8, 1990 **Federal Register** by freezing at $200 the amount of payment for an IOL furnished by an ASC effective for the period from November 5, 1990 through December 31, 1992. (See section 4151(c)(3) of OBRA 90).

Since implementation of the IOL payment freeze, preliminary evidence supporting a reduction rather than an increase in the current IOL rate has come to our attention. This information suggests that high quality IOLs can be and are being acquired for considerably less than $200, and in at least one case, below $100. We are collecting additional data, however, before considering any adjustments to IOL rates. Any changes in the IOL allowance will be announced in the **Federal Register** in a notice with public comment period.

d. New Survey

We used the cost, charge and utilization data from a survey we conducted in 1986 to establish the methodology and new rate structure that we implemented March 12, 1990. We mailed the survey to nearly 500 Medicare participating facilities and we audited 97 randomly selected facilities to obtain the data.

We have started a new survey to gather more current cost data. We revised the survey form to enhance and refine the quality of data received from ASCs. We sent survey forms to all Medicare certified ASCs (nearly 1400) in July 1992. A representative sample of randomly selected ASCs will subsequently be surveyed to collect cost data on specific high volume ASC procedures. We will announce any rate changes or rate setting methodology changes based on the survey results in the **Federal Register** through notice and comment procedures.

III. Comments and Responses

On December 31, 1991, we published a notice with comment period to implement ASC rate changes and to update the list of ASC procedures (56 FR 67666). We are responding here to the comments we received concerning that notice that are relevant to the payment rate update.

Comment: One hospital association wrote that HCFA had violated the statute by failing to update ASC rates since July 1, 1990, 18 months prior to the December 31, 1991 update.

Response: We do not agree. The Omnibus Budget Reconciliation Act of 1986 (Pub. L. 99-509) amended the Act to require an annual rather than a periodic update of ASC payment rates. Accordingly, every year since the 1987 statutory deadline for instituting an annual update, HCFA has submitted an ASC update for publication in the Federal Register. The rates announced in this notice incorporate the following previous annual updates:

1986: A new ratesetting methodology including an increase from four to eight payment groups was formulated to reflect the findings of the 1986 Ambulatory Surgical Center Payment Rate Survey (Form HCFA-452).

1988: The eight payment group amounts established in 1988 were increased by 4.86 percent.

1990: The 1988 payment group amounts were increased by 4.21 percent.

1991: The 1990 payment group amounts were increased by 5.1 percent.

We intend to continue to publish updates annually, as required by the last sentence of section 1833(i)(2)(A) of the Act. However, that provision does not preclude us from changing the date of the annual update when justified by program requirements. The October 1 date coincides with the effective date of the annual wage index changes and other PPS changes and thus streamlines the implementation and administration of the provisions for all concerned.

Comment: One hospital association protested that the 1991 increase of 5.1 percent in the ASC facility payment rates was not sufficient to offset the losses resulting from a three month delay in implementation. The commenter wrote that HCFA should either make an additional allowance to offset the delay or make the new rates retroactive to October 1, 1991.

Response: The CPI-U adjustment for inflation that we used is determined on the basis of a four-quarter moving average. Therefore, the quarterly percent change for the period October 1 through December 31, 1991 was taken into account in the overall percent adjustment for an extended rate period that began January 1, 1991 and ended March 31, 1992.

Comment: One hospital association wrote that HCFA should use an index such as the Hospital Market Basket Index instead of the CPI-U to update ASC rates because the CPI-U does not accurately reflect the rate of inflation for items such as labor, medical and administrative supplies, utilities, and professional fees purchased by health care facilities.

Response: We believe that the CPI-U is appropriate for updating ASC rates because it is a more generalized measure of inflation. Although there are certain similarities in surgical costs incurred by ASCs and hospitals, the differences in the overall mix of goods and services outweigh the similarities, and applying the Hospital Market Basket Index would distort ASC payment rates.

Comment: One hospital association encouraged HCFA to undertake as quickly as feasible the new ASC survey and to reevaluate its methodology for analyzing the survey data and establishing the ASC rate structure.

Response: The first part of a new ASC survey was sent to all Medicare certified ASCs in July 1992. It collects charge and utilization data for procedure codes on the list of Medicare covered ASC procedures. The second part of this survey concentrates on costs incurred by ASCs generally in performing selected high volume ASC procedures. We expect 1994 ASC rates to reflect data collected from the new survey. Changes in the ratesetting methodology will be published in the Federal Register in accordance with notice and comment procedures.

Comment: One hospital association encouraged HCFA to continue its collection of data on intraocular lenses (IOLs) and to avoid what it believes to be the flaws and pitfalls in earlier studies.

Response: By the conclusion of the 1992 ASC survey, we expect to have compiled a substantial body of audited data on the actual costs incurred by ASCs in acquiring IOLs. Any subsequent adjustments in the IOL allowance will be published in the Federal Register following the customary notice and comment procedures.

Comment: A hospital association commented that HCFA did not allow adequate lead time for the medical community to evaluate and incorporate the changes resulting from the December 31, 1991 notice, noting that the changes require massive computer systems changes and training of hospital personnel.

Response: Ordinarily, a delay of 30 days in the effective date for notices is provided. However, we waived the 30 day delay because we believed that to further postpone implementation of the ASC payment rates would be contrary to the public interest.

Comment: One hospital association commented that reclassifications granted by the Medicare Geographic Classification Review Board (MGCRB) should be applied to all aspects of hospital payment, and that using different wage indices for different programs creates additional administrative burden on the hospital and an unjustified payment inequity.

Response: Section 1833(i)(3)(A) of the Act stipulates that the aggregate amount for outpatient hospital facility services or rural primary care hospital services furnished in connection with ASC covered procedures be based on, in part, the amount that would be paid if the procedures had been provided in an ambulatory surgical center in the same area. Because ASCs are entities that are distinct and separate from hospitals, there is no mechanism to uniformly match the wage index value of a reclassified hospital with an individual ASC that is located in the same geographic area. Therefore, for the purpose of calculating the ASC proportion defined in section 1833(i)(3)(A) of the Act, a hospital must use the same wage index value that ASCs in the area use even if that hospital uses a reclassified wage index value to determine payments for other services.

Comment: One hospital association asked why we allow hospitals in certain counties that are deemed urban to utilize the reclassified wage value whereas hospitals in other areas cannot use the reclassified wage index value.

Response: The counties listed in the table entitled "Wage Index Values for Counties That Are Deemed Urban—Computed as Separate Urban Areas" published in the December 31, 1991 Federal Register were affected in 1989 by implementation of section 1886(d)(8) of the Act as amended by the Technical and Miscellaneous Revenue Act of 1988 (Pub. L. 100-647). We applied these exceptions to the application of the Statewide rural wage index to the ASC rate updates of March 12, 1990 and July 1, 1990. We have continued to treat these counties as exceptions in the December 31, 1991 update notice and the current notice in order to be consistent with the precedent established by earlier ASC updates. However, when we re-base the ASC payment rates utilizing the data currently being gathered by survey, we intend to review the method by which the hospital PPS wage index is applied in determining payments to individual ASCs. In the meantime, we emphasize that the values listed in the December 31, 1991 Federal Register table, "Wage Index for Counties That Are Deemed Urban—Computed as Separate Areas," are intended to apply solely to the calculation of facility payment amounts for ASCs located in

the designated counties. Hospitals located in these counties will use the values in this table only to calculate the ASC proportion as defined in section 1833(i)(3)(A)(ii)(II) of the Act.

Comment: One commenter felt that the payment group assignments for vitrectomy procedures CPT codes 67036, 67038, 67039, and 67040 were inadequate and did not comply with the Medicare law and regulations requiring reasonable payment for ASC facility resource costs. This commenter's position was that the data upon which HCFA based payment rates for vitrectomy codes was flawed and that these codes should be assigned to payment group 9.

Response: Similar comments were submitted during the comment period for our proposed notice published in the Federal Register on December 7, 1990 (55 FR 50590); we responded to those comments in the document we published on December 31, 1991 (56 FR 67666). We have nothing to add at this time, but we intend to review payment group classification for all Medicare approved ASC procedures upon completion of the 1992 ASC payment rate survey.

Comment: One commenter asked what the payment rate was for a cataract procedure when an intraocular lens (IOL) is not inserted at the time the procedure is performed, and whether the $200 IOL allowance is paid when the lens is inserted at a later time, subsequent to the cataract removal.

Response: Cataract removal procedures on the list of Medicare covered ASC procedures that do not include insertion of an intraocular lens (IOL) are CPT codes 66830, 66840, 66850, 66852, 66920, 66930, and 66940. The $200 IOL allowance is not included in payment for any of these codes.

The two CPT codes on the list of Medicare covered ASC procedures that involve separate insertion of an IOL, subsequent to cataract extraction, are CPT codes 66985 and 66986. The $200 IOL allowance is included in the total payment amount for each of these two procedures.

Comment: One commenter asked us to define what characterizes an ASC as specializing in IOL insertions.

Response: An ASC, either single specialty or multiple specialty, in which at least half of the procedures performed are IOL insertions, is considered to be an ASC that specializes in IOL insertions.

Comment: One commenter asked us to define what constitutes a multi-specialty ASC.

Response: We consider an ASC that furnishes services involving more than one surgical specialty (e.g., urology, orthopedic, and general surgical procedures) to be a multi-specialty ASC.

We also received several comments on the covered procedures list we published December 31, 1991. We limited our solicitation of comments solely to deletions from the list that were not previously proposed as deletions. None of the comments were directed at these deletions so we are not responding to them here. Comments received on ESWL services will be addressed in a forthcoming Federal Register document on that subject.

IV. Regulatory Impact Statement

A. Executive Order 12291

Executive Order 12291 (E.O. 12291) requires us to prepare and publish a regulatory impact analysis for any notice such as this that results in effects meeting one of the E.O. 12291 criteria for a "major rule"; that is, that would be likely to result in—

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or
- Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Actuarial estimates of the cost of updating the ASC rates by 3.5 percent are as follows:

PROJECTED MEDICARE COSTS

[In millions]

FY 1993	FY 1994	FY 1995	FY 1996	FY 1997
$20	$30	$40	$50	$60

Since this notice will not meet the $100 million criterion, a regulatory impact analysis is not required.

B. Regulatory Flexibility Act

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless the Secretary certifies that a general notice would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, all ASCs and hospitals are considered to be small entities.

Section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a notice may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds.

It is possible that small rural hospitals may believe the updated rates are inadequate compared to the costs likely to be incurred in performing ASC procedures. While the updated ASC rates do not fully recognize actual cost increases to hospitals, the payment methodology applicable to hospitals for furnishing ASC procedures is based on a blended amount which is determined based on 42 percent of actual hospital costs and 58 percent of ASC payment rates. For the portion of the blended payment amount that is based on a hospital's actual costs, cost increases resulting from inflation are fully recognized.

Under section 1833(i)(3)(A) of the Act, Congress mandated the method of determining payments to hospitals for ASC-approved procedures performed in an outpatient setting. Congress believed some comparability should exist in the amount of payment to hospitals and ASCs for similar procedures. However, Congress recognized that hospitals have certain overhead costs that ASCs do not and allowed for a blending of the payment. Finally, the total impact of these rates would also depend upon the number of Medicare beneficiaries a hospital services and the case-mix variation. For these reasons, we have determined, and the Secretary certifies, that this notice will not have a significant effect on a substantial number of small rural hospitals. Therefore, we have not prepared a small rural hospital impact analysis.

Although we believe an impact analysis on small rural hospitals is not required, this notice could have a significant impact on a substantial number of ASCs. Therefore, we believe that a regulatory flexibility analysis is required for ASCs. In addition, we are voluntarily providing a brief general discussion of the impact this notice may have on hospitals.

1. Impact on ASCs

We are updating the 1991 ASC payment rates, which were published in the Federal Register on December 31, 1991 (56 FR 67666). Although these new rates incorporate the estimated annual rate of change in the CPI-U for the period April 1, 1992 through March 31, 1993 (a 3.5 percent increase), there are other factors affecting the actual payments that ASCs may receive.

First, variations in an ASC's Medicare case mix will affect the size of the ASC's aggregate payment increase. Although the ASC payment rates were uniformly inflated by the CPI–U for the period April 1, 1992 through March 31, 1993, the IOL payment allowance which is currently set at $200 per lens has not been adjusted. (A discussion of our rationale for retaining the $200 IOL allowance is presented in the following paragraphs.) The actual increase in total payments for a multi-specialty ASC will be about 3.2 percent as compared to the 3.5 percent increase in the CPI–U. ASCs that perform a lower than average percentage of procedures involving insertion of an IOL will receive an increase that more closely approximates the increases in the CPI–U, while those that perform a higher than average percentage of IOL insertion procedures may expect a somewhat lower increase in their aggregate payments.

With regard to the IOL payment, we set the IOL allowance at $200 in the final **Federal Register** notice published on February 8, 1990 (55 FR 4528) that implemented a new ASC payment methodology and paid for IOLs furnished by ASCs as a facility service effective March 12, 1990. We based the amount of the allowance on the findings of an Office of Inspector General report issued in March 1988 entitled "Medicare Certified Ambulatory Surgical Centers, Cataract Surgery Costs and Related Issues."

Congress implicitly ratified the $200 IOL allowance that we established in the February 8, 1990 **Federal Register** by freezing at $200 the amount of payment for an IOL furnished by an ASC effective for the period beginning November 5, 1990 through December 31, 1992. (See section 4151(c)(3) of the Omnibus Budget Reconciliation Act of 1990, Pub. L. 101–508.)

Since implementation of the IOL payment freeze, preliminary evidence supporting a reduction rather than an increase in the current IOL allowance has come to our attention. This information suggests that high quality IOLs can be and are being acquired by ASCs for considerably less than $200. In its February 1992 report to the Senate and House Committees on the Budget entitled "Reducing the Deficit: Spending and Revenue Options," the Congressional Budget Office points out that if Medicare paid $100 for IOLs furnished at all sites as of January 1, 1993, savings to Medicare would total $1 20 million for FY '93. Any changes in the IOL allowance, however, will be based upon additional data and analysis and will be announced through notice and comment procedures in the **Federal Register**.

A second factor determining the effect of the change in the payment rates is the percentage of total revenue an ASC receives from Medicare. The larger the proportion of revenues an ASC receives from the Medicare program, the greater the impact of the updated rates being implemented by this document. The percentage of revenues derived from the Medicare program depends on the volume and types of services furnished. Since Medicare patients account for at least 60 percent of all cataract cases performed in ASCs, an ASC that performs a high percentage of cataract procedures will probably receive a higher percentage of its payments from Medicare than would an ASC with a case mix comprised largely of noncataract cases. For an ASC that receives a large portion of its revenue from the Medicare program, the changes implemented by this notice will likely have a greater influence on the ASC's operations and management decisions than they will have on an ASC that receives a large portion of revenue from other sources.

In general, however, we expect the changes implemented by this notice to affect ASCs positively by raising the rates upon which payments are based.

2. Impact on Hospitals

For ASC-approved procedures performed in an outpatient setting, hospitals are paid based on the lowest of their aggregate cost, aggregate charges or a blend of 58 percent of the applicable wage-adjusted ASC rate and 42 percent of the hospital specific amount. It should be noted that the weight of the ASC portion of the blended payment amount is offset to a degree when hospital costs, as, for example, in the case of cataract procedures in Groups 6 and 8, are as much as double the ASC rate. Further, while an ASC rate increase is being implemented by this notice, it may not in every instance keep pace with actual hospital cost increases.

Another element that may reduce the effect on hospital outpatient payments of the ASC rate increase is the application of the lowest payment screen in determining payments. Applying the lowest of costs, charges, or a blend can result in some hospitals being paid entirely on the basis of a hospital's costs or charges. In those instances, the increase in the ASC rates will have not effect on hospital payments.

V. Paperwork Reduction Act

This notice does not impose any information collection requirements; consequently, it need not be reviewed by the Executive Office of Management and Budget under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 through 3511).

VI. Response to Comments

Because of the large number of items of correspondence we normally receive on a notice with comment period, we are not able to acknowledge or respond to them individually. However, we will consider all comments that we receive by the date and time specified in the "Dates" section of this preamble, and if we proceed with the final rule, we will respond to the comments in the preamble to the final rule.

VII. Waiver of Notice of Proposed Rulemaking

We ordinarily publish a proposed notice and invite prior public comment in the **Federal Register** before publishing a final notice. The proposed notice includes a reference to the legal authority under which it is proposed and the terms and the substance of the proposed notice or a description of the subjects and issues involved. However, this procedure can be waived when an agency finds good cause that a notice-and-comment procedure is impracticable, unnecessary, or contrary to the public interest, and incorporates a statement of the finding and its reasons in the notice issued.

In this notice with comment period, we respond to public comments received on a prior notice (56 FR 67668) and announce the annual update of the ASC payment rates.

It would be impracticable, unnecessary and contrary to the public interest to publish a proposed notice and solicit comments before implementing the update. We now time the updates to coincide with the wage index used for PPS and to propose the updates with the wage index used for PPS and to propose the updates without the wage index would be an incomplete proposal and would be of reduced value; the final wage index for PPS is not ready for publication in time to be included in a proposed notice for ASC payment updates. We therefore believe it to be contrary to the public interest to publish a proposed notice and find good cause to waive it.

VIII. Waiver of 30-Day Delay in Effective Date

We ordinarily publish notices such as this subject to a 30-day delay in the

effective date. However, we can waive that delay for good cause when required in the public interest. The provisions of this notice are effective October 1, 1992, to coincide with the PPS update. These provisions will increase payment to ASCs by 3.5 percent (as modified by any changes to the wage indices). To delay the effective date until 30 days after the notice is published would delay the increased payments to the ASCs. Therefore, we find good cause to waive the delay in effective date.

Authority: Sections 1832(a)(2)(F) and 1833(i) (1) and (2) of the Social Security Act (42 U.S.C. 1395k(a)(2)(F) and 13951(i) (1) and (2)); 42 CFR 416.120, 416.125, and 416.130

Catalog of Federal Domestic Assistance Programs No. 93.744, Medicare—Supplementary Medical Insurance Program.

Dated: August 24, 1992.

William Toby, Jr.,

Acting Deputy Administrator, Health Care Financing Administration.

Dated: September 14, 1992.

Louis W. Sullivan,

Secretary.

Title 3—

The President

Notice of September 30, 1992

Continuation of Haitian Emergency

On October 4, 1991, by Executive Order No. 12775, I declared a national emergency to deal with the unusual and extraordinary threat to the national security and foreign policy of the United States constituted by the grave events that had occurred in the Republic of Haiti to disrupt the legitimate exercise of power by the democratically elected government of that country. On October 28, 1991, by Executive Order No. 12779, I took additional measures by prohibiting, with certain exceptions, trade between the United States and Haiti. Because the assault on Haiti's democracy represented by the military's forced exile of President Aristide continues to pose an unusual and extraordinary threat to the national security, foreign policy, and economy of the United States, I am continuing the national emergency with respect to Haiti in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)).

This notice shall be published in the **Federal Register** and transmitted to the Congress.

George Bush

THE WHITE HOUSE,
Washington, September 30, 1992.

FEDERAL REGISTER PAGES AND DATES, OCTOBER

45261-45558.....1

CFR PARTS AFFECTED DURING OCTOBER

At the end of each month, the Office of the Federal Register publishes separately a List of CFR Sections Affected (LSA), which lists parts and sections affected by documents published since the revision date of each title.

CFR ISSUANCES 1992
January—July 1992 Editions and Projected October, 1992 Editions

This list sets out the CFR issuances for the January—July 1992 editions and projects the publication plans for the **October, 1992** quarter. A projected schedule that will include the **January, 1993** quarter will appear in the first **Federal Register** issue of January.

For pricing information on available 1991—1992 volumes consult the CFR checklist which appears every Monday in the Federal Register.

Pricing information is not available on projected issuances. The weekly CFR checklist and the monthly List of CFR Sections Affected will continue to provide a cumulative list of CFR titles and parts, revision date and price of each volume.

Normally, CFR volumes are revised according to the following schedule:

Titles 1—16—January 1
Titles 17—27—April 1
Titles 28—41—July 1
Titles 42—50—October 1

All volumes listed below will adhere to these scheduled revision dates unless a notation in the listing indicates a different revision date for a particular volume.

*Indicates volume is still in production.

Titles revised as of January 1, 1992 editions:

TABLE OF EFFECTIVE DATES AND TIME PERIODS—OCTOBER 1992

This table is used by the Office of the Federal Register to compute certain dates, such as effective dates and comment deadlines, which appear in agency documents. In computing these dates, the day after publication is counted as the first day.

When a date falls on a weekend or holiday, the next Federal business day is used. (See 1 CFR 18.17)

A new table will be published in the first issue of each month.

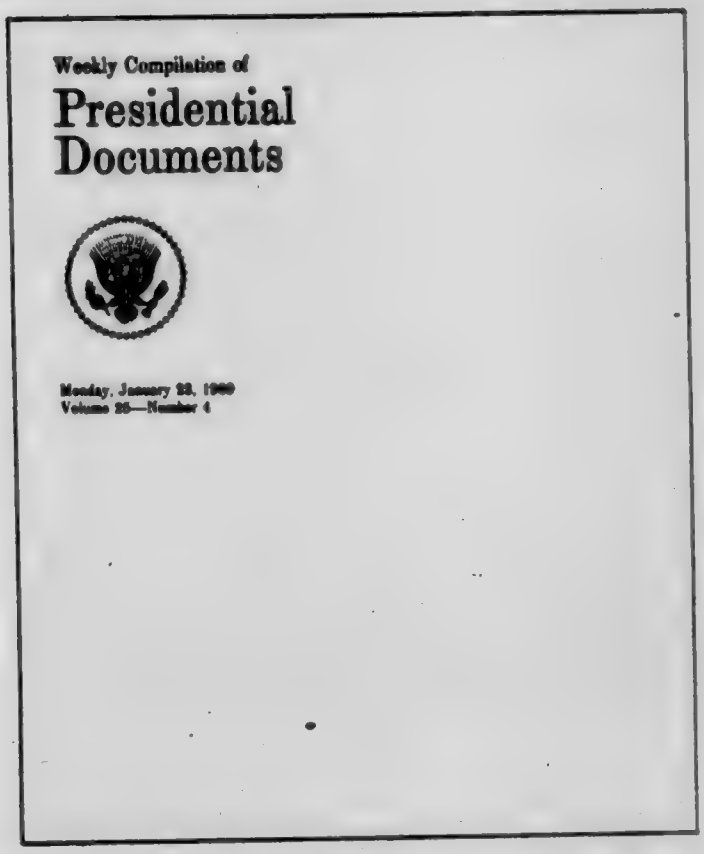
The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

Administration of George Bush



This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by the Office of the Federal Register, National Archives and Records Administration.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche format and magnetic tape. The annual subscription price for the **Federal Register** paper edition is $375, or $415 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $353; and magnetic tape is $37,500. Six month subscriptions are available for one-half the annual rate. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

Rules and Regulations

Federal Register
Vol. 57, No. 192
Friday, October 2, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 916 and 917

[Docket No. FV-92-075FR]

1992-93 Fiscal Year Expenses and Assessment Rates for the Marketing Orders Covering Nectarines and Peaches Grown in California

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department is adopting as a final rule an interim final rule which authorized expenses and established assessment rates for the 1992–93 fiscal year (March 1–February 28) under Marketing Order Nos. 916 and 917. These expenses and assessment rates are needed by the Nectarine Administrative Committee and Peach Commodity Committee established under these marketing orders to pay their expenses and collect assessments from handlers to pay those expenses. This action will enable these committees to continue to perform their duties and the marketing orders to operate.

EFFECTIVE DATE: November 2, 1992.

FOR FURTHER INFORMATION CONTACT: Gary D. Rasmussen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2523–S, Washington, DC 20090–6456; telephone: (202) 720–5331, or Kurt Kimmel, Marketing Field Office, USDA/AMS, 2202 Monterey St., Suite 102–B, Fresno, California 93721; telephone: (209) 487–5901.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Agreement and Marketing Order Nos. 916 (7 CFR part 916) regulating the handling of nectarines grown in California, and 917 (7 CFR part 917) regulating the handling of fresh pears and peaches grown in California. These agreements and orders are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This final rule has been reviewed by the U.S. Department of Agriculture (Department) in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. Under the marketing order provisions now in effect, nectarines and peaches grown in California are subject to assessments. It is intended that the assessment rates specified herein be made applicable to all assessable nectarines and peaches during the 1992–93 fiscal year, beginning March 1, 1992, through February 28, 1993. This final rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after date of the entry of the ruling.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this final rule on small entities. The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are about 300 handlers of California peaches and nectarines subject to regulation under Marketing Order Nos. 916 and 917 and about 1,800 producers of these fruits in California. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of these handlers and producers may be classified as small entities.

These marketing orders, administered by the Department, require that assessment rates for a particular fiscal year shall apply to all assessable fresh fruit handled from the beginning of such year. An annual budget of expenses is prepared by each marketing committee and submitted to the Department for approval. The members of these committees are producers of the regulated commodities. They are familiar with the committees' needs and with the costs for goods, services, and personnel in their local areas and are thus in a position to formulate appropriate budgets. The budgets are formulated and discussed in public meetings. Thus, all directly affected persons have an opportunity to participate and provide input.

The assessment rate recommended by each committee is derived by dividing anticipated expenses by the packages of fresh fruit expected to be shipped under the order. Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the committees' expected expenses. Recommended budgets and rates of assessment are usually acted upon by the committees shortly before a season starts, and expenses are incurred on a continuous basis. Therefore, budget and assessment rate approvals must be expedited so that the committees will have funds to pay their expenses.

The interim final rule was issued on July 8, 1992, and published in the Federal Register (57 FR 31090, July 14, 1992), with

a 30-day comment period ending August 13, 1992. No comments were received.

The Nectarine Administrative Committee (NAC) met May 5, 1992, and unanimously recommended approval of a 1992–93 budget with expenses of $4,106,247 and an assessment rate of $0.1825 per 25-pound package of assessable nectarines handled. The 1992–93 nectarine budget is similar in scope to the one approved for 1991–92. Actual expenses for 1991–92 totaled $3,769,577, while the assessment rate was $0.1825.

The 1992–93 nectarine budget contains $569,940 for marketing order administration and miscellaneous items, $2,192,400 for market development, $125,322 for research, $1,009,085 for inspection, and $222,000 for uncollected assessment accounts. In comparison, actual expenditures for 1991–92 were $484,548 for marketing order administration and miscellaneous items, $2,090,590 for market development, $122,128 for research, $1,009,519 for inspection, and $62,792 for uncollected assessment accounts.

Nectarine marketing order income for 1992–93 is expected to total $4,106,172, with assessment income estimated at $3,348,328, based on projected shipments of 18,347,000 packages of assessable nectarines. Other income includes $484,000 in Foreign Agriculture Service matching promotion program funds, $40,000 in other income including interest, and a $110,000 rebate from the inspection service from last season's inspection payment. The NAC's reserve amounted to $1,273,826 on March 1, 1992, an amount well within the maximum authorized under the marketing order.

The Peach Commodity Committee (PCC) met May 5, 1992, and recommended approval of a 1992–93 budget with expenses of $3,925,512 and an assessment rate of $0.19 per 25-pound package of assessable peaches handled. Eight members voted in favor of the proposed 1992–93 budget, while two members voted "no", because they favored a one-half cent lower assessment rate. The 1992–93 peach budget is similar in scope to the one approved for 1991–92. Actual expenses for 1991–92 totaled $3,626,005, while the assessment rate was $0.19.

The 1992–93 peach budget contains $550,270 for marketing order administration and miscellaneous items, $2,122,000 for market development, $125,322 for research, $913,920 for inspection, and $214,000 for uncollected assessment accounts. In comparison, actual expenditures for 1991–92 were $436,886 for marketing order administration and miscellaneous items, $1,804,531 for market development, $136,321 for research, $1,226,304 for inspection, and $21,963 for uncollected assessment accounts.

Peach marketing order income for 1992–93 is expected to total $4,224,017, with assessment income estimated at $3,404,800, based on projected shipments of 17,900,000 packages of assessable nectarines. Other income includes $484,000 in Foreign Agriculture Service matching promotion program funds, $32,000 in other income including interest, and a $100,000 rebate from the inspection service from last season's inspection payment. The PCC's reserve amounted to $911,156 on March 1, 1992, an amount well within the maximum authorized under the marketing order.

While this action will impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs will be significantly offset by the benefits derived from the operation of the marketing orders. Therefore, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, the information and recommendations submitted by the committees, and other information, it is found that finalizing the interim final rule, as published in the **Federal Register** (57 FR 31090, July 14, 1992), will tend to effectuate the declared policy of the Act.

List of Subjects

7 CFR Part 916

Marketing agreements, Nectarines, Reporting and recordkeeping requirements.

7 CFR Part 917

Marketing agreements, Peaches, Pears, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR parts 916 and 917 are amended as follows:

PART 916—NECTARINES GROWN IN CALIFORNIA

PART 917—FRESH PEARS AND PEACHES GROWN IN CALIFORNIA

1. The authority citation for 7 CFR parts 916 and 917 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C 601–674.

Note: These sections will not appear in the annual Code of Federal Regulations.

§§ 916.230 and 917.254 [Amended]

2. Accordingly, the interim final rule adding §§ 916.230 and 917.254, which was published in the **Federal Register** (57 FR 31090, July 14, 1992), is adopted as a final rule.

Dated: September 29, 1992.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule authorizes expenditures and establishes an assessment rate under Marketing Order No. 948 for the 1992–93 fiscal period (September 1, 1992, through August 31, 1993). Authorization of this budget enables the Colorado Potato Administrative Committee, San Luis Valley Office (Area II) (Committee) to incur expenses that are reasonable and necessary to administer the program. Funds to administer this program are derived from assessments on handlers.

EFFECTIVE DATE: September 1, 1992, through August 31, 1993.

FOR FURTHER INFORMATION CONTACT: Dennis West, Northwest Marketing Field Office, Green-Wyatt Federal Building, room 369, 1220 SW Third Avenue, Portland, OR 97204, telephone 503–326–2724, or Martha Sue Clark, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2523–S, Washington, DC 20090–6456, telephone 202–720–9918.

SUPPLEMENTARY INFORMATION: This rule is effective under Marketing Agreement No. 97 and Order No. 948, both as amended (7 CFR part 948), regulating the handling of Irish potatoes grown in Colorado. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This rule has been reviewed by the Department of Agriculture (Department) in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

This rule has been reviewed under Executive Order 12778, Civil Justice Reform. Under the marketing order provisions now in effect, Colorado potatoes are subject to assessments. It is intended that the assessment rate as issued herein will be applicable to all assessable potatoes handled during the 1992–93 fiscal period, which begins September 1, 1992, through August 31, 1993. This final rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608(c)(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after date of the entry of the ruling.

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 285 producers of Colorado Area II potatoes under this marketing order, and approximately 118 handlers. Small Agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $300,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of Colorado Area II potato producers and handlers may be classified as small entities.

The budget of expenses for the 1992–93 fiscal period was prepared by the Colorado Potato Administrative Committee, San Luis Valley Office (Area II), the agency responsible for local administration of the marketing order, and submitted to the Department for approval. The members of the Committee are producers and handlers of Colorado Area II potatoes. They are familiar with the Committee's needs and with the costs of goods and services in their local area and are thus in a position to formulate an appropriate budget. The budget was formulated and discussed in a public meeting. Thus, all directly affected persons have had an opportunity to participate and provide input.

The assessment rate recommended by the Committee was derived by dividing anticipated expenses by expected shipments of Colorado Area II potatoes. Because that rate will be applied to actual shipments, it must be established at a rate that will provide sufficient income to pay the Committee's expenses.

The Committee met May 21, 1992, and unanimously recommended a 1992–93 budget of $57,250, which is $2,970 more than the previous year. In Colorado, both a State and Federal marketing order operate simultaneously. The State order authorizes promotion, including paid advertising, which the Federal order does not. Increases in expenditures for the 1992–93 fiscal period include $1,275 for manager's salary, $835 for assistant's salary, and $500 for telephone. All promotion and advertising expenses are financed under the State order.

The Committee also unanimously recommended an assessment rate of $0.0036 per hundredweight, which is $0.0004 less than last season's rate. This rate, when applied to anticipated shipments of 13,250,000 hundredweight, will yield $47,700 in assessment income. This, along with $9,540 from the Committee's authorized reserve, will be adequate to cover budgeted expenses. Funds in the Committee's authorized reserve at the beginning of the 1991–92 fiscal period, estimated at $63,781, were within the maximum permitted under the order.

While this action will impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs will be offset by the benefits derived by the operation of the marketing order. Therefore, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

A proposed rule was published in the Federal Register on August 4, 1992 (57 FR 34209). That document contained a proposal to add § 948.209 to authorize expenses and establish an assessment rate for the Committee. That rule provided that interested persons could file comments through August 14, 1992. No comments were filed.

Thus, it is found that the specified expenses are reasonable and likely to be incurred and that such expenses and the specified assessment rate to cover such expenses will tend to effectuate the declared policy of the Act.

It is further found that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register (5 U.S.C. 553) because the Committee needs to have sufficient funds to pay its expenses which are incurred on a continuous basis. The 1992–93 fiscal period for the program began on September 1, 1992, and the marketing order requires that the rate of assessment for the fiscal period apply to all assessable Colorado Area II potatoes handled during the fiscal period. In addition, handlers are aware of this action which was recommended by the Committee at a public meeting.

List of Subjects in 7 CFR Part 948

Marketing agreements, Potatoes, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 948 is hereby amended as follows:

PART 948—IRISH POTATOES GROWN IN COLORADO

1. The authority citation for 7 CFR part 948 continues to read as follows:

Authority: Secs. 1–19, 46 Stat. 31; as amended; 7 U.S.C. 601–674.

2. A new § 948.209 is added to read as follows:

Note: This section will not appear in the Code of Federal Regulations.

§ 948.209 Expenses and assessment rate.

Expenses of $57,240 by the Colorado Potato Administrative Committee, San Luis Valley Office (Area II) are authorized, and an assessment rate of $0.0036 per hundredweight of assessable potatoes is established for the fiscal period ending August 31, 1993. Unexpended funds may be carried over as a reserve.

Dated: September 29, 1992.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

[DA-92-22]

Milk in the Nebraska-Western Iowa Marketing Area; Suspension of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rules.

SUMMARY: This action suspends certain provisions of the Nebraska-Western Iowa Federal milk marketing order for an indefinite period beginning with the month of September 1992. The suspension continues a suspension which expired August 31, 1992, that reduced the amount of milk that must be transferred from supply plants to pool distributing plants and removed the requirement that a producer's milk be physically received at a pool plant each month in order to be eligible for diversion to a nonpool plant. Continuation of the suspension was requested by Mid-America Dairymen, Inc. (Mid-Am), a cooperative association that represents producers who supply milk for the market. This action is necessary to prevent uneconomical and inefficient movements of milk.

EFFECTIVE DATE: September 1, 1992.

FOR FURTHER INFORMATION CONTACT: John F. Borovies, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, (202) 690-1366.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of proposed suspension: Issued August 24, 1992; published August 28, 1992 (57 FR 39141).

The Regulatory Flexibility Act (5 U.S.C. 601-612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This final rule has been reviewed by the Department in accordance with Departmental Regulation 1512-1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

This action has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have a retroactive effect. This action will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with the rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under Section 608c (15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provisions of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of an order or to be exempted from the order. A handler is afforded the opportunity for a hearing on the petition. After a hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has its principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and of the order regulating the handling of milk in the Nebraska-Western Iowa marketing area.

Notice of proposed rulemaking was published in the **Federal Register** on August 28, 1992 (57 FR 39141) concerning a proposed suspension of certain provisions of the order. Interested persons were afforded opportunity to file written data, views, and arguments thereon. No comments opposing this action were received.

After consideration of all relevant material, including the proposal in the notice and other available information, it is hereby found and determined that for an indefinite period beginning with the month of September 1992, the following provisions of the order do not tend to effectuate the declared policy of the Act:

In § 1065.6, the words "during the month";

In § 1065.7(b)(1), the words "not more than one half of"; and,

In § 1065.13, paragraph (d)(1).

Statement of Consideration

This action suspends certain provisions of the order for an indefinite period beginning with September 1992. The action continues a suspension that reduced the amount of milk that must be transferred from supply plants to pool distributing plants and allowed milk to be diverted to a nonpool plant without being physically received at a pool plant during the month, which expired August 31, 1992.

The order defines a supply plant as a plant from which Grade A milk is shipped to a pool distributing plant. The order provides that to qualify as a pool supply plant, the supply plant must transfer or divert a specified percentage of its receipts of milk to pool distributing plants. The order further provides that a supply plant must ship milk to a distributing plant each month and that not more than one-half of the qualifying shipments may be met through the direct shipment of milk from farms to pool distributing plants. The order also provides that a dairy farmer's milk is not eligible for diversion during a month unless at least one day's production is physically received at a pool plant. The expired suspension removed the requirement that milk be transferred from a supply plant to a distributing plant each month, allowed all direct-shipped milk to count as a qualifying shipment, and removed the requirement that a dairy farmer's milk be physically received at a pool plant each month through August 31, 1992.

A continuation of the action was requested by Mid-America Dairymen, Inc. (Mid-Am), a cooperative association that represents producers who supply milk to the market. Mid-Am contends that the marketing conditions that led to the last suspension will continue to exist for some time.

Current projections indicate that there will be ample supplies of direct-ship producer milk located in the proximity of the distributing plants to meet the fluid milk needs of the market. Thus, it is impractical to require producer milk located some distance from pool plants to be physically received once during the month, when the milk can more economically be diverted directly to manufacturing plants in the production area. In addition, it is inefficient to require that milk be transferred from supply plants to distributing plants when the fluid milk needs of the market can be supplied by the direct shipment of milk from farms to distributing plants. Absent a continuation of the expired suspension, costly and inefficient movements of milk will have to be made

to maintain pool status of producers who have historically supplied the fluid milk needs of the market.

The suspension was requested for an indefinite period and comments on this action were specifically requested from interested parties. This action will extend the expired suspension issued January 29, 1992, which suspended these provisions from January 1 through August 31, 1992. The continuation of this suspension indefinitely will allow for easier qualification of a supply plant as a pool supply plant. However, certain essential pooling standards would continue in the order.

Due to projections indicating that current marketing conditions will continue to exist for some time, extending the previous suspension for an indefinite period will likely prevent repetitious suspension actions in the future while ensuring efficient movements of milk. No comments were received in opposition to an indefinite suspension.

It is hereby found and determined that 30 days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) The suspension is necessary to reflect current marketing conditions and to assure orderly marketing conditions in the marketing area, in that such action is necessary to permit the continued pooling of supply plants and the milk of dairy farmers who have historically supplied the market without the need for making costly and inefficient movements of milk;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given to interested parties and they were afforded opportunity to file written data, views, or arguments concerning the suspension. No comments in opposition to the action were received.

Therefore, good cause exists for making this order effective less than 30 days from date of publication in the **Federal Register**.

List of Subjects in 7 CFR Part 1065

Milk marketing orders.

It is therefore ordered, that the following provisions in title 7, part 1065, §§ 1065.6, 1065.7(b)(1), and 1065.13 of the Nebraska-Western Iowa order, are hereby suspended for an indefinite period beginning with the month of September 1992.

PART 1065—MILK IN THE NEBRASKA-WESTERN IOWA MARKETING AREA

1. The authority citation for 7 CFR part 1065 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

§ 1065.6 [Suspended in Part]

2. In § 1065.6, the words "during the month" are hereby suspended for an indefinite period beginning with the month of September 1992.

§ 1065.7 [Suspended in Part]

3. In § 1065.7(b)(1), the words "not more than one half of" are hereby suspended for an indefinite period beginning with the month of September 1992.

§ 1065.13 [Suspended in Part]

4. In § 1065.13, paragraph (d)(1) is hereby suspended for an indefinite period beginning with the month of September 1992.

Dated: September 29, 1992.

Daniel Haley,

Administrator.

[DA–92–21]

Milk in the Nebraska-Western Iowa Marketing Area; Revision of Supply Plant Shipping Percentage

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Revision of rules.

SUMMARY: This action revises certain provisions of the Nebraska-Western Iowa Federal milk marketing order for an indefinite period beginning with September 1992. Specifically, the action reduces the percentage of supply plant receipts that must be transferred or diverted to pool distributing plants in order for the supply plant to maintain pool plant status. The shipping standard will be 20 percent in all months. The action was requested by Mid-America Dairymen, Inc. (Mid-Am), a cooperative association that represents producers who supply milk for the market. The revision is necessary to prevent uneconomical and inefficient movements of milk.

EFFECTIVE DATE: September 1, 1992.

FOR FURTHER INFORMATION CONTACT: John F. Borovies, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456 (202) 690–1366.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding: Notice of Proposed Revision of Supply Plant Shipping Percentages: Issued August 24, 1992; published August 28, 1992 (57 FR 39140).

The Regulatory Flexibility Act (5 U.S.C. 601–612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. The action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This rule has been reviewed by the Department in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

This revision has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have a retroactive effect. This action will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with the rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under Section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provisions of the order, or any obligation imposed in connection with the order, is not in accordance with law and request a modification of an order or to be exempted from the order. A handler is afforded the opportunity for a hearing on the petition. After a hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has its principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling.

This revision is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended [7 U.S.C. 601–674), and the provisions of § 1065.7(b) of the Nebraska-Western Iowa order.

Notice of proposed rulemaking was published in the **Federal Register** (57 FR 39140) concerning a proposed relaxation of the supply plant shipping percentage.

The revision was proposed to be effective for an indefinite period beginning with the month of September 1992. The public was afforded the opportunity to comment on the notice by submitting written data, views and arguments by September 4, 1992. No opposing comments were received.

Statement of Consideration

This action revises the supply plant shipping percentages set forth in § 1065.7(b) and is applicable to milk marketed on and after September 1, 1992. The revision lowers the shipping percentage for supply plants by either 10 or 20 percentage points, depending on the month, to 20 percent of receipts for an indefinite period. The revision continues the current application of a 20 percent shipping standard for supply plants that expired August 1992.

Pursuant to the provisions of § 1065.7(b)(3) of the Nebraska-Western Iowa milk order, the Director of the Dairy Division may increase or decrease the supply plant shipping percentage as set forth in § 1065.7(b) by up to 20 percentage points during any month. The adjustment can be made to help encourage additional milk shipments or to prevent uneconomic shipments of milk merely for the purpose of assuring that dairy farmers will continue to have their milk priced under the order.

Under the Nebraska-Western Iowa order, the stated supply plant shipping percentage is 40 percent or more of the total receipts of Grade A milk received from dairy farmers and cooperative associations. A revision signed October 3, 1989 (54 FR 41240), reduced the supply plant shipping percentage by 10 percentage points (from 40 percent to 30 percent of receipts) indefinitely for the months of September through March. A more recent revision, signed January 29, 1992 (57 FR 4150), reduced the shipping standard for just the months of January through August 1992 to 20 percent. This action will set the shipping standard at 20 percent of receipts for an indefinite period for all months, beginning September 1992.

Revision of the supply plant shipping standard was requested by Mid-America Dairymen, Inc. (Mid-Am), a cooperative association that represents producers who supply milk to the market. Mid-Am has projected that there will be ample supplies of direct-ship producer milk located in the general area of the Nebraska-Western Iowa distributing plants to meet the fluid needs of such plants. Absent a revision, costly and inefficient movements of milk will have to be made in order to maintain pool status of the milk of its members who have historically supplied the fluid needs of the market.

In view of marketing conditions, the aforementioned provisions of § 1065.7(b) should be relaxed for an indefinite period beginning with the month of September 1992. A reduction of the supply plant shipping percentage will eliminate the need for making uneconomic shipments of milk from supply plants to distributing plants, and will assure that dairy farmers long associated with the fluid milk market will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

It is hereby found and determined that 30 days' notice of the effective date hereof is impractical, unnecessary, and contrary to the public interest in that:

(a) This revision is necessary to reflect marketing conditions and to maintain orderly marketing conditions in the marketing area;

(b) This revision does not require of persons affected substantial or extensive preparation prior to the effective dates; and

(c) Notice of the proposed revision was given interested parties and they were afforded opportunity to file written data, views, or arguments concerning this revision. No opposing views were received.

Therefore, good cause exists for making this revision effective, less than 30 days from the date of publication of this notice in the **Federal Register.**

List of Subjects in 7 CFR Part 1065

Milk marketing orders.

Title 7 part 1065 is amended as follows:

PART 1065—MILK IN THE NEBRASKA-WESTERN IOWA MARKETING AREA

1. The authority citation for 7 CFR part 1065 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

§ 1065.7 [Amended in Part]

Note: This amendment will not be published in the annual Code of Federal Regulations.

2. In the introductory text of § 1065.7(b), the provision "30 percent" is revised to "20 percent" for an indefinite period beginning with the month of September 1992.

Dated: September 29, 1992.

[DA-92-26]

Milk in the Eastern Colorado Marketing Area; Suspension of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This action continues the suspension of certain provisions of the Eastern Colorado Federal milk order. These provisions have been suspended for the same periods for the previous six years. This action suspends for September 1992 through February 1993, the limit on the period of automatic pool plant status for a supply plant which met pool shipping standards during the previous September through February period. The "touch-base" requirement that each member-producer's milk be received at least three times each month at a pool distributing plant to be eligible for diversion is suspended from September 1992 through August 1993. The percentage limits on the amount of milk that a cooperative may divert to surplus milk outlets is also suspended from September 1992 through August 1993. Continuation of this suspension is necessary to insure that dairy farmers who have historically supplied the Eastern Colorado market will continue to have their milk priced under the Eastern Colorado order, thereby receiving the benefits that accrue from pooling. In addition, this suspension is necessary to prevent the uneconomic and inefficient movement of milk under the order.

EFFECTIVE DATE: September 1, 1992.

FOR FURTHER INFORMATION CONTACT: Richard A. Glandt, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 720–9368.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of Proposed Suspension: Issued August 24, 1992; published August 28, 1992 (57 FR 39145).

The Regulatory Flexibility Act (5 U.S.C. 601–612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action would not have a significant economic impact on a substantial number of small entities. This action will also tend to ensure that dairy farmers would continue to have their milk priced under the order and

thereby receive the benefits that accrue from such pricing.

This final rule has been reviewed by the Department in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

The final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have retroactive effect. This action does not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with the law and requesting a modification of an order or to be exempted from the order. A handler is afforded the opportunity for a hearing on the petition. After a hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has its principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after date of the entry of the ruling.

Notice of proposed rulemaking was published in the **Federal Register** (57 FR 39145) on August 28, 1992, concerning the proposed suspension for September 1992 through February 1993, limiting the period of automatic pool plant status for a supply plant which met pool shipping standards during the previous September through February period. Notice of proposed suspension, for September 1992 through February 1993, was also given on the "touch-base" requirement that each member-producer's milk be received at least three times each month at a pool distributing plant to be eligible for diversion. In addition, notice of proposed suspension was given in reference to the percentage limits on the amount of milk that a cooperative may divert to surplus milk outlets, for the months of September 1992 through August 1993. The public was afforded the opportunity to comment on the notice by submitting written data, views and arguments by September 4, 1992. Two written comments were received that discussed the nature of the proposed suspension. The comments included full support of the suspension of rule, as published in the **Federal Register**.

After consideration of all relevant material, including the proposal in the notice, the comments received, and other available information, it is hereby found and determined that the following provisions of the order do not tend to effectuate the declared policy of the Act:

1. For the months of September 1992 through February 1993:

In the second sentence of § 1137.7(b), the words "plant which has qualified as a" and the words "of March through August"; and

2. For the months of September 1992 through August 1993:

In the first sentence of § 1137.12(a)(1), the words "from whom at least three deliveries of milk are received during the month at a distributing pool plant"; and in the second sentence "30% in the months of March, April, May, June, July, and December and 20 percent in other months of", as well as the word "distributing".

Statement of Consideration

This action continues the suspension of segments of the pool plant definition as well as the "touch-base" requirements for the Eastern Colorado order. This action continues the suspension of: (1) For the months of September 1992 through February 1993, the limit on the period of automatic pool plant status for a supply plant which met pool shipping standards during the previous September through February period, and (2) the "touch-base" and diversion limitation requirements for the months of September 1992 through August 1993. These provisions have been suspended previously in order to maintain the pool status of producers who have historically supplied the fluid needs of Eastern Colorado distributing plants.

The continuation of the current suspension was requested by Mid-America Dairymen, Inc., a cooperative association that represents a substantial share of the dairy farmers who supply the Eastern Colorado market. Western Dairymen Cooperative, Inc., filed comments supporting the proposed suspension.

The marketing conditions in the Eastern Colorado order that existed when the provisions were previously suspended still continue. During 1991, producer milk was 3.9 percent above 1990 while Class I sales were up 2.1 percent. During the period January through July 1992, producer receipts were 5.6 percent above the same period in 1991 and Class I sales were up 1.3 percent. Current projections indicate that there will be ample supplies of locally produced milk to meet the requirements of Eastern Colorado distributing plants without requiring that each producer's milk be received at least three times each month at a pool distributing plant and without restricting the amount of milk that can be diverted to non-pool plants. Without the suspension action of the pool plant definition, locally produced milk would have to be shipped from the Denver area to surplus handling plants. The suspension of the touch-base provision of the order will not allow additional milk supplies to be pooled, but rather will provide for more efficient disposition of producer milk not needed for fluid requirements of Eastern Colorado distributing plants. By suspending the touch-base provision, producer milk will not be required to be delivered to pool plants for the sole purpose of meeting provisions of the Eastern Colorado order.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) The suspension is necessary to reflect current marketing conditions and to assure orderly marketing conditions in the marketing area, in that such action is necessary to permit the continued pooling of supply plants and the milk of dairy farmers who have historically supplied the market without the need for making costly and inefficient movements of milk;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this suspension. Two comments in support of the suspension were received.

Therefore, good cause exists for making this order effective less than 30 days from date of publication in the **Federal Register**.

List of Subjects in 7 CFR Part 1137

Milk marketing orders.

It is therefore ordered, that the following provisions in title 7, part 1137, sections 7(b) and 12(a)(1) of the Eastern Colorado order are hereby suspended beginning September 1, 1992.

PART 1137—MILK IN THE EASTERN COLORADO MARKETING AREA

1. The authority citation for 7 CFR part 1137 continues to read as follows:

Authority: (Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

§ 1137.7 [Suspended in Part]

2. In § 1137.7(b), for the months of September 1992 through February 1993.

In the second sentence of § 1137.7(b), the words "plant which has qualified as a" and the words "of March through August"; and

§ 1137.12 [Suspended in Part]

3. In § 1137.12(a)(1), for the months of September 1992 through August 1993:

In the first sentence of § 1137.12(a)(1), the words "from whom at least three deliveries of milk are received during the month at a distributing pool plant"; and in the second sentence "30% in the months of March, April, May, June, July, and December and 20 percent in other months of", as well as the word "distributing".

Dated: September 29, 1992.

L.P. Massaro,

Acting Administrator.

BILLING CODE 3410-02-M

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 30 and 35

RIN 3150-AE23

Departures From Manufacturer's Instructions; Elimination of Recordkeeping Requirements

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending its regulations to eliminate certain recordkeeping requirements related to the preparation and use of radiopharmaceuticals. Specifically, this rule eliminates recordkeeping requirements related to the justification for and a precise description of the departure, and the number of departures from the Food and Drug Administration (FDA) approved manufacturer's instructions. Both the NRC and the FDA staffs agree that the major trends in departures that may be identified by this recordkeeping are already discernible and collecting additional data is unnecessary.

EFFECTIVE DATE: October 2, 1992.

FOR FURTHER INFORMATION CONTACT: Samuel Z. Jones, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492-3738.

SUPPLEMENTARY INFORMATION:

Background

On September 15, 1989 (54 FR 38239), the NRC published in the **Federal Register** a notice of receipt of a petition for rulemaking (PRM-35-9) from the American College of Nuclear Physicians (ACNP) and the Society of Nuclear Medicine (SNM). The ACNP and SNM requested, among other things, that the NRC amend its regulations in 10 CFR part 35, "Medical Use of Byproduct Material," to recognize their appropriate practice of medicine and to allow: (1) Departures from the manufacturer's instructions for preparing diagnostic radiopharmaceuticals and (2) the use of radiopharmaceuticals for therapeutic indications and methods of administration not included in the FDA approved package insert.

On August 23, 1990 (55 FR 34513), the NRC published in the **Federal Register** an Interim Final Rule granting the petition, in part, to specifically allow departures from the manufacturer's instructions for preparing diagnostic radiopharmaceuticals using generators and reagent kits for which the FDA has approved a New Drug Application (NDA). The Interim Final Rule also included recordkeeping requirements for the specific nature of the departure, a brief statement of the reasons for the departure, and the number of departures. The Interim Final Rule is effective through August 23, 1993. This action was taken after consulting with the FDA and with the intention that the provision might become permanent after further experience had been gained under the new provision, including an assessment of licensee documentation of departures. The NRC's original intent was to examine this documentation and make it available to the FDA and to consult with the FDA prior to any decision regarding either revision or continuation of the Interim Final Rule or making it permanent. The NRC staff has recently consulted with the FDA staff on the documentation collected to date.

Based on this documentation, the NRC and FDA staffs concluded that the major trends in departures are already clear and that collecting additional data would not be expected to reveal any significant new information. On June 11, 1992 (57 FR 24763), the NRC published a proposed rule in the **Federal Register** that suggested amendments to 10 CFR parts 30 and 35 to eliminate recordkeeping requirements involving the justification for and a precise description of the departure and the number of departures from the FDA approved manufacturer's instructions. The FDA staff had no objection to eliminating these recordkeeping requirements. The issue of whether departures, as set out in the Interim Final Rule, should be allowed on a permanent basis is currently under consideration by the NRC as part of its effort to resolve PRM-35-9.

Public Comments and NRC's Responses

The NRC received nine comment letters in response to the proposed rule. In terms of the types of organizations, there were three comment letters from hospitals and clinics, two from professional associations, and one each from an Agreement State, a pharmacy, a Federal agency, and an individual member of the public. Eight of the letters supported the proposed amendments and one letter opposed the rule.

Brief descriptions of the issues raised in public comment letters and NRC's responses to these issues are presented in the following paragraphs.

1. *Comment.* A commenter suggested that the NRC allow the disposition of records of departures generated under the Interim Final Rule after 3 years (instead of 5 years as specified in the Interim Final Rule) because the records have apparently served their purpose.

Response. The NRC agrees that the records have served their purpose and additional retention of these records is not necessary. This rule eliminates the retention period for these records. Thus, as of the effective date of this rule, licensees are no longer required to keep records of departures carried out under the Interim Final Rule.

2. *Comment.* A commenter suggested the termination of the remainder of the Interim Final Rule in favor of the provisions detailed in the ACNP-SNM Petition (PRM-35-9).

Response. The NRC is currently considering all issues raised in the ACNP-SNM Petition. NRC consideration includes the continuation of departures as set out in the Interim Final Rule. However, at this time the NRC is limiting this rulemaking to the recordkeeping requirements and has determined not to expand this rulemaking to include the termination of the remainder of the Interim Final Rule. That subject, the termination of the remainder of Interim Final Rule, will be covered when the NRC has completed its consideration of the ACNP/SNM petition.

3. *Comment.* A commenter noted a typographical error in the text of § 35.200 of the proposed rule which indicated paragraph (i) instead of paragraph (c).

Response. This typographical error has been corrected.

4. *Comment.* A commenter suggested that if there are no public health and safety issues identified, the authorization to deviate should not expire on August 23, 1993.

Response. The purpose of this rule is to provide relief to licensees concerning the recordkeeping burden related to the requirements in the Interim Final Rule. Therefore, the effective period of this rule was intentionally used to be consistent with the effective period of the Interim Final Rule.

The NRC anticipates that the ACNP–SNM petition (PRM–35–9), including the issues associated with the Interim final Rule, will be resolved prior to August 23, 1993.

5. *Comment.* A commenter opposed this rule. The commenter provided the following rationale:

(a) While reduction of regulatory burden may be a worthy goal, the legislative mandate to protect public health and safety must take precedence over an administrative goal;

(b) The modification in this rule would invite and promote an attitude or climate which resulted in the Three Mile Island accident, and thus, would present a danger to the health and safety of the public; and

(c) The NRC's rationale for this rule contradicts a statement made by the NRC, in a **Federal Register** notice announcing a public workshop (57 FR 27711; June 22, 1992), that some medical use licensees have administered byproduct material to patients who are pregnant or breast-feeding without knowing the patient's pregnancy or breast-feeding status.

Response. With respect to the first point, the elimination of the recordkeeping requirements addressed in this rule will not compromise public health and safety because this rule continues the requirement that departures may only be made by following the directions of an authorized user physician. Therefore, since there is no reduction in the protection of the public health and safety, the NRC continues to meet its legislative mandate. With respect to the second point, licensees must continue to comply with all applicable regulatory requirements and will continue to be subject to the same inspection and enforcement efforts. Therefore, the NRC believes that licensees' attitudes will not be negatively affected by this rule, and thus will not present a danger to the health and safety of the public.

Concerning the statement made in the public workshop notice as related to the rationale for this rule, the NRC views these two regulatory issues as separate matters. The rationale for this rule is to eliminate a regulatory burden that is no longer needed. The NRC has collected data specific to licensees' departures from manufacturer's instructions. The NRC and FDA staffs have concluded that the major trends in departures are already clear and that collecting additional data would not be expected to reveal any significantly new information. This rule is not connected to the issue concerning inadvertent radiation exposures to an embryo, fetus, or breast-feeding infant. In particular, the NRC has not stated that departures from manufacturer's instructions have led to an unintended radiation exposure to an embryo, fetus, or breast-feeding infant. Also, the NRC staff is not aware of any cases involving an unintended radiation exposure to an embryo, fetus, or breast-feeding infant that has been caused by a licensee departing from a manufacturer's instructions. Therefore, the NRC sees no contradiction between the rationale for this rule and the statement made in the public workshop notice.

The issue regarding unintended radiation exposures to an embryo, fetus, or breast-feeding infant from medical use of byproduct material is currently under study by the NRC to determine whether any regulatory action is necessary.

Discussion of the Final Rule Text

Based on public comments and NRC's responses discussed above, no substantive changes to the final rule are necessary. Thus, the text of the final rule remains the same as the text of the proposed rule with the exception that a typographical error in the proposed rule, in § 35.200 paragraph (i), has been correctly identified as paragraph (c).

Environmental Impact: Categorical Exclusion

The NRC has determined that this final regulation is the type of action described in categorical exclusion 10 CFR 51.22(c)(3)(ii). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this final rule.

Paperwork Reduction Act

This final rule eliminates information collection requirements that are subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). The reduction in information collection requirements was approved by the Office of Management and Budget under approval numbers 3150–0010 and 3150–0017.

The public reporting burden for this collection of information is estimated to be reduced by .05 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, to the Information and Records Management Branch (MNBB–7714), U.S. Nuclear Regulatory Commission, Washington, DC 20555; and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB–3019, (3150–0010 and 3150–0017), Office of Management and Budget, Washington, DC 20503.

Regulatory Analysis

In August 1990, the NRC implemented an Interim Final Rule allowing licensees to depart from the manufacturer's instructions for preparing diagnostic radiopharmaceuticals, and to depart from the package insert instructions regarding use of radiopharmaceuticals for therapy, provided that certain conditions were met. One of the conditions was for licensees to maintain records of such departures.

On June 11, 1992, the NRC published in the **Federal Register** a proposed rule that would delete these recordkeeping requirements (57 FR 24763). Nine comment letters were received, eight supported and one opposed this rule.

The only alternative to this action is to continue to keep these records. However, the NRC and FDA staffs have concluded that the major trends in departures are already clear and that collecting additional data would not be expected to reveal any significant new information. Therefore, the NRC believes that these recordkeeping requirements are no longer necessary.

The estimated reduction in annual burden would be approximately 1000 hours for NRC licensees. The NRC concludes that this action is justified due to the net annual savings to NRC licensees and because eliminating these recordkeeping requirements would not affect public health and safety.

Regulatory Flexibility Certification

As required by the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission certifies that this rule will not have a significant economic impact on a substantial number of small entities. This rule would affect medical use licensees including some private practice physicians. Some of these licensees would be considered small entities under the NRC's size standards (56 FR 56672; November 6, 1991). This rule eliminates recordkeeping requirements that the NRC and FDA staffs agree are no longer necessary.

This action will reduce the regulatory burden on medical use licensees, including some small entities.

Backfit Analysis

The NRC has determined that the backfit rule, 10 CFR 50.109, does not apply to this rule, and therefore, a backfit analysis is not required for this rule, because these amendments do not involve any provisions which would impose backfits as defined in 10 CFR 50.109(a)(1).

List of Subjects

CFR Part 30

Byproduct material, Criminal penalty, Government contracts, Intergovernmental relations, Isotopes, Nuclear materials, Radiation protection, Reporting and recordkeeping requirements.

CFR Part 35

Byproduct material, Criminal penalty, Drugs, Health facilities, Health professions, Incorporation by reference, Medical devices, Nuclear materials, Occupational safety and health, Radiation protection, Reporting and recordkeeping requirements.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 552 and 553, the NRC is adopting the following amendments to 10 CFR parts 30 and 35.

PART 30—RULES OF GENERAL APPLICABILITY TO DOMESTIC LICENSING OF BYPRODUCT MATERIAL

1. The authority citation for Part 30 continues to read as follows:

Authority: Secs. 81, 82, 161, 182, 183, 186, 68 Stat. 935, 948, 953, 954, 955, as amended, sec. 234, 83 Stat. 444, as amended (42 U.S.C. 2111, 2112, 2201, 2232, 2233, 2236, 2282); secs. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846).

Section 30.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Section 30.34(b) also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 30.61 also issued under sec. 187, 68 Stat. 955 (42 U.S.C. 2237).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 30.3, 30.10, 30.34(b), (c), (f), (g) and (i), 30.41 (a) and (c), and 30.53 are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); § 30.10 is issued under sec. 161i, 68 Stat. 949, as amended (42 U.S.C. 2201(i)); and §§ 30.6, 30.9, 30.34(g), 30.36, 30.50 30.51, 30.52, 30.55, and 30.56(b) and (c) are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

2. In § 30.34, paragraph (i) is revised to read as follows:

§ 30.34 Terms and conditions of licenses.

* * * * *

(i)(1) From August 23, 1990, to August 23, 1993, each licensee eluting generators and processing radioactive material with diagnostic reagent kits for which the Food and Drug Administration (FDA) has approved a "New Drug Application" (NDA), may depart from the manufacturer's elution and preparation instructions (for radiopharmaceuticals authorized for use pursuant to 10 CFR 35.200), provided that the licensee follows the directions of an authorized user physician.

(2) The actions authorized in paragraph (i)(1) of this section are permitted in spite of more restrictive language in license conditions.

(3) Nothing in this section relieves the licensee from complying with other applicable NRC, FDA, and other Federal or State regulations.

PART 35—MEDICAL USE OF BYPRODUCT MATERIAL

3. The authority citation for part 35 is revised to read as follows:

Authority: Secs. 81, 161, 182, 183, 68 Stat. 935, 948, 953, 954, as amended (42 U.S.C. 2111, 2201, 2232, 2233); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 35.11, 35.13, 35.20(a) and (b), 35.21(a) and (b), 35.22, 35.23, 35.25, 35.27(a), (c) and (d), 35.31(a), 35.32(a), 35.49, 35.50(a)–(d), 35.51(a)–(c), 35.53(a)–(b), 35.59(a)–(c), (e)(1), (g), and (h), 35.60, 35.61, 35.70(a)–(f), 35.75, 35.80(a)–(e), 35.90, 35.92(a), 35.120, 35.200(b) and (c), 35.204(a) and (b), 35.205, 35.220, 35.300, 35.310(a), 35.315, 35.320, 35.400, 35.404(a), 35.406(a) and (c), 35.410(a), 35.415, 35.420, 35.500, 35.520, 35.605, 35.606, 35.610(a) and (b), 35.615, 35.620, 35.630(a) and (b), 35.632(a)–(f), 35.634(a)–(e), 35.636(a) and (b), 35.641(a) and (b), 35.643(a) and (b), 35.645(a) and (b), 35.900, 35.910, 35.920, 35.930, 35.932, 35.934, 35.940, 35.941, 35.950, 35.960, 35.961, 35.970, and 35.971 are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); and §§ 35.14, 35.21(b), 35.22(b), 35.23(b), 35.27(a) and (c), 35.29(b), 35.32(b)–(f), 35.33(a)–(b), 35.36(b), 35.50(e), 35.51(d), 35.53(c), 35.59(d), (e)(2), (g), and (i), 35.70(g), 35.80(f), 35.92(b), 35.204(c), 35.310(b), 35.315(b), 35.404(b), 35.406(b) and (d), 35.410(b), 35.415(b), 35.610(c), 35.615(d)(4), 35.630(c), 35.632(g), 35.634(f), 35.636(c), 35.641(c), 35.643(c), 35.645, and 35.647(c) are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

4. In § 35.200, paragraph (c) is revised to read as follows:

§ 35.200 Use of radiopharmaceuticals, generators, and reagent kits for imaging and localization studies.

* * * * *

(c)(1) From August 23, 1990, to August 23, 1993, a licensee may depart from the manufacturer's instructions for eluting generators and preparing reagent kits for which the Food and Drug Administration (FDA) has approved a "New Drug Application" (NDA), by following the directions of an authorized user physician.

(2) Nothing in this section relieves the licensee from complying with other applicable NRC, FDA, and other Federal or State regulations.

5. In § 35.300, paragraph (b) is revised to read as follows:

§ 35.300 Use of radiopharmaceuticals for therapy.

* * * * *

(b)(1) From August 23, 1990, to August 23, 1993, a licensee may depart from the package insert instructions regarding indications or method of administration for a radiopharmaceutical for which the Food and Drug Administration (FDA) has approved a "New Drug Application" (NDA), provided that the authorized user physician has prepared a written directive as required by § 35.32(a).

(2) Nothing in this section relieves the licensee from complying with other applicable NRC, FDA, and other Federal or State regulations.

Dated at Rockville, Maryland, this 17th day of September 1992.

For the Nuclear Regulatory Commission.

James M. Taylor,

Executive Director for Operations.

BILLING CODE 7590–01–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8441]

RIN 1545–AQ95

Bank Bad Debts, Conclusive Presumption

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations that clarify the scope of the express determination that is required under § 1.166–2(d)(3) in order for a bank to elect to use a method of accounting that conforms tax accounting for bad debts to regulatory accounting by providing a conclusive presumption of worthlessness for debts charged off for regulatory purposes. The temporary regulations affect banks that have made or intend to make an election under § 1.166–2(d)(3). The text of the

temporary regulations set forth in this document also serves as the text of the proposed regulations cross-referenced in the notice of proposed rulemaking in the proposed rules section of this issue of the Federal Register.

DATES: These temporary regulations are effective October 1, 1992 and apply to taxable years ending on or after December 31, 1991.

FOR FURTHER INFORMATION CONTACT: Bernita L. Thigpen, 202–622–4016 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

Under § 1.166–2(d)(3), a bank may elect to use a method of accounting that allows the bank to conform its tax accounting for bad debts with its regulatory accounting (the "conformity election"), and thereby deduct for tax purposes those debts that are classified as loss assets and charged off for regulatory purposes. Generally, pursuant to § 1.166–2(d)(3)(iii)(D), the election is effective only if the bank's supervisory authority (as defined in that section) expressly determines that the bank maintains and applies loan review and loss classification standards that are consistent with those standards of the supervisory authority. Pursuant to Rev. Proc. 92–18, 1992–10 I.R.B. 24, the express determination is in the form of a uniform letter that is provided to banks by the supervisory authorities.

To afford the supervisory authorities time to develop and disseminate procedures for issuing express determination letters, § 1.166–2(d)(3)(iii)(E) of the regulations provides a transition rule which allows a bank to make the conformity election prior to its first examination in which it could obtain an express determination letter. If, in the first such examination, the bank does not obtain an express determination letter, pursuant to § 1.166–2(d)(3)(iv), the bank's conformity election is revoked automatically effective beginning with the taxable year of the election.

Explanation of Provisions

The requirement that a bank's supervisory authority expressly determined that the bank maintains and applies loan review and loss classification standards consistent with regulatory standards was intended to ensure that the bank properly identifies, classifies, and charges off debts that become loss assets for regulatory purposes. After the final regulations were published, concerns were raised that a supervisory authority's express determination could be interpreted as exceeding the intended scope of the express determination by, for example, indicating regulatory approval of the adequacy of a bank's general allowances for loan and lease losses notwithstanding the explicit language to the contrary in the express determination letter. To alleviate these concerns, § 1.166–2(d)(3) is being amended to require that a bank's supervisory authority expressly determine that the bank maintains and applies "loan loss classification" standards, rather than "loan review and loss classification standards" that are consistent with regulatory standards. See § 1.166–2T(d)(3)(iii)(D). The revised language does not alter the intended scope of the express determination requirement.

In addition, because the supervisory authorities may have conducted a number of examinations relating to a bank's loan review process after December 31, 1991, and may not have issued express determination letters, under the regulations any examined bank that made the conformity election for the 1991 taxable year may have its election automatically revoked. Accordingly, the transition rules in § 1.166–2(d)(3) are being amended to allow a bank to make the conformity election without an express determination letter until its first examination (involving the loan review process) that is after the date of these amendments. See § 1.166–2T(d)(3)(iii)(E) and (d)(3)(iv)(C)(*2*).

Need for Temporary Regulations

The provisions contained in this Treasury decision are needed immediately to afford banks the benefits of the conformity rules in § 1.166–2(d)(3). The provisions merely clarify what was initially intended by the regulations and, although not substantive in nature, change the content of the express determination that is required for a valid conformity election. In addition, the provisions extend the transitional period to prevent the automatic revocation under § 1.166–2(d)(3)(iv) of any election made by a bank in reliance on the regulations for its 1991 taxable year. Therefore, it is found impracticable and contrary to the public interest to issue this Treasury decision with prior notice under section 553(b) of title 5 of the United States Code.

Special Analyses

It has been determined that these rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a final Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking for the regulations was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal author of these regulations is Bernita L. Thigpen, Office of the Assistant Chief Counsel (Financial Institutions & Products), Internal Revenue Service. However, other personnel from the Service and Treasury Department participated in their development.

List of Subjects in 26 CFR 1.161–1 Through 1.194–4

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 1.166–2 is amended by revising paragraphs (d)(3)(iii)(D), (d)(3)(iii)(E) and (d)(3)(iv)(C)(*2*) to read as follows:

§ 1.166–2 Evidence of worthlessness.

* * * * *

(d) * * *
(3) * * *
(iii) * * *
(D) [Reserved]. See § 1.166–2T (d)(3)(iii)(D).
(E) [Reserved]. See § 1.166–2T (d)(3)(iii)(E).
(iv) * * *
(C) * * *
(*2*) [Reserved]. See § 1.166–2T (d)(3)(iv)(C)(*2*).

* * * * *

Par. 3. Section 1.166–2T is added to read as follows:

§ 1.166–2T Evidence of worthlessness (temporary).

(a) through (d)(3)(iii)(C) [Reserved].

(d)(3)(iii)(D) *Express determination requirement.* In connection with its most

recent examination involving the bank's loan review process, the bank's supervisory authority must have made an express determination (in accordance with any applicable administrative procedure prescribed hereunder) that the bank maintains and applies loan loss classification standards that are consistent with the regulatory standards of that supervisory authority. For purposes of this paragraph (d)(3)(iii)(D), the supervisory authority of a bank is the "appropriate Federal banking agency" for the bank, as that term is defined in 12 U.S.C. 1813(q) or, in the case of an institution in the Farm Credit System, the Farm Credit Administration.

(E) *Transition period election.* For taxable years ending before completion of the first examination of the bank by its supervisory authority (as defined in paragraph (d)(3)(iii)(D) of this section) that is after October 1, 1992, and that involves the bank's loan review process, the statement or Form 3115 filed by the bank must include a declaration that the bank maintains and applies loan loss classification standards that are consistent with the regulatory standards of that supervisory authority. A bank that makes this declaration is deemed to satisfy the express determination requirement of paragraph (d)(3)(iii)(D) of this section for those years, even though an express determination has not yet been made.

(iv) (A) through (C) (*1*) [Reserved].

(iv)(C)(*2*) *Year of revocation.* If a bank makes the conformity election under the transition rules of paragraph (d)(3)(iii)(E) of this section and does not obtain the express determination in connection with the first examination involving the bank's loan review process that is after October 1, 1992, the election is revoked as of the beginning of the taxable year of the election or, if later, the earliest taxable year for which tax may be assessed. In other cases in which a bank does not obtain an express determination in connection with an examination of its loan review process, the election is revoked as of the beginning of the taxable year that includes the date as of which the supervisory authority conducts the examination even if the examination is completed in the following taxable year.

Shirley D. Peterson,

Commissioner of Internal Revenue.

Approved: September 24, 1992.

Alan J. Wilensky,

(Deputy) Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Part 1602

Records and Reports; Employer Information Report; Extension of the Filing Deadline

AGENCY: Equal Employment Opportunity Commission.

ACTION: Extension of deadline for filing report.

SUMMARY: Notice is hereby given that the deadline for filing the 1992 Employer Information Report (EEO-1) required by 29 CFR 1602.7 is extended from September 30, 1992 to November 30, 1992. Employment data may be used from any payroll period in the third quarter (July, August, or September) of the current calendar year or for any other period that has been approved by the Commission.

EFFECTIVE DATE: October 2, 1992.

FOR FURTHER INFORMATION CONTACT: Joachim Neckere, Director, Program Research and Surveys Division at (202) 663-4958 (voice) or (202) 708-9300 (TDD).

For the Commission,

Evans J. Kemp, Jr.,

Chairman.

BILLING CODE 6750-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD2 92-05]

Special Local Regulations: Tall Stacks 1992 (Ohio River mile 466.0 to mile 474.0); Correction

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule; correction.

SUMMARY: This document corrects the temporary final rule (CGD 92-05), published on Monday, August 31, 1992, (57 FR 39359) concerning the mile markers of the event to take place.

EFFECTIVE DATES: 6 a.m. to 2:30 a.m. on October 13 through October 17 and 6 a.m. to midnight October 18, 1992.

FOR FURTHER INFORMATION CONTACT: Ensign D. R. Dean, Chief, Boating Affairs Branch, Second Coast Guard District, 1222 Spruce Street, St. Louis, Missouri 63103-2832. The telephone number is (314) 539-3971, Fax: (314) 539-2685.

SUPPLEMENTARY INFORMATION: As published, the temporary final rule contains errors which requires correction: In the heading and text, the mile markers listed to describe the perimeter of the event are incorrect. The correct mile markers describing the perimeter of the event are the Ohio River from mile 466.0 to mile 474.0.

Correction

The following corrections are made to temporary final rule (CGD 92-05) which was published in the **Federal Register** on August 31, 1992, (57 FR 39359):

1. On page 39359, in the second column, the subject heading, "Special Local Regulations: Tall Stacks 1992 (Ohio River mile 469.0 to mile 471.0)" is corrected to read "Special Local Regulations: Tall Stacks 1992 (Ohio River mile 466.0 to mile 474.0)".

2. On page 39359, in the second column, in the **"SUMMARY"** section, "from mile 469.0 to mile 471.0" is corrected to read "from mile 466.0 to mile 474.0."

3. On page 39359, in the third column, in § 100.35-T0205(a) of the "Regulated Area" section, "mile 469.0 to mile 471.0" is corrected to read "from mile 466.0 to mile 474.0."

Dated: September 22, 1992.

J.J. Lantry,

Captain, U.S. Coast Guard, Acting Commander, Second Coast Guard District.

[FR Doc. 92-23974 Filed 10-1-92; 8:45 am]

BILLING CODE 4910-14-M

POSTAL SERVICE

39 CFR Part 20

VALUEPOST/CANADA Service

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: Pursuant to its authority under 39 U.S.C. 407, the Postal Service, after considering the comments submitted in response to its request for comments on its proposal to establish a new service for bulk mailings of certain AO mail to Canada, hereby gives notice that it is implementing the new service as proposed. The name of the new service is VALUEPOST/CANADA.

EFFECTIVE DATE: 12:01 a.m., October 18, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Rainer K. Hengst (202) 268-6095.

SUPPLEMENTARY INFORMATION: On May 11, 1992, the Postal Service published in the **Federal Register** a notice proposing the establishment of a new service for

bulk mailings to Canada of regular printed matter, books and sheet music, publishers' periodicals, and small packets (57 FR 20137).[1] The new service would be available from all U.S. post offices to all destinations in Canada. Mail would be conveyed by surface transportation from the United States to Canada, where it would be entered into the Canadian surface mail system for delivery.

The proposed per-item weight limit for the new service was 2 pounds. Two size-based rate categories were proposed. The letter-size rate category included items whose length was less than or equal to 11½ inches, height was less than or equal to 6⅛ inches, and thickness was less than or equal to ¼ inch. The flat-size rate category included items not fitting into the letter-size rate category whose length was less than or equal to 15 inches, height was less than or equal to 11½ inches, and thickness was less than or equal to ¾ inch. Items exceeding one or more of the flat-size rate category's maximum dimensions would not be eligible for the new service.

The proposed qualifying minimum for the new service varied depending on whether the mailing contained letter-size items, flat-size items, or a combination of both. A mailing containing only letter-size items would be required to weigh at least 50 pounds to qualify for the service. A mailing containing either only flat-size items or both letter-size and flat-size items would be required to weigh at least 100 pounds to qualify.

The proposal required mailers to sort, sack, and label their mail according to 13 Canadian postal code separations. In addition, the proposal required users to separate their mail by rate category (letter-size or flat-size). Within these two separations, users would be further required to sort, sack, and label their mail according to whether it was subject to the per-piece charge or the piece-plus-pound rate. No residual mail would be allowed in a dispatch, and commingling would not be permitted for mail from different rate categories or for mail subject to different postage rates.

The Postal Service received two comments concerning the new service, one from a large volume lettershop and one from an individual who identified himself only by name. The lettershop commenter maintained that the proposed rates would not be attractive to large mailers located near the U.S.-Canadian border, as those mailers could enter their items directly into the Canadian mail system and, thus, take advantage of the various presort discounts offered by Canada Post. This commenter suggested that the Postal Service consider taking the following three steps to reduce the proposed service's effective rates: (1) Making certain of Canada Post's presort discounts available to users of the new service; (2) providing users of the new service with a discount for entering their mail at certain U.S. and Canadian cities located near the U.S.-Canadian border; and (3) providing users of the new service with volume discounts for letter mail.

The individual commenter's remarks focused on two other aspects of the new service. First, he requested that payment of postage be permitted by any method that does not require cancellation of stamps. Second, he requested that the proposed rate structure be modified to allow for a savings for flat-size items weighing one ounce or less.

The Postal Service has concluded that none of the four modifications to the proposed rates requested by the commenters is feasible. The rate structure proposed in the May 11 notice was based on a break-point system, with rates including both per-piece and per-pound elements. The letter-size rate category's break-point would be 1 ounce. For letter-size items weighing 1 ounce or less, the proposed postage was 28 cents per piece. For letter-size items weighing over 1 ounce, the proposed rate was 26 cents per piece plus 40 cents per pound. The flat-size rate category's break-point would be 5 ounces. For flat-size items weighing 5 ounces or less, the proposed postage was 53 cents per piece. For flat-size items weighing over 5 ounces, the proposed rate was 30 cents per piece plus $1.00 per pound.

The proposed rates' discounts from the existing surface AO rates to Canada were premised on cost savings from the extensive worksharing required. The proposed rates also took into account origin-destination mail flows and reflected the overall transportation costs associated with those flows. In addition, the Postal Service sought to establish a relatively simple rate structure accessible to all mailers without regard to location.

At this time, the Postal Service has no means to access worksharing discounts offered by Canada Post. Consequently, the Postal Service is unable to make any of Canada Post's presort discounts available to VALUEPOST/CANADA users. Providing a discount for mail entered at certain U.S. and Canadian cities is similarly impracticable. The Postal Service's not being able to accept mail outside of the United States precludes discounted Canadian entry. The expectation that most VALUEPOST/CANADA mail will originate near the U.S.-Canadian border, together with the Postal Service's desire to establish a relatively simple rate structure, likewise militates against a discount for entry at specific U.S. cities.

The Postal Service believes that volume discounts are also insupportable. The new service was designed as a bulk service with substantial qualifying minimums. The extensive worksharing required of users was intended to minimize the Postal Service's processing and handling costs. The Postal Service would not realize significant additional cost savings if mailings contained more items than required to qualify for the service. As higher volumes would not lower the Postal Service's costs to an appreciable extent, they do not provide the basis for a discount.

The fourth requested rate-related modification concerned the proposed rate for flat-size items weighing one ounce or less. Although the commenter failed to explain his concern, it is likely that he was reacting to the fact that the proposed rate for one-ounce flats (53 cents) was greater than the existing one-ounce surface AO rate to Canada (36 cents for regular printed matter). This situation resulted from the way in which the Postal Service established the proposed rates. The Postal Service disaggregated the costs associated with letter-size pieces from the higher costs associated with flat-size pieces. Consequently, for a small number of weight steps, including one-ounce flats, mailers would have access to more advantageous rates by using the Postal Service's existing services to Canada. However, the Postal Service believes that the proposed rates would provide significant savings to the vast majority of mailers able to qualify and to meet the worksharing requirements.

In light of the foregoing, the Postal Service is implementing the rate structure as proposed. The rates being implemented are shown below.

As mentioned above, the individual commenter also requested that payment of postage be permitted by any method that does not require cancellation of stamps. The May 11 notice required that postage be paid by postage meter for non-identical weight items and by permit imprint or postage meter for identical weight items. The notice also stated that mailers would be permitted to use permit imprint for non-identical weight items if authorized to participate in the postage payment programs

[1] This includes all types of AO mail except matter for the blind.

described in Domestic Mail Manual (DMM) sections 145.7, Manifest Mailing System (MMS); 145.8, Optional Procedure (OP) Mailing System; or 145.9, Alternate Mailing Systems (AMS).

The Postal Service agrees with the commenter that mailers should have as much flexibility as practicable when paying postage. Therefore, in addition to implementing the proposed postage payment methods, the Postal Service will also allow VALUEPOST/CANADA users to precancel adhesive postage stamps when authorized by the Postal Service under the conditions in DMM 143.2.

The Postal Service did not receive comments on any other aspect of the new service. Consequently, with one exception, the mailing conditions being implemented for VALUEPOST/CANADA service are the same as those proposed in the May 11 notice and summarized above. The single change involves the use of Canadian postal codes for items sent in this service. In the interest of improving service quality, the Postal Service is now requiring that mailers include the Canadian postal code in the address on all VALUEPOST/CANADA items. As shown below, the sortation requirements set forth in the May 11 notice have been modified to reflect this change.

In setting international postage rates, the Postal Service must ensure that such rates (1) do not apportion the costs of the service so as to impair the overall value of the service to the users; (2) apportion the costs of all postal operations to all users on a fair and equitable basis; (3) are fair and reasonable; and (4) are not unduly or unreasonably discriminatory or preferential. The VALUEPOST/CANADA rates announced herein satisfy these criteria.

Accordingly, the Postal Service has determined to implement VALUE/CANADA service. This service will begin at 12:01 a.m., on October 18, 1992.

The Postal Service adopts the following amendments to the International Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See 39 CFR 20.1.

List of Subjects in 39 CFR Part 20

International postal service, Foreign relations.

PART 20—[AMENDED]

1. The authority citation for 39 CFR part 20 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 401, 404, 407, 408.

2. Chapter 2 of the International Mail Manual is amended by incorporating parts 247, 248, and 249 into part 248 and adding a new part 247 as follows:

CHAPTER 2—CONDITIONS FOR MAILING

* * * * *

247 VALUEPOST/CANADA

247.1 General

247.11 Description. This service is a bulk service for regular printed matter, books and sheet music, publishers' periodicals, and small packets. Rates are generally less than the single-piece rates for these classifications. The mailer must sort and prepare mail as described in this part.

247.12 Qualifying Mailings. To qualify, a mailing must consist of at least 50 pounds of letter-size items or at least 100 pounds of flat-size items. Mailings containing both letter-size and flat-size items must weigh at least 100 pounds.

247.13 Addressing. All items must be addressed in accordance with 122 and the Canadian postal code must be included as part of the address. Mailers wishing to order a Canadian Postal Code Directory should write to the following address to obtain an order form:

Canada Post Corporation
Head Sales and Customer Service
Ottawa, Ontario K1A 0B1
Canada

Mailers requiring postal code information on computer tape or information regarding Canadian mailing standards should write to the following address:

Canada Post Corporation
Postal Code Management
Sir Alexander Campbell Building Annex
C Station 321
Ottawa, Ontario K1A 0B1
Canada

or telephone (613) 993–1784. This telephone number is not intended as an information source to obtain the code for a single Canadian address.

247.14 Makeup Requirements. All items must be prepared as required in 244.4 for printed matter, and 284 for small packets.

247.15 Where to Mail. The postmaster will designate the acceptance points for this service. Although there is no drop shipment rate for this service, mailers may be authorized a plant-verified drop shipment postage payment system as provided in DMM 664. Plant loading may be authorized as provided in DMM 254.

247.16 Special Services Not Available. The special services described in IMM Chapter 3 are not available for items mailed using this service.

247.17 Return to Sender. Printed matter is generally not returned to the sender if undeliverable (see 244.23). Return addresses in a country other than the U.S. are not usually permitted (see 122.2). If the mailer wishes to have items returned if undeliverable, the items must be endorsed "Return Requested." Return charges are collected as provided in 781.5.

247.18 Enclosures in Printed Matter Items. Printed matter sent to Canada may contain as an enclosure a card, envelope, or wrapper bearing the printed address of the sender or the sender's agent in either the U.S. or Canada.

247.19 Customer Identification Number. Customers not authorized a permit imprint must be assigned, by their post office, a customer identification number. This number must be 6 digits and must not be the same as any permit number issued by that post office. Use the International Surface Air Lift (add a leading zero) or International Priority Airmail customer ID number if one has been issued to the mailer. This number must be entered on the Form 3651–C.

247.2 Size and Weight Limits

247.21 Size Limits. All items sent in this service must meet the size requirements for either letter-size or flat-size items. Items not meeting either of these requirements may not be mailed using this service. The following size limits apply:

a. Letter-Size

(1) Minimum
Height—3-½"
Length—5-½"
Thickness—.007"

(2) Maximum
Height—6-⅛"
Length—11-½"
Thickness—¼"

b. Flat-Size. Items exceeding at least one of the maximum size limits for letter-size items, but not exceeding the following dimensions, are acceptable at the rate for flat-size items:

Height—11-½"
Length—15"
Thickness—¾"

247.22 Weight Limits. Individual items may not weigh more than 2 pounds.

247.3 Postage

247.31 Rates

Weight	Rate
Letter-size:	
1 ounce or less	28 cents per piece.
Over 1 ounce	28 cents per piece plus 40 cents per pound or fraction of a pound.
Flat-size:	
5 ounces or less	53 cents per piece.
Over 5 ounces	30 cents per piece plus $1.00 per pound or fraction of a pound.

247.32 Postage Payment Methods

247.321 Permit Imprint. Mailers may use permit imprint only with mailings consisting of identical weight pieces. Mailers may be authorized to use permit imprint on mailings of non-identical weight items if authorized specific procedures under one of the special postage payment programs in DMM 145.7, 145.8, or 145.9.

247.322 Postage Meter. Mailings of non-identical weight pieces must bear the appropriate piece rate by postage meter impression. Items in each rate category must be sacked separately and presented by rate category.

247.323 Precancellation by Mailer. Mailers may precancel adhesive postage stamps when authorized by the Postal Service under the conditions in DMM 143.2.

247.324 Mailing Statement. Postage is computed on Form 3651–C, *Statement of Mailing—VALUEPOST/CANADA*, which must be completed for each mailing and must be presented at the time of mailing.

247.4 Preparation Requirements

247.41 Endorsements. All items must bear the endorsement "Printed Matter" or "Small Pocket," as appropriate. Publishers' periodicals mailed in this service may bear the endorsements in 244.21d. If the sender wants undeliverable printed matter returned, the item must be endorsed "Return Requested." All items must also be endorsed "Bulk Rate." For items paid by meter, this endorsement may be in either the ad plate area or the postal inscription (slug) area. If a permit imprint is used, the imprint may include the bulk rate endorsement. See DMM Exhibit 145.41c for examples. The imprint may not contain reference to domestic rates such as carrier route sort, ZIP+4, five-digit ZIP+4, ZIP+4 barcoded, or nonprofit organization.

247.42 Customs Declarations. Items in this service may require the use of either Form 2976, *Customs-Douane C1*, or Form 2976–A, *Customs Declaration*. See 123.1 for information on the use of customs forms.

247.43 Sortation Requirements

247.431 Facing and Bundling. All mail must be bundled according to the Canadian province of destination as shown in Exhibit 247.431. Letter-size and flat-size items must be bundled separately. Items not within the same rate category may not be commingled. For example, letter-size items under and over 1 ounce may not be bundled or sacked together. Bundles should be approximately 4 to 6 inches thick and must be banded around the length and girth. All bundles must bear a facing slip showing the Canadian province of destination and the first letter(s) of the postal code(s) included in the bundle. For example, a bundle containing mail for Manitoba with a postal code beginning with "R" will have the following facing slip.

Exhibit 247.431 shows Canadian provinces and the postal code letters.

247.432 Sacks. Gray disposable international sacks must be used. All bundles must be placed in sacks labeled to the destinations shown in Exhibit 247.431. For example, all bundles for Manitoba must be placed in a sack labeled to Winnipeg MB FWD. Items in different rate categories may not be placed in the same sack. For example, flat-size items weighing under and over 5 ounces must be sacked separately. There is no minimum weight per sack. Sacks may not weigh more than 66 pounds (contents and sack).

247.433 Sack Labels

a. Format. Use blue sack labels completed using the following format:

Line 1: Six digit Canadian postal code (left justified). U.S. routing code (right justified).

Line 2: Destination office in Canada and contents.

Line 3: Mailer, Mailer Location.

Example:

```
K0A 9Z0                                  099
OTTAWA ON FWD                            3C
ABC Publishers, Chicago, IL 60601
```

b. Obtaining Labels. Instructions for ordering labels are contained in Handbook PO–423, *Requisitioning Labels*. Alternatively, mailers may preprint them. The labels must be blue in color, similar to those used by the Postal Service.

EXHIBIT 247.431.—CANADIAN SORTATION SCHEME

CANADIAN PROVINCE/TERRITORY	CANADIAN POSTAL CODE	SACK LABEL
Newfoundland Nova Scotia	A	B0J 9Z0 044 Halifax NS Fwd Mailer, Mailer Location.

British Columbia [2]	W	V0T 9Z0 98001 Vancouver BC Fwd.
Northwest Territories [1]	X	T0N 9Z0 568 Edmonton AB Fwd Mailer, Mailer Location.
Yukon Territory [2]	Y	V0T 9Z0 98001 Vancouver BC Fwd Mailer, Mailer Location.

[1] Alberta and Northwest Territories should be combined in the same sack if there is less than 11 pounds to either destination.
[2] British Columbia and Yukon Territory should be combined in the same sack if there is less than 11 pounds to either destination.

A transmittal letter making these changes in the pages of the International Mail Manual will be published and transmitted to subscribers automatically. Meanwhile, these changes will be published in the Postal Bulletin. See 39 CFR 20.3(c). Notice of issuance of the IMM transmittal letter will be published in the Federal Register as provided by 39 CFR 20.3.

Stanley F. Mires,

Assistant General Counsel, Legislative Division.

BILLING CODE 7710-12-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 271

[FRL-4516-7]

Rhode Island; Final Authorization of State Hazardous Waste Management Program Revisions

AGENCY: Environmental Protection Agency.

ACTION: Immediate final rule.

SUMMARY: Rhode Island has applied for final authorization of revisions to its hazardous waste program under the Resource Conservation and Recovery Act (RCRA). The Environmental Protection Agency (EPA) has reviewed Rhode Island's application and has made a decision, subject to public review and comment, that Rhode Island's hazardous waste program revision satisfies all of the requirements necessary to qualify for final authorization. Thus, EPA intends to approve Rhode Island's hazardous waste program revision. Rhode Island's application for program revision is available for public review and comment.

DATES: Final authorization for Rhode Island shall be effective December 1, 1992 unless EPA publishes a prior Federal Register action withdrawing this immediate final rule. All comments on Rhode Island's program revision application must be received by the close of business November 2, 1992.

ADDRESSES: Copies of Rhode Island's program revision application are available for inspection and copying, 8:30am–4:00 pm Monday-Friday at the following addresses: Rhode Island Department of Environmental Management, Division of Air & Hazardous Materials, 291 Promenade Street, Providence, Rhode Island 02908-5767, Phone: 401/277-2787; U.S. EPA Region I Library, One Congress Street, 11th Floor, Boston, Massachusetts 02203, Phone: 617/565-3300. Written comments should be sent to Betsy Davis, at the address below.

FOR FURTHER INFORMATION CONTACT: Betsy Davis, MA & RI Waste Regulation Section, U.S. EPA Region I, HRR-CAN3, JFK Federal Building, Boston, Massachusetts 02203, Phone: 617/573-5722.

SUPPLEMENTARY INFORMATION:

A. Background

States with final authorization under Section 3006(b) of the Resource Conservation and Recovery Act ("RCRA" or "the Act"), 42 U.S.C. 6929(b), have a continuing obligation to maintain a hazardous waste program that is equivalent to, consistent with, and no less stringent than the Federal hazardous waste program. Revisions to State hazardous waste programs are necessary when Federal or State statutory or regulatory authority is modified or when certain other changes occur. Most commonly, State program revisions are necessitated by changes to EPA's regulations in 40 CFR parts 260–266, 268, 124 and 270.

B. Rhode Island

Rhode Island initially received final authorization on January 31, 1986 (51 FR 3780, January 30, 1986) to implement its base hazardous waste program. Rhode Island received final authorization for revisions to its program on March 26, 1990 (55 FR 9128, March 12, 1990) and May 5, 1992, (57 FR 8089, March 6, 1992) to implement the program revisions listed in the Federal Register notices published March 12, 1990 and March 6, 1992, respectively. On November 28, 1988, Rhode Island submitted a draft program revision application for federal requirements promulgated on September 9, 1987, April 22, 1988, and from July 1, 1986 to June 30, 1987, except that approval was not requested for revisions which are required as a result of the Hazardous and Solid Waste Amendments of 1984 (Public Law 98-616, November 8, 1984, hereinafter "HSWA"). Today, Rhode Island is seeking approval of its program revision in accordance with 40 CFR 271.21(b)(3).

EPA has reviewed Rhode Island's application, and has made an immediate final decision that Rhode Island's hazardous waste program revision satisfies all of the requirements necessary to qualify for final authorization. Consequently, EPA intends to grant final authorization for the modifications to the Rhode Island program subject to further review based on adverse public comment. The public may submit written comments on EPA's immediate final decision up until November 2, 1992. Copies of Rhode Island's application for program revision are available for inspection and copying at the locations indicated in the "**ADDRESSES**" section of this notice.

Approval of Rhode Island's program revision shall become effective in 60 days unless an adverse comment pertaining to the State's revision discussed in this notice is received by the end of the comment period. If an adverse comment is received EPA will publish either (1) a withdrawal of the immediate final decision or (2) a notice containing a response to comments which either affirms that the immediate final decision takes effect or reverses the decision.

The Rhode Island program revision application is based on changes to State Regulations which were intended to make them equivalent to the analogous Federal Regulations which had been promulgated during the July 1, 1986 to June 30, 1987 period, and September 9, 1987, and April 22, 1988, in 40 CFR parts 260, 261, 264, 265 and 270. These changes did not include any provisions which were required as a result of the Hazardous and Solid Waste Amendments 1984 (HSWA) and radioactive mixed waste. Specific provisions which are included in the Rhode Island program revision authorization made today are listed in Table 1 below.

TABLE 1.—PROVISIONS COVERED BY THIS PROGRAM REVISION AUTHORIZATION

Federal requirement	State authority
Liability Coverage 51 FR 25350-25356, July 11, 1986.	Rules 9.17, 7.01(E).
Standards for Hazardous Waste Storage and Treatment Tank Systems 51 FR 25470-25486, July 14, 1986.	Rules 3.100, 3.25, 5.02, 9.05, 9.12, 9.16, 9.17, 9.19, 8.04(K), 8.04(R), 8.04(V), 7.06(D).
Corrections to Listing of Commercial Chemical Products and Appendix VIII Constituents 51 FR 28296-28310, August 6, 1986.	Rule 3.25.
Revised Manual SW-846; Amended Incorporation by Reference 52 FR 8072-8073, March 16, 1987.	Rule 3.25.
Closure/Post-Closure Care for Interim Status Surface Impoundments 52 FR 8704-8709, March 19, 1987.	Rule 7.01(E).
Definition of Solid Waste Technical Corrections 52 FR 21306-21307, June 5, 1987.	Rule 3.25.

TABLE 1.—PROVISIONS COVERED BY THIS PROGRAM REVISION AUTHORIZATION—Continued

Federal requirement	State authority
Amendments to Part B Information Requirements for Disposal Facilities 52 FR 23447-23450, June 22, 1987 as amended 52 FR 33936, September 9, 1987.	Rule 8.01(G).
Technical Corrections; Identification and Listing of Hazardous Waste 53 FR 13382-13393, April 22, 1988.	Rule 3.25.

Rhode Island agrees to review all state hazardous waste permits which have been issued under state law prior to the effective date of this authorization. Rhode Island agrees to then modify, revoke and reissue, or reissue such permits as necessary to require compliance with the amended state program when the permit expires. The modification, revocation and reissuance, or reissuance will be scheduled in the State Grant Workplan, if necessary.

Rhode Island is not seeking authorization to operate on Indian lands.

C. Decision

I conclude that Rhode Island's application for program revision meets all of the statutory and regulatory requirements established by RCRA. Accordingly, Rhode Island is granted final authorization to operate its hazardous waste program as revised.

Rhode Island now has responsibility for permitting treatment, storage, and disposal facilities within its borders and carrying out the aspects of the RCRA program described in its revised program application and previously approved authorization, subject to the limitations of the HSWA. Rhode Island also has primary enforcement responsibilities, although EPA retains the right to conduct inspections under Section 3007 of RCRA and to take enforcement actions under Section 3008, 3013, and 7003 of RCRA.

Compliance With Executive Order 12291

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 4 U.S.C. 605(b), I hereby certify that this authorization will not have a significant economic impact on a substantial number of small entities. This authorization effectively suspends the applicability of certain Federal regulations in favor of Rhode Island's program, thereby eliminating duplicative requirements for handlers of hazardous waste in the State. It does not impose any new burdens on small entities. This rule, therefore, does not require a regulatory flexibility analysis.

List of Subjects in 40 CFR Part 271

Administrative practice and procedure, Confidential business information, Hazardous materials transportation, Hazardous waste, Indian lands, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Water pollution control, Water supply.

Authority: This notice is issued under the authority of Sections 2002(a), 3006, and 7004(b) of the Solid Waste Disposal Act as amended 42 U.S.C. 6912(a), 6926, 6974(b).

Dated: September 25, 1992.

Patricia L. Meaney,

Acting Regional Administrator.

BILLING CODE 6560-50-M

---

40 CFR Part 272

[FRL-4125-1]

Hazardous Waste Management Program; Codification of Approved State Hazardous Waste Program for Illinois

AGENCY: Environmental Protection Agency.

ACTION: Immediate final rule.

SUMMARY: Under the Resource Conservation and Recovery Act of 1976, as amended (RCRA), the United States Environmental Protection Agency (EPA) may grant Final Authorization to States to operate their hazardous waste management programs in lieu of the Federal program. EPA uses part 272 of title 40 of the Code of Federal Regulations (40 CFR part 272) to codify its authorization of State programs and to incorporate by reference those provisions of State statutes and regulations that EPA will enforce under RCRA section 3008. Thus, EPA intends to codify the Illinois authorized State program in 40 CFR part 272. The purpose of this **Federal Register** (FR) is incorporation by reference of EPA's approval of recent revisions to Illinois' program.

DATES: Codification of Illinois' revised authorization hazardous waste program shall be effective December 1, 1992, unless EPA publishes a prior FR action withdrawing this immediate final rule. All comments on Illinois' codification must be received by the close of business November 2, 1992. The incorporation of certain publications listed in the regulations is approved by the Director of the FR as of December 1, 1992.

ADDRESSES: Written comments should be sent to Gary Westefer, Illinois Regulatory Specialist, Office of RCRA, U.S. EPA Region V, 77 West Jackson Boulevard, HRM-7J, Chicago, Illinois 60604, (312) 886-7450, (FTS: 312/886-7450).

FOR FURTHER INFORMATION CONTACT: Gary Westefer, Illinois Regulatory Specialist, Office of RCRA, U.S. EPA Region V, 77 West Jackson Boulevard, HRM-7J, Chicago, Illinois 60604, (312) 886-7450, (FTS: 312/-886-7450).

SUPPLEMENTARY INFORMATION:

Background

On September 12, 1989, and January 31, 1992, EPA published notices in the FR of its decisions to incorporate by reference Illinois' then authorized hazardous waste program (see 54 FR 37649 and 57 FR 3722). Since then, EPA has granted authorization to Illinois for additional revisions to the State hazardous waste program 56 FR 13595 (April 13, 1991). In this notice, EPA is incorporating the currently authorized State hazardous waste program in Illinois.

EPA codifies its approval of State programs in 4 CFR part 272, and incorporates by reference therein the State statutes and regulations that EPA will enforce under section 3008 of RCRA. This effort will provide clear notice to the public of the scope of the authorized program in Illinois.

Revisions to Illinois' and other State hazardous waste programs are necessary when Federal statutory or regulatory authority is modified. The codification of Illinois' authorized program in subpart 0 of part 272 is intended to enhance the public's ability to discern the current status of the authorized State program and clarify the extent of Federal enforcement authority. For a fuller explanation of EPA's codification of Illinois' authorized hazardous waste program, see 54 FR 37649 (September 12, 1989) and 56 FR 13595 (April 3, 1991).

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this action will not have a significant economic impact on a substantial number of small entities. It intends to codify the decision

already made to authorize Illinois' program and has no separate effect on handlers of hazardous waste in the State or upon small entities. This rule, therefore, does not require a regulatory flexibility analysis.

Compliance With Executive Order 12291

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Paperwork Reduction Act

Under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*, Federal agencies must consider the paperwork burden imposed by any information request contained in a proposed rule or a final rule. This rule will not impose any information requirements upon the regulated community.

List of Subjects in 40 CFR Part 272

Administrative practice and procedure, Confidential business information, Hazardous waste transportation, Hazardous waste, Incorporation by reference, Indian lands, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Water pollution control, Water supply.

William H. Sanders III,

Acting Regional Administrator.

For the reasons set forth in the preamble, 40 CFR part 272 is amended as follows:

PART 272—APPROVED STATE HAZARDOUS WASTE MANAGEMENT PROGRAMS

1. The authority citation for part 272 continues to read as follows:

Authority: Secs. 2002(a), 3006, and 7004(b) of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act, 42 U.S.C. 6912(a), 6926, and 6974(b).

2. Section 272.700 is amended by revising paragraphs (a) and (b) to read as follows:

§ 272.700 State authorization.

(a) The State of Illinois is authorized to administer and enforce a hazardous waste management program in lieu of the Federal program under subtitle C of the Resource Conservation and Recovery Act of 1976 (RCRA), 42 U.S.C. 6921 *et seq.* subject to the Hazardous and Solid Waste Amendments of 1984 (HSWA), (Public Law 98–616, November 8, 1984), 42 U.S.C. 6926 (c) and (g). The Federal program for which a State may receive authorization is defined in 40 CFR Part 271. The State's base program and revisions to that program, as administered by the Illinois Environmental Protection Agency, were approved by EPA pursuant to 42 U.S.C. 6926(b) and 40 CFR part 271. EPA's approval of Illinois' base program was effective on January 31, 1986. EPA's approval of revisions to Illinois' base program were effective on March 5, 1988, April 30, 1990 and June 3, 1991.

(b) Illinois is authorized to implement only those HSWA requirements addressed in 40 CFR 272.701 and codified herein.

* * * * *

2. Section 272.701 is amended by revising the introductory text of the section, the heading for paragraph (a), paragraphs (a)(1), (a)(2)(ii) introductory text, (b), (c) and (d) to read as follows:

§ 272.701 State administered program: Final authorization.

Pursuant to section 3006(b) of RCRA, 42 U.S.C. 6926(b), Illinois has final authorization for the following elements submitted to EPA in Illinois; base program and program revision applications for final authorization and approved by EPA effective on January 31, 1986, March 5, 1988, April 30, 1990 and June 3, 1991.

(a) *State Statutes and Regulations.*

(1) The following Illinois regulations and statutes are incorporated by reference with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51 as part of the hazardous waste management program under Subtitle C of RCRA, 42 U.S.C. 6921 *et seq.*:

(i) Illinois Administrative Code, Title 35, Part 702, Sections 702.101–702.104, 702.110–702.187; Part 703, Sections 703.100–703.126, 703.140–703.246; Part 709, Sections 709.102–709.105, 709.201, 709.301, 709.302, 709.401, 709.501–709.603; Part 720, Sections 720.101–720.122, Part 720 Appendix A; Part 721, Sections 721.101–721.133, Part 721 Appendices A, B, C, G, H, I, J, Z; Part 722, Sections 722.110–722.151, Part 722 Appendix A; Part 723, Sections 723.110–723.131; Part 724, Sections 724.101–724.321, 724.326–724.351, 724.354–724.451, Part 724 Appendices A, D, E; Part 725, Sections 725.101–725.248, 725.270–725.530, Part 725 Appendices, A, C, D, E; Part 726, Sections 726.120–726.180; Part 728; and Part 729, Sections 729.100–729.321; (Illinois Administrative Code, January 1, 1985, as amended January 1, 1986, January 1, 1987, and January 1, 1988).

Copies of the Illinois regulations that are incorporated by reference in this paragraph are available from the Secretary of State, Administrative Code Division, 288 Centennial Building, Springfield, Illinois 62756. Copies may be inspected at U.S. EPA headquarters, 401 M Street, SW., Washington, DC, or at the Office of Federal Register, 800 North Capital Street, NW., suite 700, Washington, DC.

(ii) (Reserved)

(2) * * *

(ii) Illinois Administrative Code, Title 35 Part 700, Sections 700.101–700.504; Part 702 Sections 702.105–702.109; Part 705, Section 705.101–705.212; Part 720, Sections 720.140–720.141; and Title 2, Part 1826, Sections 1826.101–1826.503, Section 1826 Appendices A and B. (Illinois Administrative Code, January 1, 1985, as amended January 1, 1986, January 1, 1987, and January 1, 1988).

* * * * *

(b) *Memorandum of Agreement.* The Memorandum of Agreement between EPA-Region V and the Illinois Environmental Protection Agency, signed by the EPA Regional Administrator on January 26, 1990, is part of the authorized hazardous waste management program under Subtitle C of RCRA, 42 U.S.C. 6921 *et seq.*

(c) *Statement of Legal Authority.* The Illinois Attorney General's Statements for final authorization signed by the Attorney General of Illinois on June 4, 1985, July 15, 1986, May 26, 1988, and February 23, 1990 are part of the authorized hazardous waste management program under Subtitle C of RCRA, 42 U.S.C. 6921 *et seq.*

(d) *Program Description.* Program Descriptions dated July 26, 1985, August 7, 1986, November 29, 1988, and May 18, 1990, and any other materials submitted as part of, or as supplements to, the original application or revision applications are codified as part of the authorized hazardous waste management program under Subtitle C of RCRA, 42 U.S.C. 6921 *et seq.*

[FR Doc. 92–23953 Filed 10–1–92; 8:45 am]

BILLING CODE 6560–50–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6949

[NM–930–4214–10; NMNM 84806]

Withdrawal of National Forest System Land for the Jemez Falls Campground Addition; New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order withdraws 164.60 acres of National Forest System land from mining for 20 years to protect significant improvements associated

with the Forest Service's Jemez Falls Campground Addition. The land has been and remains open to mineral leasing and surface uses authorized by the Forest Service.

EFFECTIVE DATE: October 2, 1992.

FOR FURTHER INFORMATION CONTACT: Georgiana E. Armijo, BLM New Mexico State Office P.O. Box 27115, Santa Fe, New Mexico 87502-7115, 505-438-7594.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714 (1988), it is ordered as follows:

1. Subject to valid existing rights, the following described National Forest System land is hereby withdrawn from location and entry under the United States mining laws (30 U.S.C. ch. 2 (1988)), but not from leasing under the mineral leasing laws, to protect the Forest Service's capital investments of the Jemez Falls Campground Addition:

New Mexico Principal Meridian

Santa Fe National Forest

T. 18 N., R. 3 E.,
Sec. 3, lots 5, 6, and 7, E½SE¼NW¼, and E½E½SW¼;
Sec. 10, NE¼NE¼NW¼.

The area described contains 164.60 acres in Sandoval County.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the National Forest System land under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

3. This withdrawal will expire 20 years from the effective date of this order unless, as a result of a review conducted before the expiration date pursuant to section 204(f) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714(f) (1988), the Secretary determines that the withdrawal shall be extended.

Dated: September 21, 1992.

Dave O'Neal,

Assistant Secretary of the Interior.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 90-176; RM-7053; RM-8040]

Radio Broadcasting Services; Columbia and Arnold, CA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document grants reconsideration of two petitions for rule making filed by Eric R. Hilding and Clarke Broadcasting and allots Channel 255A to Columbia, California, as that community's first local FM service at North Latitude 38-02-11, West Longitude 120-24-01. This document also allots Channel 240A to Arnold, California, as that community's second local FM service at North Latitude 38-18-03, West Longitude 120-20-06 with a site restriction 5.2 kilometers (3.2 miles) north. See 56 FR 26367, June 7, 1991. With this action, the proceeding is terminated.

EFFECTIVE DATES: November 12, 1992. The window period for filing applications will open on November 13, 1992, and close on December 14, 1992.

FOR FURTHER INFORMATION CONTACT: Elizabeth Beaty, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Memorandum Opinion and Order, MM Docket No. 90-176, adopted August 31, 1992, and released September 28, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452-1422, 1990 M Street, NW., Washington, DC 20036.

BILLING CODE 6712-01-M

---

47 CFR Part 73

[MM Docket No. 90-138; RM-7040]

Radio Broadcasting Services; Newnan and Peachtree City, GA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document reallots Channel 244A from Newnan, Georgia, and modifies the construction permit of Station WMK](FM) to specify Peachtree City, Georgia, as its community of license, at the request of South Metro Broadcasting Co., Inc. The allotment of Channel 244A to Peachtree City will provide the community with its first local aural transmission service, without depriving Newnan of its aural transmission service, in accordance with § 1.420(i) of the Commission's Rules. See 55 FR 11411, March 28, 1990. Channel 244A can be allotted to Peachtree City in compliance with the Commission's minimum distance separation requirements of the Rules, with a site restriction of 11.8 kilometers (7.3 miles) northwest of the community. The site restriction is necessary to maintain the present short-spacing to Station WKLS(FM), Channel 241C, Atlanta, Georgia. The coordinates for Channel 244A at Peachtree City are North Latitude 33-26-22 and West Longitude 84-42-42. With this action, this proceeding is terminated.

EFFECTIVE DATE: November 12, 1992.

Radio Broadcasting Services; White Stone, VA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Windmill Communications, permittee of Station WNDJ-FM, Channel 261A, White Stone, Virginia, substitutes Channel 285A for Channel 261A at White Stone and modifies Station WNDJ-FM's construction permit to specify operation on Channel 285A. See 57 FR 28162, June 24, 1992. Channel 285A can be allotted to White Stone in compliance with the Commission's minimum distance separation requirements with a site restriction of 6.7 kilometers (4.2 miles) northwest to accommodate Windmill's desired site. The coordinates for Channel 285A at White Stone are 37-42-00 and 76-26-00. With this action, this proceeding is terminated.

EFFECTIVE DATE: November 9, 1992.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 285

[Docket No. 910102-1312]

Atlantic Tuna Fisheries; Bluefin Tuna

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Reopening of the northern longline component of the Incidental Catch category.

SUMMARY: NMFS issues this notice to reopen the fishery for Atlantic bluefin tuna conducted by longline vessels permitted in the Incidental Catch category and operating in the northern part (north of 36°00'N latitude) of the Regulatory Area. Reopening of this fishery is necessary because the total annual quota of 28 metric tons (mt) of Atlantic bluefin tuna allocated to that category for this area, was closed before final rules for 1992 became effective. This closure was based on overages in the southern longline component of the Incidental Catch category. For a biennial quota, the 1992 rules allow for subtracting from, or adding to, a specific component in the following year for any overages and underages from the previous fishing year. The intent of this action is to allow an opportunity for fishermen in the northern longline component of the Incidental Catch category to harvest the quota allocated for this fishery.

EFFECTIVE DATE: The opening is effective 0001 hours local time October 1, 1992.

FOR FURTHER INFORMATION CONTACT: Richard B. Stone, 301-713-2347.

SUPPLEMENTARY INFORMATION: Regulations promulgated under the authority of the Atlantic Tunas Convention Act (16 U.S.C. 971 *et seq.*) regulating the harvest of Atlantic bluefin tuna by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 285.

Section 285.22(f)(1) of the regulations provides for an annual quota of 28 mt of Atlantic bluefin tuna to be harvested from the Regulatory Area by longline vessels permitted in the Incidental Catch category and fishing north of 36°00'N latitude. The Assistant Administrator for Fisheries, NOAA (Assistant Administrator), is authorized under § 285.20(b)(1) to monitor the catch and landing statistics and, on the basis of these statistics, to project a date when the total catch of Atlantic bluefin tuna will equal any quota under § 285.22. The Assistant Administrator is further authorized under § 285.20(b)(1) to prohibit the fishing for, or retention of, Atlantic bluefin tuna by those fishing in the category subject to the quota when the catch of tuna equals the quota established under § 285.22.

The Assistant Administrator had determined (prior to implementation of rules specifically for 1992 and beyond that contained provisions for underages and overages by a specific component), based on the reported catch, that the annual quota of Atlantic bluefin tuna for longline vessels fishing in the Regulatory Area would be attained by July 8, 1992. Therefore, based on total landings from the southern and northern components of the fishery, a closure notice was issued on July 6, 1992, to take effect upon July 8, 1992.

Upon further analysis of the landing data after the fishery was closed, the Assistant Administrator has determined that 15.18 mt of the 28 mt quota still exists for the northern component of the Incidental Catch category north of 36°00'N latitude. This notice of reopening is intended to allow an opportunity for the fishermen in that category to take their full allocation.

Classification

This action is taken under 50 CFR part 285 and complies with Executive Order 12291.

Authority: 16 U.S.C. 971 *et seq.*

BILLING CODE 3510-22-M

National Oceanic and Atmospheric Administration

50 CFR Part 672

[Docket No. 911176-2018]

Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Closure.

SUMMARY: NMFS is closing the directed fishery for pollock in statistical area 61 of the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the fourth quarterly allowance of the total allowable catch (TAC) for pollock in this area.

EFFECTIVE DATES: Effective 12 noon, Alaska local time (A.l.t.), September 28, 1992, through 12 midnight, A.l.t., December 31, 1992.

FOR FURTHER INFORMATION CONTACT: Patsy A. Bearden, Resource Management Specialist, Fisheries Management Division, NMFS, 907-586-7228.

SUPPLEMENTARY INFORMATION: The groundfish fishery in the exclusive economic zone within the GOA is managed by the Secretary of Commerce according to the Fishery Management Plan for Groundfish of the GOA (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 672.

The fourth quarterly allowance of pollock TAC for statistical area 61 is 1,353 metric tons (mt), determined in accordance with § 672.20(a)(2)(iv). During the one-day third quarter fishery, 2,977 mt was caught.

The Director of the Alaska Region, NMFS, has determined that any directed fishery for pollock in Statistical area 61 would likely result in exceeding the TAC. Therefore, in accordance with § 672.20(c)(2)(ii), NMFS is establishing a directed fishing allowance for the fourth quarter of 0 mt, is setting aside the remaining 1,353 mt to support bycatch needs in other groundfish fisheries, and is prohibiting directed fishing for pollock in statistical area 61, effective from 12 noon A.l.t., September 28, 1992, through midnight, A.l.t., December 31, 1992.

Directed fishing standards for applicable gear types may be found in the regulations at § 672.20(g).

Classification

This action is taken under 50 CFR 672.20 and is in compliance with Executive Order 12291.

Proposed Rules

Federal Register
Vol. 57, No. 192
Friday, October 2, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 910

[Docket No. FV92-910-1]

Lemons Grown in California and Arizona; Proposed Weekly Volume Regulations

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule invites comments on the quantities of fresh California-Arizona lemons that may be shipped weekly to domestic markets for the four week period from the week ending October 17 through the week ending November 7, 1992. Comments on the weekly levels of volume regulation must be received by the Department of Agriculture (Department) by 12 Noon Eastern Time and by the Lemon Administrative Committee (Committee) by 12 Noon Pacific Time on the day prior to the Committee meeting associated with the week of regulation being addressed in the comment. A list of the committee meetings, dates and proposed levels of volume regulations can be found under the heading. *Committee Meetings and Dates* Consistent with program objectives, volume regulations for these weeks may be needed to establish and maintain orderly marketing conditions for fresh California-Arizona lemons. The Committee locally administers the marketing order covering lemons grown in California and Arizona.

DATES: Comments on the volume regulation proposed for the week ending October 17 must be received by the Department and the Committee by October 5; for the week ending October 24 by October 13; for the week ending October 31 by October 19; and for the week ending November 7 by October 26.

ADDRESSES: Interested persons are invited to submit written comments concerning the proposed weekly levels of volume regulation. Comments must be sent in triplicate to the Docket Clerk, room 2525–S, F&V, AMS, USDA, P.O. Box 96456, Washington, DC 20090–6456, or by faxogram at (202) 720–5698; and to the Lemon Administrative Committee, 25129 The Old Road, suite 304, Newhall, California 91381, or by faxogram at (805) 253–2764. Such comments should reference the docket number, date, and page number of this issue of the **Federal Register**, and the dates of the regulatory week or weeks being addressed. For ease of review, persons submitting comments in excess of five pages may wish to include a one page summary. Such comments will be made available for public inspection in the Office of the Docket Clerk and the Committee office during regular business hours.

FOR FURTHER INFORMATION CONTACT: Kenneth G. Johnson, Marketing Order Administration Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, room 2523–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 690–3670; or Martin Engeler, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, 2202 Monterey Street, suite 102B, Fresno, California, 93721; telephone: (209) 487–5901.

SUPPLEMENTARY INFORMATION: This proposed rule is issued under Marketing Order No. 910 (7 CFR part 910), as amended, regulating the handling of lemons grown in California and Arizona, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, (7 U.S.C. 601–674), hereinafter referred to as the "Act."

This proposed rule has been reviewed by the U.S. Department of Agriculture (Department) in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

This proposed rule has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have retroactive effect. This proposed rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to any order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 70 handlers of lemons who are subject to regulation under the marketing order and approximately 2,000 producers of lemons in California and Arizona. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of producers and handlers of California-Arizona lemons may be classified as small entities.

The Administrator of the AMS has determined that this proposed rule would not have a significant economic impact on a substantial number of small entities.

The order authorizes volume regulations applicable to fresh shipments of California-Arizona lemons to the domestic market, which is defined by the order to include Canada. The marketing order does not limit the volume of export shipments of lemons, lemons consumed by charitable institutions, or lemons utilized in the production of processed lemon products. Exemptions are also provided for lemons used for livestock feed; lemons which are distributed in gift packages; the marketing and distribution of organic lemons to organic or health food wholesalers or retailers; and lemons sold directly by producers to consumers.

The declaration of policy in the Act includes provisions concerning establishment and maintaining such orderly marketing conditions as will protect producer prices and as will provide, in the interest of producers and consumers, an orderly flow of the supply of a commodity throughout its normal marketing season to avoid unreasonable fluctuations in supplies and prices. Limiting the quantity of California-Arizona lemons that each handler may handle on a weekly basis may contribute to the Act's objectives of orderly marketing and improving producer's returns.

The Committee may recommend to the Secretary the utilization of weekly volume regulations under the order to effectuate the purposes of the Act. Volume regulations may help to establish and maintain orderly marketing conditions for lemons, and at the same time benefit consumers by maintaining adequate supplies of lemons in the marketplace. Thus, volume regulations can be a valuable tool in achieving the goal of market stabilization for California-Arizona lemons.

Committee recommendations for volume regulations may vary from the established shipping projections in this proposed rule. Factors that may stimulate increased fresh lemon consumption and necessitate a Committee recommendation for volume regulation above the proposed level include: (1) Significant changes in weather patterns in major consuming areas; (2) a regional or national concern for health; or (3) promotional efforts by industry marketing organizations. Factors that could adversely affect lemon demand in the marketplace and necessitate a recommendation for volume regulation at a lower level than that proposed herein include: (1) Significant changes in weather conditions; (2) the size composition of existing supplies; (3) the condition of the fruit; (4) transportation problems; or (5) extreme supply fluctuations created by competitive imports.

Because the Department has determined that volume regulation may be recommended and adopted, it is issuing this proposed rule covering the four week period from the week ending on October 17, 1992, through the week ending on November 1, 1992. Should the Committee recommend, and the Department adopt, regulation for any or all weeks during the four week period, the Department would issue final rules establishing such regulations. Similar proposed rules may be issued and subsequently finalized throughout the season.

The Department invites comments on the proposed weekly levels of volume regulation for the week ending October 17, through the week ending November 7, 1992. The Committee meets on a weekly basis to consider current and prospective marketing conditions and interested persons may orally present their position at such meetings. Interested persons are also invited to submit written comments to the Committee and the Department regarding the proposed levels of regulation for any or all weeks of the four week period specified in this rule. Interested persons who wish to comment in writing must submit copies to both the Department and the Committee. For ease of review, persons submitting comments in excess of five pages may wish to include a one page summary.

Comments proposing alternative levels of shipments, including no regulation, during this four week period should provide as much information as possible in support of the suggested alternatives. Interested persons are also invited to comment on the possible regulatory and informational impact of the proposed volume regulations on small businesses.

The Committee will consider comments received in response to this proposed rule when deliberating on its recommendations for volume regulation. The Department will also consider comments received in its evaluation of Committee recommendations for volume regulation. If warranted, the Department will issue volume regulations on a weekly basis.

Comments on the weekly levels of volume regulation must be received by the Department by 12 Noon Eastern Time and by the Committee by 12 Noon Pacific Time the day prior to the Committee meeting associated with the week of regulation being addressed in the comment.

Following is a list of the Committee's meeting dates, times, and locations, the regulatory week to be addressed at each meeting, and the proposed level of volume regulation for each regulatory week.

Committee Meetings And Dates

1. Committee Meeting Date: October 6, 1992
   Time: 11 a.m.
   Location: 25129 The Old Road, suite 304, Newhall, California 91381
   Regulatory Week to be Addressed: October 11–October 17, 1992
   Proposed Level: 305 cars
2. Committee Meeting Date: October 14, 1992
   Time: 11 a.m.
   Location: Erawan Garden Resort, 76–477 Highway 111, Indian Wells, California 92210
   Regulatory Week to be Addressed: October 18–October 24, 1992
   Proposed Level: 305 cars
3. Committee Meeting Date: October 20, 1992
   Time: 11 a.m.
   Location: 25129 The Old Road, suite 304, Newhall, California 91381
   Regulatory Week to be Addressed: October 25–October 31, 1992
   Proposed Level: 300 cars
4. Committee Meeting Date: October 27, 1992
   Time: 11 a.m.
   Location: 25129 The Old Road, suite 304, Newhall, California 91381
   Regulatory Week to be Addressed: November 1–November 7, 1992
   Proposed Level: 310 cars

Comments received will be analyzed and considered part of the rulemaking process.

List of Subjects in 7 CFR Part 910

Lemons, Marketing agreements, and Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 910 is proposed to be amended as follows:

Note: This section will not appear in the annual Code of Federal Regulations.

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

1. The authority citation for 7 CFR part 910 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. A new § 910.1056 is added to read as follows:

§ 910.1056 Lemon Regulation 758.

The quantity of lemons grown in California and Arizona which may be handled during the period from October 11 through October 17, 1992, is 305,000 cartons.

3. A new § 910.1057 is added to read as follows:

§ 910.1057 Lemon Regulation 757.

The quantity of lemons grown in California and Arizona which may be handled during the period from October 18 through October 24, 1992, is 305,000 cartons.

4. A new § 910.1058 is added to read as follows:

§ 910.1058 Lemon Regulation 758.

The quantity of lemons grown in California and Arizona which may be handled during the period from October 25 through October 31, 1992, is 300,000 cartons.

5. A new § 910.1059 is added to read as follows:

§ 910.1059 Lemon Regulation 759.

The quantity of lemons grown in California and Arizona which may be handled during the period from November 1 through November 7, 1992, is 310,000 cartons.

Dated: September 29, 1992.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

7 CFR Part 1106

[DA-92-28]

Milk in the Southwest Plains Marketing Area; Proposed Temporary Revision of a Cooperative's Plant Pooling Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed temporary revision of rule.

SUMMARY: This notice invites public comment on a proposal to temporarily ease the pooling requirements for a plant operated by a cooperative association for a 24-month period, beginning October 1, 1992. The order currently requires that at least 45 percent of the producer milk marketed by a cooperative association must be delivered to distributing (bottling) plants in order to qualify the cooperative's plant for pooling under the Southwest Plains order. It is proposed that this percentage be reduced from 45 percent to 35 percent. This action was requested in order to prevent the uneconomic movement of milk by cooperative associations that represent producers regularly associated with the market.

DATES: Comments are due no later than October 9, 1992.

ADDRESSES: Comments (two copies) should be sent to USDA/AMS/Dairy Division, Order Formulation Branch, room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456.

FOR FURTHER INFORMATION CONTACT: Richard A. Glandt, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456 (202) 720-4829.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act (5 U.S.C. 601-612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action would not have a significant economic impact on a substantial number of small entities. This action would also tend to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accure from such pricing.

This proposed temporary revision of rules has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have retroactive effect. If adopted, this proposed action will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with the law and requesting a modification of an order or to be exempted from the order. A handler is afforded the opportunity for a hearing on the petition. After a hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has its principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after date of the entry of the ruling.

This proposed rule has been reviewed by the Department in accordance with Departmental Regulation 1512-1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule. Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and the provisions of § 1106.7 (c) and (d) of the order, the temporary revision of certain provisions of the order regulating the handling of milk in the Southwest Plains marketing area is being considered for a 24-month period beginning October 1, 1992.

All persons who desire to submit written data, views or arguments about the proposed revision should send two copies of their views to USDA/AMS/Dairy Division, Order Formulation Branch, room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456 by the 7th day after publication of this notice in the **Federal Register**. The period for filing comments is limited to seven days because a longer period would not provide the time needed to complete the required procedures and include October 1992 in the temporary revision period.

All written submissions made pursuant to this notice will be made available for public inspection in the Dairy Division during regular business hours (7 CFR 1.27(b)).

Statement of Consideration

In order for a cooperative association plant that is located in the marketing area or in a county adjacent to the marketing area to be a pool plant, the Southwest Plains order requires that the cooperative must deliver to pool distributing plants a minimum of 45 percent of the total quantity of milk marketed by the cooperative, either during the month or during the 12-month period ending with the immediately preceding month. The order also provides ending with the immediately preceding month. The order also provides authority for the Director of the Dairy Division to increase or decrease this requirement by up to 10 percentage points if such a revision is necessary to obtain needed shipments or to prevent uneconomic shipments.

Mid-America Dairymen, Inc. (Mid-Am), and Associated Milk Producers, Inc. (AMPI), cooperative associations that represent many of the market's producers, have requested that expedited action be taken to temporarily ease the pooling requirement by decreasing it by 10 percent. The total minimum quantity of its milk supply that a cooperative association would then be required to deliver to distributing plants in order for the plant to maintain pool plant status would be decreased to 35 percent. This temporary revision would be effective for a 24-month period, beginning October, 1992.

Mid-Am and AMPI assert that in eleven of the past nineteen months (January, 1991 through July, 1992), their shipments to distributing plants have failed to meet the 45 percent shipping standard. Though the 12-month average

has met the 45 percent standard (except for the period ending July, 1992), maintaining pool plant status has been marginal and difficult, according to the proponents.

The proponents anticipate that the marketing conditions currently existing will continue through the next two years or longer. Those marketing conditions attributing to the need to reduce the shipping percentage of a cooperative association are increasing producer receipts and reduced sales to distributing plants. Reduced sales to distributing plants can be attributed to two factors: (1) Increased non-member sales and, (2) A significant volume of fluid sales being lost by a Southwest Plains handler to a Texas handler, according to Mid-Am and AMPI.

The proponents anticipate the shipping percentage during many months over the next two years will be significantly below 45 percent shipping requirement, and subsequently that the 12-month shipping percentage average will fall below 45 percent. Mid-Am and AMPI therefore request a reduction of the shipping percentage of § 1106.7(c) from 45 percent to 35 percent pursuant to § 1106.7(d) of the Southwest Plains Milk Marketing Order.

Accordingly, it may be appropriate to reduce the delivery requirement from 45 to 35 percent for a 24-month period, beginning October 1992.

BILLING CODE 3410–02–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92–NM–117–AD]

Airworthiness Directives; Boeing Model 727 Series Airplanes Equipped With Bendix Brakes Fitted With NASCO Rotors Installed in Accordance With Supplemental Type Certificate (STC) SA3948NM

AGENCY: Federal Aviation Administration; DOT.

ACTION: Notice of proposed rulemaking (NPRM), correction.

SUMMARY: This document corrects the closing date for submittal of comments to the above-captioned proposed Airworthiness Directive (AD) that was published in the **Federal Register** on Wednesday, September 23, 1992 (57 FR 43944). A delay in the processing of the document resulted in its publication after the indicated comment deadline had passed. In all other respects, the proposed AD is correct.

DATES: Comments must be received by December 1, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–117–AD, 1601 Lind Avenue SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Andrew Gfrerer, Aerospace Engineer, Mechanical/Environmental and Crashworthiness Section, ANM–131L, FAA, Los Angeles Aircraft Certification Office (ACO), 3229 East Spring Street, Long Beach, California 90806; telephone (310) 988–5338; fax (310) 988-5210.

SUPPLEMENTARY INFORMATION: A document proposing the adoption of a new airworthiness directive (AD), applicable to certain Boeing Model 727 series airplanes equipped with Bendix brakes fitted with NASCO rotors installed in accordance with STC SA3948NM, was published in the **Federal Register** on Wednesday, September 23, 1992 (57 FR 43944). This document corrects the closing date for submittal of public comments to December 1, 1992. Since no other portion of the proposal or regulatory information has been changed, the proposed rule is not being republished.

Issued in Renton, Washington, on September 24, 1992.

Bill R. Boxwell,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92–23038 Filed 10–1–92; 8:45 am]

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

14 CFR Part 39

[Docket No. 92–NM–143–AD]

Airworthiness Directives; British Aerospace Model BAe 125–800A Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain British Aerospace Model BAe 125–800A series airplanes. This proposal would require the identification of additional circuit breakers that must be included in smoke drill procedures. This proposal is prompted by a report that additional circuit breakers must be identified in order to ensure that the flight crew disenables them in an emergency. The actions specified by the proposed AD are intended to prevent reduced effectivity of smoke elimination and passenger evacuation procedures.

DATES: Comments must be received by November 9, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–143–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041–0414. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. William Schroeder, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2148; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-NM-143-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-143-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056.

Discussion: The United Kingdom Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, recently notified the FAA that an unsafe condition may exist on certain British Aerospace Model BAe 125-800A series airplanes. The CAA advises that in order to satisfy the smoke drill procedures contained in the FAA-approved Airplane Flight Manual (AFM) for windscreen heat equipment supplied by certain busbars, additional circuit breakers must be identified. Failure to identify these circuit breakers could result in the flight crew failing to disenable the circuit breakers in an emergency, thereby reducing the effectivity of smoke elimination and passenger evacuation procedures.

British Aerospace has issued Service Bulletin 24-288-3284A, dated February 7, 1992, which describes procedures for the identification of additional circuit breakers that must be included in smoke drill procedures. The identification procedure (Modification No. 253284A) involves adding a placard (white indicator label) to the power supply circuit breakers for the left-hand windscreen panel A and the right-hand windscreen panel B heat controls. The CAA classified this service bulletin as mandatory.

This airplane model is manufactured in the United Kingdom and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA has kept the FAA informed of the situation described above. The FAA has examined the findings of the CAA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require the identification of additional circuit breakers that must be included in smoke drill procedures. The actions would be required to be accomplished in accordance with the service bulletin described previously.

The FAA estimates that 137 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $7,535. This total cost figure assumes that no operator has yet accomplished the proposed requirements of this AD action.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation:

(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES.**"

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

British Aerospace: Docket 92-NM-143-AD.

Applicability: All Model BAe 125-800A series airplanes on which Modification No. 253284A has not been installed; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent the crew from failing to disenable all appropriate circuit breakers in an emergency, accomplish the following:

(a) Within 3 months after the effective date of this AD, install Modification No. 253284A by painting the perimeters of the "A SCRN" and "B SCRN" heat control circuit breakers with matte white (non-cellulose) paint, in accordance with British Aerospace Service Bulletin 24-288-3284A, dated February 7, 1992.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on September 8, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-23009 Filed 10-1-92; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 92-NM-142-AD]

Airworthiness Directives; McDonnell Douglas Model DC-9 and DC-9-80 Series Airplanes, Model MD-88 Airplanes, and C-9 (Military) Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the supersedure of an existing airworthiness directive (AD), applicable to certain McDonnell Douglas Model DC-9-80 series airplanes and Model MD-88 airplanes, that currently requires inspection of the rudder power control valve to determine if a lockwire is installed and, if not installed, adjustment of the retention nut and installation of a lockwire. This action proposes to add airplanes to the applicability statement of the rule and to revise the required measurement for the end cap torque. This proposal is prompted by reports of loss of rudder control on final approach and landing. The actions specified by the proposed AD are intended to prevent loss of rudder control.

DATES: Comments must be received by November 9, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-142-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from McDonnell Douglas Corporation, P.O. Box 1771, Long Beach, California 90846-0001, Attention: Business Unit Manager, Technical Publications—Technical Administrative Support, C1-L5B. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Los Angeles Aircraft Certification Office (ACO), Transport Airplane Directorate, 3229 East Spring Street, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. Walter Eierman, Aerospace Engineer, Los Angeles Aircraft Certification Office, ANM-130L, FAA Transport Airplane Directorate, 3229 East Spring Street, Long Beach, California 90806-2425; telephone (310) 988-5336; fax (310) 988-5210.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-NM-142-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-142-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056.

Discussion: On August 6, 1991, the FAA issued AD 91-18-03, Amendment 39-8006 (56 FR 41058, August 19, 1991), to require inspection of the rudder power control valve to determine if a lockwire is installed and, if not installed, adjustment of the retention nut and installation of a lockwire. That action was prompted by a report that the rudder pedal could not be depressed during landing rollout. The requirements of that AD are intended to prevent loss of rudder control.

Since the issuance of that AD, there have been additional reports of missing lockwire on other airplane models, which indicate that the problem is more widespread than initially reported. The retention nut lockwire was inadvertently left out during assembly of the rudder power control valve. In addition, the FAA has determined that the end cap torque measurement recommended in McDonnell Douglas Alert Service Bulletin A27-317, dated June 17, 1991, is incorrect.

The FAA has reviewed and approved the following service bulletins:

(1) McDonnell Douglas Alert Service Bulletin A27-327, Revision 1, dated March 9, 1992, which describes procedures to perform a one-time visual inspection of the retention nut on the rudder power control valve slide assembly for proper installation of a lockwire and, if not installed, adjustment of the retention nut and installation of a lockwire. Revision 1 adds Model DC-9 series airplanes to the effectivity listing that were not included in the original issue of this service bulletin.

(2) McDonnell Douglas Alert Service Bulletin A27-317, Revision 2, dated May 22, 1992, which describes procedures for inspecting lockwire installed on the rudder power actuator slide assembly retention nut. Revision 2 corrects the torque requirements for the end cap.

(3) McDonnell Douglas Service Bulletin 27-321, dated May 18, 1992, which describes procedures for modifying the slide assembly of the rudder power control valve. The modification involves replacing lockwire with a locking tab washer on the rudder power control valve located in the aft fuselage at the lower end of the rudder hinge line. This modification adds dual locking capability to the slide adjustment retention nut, which will minimize the possibility of a retention nut not locking.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would supersede AD 91-18-03 to add airplanes to the applicability of the rule. This action would require that: (1) Operators who have not previously accomplished the inspection of the retention nut of the rudder power control valve must inspect the retention nut and take corrective action as necessary; and (2) operators who have previously accomplished the inspection must retighten the end nut to the newly specified torque limit. As an alternative to performing the inspection,

operators may modify the slide assembly of the rudder power control valve. The actions would be required to be accomplished in accordance with the service bulletin described previously.

There are approximately 1,950 McDonnell Douglas Model DC–9 and DC–9–80 series airplanes, MD–88 airplanes, and C–9 (Military) airplanes of the affected design in the worldwide fleet. (The previously issued AD affected 120 McDonnell Douglas Model DC–9–80 series airplanes and Model MD–88 airplanes.) The FAA estimates that 1,150 airplanes of U.S. registry would be affected by this proposed AD. (The previously issued AD affected 60 U.S. registered airplanes.) The FAA estimates that it would take approximately 1 work hour per airplane to accomplish the proposed inspection requirement, and approximately 2 work hours per airplane to accomplish the proposed inspection and modification requirements. The average labor rate is $55 per work hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be between $63,250 and $126,500. (This is an increase over the total cost of the previously issued AD of between $59,950 and $123,200; however, the cost per airplane remains approximately the same). This total cost figure assumes that no operator has yet accomplished the proposed requirements of this AD action.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39–8006 (56 FR 41058, August 19, 1991), and by adding a new airworthiness directive (AD), to read as follows:

McDonnell Douglas: Docket 92–NM–142–AD. Supersedes AD 91–18–03, Amendment 39–8006.

Applicability: Model DC–9 and C–9 (Military) airplanes; as listed in McDonnell Douglas DC–9 Alert Service Bulletin A27–327, Revision 1, dated March 9, 1992; and Model DC–9–80 series airplanes and Model MD–88 airplanes; as listed in McDonnell Douglas MD–80 Alert Service Bulletin A27–317, Revision 2, dated May 22, 1992; certificated in any category.

Compliance: Required as indicated, unless accomplished previously. To prevent loss of rudder control, accomplish the following:

(a) For airplanes on which the retention nut on the slide assembly of the rudder power control valve has not been inspected in accordance with McDonnell Douglas DC–9 Alert Service Bulletin A27–327, dated December 2, 1991; or McDonnell Douglas MD–80 Alert Service Bulletin A27–317, dated June 17, 1991, or Revision 1, dated January 14, 1992, or Revision 2, dated May 22, 1992: Within 90 days after the effective date of this AD, inspect the retention nut on the rudder power control valve slide assembly to determine if a lockwire is installed, in accordance with McDonnell Douglas DC–9 Alert Service Bulletin A27–327, Revision 1, dated March 9, 1992; or McDonnell Douglas MD–80 Alert Service Bulletin A27–317, Revision 2, dated May 22, 1992; as applicable.

(1) If a lockwire is installed, no further action is required by this AD.

(2) If a lockwire is not installed, prior to further flight, adjust the retention nut, install a lockwire, and functionally check the rudder power control valve in accordance with McDonnell Douglas DC–9 Alert Service Bulletin A27–327, Revision 1, dated March 9, 1992; or McDonnell Douglas MD–80 Alert Service Bulletin A27–317, Revision 2, dated May 22, 1992; as applicable.

(b) For airplanes on which the retention nut on the slide assembly of the rudder power control valve has been inspected prior to the effective date of this AD in accordance with McDonnell Douglas DC–9 Alert Service Bulletin A27–327, dated December 2, 1991; or McDonnell Douglas MD–80 Alert Service Bulletin A27–317, dated June 17, 1991, or Revision 1, dated January 14, 1992: Within 90 days after the effective date of this AD, retighten the end cap to the specified torque, in accordance with McDonnell Douglas DC–9 Alert Service Bulletin A27–327, Revision 1, dated March 9, 1992; or McDonnell Douglas MD–80 Alert Service Bulletin A27–317, Revision 2, dated May 22, 1992; as applicable.

(c) Modification of the rudder power control valve by replacing the lockwire with a locking tab washer, in accordance with McDonnell Douglas Service Bulletin 27–321, dated May 18, 1992, constitutes terminating action for the requirements of this AD.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on September 8, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[FI–49–92]

RIN 1545–AR02

Bank Bad Debts, Conclusive Presumption

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations portion of this issue of the **Federal Register**, the Internal Revenue Service is issuing temporary regulations to clarify the scope of the express determination that is required under § 1.166–2(d)(3) in order for a bank to elect to use a method of accounting that conforms tax

accounting for bad debts to regulatory accounting. The temporary regulations affect banks that have made or intend to make an election under § 1.166–2(d)(3). The text of the temporary regulations also serves as the comment document for this notice of proposed rulemaking.

DATES: Written comments and requests for a public hearing must be received by November 30, 1992.

ADDRESSES: Send comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044, Attn: CC:CORP:T:R (FI–49–92), room 5228.

FOR FURTHER INFORMATION CONTACT: Bernita L. Thigpen, 202–622–4016 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations published in the Rules and Regulations portion of this issue of the **Federal Register** amend § 1.166–2(d)(3) of part 1 of Title 26 of the Code of Federal Regulations (CFR). For the text of the new temporary regulations, see T.D. 8441, published in the Rules and Regulations portion of this issue of the **Federal Register**. The preamble to the temporary regulations explains the regulations.

Special Analysis

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Comments and Requests for a Public Hearing

Before these proposed regulations are adopted, consideration will be given to any written comments that are timely submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying in their entirety. A public hearing will be scheduled and held upon written request by any person who submits written comments on the proposed rules. Notice of the time and place for the hearing will be published in the **Federal Register**.

Drafting Information

The principal author of the proposed regulations is Bernita L. Thigpen, Office of the Assistant Chief Counsel (Financial Institutions & Products), Internal Revenue Service. However, other personnel from the Service and Treasury Department participated in their development.

Proposal of Regulations

The temporary regulations (T.D. 8441), published in the Rules and Regulations section of this issue of the **Federal Register**, are hereby also proposed as final regulations under section 166 of the Internal Revenue Code of 1986.

Shirley D. Peterson,

Commissioner of Internal Revenue.

BILLING CODE 4830–01–M

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 9

[Notice No. 756; Re: Notice Nos. 728, 729 and 738]

RIN 1512–AA07

Oakville and Rutherford Viticultural Areas; Public Hearings

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Notice of public hearings on two proposed rules.

SUMMARY: This notice announces the time and place of public hearings to be held by the Bureau of Alcohol, Tobacco and Firearms concerning the establishment of two viticultural areas in Napa County, California, to be known as "Oakville" and "Rutherford." In Notice Nos. 728 and 729 (56 FR 47039 and 47044), published in the **Federal Register** on September 17, 1991, ATF detailed a proposal for the establishment of these two viticultural areas and requested comments. Due to the extent and controversy of the comments received, ATF published another notice, Notice No. 738 (57 FR 14681), in the **Federal Register** on April 22, 1992, which reopened the comment periods for the proposed Oakville and Rutherford viticultural areas. In consideration of the continued controversy expressed in the comments to Notice No. 738 concerning the boundaries of the two areas, ATF has determined that the public interest would be best served by the holding of public hearings on these matters. The purpose of the hearings is to gather additional information and to receive evidence with respect to the establishment of these viticultural areas, the proposed boundaries, and other possible boundaries.

DATES: The hearing for Rutherford will be held on December 9, 1992, beginning at 9 a.m. The hearing for Oakville will be held on December 10, 1992, beginning at 9 a.m. Persons desiring to make oral comments at the hearings should submit a letter notifying ATF of their intent to comment on or before November 9, 1992.

ADDRESSES: The hearings will be held in the conference room at the Inn at Napa Valley, 1075 California Boulevard, Napa, California 94559.

Letter notifications and written comments are to be submitted to: Chief, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 50221, Washington, DC 20091–0221, Attn: Notice No. 756.

FOR FURTHER INFORMATION CONTACT: Robert White, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, Washington, DC 20226, (202) 927–8230.

SUPPLEMENTARY INFORMATION:

Background

On September 17, 1991, ATF published two notices of proposed rulemaking, Nos. 728 and 729 (56 FR 47039 and 47033), in the **Federal Register**. In the notices, proposals were made for the establishment of two viticultural areas in Napa County, California, to be known as "Oakville" and "Rutherford."

As specified in Notice No. 728, the proposed Oakville viticultural area is located just north of the town of Yountville, and approximately 10 miles northwest of the city of Napa. In very general terms, the proposed Oakville boundary goes as far north as Skellenger Lane, as far east as the 500-foot contour line on the western side of the Vaca Mountain Range, as far west as the 500-foot contour line on the eastern side of the Mayacamas Mountain Range, as far south as approximately one mile northwest of the town of Yountville.

As specified in Notice No. 729, the proposed Rutherford viticultural area is located just south of the city of St. Helena and approximately 12 miles northwest of the city of Napa. In very general terms, the proposed Rutherford boundary goes as far north as Zinfandel Lane, as far east as the 500-foot contour line on the western side of the Vaca Mountain Range, as far west as the 500-foot contour line on the eastern side of

the Mayacamas Mountain Range, and as far south as Skellenger Lane with the exception of one area going approximately .5 mile south of Skellenger Lane.

It is important to note that the proposed southern boundary of Rutherford coincides exactly with the proposed northern boundary of Oakville.

In response to the two notices of proposed rulemaking, ATF received a total of 19 comments. These comments were thoroughly discussed in the reopening notice (Notice No. 738).

The reopening notice was published in the **Federal Register** (57 FR 14681) on April 22, 1992. ATF received 62 comments in response to this reopening notice.

After reviewing these 62 comments, it appears there is controversy concerning the northern, northeastern, northwestern, eastern, and southern boundary of Rutherford, and the southwestern boundary of Oakville.

Twenty-five commenters disagree with the proposed northern boundary of Rutherford. These commenters feel that the Rutherford boundary should extend further north either to Sulphur Creek or to the southern city limits line at St. Helena.

One of the commenters requesting an extension of the northern boundary of the proposed Rutherford viticultural area submitted geographical information in support of his position that there is litter or no difference in the geographical features of the area between Zinfandel Lane and Sulphur Creek as compared to the proposed Rutherford viticultural area. The commenter also requests that the proposed Rutherford viticultural area, including his requested northern extension to Sulphur Creek, be named Rutherford Bench instead of Rutherford.

Ten commenters agree with the proposed northern boundary of Rutherford and state that there is no historical or current evidence which would suggest that the area north of Zinfandel Lane has ever been considered to be within the Rutherford area.

One commenter disagrees with the northeastern boundary of Rutherford. He feels that the northeastern boundary should continue to be the 500-foot contour line (which would include the Spring Valley area) rather than changing to the 380-foot contour line which would exclude the Spring Valley area.

One commenter disagrees with the northwestern boundary of Rutherford. He feels that the Rutherford boundary should be extended along the northern fork of Bale Slough approximately 2,750 feet to a point intersecting the straight line westward extension of the light-duty road known as Inglewood Avenue, then following that line to the west to the 500-foot contour line.

Two commenters disagree with the eastern boundary of Rutherford. These two commenters state that the eastern boundary of Rutherford should be extended beyond the currently proposed 500-foot elevation line to the 1200-foot elevation line to include the area south of Lake Hennessey known as Pritchard Hill.

Five commenters, plus petitions containing the names of 56 additional interested persons within the Napa Valley, disagree with the southern boundary of Rutherford. These commenters and petitioners feel that any boundaries for Rutherford must include Beaulieu Vineyard properties No. 2 and No. 4 which have historically been associated with Beaulieu Vineyard and its Cabernet Sauvignon wines, and which have contributed greatly to the development and consumer recognition of the Rutherford name. These two Beaulieu Vineyard properties are currently within the proposed Oakville viticultural area.

One of the commenters suggests that these two Beaulieu Vineyard properties can be included in the Rutherford area by extending the 500-foot elevation line western boundary at the extreme southwestern corner of the proposed Rutherford viticultural area in a generally southerly direction to its point of intersection with an unnamed creek flowing in a generally easterly direction. Thence along this unnamed creek to its point of intersection with Walnut Lane, thence east along Walnut Lane to Highway 29, thence north on Highway 29 to the originally proposed southern boundary of Rutherford, and thence continuing in the same manner as the originally proposed Rutherford boundary.

This same commenter also submitted geographical information which he feels indicates little or no difference between Beaulieu Vineyard properties No. 2 and No. 4; and between these two vineyard properties and the proposed Rutherford viticultural area.

Six commenters state that they agree with the originally proposed southern boundary of Rutherford and do not feel that it should be changed to include Beaulieu Vineyard properties No. 2 and No. 4. These commenters state that these two vineyard properties are located in the Oakville area. These commenters refer to the information submitted in the original Rutherford and Oakville petitions as evidence for their position.

Sixteen commenters disagree with the proposed southwestern boundary of Oakville. These commenters feel that the southwestern boundary extends too far south into what they feel is Yountville. According to these commenters, the Oakville/Yountville boundary has always been known by the locals to be Dwyer Road to Highway 29, then Yount Mill Road to Rector Creek. These commenters submitted evidence which suggests that one winery and several other businesses located south of Dwyer Road have Yountville addresses and consider themselves to be in the Yountville area. These businesses are currently within the boundaries of the proposed Oakville viticultural area.

Eleven commenters agree with the proposed southwestern boundary of Oakville. These commenters state that they have lived and worked in the area for thirty years or more and that they have never heard of Dwyer Road (Lane) and Yount Mill Road being used as the boundary line between Oakville and Yountville. Some of these commenters submitted historical information in support of their position that Dwyer Road and Yount Mill Road have never been used as the dividing line between Oakville and Yountville.

One commenter states that the Rutherford Bench designation should be expanded to include the entire area delimited by the original petitioners as Rutherford. This commenter states that if his proposal is adopted, the word "Bench" in the appellation should not be required on the wine label. The bottling winery with grapes from this area would be allowed to place either Rutherford or Rutherford Bench on the label. According to this commenter, there is no geographic distinction between the Rutherford and Rutherford Bench areas, including soil, rainfall, heat summation, or geologic formation.

And finally, one commenter states that she objects to an Oakville appellation since she is not convinced that more appellations are needed in the Napa Valley.

Hearings

Based on the information presented in the comments, it is apparent that disagreement exists on a boundary for both the Oakville and Rutherford viticultural areas. Therefore, ATF desires to obtain more information on the establishment of these two viticultural areas, their proposed boundaries, and other possible boundaries.

For these reasons, ATF has determined that public hearings are

necessary and would serve the public interest. The purpose of the hearings is to obtain evidence for the record and to afford interested parties an opportunity to express their views. Evidence obtained and views expressed will be considered in the preparation of any final rules concerning the Oakville and Rutherford viticultural areas.

Participation

Any person desiring to participate in the hearings should notify ATF by submitting a letter specifying which viticultural area hearing they intend to participate in, and the name, address and daytime telephone number of the individual who will prevent oral comments. Any preference a person may have as to the time of day for presentation of comments should also be stated. The letter must be accompanied by an outline which briefly summarizes the topics the commenter will discuss and the information to be presented. Each topic to be discussed should be separately numbered and each numbered topic should specify the information to be presented. Assurance of having the opportunity to be heard is given only to those persons notifying ATF prior to the scheduling cutoff date of November 9, 1992.

Any person unable to attend the hearings or who prefers not to present oral comments may submit written comments before or after the hearing. ATF will accept written comments until December 28, 1992. In written comments, each topic to be discussed should be separately numbered and each numbered topic should specify the factual basis supporting the views, data, or arguments presented. All written comments received will be considered in the development of a decision on this matter.

ATF wants to make it clear that this public hearing is being held for the sole purpose of obtaining information and/or evidence concerning the possible establishment of a Rutherford and/or Oakville viticultural area. ATF is not considering during these hearings the establishment of a Rutherford Bench or an Oakville Bench viticultural area within the currently proposed Rutherford and Oakville viticultural areas. However, since several commenters submitted comments concerning use of the name Rutherford Bench in place of or in addition to the name Rutherford, ATF will accept testimony concerning the best name for the Rutherford area. Nevertheless, ATF wishes to reiterate its position that testimony or information in support of or in opposition to the original proposed Rutherford Bench and/or Oakville Bench petitions is not appropriate during these hearings.

General Information on Hearing Procedures

The hearings will be conducted under the procedural rules contained in 27 CFR 71.41(a)(3) and will be open to the public, subject to the limitations of space. In the event attendance exceeds available seating space, persons scheduled to present oral comments will be given preference in respect to admission. Time limitations make it necessary to limit the length of oral presentations to a maximum of ten (10) minutes. However, this allotted time per commenter may have to be reduced depending on the number of persons wishing to make oral presentations. Commenters will not be permitted to trade their time to obtain a longer presentation period. However, the hearing officer may allow any person additional time after all other commenters have been heard. To the extent that time is available after presentation of oral comments by those who are scheduled to comment, others will be given an opportunity to be heard.

In order to ensure that ATF will have the full benefit of their views even if time constraints limit an oral presentation, persons presenting oral comments are urged to supplement their oral statement with a more complete written statement. A written statement submitted to the hearing officer at the time of presentation of the oral statement will be considered part of the hearing record.

After making an oral presentation, a person should be prepared to answer questions from the hearing panel on not only the topics presented but also on matters relating to any written comments which he or she has submitted. Other persons will not be permitted to question a commenter. However, questions may be submitted, in writing, to the hearing officer who will evaluate their relevance. If the hearing officer determines that elicitation of further discussion would be beneficial, the questions may be presented to a commenter for a response.

Persons will be scheduled, if possible, according to the time preference mentioned in their letter notification to ATF. ATF will confirm by telephone the time a person is scheduled to present oral comments. A letter notification received by ATF prior to the cutoff date ensures that a person will be scheduled to comment. Letter notifications received after the cutoff date and up to one (1) working day preceding the hearing, will be honored to the extent practicable on a first-come-first-serve basis. Any scheduled commenter not present at the hearing when called will lose his or her place in the scheduled order, but will be recalled after all other scheduled commenters have been heard.

ATF will prepare an agenda listing the persons scheduled to comment and copies will be available at the hearing. In addition, copies of the petitions and all received written comments will be available at the hearing for public inspection.

Comments

Any person participating in the hearing or submitting written comments may present such data, views, or arguments as the person so desires. Comments that provide the factual basis supporting the views or suggestions presented will be particularly helpful in developing a reasoned regulatory decision on this matter. However, comments consisting of mere allegations or denials are counterproductive to the rulemaking process.

ATF specifically requests that commenters consider making comments on the following questions:

1. What are the historical and current boundaries (north, south, east, and west) of the areas known as "Oakville" and "Rutherford?"

2. Why, and how, should the boundaries of "Oakville" and "Rutherford," as proposed in Notice Nos. 728 and 729 respectively, be modified?

3. What geographical or climatic features, or evidence of name, or other current or historical evidence, support the extension of the Rutherford area north of Zinfandel Lane into the Sulphur Creek area, or northeast of the 380-foot contour line, along the proposed northeastern boundary of Rutherford, into the Spring Valley area? In addition, what such features or evidence support the extension of the Rutherford area northwest of the currently proposed northwestern boundary of Rutherford to include the northern fork of Bale Slough and continuing along this northern fork approximately 2,750 feet north to a point intersecting the straight line westward extension of the light-duty road known as Inglewood Avenue, then following that line to the west to the 500-foot contour line?

4. What geographical or climatic features, or evidence of name, or other current or historical evidence, support the extension of the southern boundary of the proposed Rutherford viticultural area to include Beaulieu Vineyard properties No. 2 and No. 4, which are

currently within the proposed Oakville viticultural area? In addition, what such features or evidence support the extension of the eastern boundary of the proposed Rutherford viticultural area to include the area south of Lake Hennessey known as Pritchard Hill?

5. What geographical or climatic features, or evidence of name, or other current or historical evidence, support using Dwyer Road and Yount Mill Road as the southwestern boundary of the proposed Oakville viticultural area? Currently, the proposed southwestern boundary extends south of Dwyer Road approximately 1 mile.

6. Is there any additional evidence, other than what is currently in the Oakville and Rutherford petitions, which supports the boundaries of the proposed Oakville and Rutherford viticultural areas as proposed in Notice Nos. 728 and 729 respectively?

7. Is there evidence that the name of the proposed Rutherford viticultural area is locally or nationally known as including the area north of Zinfandel Lane to include the Sulphur Creek area, or northeast of the 380-foot contour line along the northeastern boundary into the Spring Valley area, or south of Skellenger Lane along the southern border to include the Beaulieu Vineyard properties Nos. 2 and 4? In addition, is there evidence that the name of the proposed Rutherford viticultural area is locally or nationally known as including the area northwest of the currently proposed northwestern boundary of Rutherford (as previously described in number 3 above), or east of the proposed eastern boundary of Rutherford to include the area south of Lake Hennessey known as Pritchard Hill?

8. Is there evidence that the name of the proposed Oakville viticultural area is locally or nationally known as including the area approximately 1 mile south of Dwyer Road and Yount Mill Road?

9. What do wineries outside of the proposed Oakville and Rutherford areas consider to be the "Oakville" and "Rutherford" grape growing areas?

10. To what extent have wineries in the "Oakville" and "Rutherford" areas, as proposed in Notice Nos. 728 and 729, as well as those wineries located in the controversial areas, identified themselves as being in either "Oakville" or "Rutherford?"

11. To what extent have grapes grown in the proposed "Oakville" or "Rutherford" areas, or in the previously mentioned controversial areas, been or not been marketed as either "Oakville" or "Rutherford" grapes?

12. Is there any evidence to suggest that the name Rutherford Bench is an appropriate designation of the entire Rutherford area?

33 CFR Part 151

[CGD 91-066]

RIN 2115-AD80

Ballast Water Management For Vessels Entering the Great Lakes

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes regulations to implement the regulatory requirements of the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990. The proposed regulations, if adopted, would require ballast water management practices for each vessel entering the Great Lakes. These requirements, which would replace voluntary guidelines published on March 15, 1991, would prevent the additional introduction of nonindigenous aquatic nuisance species through the ballast water of vessels entering the Great Lakes.

DATES: Comments must be received on or before November 16, 1992.

ADDRESSES: Comments may be mailed to the Executive Secretary, Marine Safety Council (G-LRA/3406) (CGD 91-066), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001, or may be delivered to room 3406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267-1477. Comments on collection of information requirements must be mailed also to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW., Washington, DC 20503, Attn: Desk Officer, U.S. Coast Guard.

The Executive Secretary maintains the public docket for this rulemaking. Comments will become part of this docket and will be available for inspection or copying at room 3406, U.S. Coast Guard Headquarters.

FOR FURTHER INFORMATION CONTACT: Lieutenant Jonathan C. Burton, Project Manager, Division of Marine Environmental Protection (G-MEP-1), (202) 267-6714.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written data, views, or arguments. Persons submitting comments should include their name and address, identify this rulemaking (CGD 91-066) and the specific section of this proposal to which each comment applies, and give a reason for each comment. Persons wanting acknowledgement of receipt of comments should enclose a stamped, self-addressed postcard or envelope.

The Coast Guard will consider all comments received during the comment period. It may change this proposal in view of the comments.

The Coast Guard plans no public hearing. Persons may request a public hearing by writing to the Marine Safety Council at the address under "**ADDRESSES**". If it determines that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by a later notice in the **Federal Register**.

Drafting Information

The principal persons involved in drafting this document are Lieutenant Jonathan C. Burton, Project Manager, and Ms. Helen Boutrous, project Counsel, Office of Chief Counsel.

Background and Purpose

Historical records suggest that over 100 non-native species have been introduced into the Great Lakes. The introduction of non-native fish and other aquatic organisms through the discharge of ballast water alters the balance of the ecosystem, often to the detriment of the system. In the 1980's alone, ballast water discharges are believed to have been the cause for the introduction of four nuisance species to the Great Lakes: The zebra mussel (Dreissena polymorpha); the European ruffe (Gymnocephalus cernus); the spiny

water-flea (Bythotrophes cederstroemi); and the tube-nosed goby (Proterorhinus marmoratus).

Many vessels take on water as ballast in foreign harbors or in the nearshore waters. These waters are often rich in living organisms. When these vessels arrive in the Great Lakes to take on cargo, they discharge ballast water. Any organisms contained in the water then enter the Great Lakes.

Many of these transplanted species do not survive in this new environment. However, those that do survive quickly adapt and in some instance thrive in their new environment, particularly where there are no natural predators to control their population growth. This uncontrolled population growth can be detrimental to a delicately balanced ecosystem.

The zebra mussel provides a good example of the harmful effects of a newly introduced species. In June 1988, this small bivalve mollusk, native to the Black, Asov, and Caspian Seas in eastern Europe, was discovered on the Canadian side of Lake Saint Clair in the Great Lakes. In July of that year, it was discovered on the United States side in the western basin of Lake Erie. Scientists believe that it was introduced in 1986 in its preadult planktonic phase by the discharge of freshwater ballast of vessels from northern Europe, where it has spread over the last century.

The zebra mussel is a major fouling pest-species: Hundreds of millions can be found on and in pipes, screens, conduits, boat bottoms, floats, buoys, rocks, submerged objects, submerged objects and native animals and plants. As a filter-feeding organism, it removes vast quantities of microscopic organisms from the water, the same organisms that fish larvae and young fish rely upon for their food supply. It also completely covers rocks and other substances normally used by Great lakes fish for laying eggs.

Since its introduction into the Great Lakes, the zebra mussel has reproduced and spread to each of the Great Lakes, the Saint Lawrence River, and the Erie Canal. It now affects intakes to municipal water-filtration and electric-power plants in Michigan, Ohio, and New York. The economic impact on communities affected by its introduction into the Great Lakes may reach $5 billion by the year 2000. Natural range expansion and secondary transfer media will likely lead to its establishment in all connecting waters of the Great Lakes and eventually in many other North American rivers and lakes.

Solutions

Currently, the most practical method of protecting the Great Lakes from foreign organisms that may exist in ballast water appears to be an exchange of ballast water in the open ocean, beyond the continental shelf. Water in the open ocean contains fewer organisms than water collected in harbors or coastal waters. Those organisms that exist in the open ocean are adapted to relatively constant conditions, such as salinity and temperature, and are less likely to survive if introduced into a freshwater system.

In addition to ballast water exchange, there are other possible methods of ballast control. They include discharging ballast water to reception facilities ashore, retaining the ballast water on board, heating or chemically treating ballast water, disinfecting ballast water with ultraviolet light, depriving ballast water of oxygen, coating tanks with biocides, installing filters, and modifying vessel design. However, there is a lack of research and practical experience on the cost, safety, effectiveness, and environmental acceptability of these methods.

International Recognition

The introduction and spread of nonindigenous species by vessels' ballast water has been brought to the attention of the International Maritime Organization (IMO). IMO, the United Nations' specialized agency for maritime affairs, has recognized this issue as an international problem, which requires an international solution. In November 1990, the Marine Environment Protection Committee (MEPC) of IMO formed a working group to consider research information and solutions proposed by member states of IMO and by nongovernmental organizations in developing an international approach to resolving this problem. The working group concluded that the establishment of voluntary guidelines was an appropriate first step in addressing this problem. The group reviewed and modified a draft resolution and guidelines submitted by the Canadian delegation. The group submitted the draft resolution and guidelines to the session of the MEPC held in July 1991, and it was adopted. Those guidelines call for ballast water exchange in the open ocean as a primary method of controlling the introduction of nonindigenous nuisance species.

Canadian Voluntary Guidelines

In May 1989, the Canadian Coast Guard introduced the first voluntary guidelines for controlling ballast water discharges into the Great Lakes. The Canadian Coast Guard developed these guidelines in full consultation with the United States Coast Guard, the Great Lakes Fishery Commission, and representatives of commercial shipping. These guidelines encouraged all vessels transiting the Eastern Canadian Vessel Traffic Service (ECAREG VTS) Zone inbound for the Saint Lawrence Seaway and the Great Lakes to exchange freshwater ballast collected in foreign harbors or near coastal waters for saltwater ballast collected from the open ocean. This exchange was to occur far enough from any coastline such that there would be few organisms of any kind in the new ballast water, which would eventually be discharged into the Great Lakes.

United States Legislation

On November 29, 1990, the United States enacted the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (Pub. L. 101-646, codified at 16 U.S.C. 4701 *et seq.*) (the Act). The Act required the United States Coast Guard, in consultation with the government of Canada, to issue voluntary guidelines, not later than six months after enactment, to prevent further introduction and spread of aquatic nuisance species into the Great Lakes through the ballast water of vessels. Joint United States and Canadian voluntary guidelines, which closely tracked the Canadian guidelines discussed above, went into effect on March 15, 1991 (56 FR 11330). Participation by the commercial shipping industry has been high with an estimated 90 percent rate of voluntary compliance.

The Act also calls for regulations to be issued, in consultation with the Task Force created by the Act, within 24 months of enactment. The Task Force, which includes the Director of the United States Fish and Wildlife Service, the Under Secretary of Commerce for Oceans and Atmosphere, the Administrator of the Environmental Protection Agency, and the Commandant of the United States Coast Guard, has other responsibilities as well, including establishing a program for waters of the United States to prevent introduction and dispersal of aquatic nuisance species.

The Act calls for the regulations to apply to vessels that enter a United States port on the Great Lakes after operating on the waters beyond the Exclusive Economic Zone (EEZ). The Act provides for civil and criminal penalties (16 U.S.C. 4711 (c) and (d)).

Any person who violates the regulations shall be liable for a civil penalty not to exceed $25,000. Each day of a continuing violation would constitute a separate violation. A vessel operated in violation of the regulations would be liable in rem for any civil penalty assessed for that violation. Any person who knowingly violates the regulations would be guilty of a class C felony. A class C felony is punishable by imprisonment of not more than 12 years (18 U.S.C. 3581(b)(3)) and a fine of not more than $250,000 for an individual or not more than $500,000 for an organization (18 U.S.C. 3571(c)(3)).

In accordance with the Act, the Coast Guard proposes the regulations discussed below.

Discussion of Proposed Regulations

General Provisions

This proposal, if adopted, would establish a new subpart C to 33 CFR part 151, implementing ballast water management practices, as required by the Act, to prevent additional introduction and spread of nonindigenous aquatic nuisance species into the Great Lakes through the ballast water of vessels. As stated in proposed § 151.1502, these regulations would apply to all vessels that carry ballast water and are headed for a United States port on the Great Lakes after operating on the waters beyond the EEZ. Proposed § 151.1504 would provide definitions of key terms used in the proposed subpart.

Proposed § 151.1506 would prohibit the master of a vessel subject to the proposed subpart, from operating in the Great Lakes unless the master has certified that he or she has complied with the requirements of the proposed subpart. The Commandant of the Coast Guard has delegated final authority for maritime law enforcement within each district to the District Commander (33 CFR 1.01-1). Therefore, the District Commander would have the authority to enforce this proposed provision. Certification procedures are provided for in proposed § 151.1516 and are discussed below. As provided for in the Act, and in proposed § 151.1508, the District Commander would also have the authority to request the District Director of Customs to withhold or revoke the clearance required by 46 U.S.C. App. 91 for a vessel, the owner or operator of which is not in compliance with the requirements of the proposed subpart.

Ballast Water Management

The master of each vessel subject to the proposed subpart would be required, under proposed § 151.1510, to either exchange the vessel's ballast water beyond the EEZ in an ocean depth of not less than 1.24 miles (2,000 meters) prior to entering a port within the Great Lakes, or use an alternative environmentally sound method of ballast water management. Any alternative method would be required to be submitted to the Captain of the Port (COTP) of the first port the vessel would enter, before entering that port. No alternative methods may be employed unless the COTP, who has been delegated the Commandant's authority to enforce marine environmental protection regulations (33 CFR 1.01–30), approves the alternative method before the vessel enters the port. Only environmentally sound methods that are as effective as ballast water exchange in preventing and controlling the infestations of aquatic nuisance species would be approved. "Environmentally sound methods" are methods, efforts, actions, or programs to prevent introductions or to control infestations of aquatic nuisance species, that minimize adverse impacts to the structure and function of an ecosystem and minimize the adverse effects on non-target organisms and ecosystems and that emphasize integrated pest management techniques and non-chemical measures.

At this time, ballast water exchange is determined to be the most practical method of protecting the Great Lakes from foreign organisms that may exist in ballast water. There is a lack of research and practical experience on the cost, safety, effectiveness, and environmental acceptability of other methods. Since most masters of vessels that would be subject to this proposed subpart are already practicing ballast water exchange, the Coast Guard expects that a high rate of compliance would be achieved. As international efforts and Task Force studies continue, permitting masters of vessels to submit alternative methods of ballast water management would provide the needed flexibility to approve additional ballast water management methods that may eventually be determined to be as effective as ballast water exchange in preventing and controlling additional infestations of nonindigenous species.

Proposed § 151.1510 also would require that sediment from ballast water tanks be disposed of ashore in accordance with local applicable requirements. Additionally, proposed § 151.1510 notifies masters of vessels subject to the proposed requirements that nothing in this proposed subpart would authorize the discharge of oil, noxious liquid substances, or other pollutants in a manner prohibited by United States or international law or regulations, or affects their responsibilities under the Federal Water Pollution Control Act (33 U.S.C. 1251 *et seq.*) Further, masters of vessels subject to the proposed subpart, as stated in proposed § 151.1512, would remain responsible for ensuring the safety and stability of the vessel, the safety of the crew and passengers, and for any other existing responsibility.

Proposed § 151.1514 provides for an exemption from the ballast water management requirements if due to weather, equipment failure, or other extraordinary conditions a master is unable to exchange ballast water before entering the territorial waters of the United States. If this happens, the master must request from the COTP of the first United States port the vessel would enter, permission to either retain the vessel's ballast water and refrain from discharging it while in the territorial waters of the United States, or discharge the vessel's ballast water within an area designated by the COTP at the time of the request.

Proposed § 151.1516 includes information reporting and collection requirements which would enable the Coast Guard to monitor compliance with the proposed subpart. The Coast Guard proposes that Snell Lock at Massena, New York be the site for collection of information regarding compliance with the proposed requirements, and for the master's certification of compliance. The Act requires that the master of each vessel certify compliance with the requirements of the Act before that vessel enters a port on the Great Lakes. The last lock under United States jurisdiction before entering a United States port on the Great Lakes is Snell Lock. Therefore, the Coast Guard proposes that Snell Lock would be the appropriate point for the reporting and collection of information, so that the Coast Guard may monitor compliance with, and effectiveness of, the proposed regulations. It would also serve as the point at which the master of a vessel subject to the proposed subpart, would be required to certify that he or she has complied with the requirements of the proposed subpart before entering the Great Lakes.

The master of each vessel subject to the proposed subpart would be required to provide information regarding ballast water management practices, in writing, including the vessel's name, port of registry, and official number or call sign, the name of the vessel's owner(s), whether ballast water is being carried, the location it was taken on, and intended discharge port. This

information is currently collected by the United States and Canada under the joint voluntary guidelines discussed above. The master would be required to provide his signature along with the information, attesting to the accuracy of the information provided. The signature would also serve as the master's certification that he or she has complied with the requirements of the subpart. This information would serve to verify compliance and become part of a statistical base to determine the effectiveness of the program. Because some masters of vessels subject to the proposed subpart may continue to provide Canada with the information requested under their voluntary program, and since local programs may be established in connection with the Task Force, a photocopy of the information required by this proposed subpart, pertaining to the same voyage, prepared for another State, local, or foreign government agency would be accepted by the Coast Guard in order to avoid duplication of information reporting requirements.

Under proposed § 151.1516, Coast Guard officials would be authorized to take samples of vessel's ballast water to test for salinity and the presence of foreign organisms. The testing of ballast water would serve as an additional method of monitoring the effectiveness of, and compliance with, the proposed regulations.

Regulatory Evaluation

This proposal is not major under Executive Order 12291 and not significant under the Department of Transportation Regulatory Policies and Procedures (44 FR 11040; February 26, 1979). A draft Regulatory Evaluation is available in the docket for inspection or copying where indicated under "**ADDRESSES**". Entities involved are encouraged to identify themselves and give comments on the potential cost of implementing these proposed regulations.

The Coast Guard estimates that the impact of the proposed regulations on United States flag vessels would be minimal. Due to size constraints, only smaller vessels are able to transit the Saint Lawrence Seaway. These vessels do not engage in foreign voyages which would place them on waters beyond the EEZ. Only vessels that have operated on waters beyond the EEZ and enter a port on the Great Lakes, would be subject to the requirements of the proposed regulations. During the 1990 shipping season, 455 foreign oceangoing vessels entered the Saint Lawrence Seaway. Of these, 198 or 44 percent carried ballast water and would have been subject to the proposed rules. It is not expected that the number of vessels entering the Saint Lawrence Seaway will increase. The number has declined in recent years. The typical ocean carrier bound for the Great Lakes in full ballast condition could have on board from 7,000 to 10,000 tons of ballast water. Including the cost of diesel fuel, power generating costs to operate the pumps to effect an exchange would cost approximately $900.00 per vessel. Manpower costs would not be an appreciable factor since the exchange would be conducted by crew members already employed on the vessel for the voyage. Reporting and record keeping costs would add $35.00 per vessel. The time lost due to decrease in speed necessary to effect a ballast water exchange would be minimal since the ships affected by the proposed rules should be able to effect the exchange while in transit on the high seas. Adding a 10 percent factor for wear and tear, plus 4 percent a year for inflation, the total cost per vessel would be $1,147. Therefore, the estimated cost to foreign vessels for 1993, assuming 200 foreign vessels would be affected at a cost of $1,147 per vessel, would be $229,400. Total costs through the year 2000 are estimated to be $2,113, 744.

The Coast Guard expects that costs to consumers would be minimal. Assuming that all costs would be passed on to the consumer, the cost per ton of foreign cargo on vessels subject to the proposed regulations would increase $.089 per ton in 1993 and $.910 through the year 2000.

Measures to slow or stop the introduction of nonindigenous species into the Great Lakes would be of great benefit. The over 100 non-native species introduced into the Great Lakes in the last 100 years have had a profound effect on the native species and the economic welfare of the Great Lakes area. The economic impact on communities affected by the introduction of the zebra mussel may reach $5 billion by the year 2000. The experience of the zebra mussel infestation makes clear the tremendous cost benefit of implementing regulations to prevent the introduction of nonindigenous nuisance species before they become established in an ecosystem.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal will have significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). The Coast Guard has not identified any United States flag vessels that routinely enter the Great Lakes after operating on waters beyond the EEZ. The costs to foreign flag vessels that would be subject to the proposed regulations would be $1,147 per vessel in 1993. Because it expects the impact of this proposal to be minimal, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities.

Collection of Information

Under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), the Office of Management and Budget (OMB) reviews each proposed rule which contains a collection of information requirement to determine whether the practical value of the information is worth the burden imposed by its collection. Collection of information requirements include reporting, recordkeeping, notification, and other, similar requirements.

This proposal contains collection of information requirements in § 151.1516. That section would require that the master of each vessel subject to the proposed subpart, provide information, in written form, to the Lockmaster at the Snell Lock at Messena, New York. Most vessels that would be subject to the subpart are already supplying this information under the joint United States and Canadian voluntary guidelines issued on March 15, 1991. Approximately 200 vessels per year would be subject to the proposed subpart. It is estimated that it would take 30 minutes to complete the proposed reporting and collection information requirements. Since many masters of vessels subject to the proposed subpart would be submitting the information to Canada voluntarily, photocopies of the information for the same voyage would be accepted.

The Coast Guard has submitted the requirements to OMB for review under section 3504(h) of the Paperwork Reduction Act. Persons submitting comments on the requirements should submit their comments both to OMB and to the Coast Guard where indicated under "**ADDRESSES**."

Federalism

The Coast Guard has analyzed this proposal in accordance with the principles and criteria contained in Executive Order 12612 and has determined that this proposal does not have sufficient federalism implications

to warrant preparation of a Federalism Assessment.

The authority to issue regulations requiring ballast water management practices for vessels entering the Great Lakes has been committed to the Coast Guard by the Act. Standardizing the minimum requirements for vessels entering the Great Lakes after operating in waters beyond the EEZ is necessary to effectively prevent further introductions of nonindigenous species. Therefore, if this rule becomes final, the Coast Guard intends it to preempt state and local regulations that are inconsistent with the requirements of this proposed rule. These regulations were developed in consultation with the Task Force which is charged with coordinating action among, and providing technical assistance to, regional, State, and local entities regarding environmentally sound approaches to prevention and control of aquatic nuisance species. Additionally, in accordance with the Act, the Coast Guard has consulted with the Government of Canada throughout the development of the guidelines and regulations in order to develop an effective international program.

Environment

The Coast Guard considered the environmental impact of this proposal and concluded that preparation of an environmental impact statement is not necessary. An Environmental Assessment and a draft Finding of No Significant Impact are available for inspection or copying where indicated under "**ADDRESSES**." The exchange of ballast water in the open ocean would benefit the Great Lakes environment by helping to prevent the further introduction of nonindigenous nuisance species through the ballast water of vessels, which has caused millions of dollars of damage to date. Initial study has concluded that the discharging of vessels' seawater ballast into Great Lakes ports does not constitute a sufficiently high volume of water to change the salinity or temperature levels of the local waters. Species contained in water collected from the open ocean are unlikely to survive a fresh water environment. Therefore, the Coast Guard concluded that the proposed regulations would have no significant impact on the environment. The Coast Guard solicits comments on the potential environmental impact of the proposed requirements.

List of Subjects in 33 CFR Part 151

Administrative practice and procedure, Oil pollution, Penalties, Reporting and recordkeeping requirements, Water pollution control.

For the reasons set out in the preamble, the Coast Guard proposes to amend 33 CFR part 151 as follows:

1. The heading for part 151 is revised to read as follows:

PART 151—VESSELS CARRYING OIL, NOXIOUS LIQUID SUBSTANCES, GARBAGE, MUNICIPAL OR COMMERCIAL WASTE, AND BALLAST WATER

2. Subpart C is added to part 151 to read as follows:

Subpart C—Ballast Water Management for Control of Nonindigenous Species

Sec.

151.1500 Purpose.
151.1502 Applicability.
151.1504 Definitions.
151.1506 Restriction on operation.
151.1508 Revocation of clearance.
151.1510 Ballast water management.
151.1512 Vessel safety.
151.1514 Exemption from ballast water management.
151.1516 Compliance monitoring.

Subpart C—Ballast Water Management for Control of Nonindigenous Species

Authority: 16 U.S.C. 4711; 49 CFR 1.46.

§ 151.1500 Purpose.

The purpose of this subpart is to implement the provisions of the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (16 U.S.C. 4701 *et seq.*).

§ 151.1502 Applicability.

This subpart applies to each vessel that carries ballast water, and which after operating on the waters beyond the Exclusive Economic Zone is inbound for the Saint Lawrence River destined for a United States port on the Great Lakes.

§ 151.1504 Definitions.

The following definitions are for terms used in this subpart:

Ballast water means any water and associated sediments used to manipulate the draft, trim, or stability of a vessel.

Captain of the Port (COTP) means the United States Coast Guard officer commanding a COTP zone described in part 3 of this chapter, or that person's authorized representative.

Commandant means the Commandant of the Coast Guard or an authorized representative.

District Commander means the officer of the Coast Guard designated by the Commandant to command a Coast Guard District, as described in part 3 of this chapter or an authorized representative.

Environmentally sound method means methods, efforts, actions, or programs, either to prevent introductions or to control infestations of aquatic nuisance species, that minimize adverse impacts to the structure and function of an ecosystem and minimize adverse effects on non-target organisms and ecosystems and that emphasize integrated pest management techniques and non-chemical measures.

Exclusive Economic Zone (EEZ) means the area established by Presidential Proclamation 5030, dated March 10, 1983 (3 CFR, 1983 Comp., p. 22), which extends from the base line of the territorial sea of the United States seaward 200 miles.

Great Lakes means Lake Ontario, Lake Erie, Lake Huron (including Lake Saint Clair), Lake Michigan, Lake Superior, and the connecting channels (Saint Mary's River, Saint Clair River, Detroit River, Niagara River, and Saint Lawrence River to the Canadian border), and includes all other bodies of water within the drainage basin of such lakes and connecting channels.

Port means a terminal or group of terminals, port authority or other organization, or any place or facility that has been designated as a port by the COTP.

§ 151.1506 Restriction on operation.

No vessel subject to the requirements of this subpart, may be operated in the Great Lakes unless the master of the vessel has certified, in accordance with § 151.1516, that the requirements of this subpart have been met.

§ 151.1508 Revocation of clearance.

A District Commander may request the District Director of Customs to withhold or revoke the clearance required by 46 U.S.C. App. 91 for a vessel subject to this subpart, the owner or operator of which is not in compliance with the requirements of this subpart.

§ 151.1510 Ballast water management.

(a) The master of each vessel subject to this subpart shall employ one of the following ballast water management practices:

(1) Carry out an exchange of ballast water on the waters beyond the EEZ, in an ocean depth of not less than 1.25 miles (2,000 meters), prior to entry into any United States port within the Great Lakes. When a vessel is discharging ballast water, preparatory to an exchange, the pump must be run until it loses suction, thus assuring that the tank

is as empty as practicable before taking on new ballast water.

(2) Use an alternative environmentally sound method of ballast water management. Any alternative method must be submitted to, and approved by, the COTP in charge of the first United States port that the vessel will enter, before the vessel enters the Great Lakes.

(b) Sediment from ballast water tanks of each vessel arriving from a foreign port must be disposed of ashore in accordance with local requirements.

(c) Nothing in this subpart authorizes the discharge of oil or noxious liquid substances (NLSs) in a manner prohibited by United States or international laws or regulations. Ballast water carried in any tank containing a residue of oil, NLSs, or any other pollutant must discharge in accordance with the applicable regulations. Nothing in this subpart affects or supersedes any requirement or prohibitions pertaining to the discharge of ballast water into the waters of the United States under the Federal Water Pollution Control Act (33 U.S.C. 1251 *et seq.*).

§ 151.1512 Vessel safety.

Nothing in this subpart relieves the master of the responsibility for ensuring the safety and stability of the vessel or the safety of the crew and passengers, or any other responsibility.

§ 151.1514 Exemption from ballast water management.

The master of any vessel subject of this subpart unable to exchange ballast water before entering the territorial waters of the United States, due to weather, equipment failure, or other extraordinary conditions must request from the COTP of the first United States port that the vessel will enter, permission to—

(a) Retain the vessel's ballast water on board the vessel; or

(b) Discharge the vessel's ballast water within an area designated by the COTP at the time of the request.

§ 151.1516 Compliance monitoring.

(a) The master of each vessel subject to this subpart shall provide the following information, in written form, to the Lockmaster at the Snell Lock at Massena, New York:

(1) The vessel's name, port of registry, and official number or call sign.

(2) The name of the vessel's owner(s).

(3) Whether ballast water is being carried.

(4) The original location and salinity, if known, of ballast water taken on, before an exchange.

(5) The location, date, and time of by ballast water exchange.

(6) If known, the salinity of the ballast water to be discharged into the territorial waters of the United States.

(7) The intended discharge port for ballast water and location for disposal of sediment carried upon entry into the territorial waters of the United States.

(8) The signature of the master attesting to the accuracy of the information provided and certifying compliance with the requirements of this subpart.

(b) A photocopy of a submission of the information, required in paragraph (a) of this section, for the same voyage, to a State, local, or foreign government agency, is acceptable to fulfill this requirement.

(c) Coast guard officials may take samples of the ballast water to assess the compliance with, and the effectiveness of this part.

Dated: September 25, 1992.

A.E. Henn,

Rear Admiral, U.S. Coast Guard Chief, Office of Marine Safety, Security and Environmental Protection.

[FR Doc. 92-23973 Filed 10-1-92; 8:45 am]

BILLING CODE 4910-14-M

---

33 CFR Part 165

[CGD 07-92-86]

Safety/Security Zone: Cumberland Sound, Georgia and St. Marys River Entrance Channel

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is considering a proposal to change the boundaries of the permanent safety/security zone and the temporary safety/security zone described in the above referenced Code of Federal Regulation. The proposal reduces the area of the permanent safety/security zone and changes a portion of it to a temporary safety/security zone. The affected area of the safety/security zone is difficult to patrol at low tide and current "signs" are inadequate to warn boaters. This change will open areas for recreational use and reduce patrol requirements without affecting security.

DATES: Comments must be received on or before November 16, 1992.

ADDRESSES: Comments should be mailed to Commanding Officer, Coast Guard Marine Safety Office, 2831 Talleyrand Avenue, Jacksonville, FL 32206-3497. The comments and other materials referenced in this notice will be available for inspection and copying at MSO Jacksonville, room 222, 2831 Talleyrand Avenue, Jacksonville, FL. Normal office hours are between 7:30 a.m. and 4 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: LCDR G. W. Dunton (904) 232-2648.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, data or arguments. Persons submitting comments should include their names and addresses, identify this notice *Docket Number* 07-92-86 and the specific section of the proposal to which their comments apply, and give reasons for each comment.

The regulations may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The drafters of this notice are LCDR G. W. Dunton, Project Officer, and LT Jacqueline M. Losego, project attorney, Seventh Coast Guard District Legal Office.

Discussion of Proposed Regulations

This proposed change reduces the area affected by the permanent safety/security zone. While the temporary area will be increased, it will only be increased by that area that is currently within the permanent zone. This proposal is made pursuant to the request of the Commanding Officer, Naval Submarine Base, Kings Bay due to a reassessment of its threat conditions and patrol missions.

This regulation is issued pursuant to 50 U.S.C. 191, 33 U.S.C. 1225 and 1231 as set out in the authority citation for all of part 165.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. The net change in Safety/Security zone coverage is not reduced. The permanent area is reduced and the area removed from the permanent zone is placed into the

temporary Safety/Security zone. Increased recreational use of the affected zone will have a negligible economic impact.

Since the impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend part 165 of title 33, Code of Federal Regulations as follows:

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5.

2. Section 165.731 is revised to read as follows:

§ 165.731 Safety/Security Zone: Cumberland Sound, Georgia and St. Marys River Entrance Channel.

(a) *Location.* A permanent safety/security zone is established within the following coordinates, the area enclosed by a line starting at

30° 44'55" N, 081° 29'39" W; thence to
30° 44'55" N, 081° 29'18" W; thence to
30° 46'35" N, 081° 29'18" W; thence to
30° 47'02" N, 081° 29'34" W; thence to
30° 47'21" N, 081° 29'39" W; thence to
30° 48'00" N, 081° 29'42" W; thence to
30° 49'07" N, 081° 29'56" W; thence to
30° 48'54" N, 081° 32'25" W; thence following the land base perimeter boundary to point of origin.

(b) A temporary safety/security zone, when activated by the Captain of the Port, Jacksonville, Florida, encompasses all waters and land from bank to bank within Cumberland Sound and the St. Marys Entrance Channel: the northern extent of this zone starts at the southern tip of Crab Island; lighted buoy number "1" at the mouth of the Amelia River demarks the southern boundary; daymarker number "2" at the mouth of the St. Marys River indicates the western boundary; and the eastern boundary extends out to three (3) nautical miles in the Atlantic Ocean, with the zone also encompassing the waters within 1000 yards of the entrance channel east of the jetties and shall additionally encompass the area enclosed by a line starting at

30° 44'55" N, 081° 29'39" W; thence to
30° 44'55" N, 081° 29'18" W; thence to
30° 46'35" N, 081° 29'18" W; thence to
30° 47'02" N, 081° 29'34" W; thence to
30° 47'21" N, 081° 29'39" W; thence to
30° 48'00" N, 081° 29'42" W; thence to
30° 49'07" N, 081° 29'56" W; thence to
30° 49'55" N, 081° 30'35" W; thence to
30° 50'15" N, 081° 31'08" W; thence to
30° 50'14" N, 081° 31'30" W; thence to
30° 49'58" N, 081° 31'45" W; thence to
30° 49'58" N, 081° 32'03" W; thence to
30° 50'12" N, 081° 32'17" W; thence following the land base perimeter boundary to the point of origin.

(c) *Regulations.* (1) The Captain of the Port, Jacksonville, Florida will activate the temporary safety/security zone described in paragraph (b) of this section by issuing a local broadcast notice to mariners.

(2) All persons and vessels in the vicinity of the safety/security zone shall immediately obey any direction or order of the Captain of the Port, Jacksonville, Florida.

(3) The general regulations governing safety and security zones contained in 33 CFR 165.23 and 165.33 apply. No person or vessel may enter or remain within the designated zones without the permission of the Captain of the Port, Jacksonville, Florida.

(4) This regulation does not apply to persons or vessels operating under the authority of the Untied States Navy nor to authorized law enforcement agencies.

Dated: August 24, 1992.

J.P. Wysocki,

Captain, U.S. Coast Guard, Captain of the Port, Jacksonville, Florida.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Ch. I

[FRL 4516–8]

Establishment and Open Meeting of the Negotiated Rulemaking Advisory Committee for Architectural and Industrial Coatings

AGENCY: Environmental Protection Agency (EPA).

ACTION: Establishment of FACA Committee and meeting announcement.

SUMMARY: As required by section 9(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463). we are giving notice of the establishment of an Advisory Committee to negotiate a rule to control VOC emissions from Architectural and Industrial Maintenance Coatings under section 183(e) of the Clean Air Act, as amended. We are also announcing the Committee's first meeting on October 15 and 16. Its purpose is to finalize and begin work on the issues relevant to this rule. The Committee meeting is open to the public without need for advance registration.

DATES: The October 15 meeting will start at 9 a.m. and end at 5 p.m. The October 16 meeting will start at 8 a.m. and end no later than 2 p.m.

ADDRESSES: The meeting will be the Hyatt Regency Hotel, 151 East Wacker Drive, Chicago, Illinois 60601, (312) 565–1234.

FOR FURTHER INFORMATION CONTACT: Persons needing further information on substantive aspects of the rule should contact Ellen Ducey, Office of Air Quality Planning and Standards, EPA, (919) 541–5408. Persons needing further information on procedural matters should contact Barbara Stinson, the Committee Co-Chair, at (303) 468–5822.

Dated: August 28, 1992.

National Oil and Hazardous Substances Pollution Contingency Plan National Priorities List

AGENCY: Environment Protection Agency.

ACTION: Notice of intent to delete Rose Park Sludge Pit Site from the National Priorities List: Request for comments.

SUMMARY: The Environmental Protection Agency (EPA) Region VIII announces its intent to delete the Rose Park Sludge Pit Site from the National Priorities List (NPL) and requests public comment on this action. The NPL constitutes appendix B of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended. EPA and the State of Utah have determined that all appropriate response actions have been implemented and that no further cleanup by responsible parties is appropriate at this time. Moreover, EPA and the State have determined that remedial activities conducted at the site to date have been protective of public health, welfare, and the environment.

DATES: Comments concerning this site may be submitted on or before November 6, 1992.

ADDRESSES: Comments may be mailed to: Robert L. Duprey, Director, Hazardous Waste Management Division, U.S. Environment Protection Agency, Region VIII, 999 18th Street, suite 500, Denver, Colorado 80202–2466.

Comprehensive information on this site including the deletion docket is available at the EPA Region VIII Superfund Records Center or at the Rose Park Sludge Pit Site information repository. This information is available for public inspection and copying. Requests for documents should be directed to the EPA Region VIII Superfund Records Center at the EPA Region VIII office.

The address for the Regional records center is: Superfund Records Center, U.S. Environment Protection Agency, Region VIII, 999 18th Street, suite 500, Denver, Colorado 80202–2466, Hours: 8 a.m. to 4:30 p.m., Monday through Friday.

The Rose Park Sludge Pit Site information repository is located at: Utah Department of Environmental Quality, Division of Environmental Response and Remediation, 1950 West North Temple, Second Floor, Salt Lake City, Utah 84116–4840, Hours: 8 a.m. to 5 p.m., Monday through Friday.

SUPPLEMENTARY INFORMATION:

I. Introduction.
II. NPL Deletion Criteria.
III. Deletion Procedures.
IV. Basis for Intended Site Deletion.

I. Introduction

The Environment Protection Agency (EPA) Region VIII announces its intent to delete the Rose Park Sludge Pit Site, Salt Lake City, Utah from the National Priorities List (NPL), which constitutes Appendix B of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), and requests comments on this deletion. EPA identifies sites that appear to present a significant risk to public health, welfare, or the environment and maintains the NPL as the list of those sites. Sites on the NPL may be the subject of remedial actions financed by the Hazardous Substance Response Trust Fund (Fund). Pursuant to § 300.66(c)(8) of the NCP, any site deleted from the NPL remains eligible for Fund-financed remedial actions if conditions at the site warrant such action.

EPA will accept comments on this site for thirty days after publication of this notice in the **Federal Register**.

Section II of this notice explains the criteria for deleting sites from the NPL. Section III discusses procedures that EPA is using for this action. Section IV discusses how the site meets the deletion criteria.

II. NPL Deletion Criteria

The NCP establishes the criteria that the Agency uses to delete sites from the NPL. In accordance with 40 CFR 300.66(c)(7), sites may be deleted from the NPL where no further response is appropriate. In making this determination, EPA shall consider, in consolation with the State, whether any of the following criteria have been met:

(1) Responsible parties or other persons have implemented all appropriate response actions required; or

(2) All appropriate Fund-financed responses under CERCLA have been implemented and no further cleanup by responsible parties is appropriate; or

(3) The remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, taking of remedial measures is not appropriate.

Deletion of a site from the NPL does not preclude eligibility for subsequent Fund-financed actions if future conditions warrant such actions. Section 105(e) of CERCLA states: "Whenever there has been, after January 1, 1985, a significant release of hazardous substances or pollutants or contaminants from a site which is listed by the President as a 'Site Cleaned Up to Date' on the National Priorities List, the site shall be restored to the National Priorities List without application of the hazard ranking system."

III. Deletion Procedures

In the NPL rulemaking published in the **Federal Register** on October 15, 1984 (49 FR 40320), the Agency solicited and received comments on whether the notice and comment procedures followed for adding sites to the NPL should also be used before sites are deleted. Comments were also received in response to the amendments to the NCP that were proposed in the **Federal Register** on February 12, 1985 (50 FR 5862). Deletion of sites from the NPL does not itself create, alter, or revoke any individual's rights or obligations. The NPL is designed primarily for informational purposes and to assist Agency management. As is mentioned in Section II of this notice, section 105(e) of CERCLA makes clear that deletion of a site from the NPL does not preclude eligibility for future Fund-financed response actions.

EPA Region VIII will accept and evaluate public comments before making a final decision to delete a site from the NPL. The Agency believes that deletion procedures should focus on notice and comment at the local level. Comments from the local community may be the most pertinent to deletion decisions. The following procedures were used for the intended deletion of this site:

(1) EPA Region VIII and the State of Utah have agreed to conduct five-year reviews at this site. The first five-year review was completed on June 1, 1992.

(2) EPA Region VIII has recommended deletion and has prepared the relevant documents.

(3) The State of Utah is expected to concur with the deletion decision.

(4) Concurrent with the National Notice of Intent to Delete, a local notice has been published in local and community newspapers and has been distributed to appropriate federal, state and local officials and other interested parties.

(5) The Region has made all relevant documents available in the Regional Office and local site information repository.

The comments received during the notice and comment period will be evaluated before the final decision to delete. The Region will prepare a Responsiveness Summary, which will address the comments received during the public comment period.

A deletion will occur at the Assistant Administrator for the Office of Solid Waste and Emergency Response places a notice in the **Federal Register**. The NPL will reflect any deletions in the next final update. Public notices and copies of the Responsiveness Summary will be made available to local residents by Region VIII.

IV. Basis for Intended Site Deletion

The following summary provides the Agency's rationale for recommending deletion of the Rose Park Sludge Pit Site, Salt Lake City, Utah.

The Rose Park Sludge Pit is located in North Salt Lake City, an area where oil refineries and industrial facilities have been located since before 1900. The sludge pit was used as a waste disposal site for acidic sludge wastes from petroleum refining operations. Waste was placed in an unlined pit from the 1930's until 1957.

The site was ranked for the NPL in August, 1982. Rose Park Sludge Pit scored 7.46 based on the surface water and groundwater routes. Due to the threat of public exposure and direct contact, the State of Utah requested that EPA consider Rose Park as the State's top priority site. As a result of this request, the site was listed on the NPL on December 30, 1982.

A series of field investigations were conducted between 1979 and 1981. These investigations found waste sludge

as deep as 20 feet, covering an area of about 5.5 acres. Shallow, unconfined groundwater was found at a depth of 8 to 10 feet. In March, 1981, a responsible party (RP) installed six ground-water monitoring wells and collected soil samples from six borings through the sludge pit and surrounding areas.

On October 29, 1982, EPA, Utah State Department of Health, Salt Lake City Corporation, Salt Lake City/County Health Department and Amoco Oil Company entered into an Intergovernmental Corporate Cooperation Agreement (ICCA) to conduct remedial actions at the site. All remedial actions at the site were conducted under the ICCA and there is not a Record of Decision (ROD) associated with this site.

The remedy consisted of installing additional monitoring wells, constructing a bentonite slurry wall around the pit and capping the pit with a sand layer, fabric membrane, clay layer and a vegetated soil cover. A traffic barrier and signs identifying the containment structure were installed. All required remedial actions were completed by October, 1984. Provisions in the ICCA required Salt Lake City, the property owner, to maintain, supervise and care for the site. The agreement was recorded in the records of Salt Lake County.

The ICCA included a 30 year groundwater monitoring plan to ensure the continued protection of groundwater and to monitor for possible releases of contaminants from the sludge pit. The monitoring plan provides for annual monitoring for indicator parameters as specified in the plan. Due to problems with the original monitoring plan, a new monitoring plan was developed and implemented in 1992. This plan requires the installation of additional monitoring wells and more detailed groundwater sampling and analysis.

Though not required in the ICCA, Amoco Oil Company has committed to conduct the long term monitoring of the site. Amoco and the State of Utah will formalize Amoco's commitment in an agreement prior to the final deletion.

A community relations plan was developed for the site. The ICCA required the parties to hold a public meeting for the purpose of informing the public and Rosewood Park area residents about the remedy and allowing for comments and input. A meeting was held in February, 1983. The community relations plan was updated in 1992 in conjunction with the five-year review to provide for activities related to the review and deletion.

EPA conducted a five-year review of the site in 1992. This review confirmed the remedy remains protective of human health and the environment. Direct contact exposure is prevented by the cap and groundwater is protected from further degradation by the slurry wall. The monitoring data found no contamination related to the sludge pit in the groundwater exceeding MCLs (maximum contaminant levels for drinking water as established by the Safe Drinking Water Act) or health based standards. The next five-year review is scheduled for April, 1997 or earlier if appropriate.

EPA, with concurrence of the State of Utah, has determined that all appropriate responsible party responses under CERCLA at the Rose Park Sludge Pit Site have been implemented, and that no further cleanup by responsible parties is appropriate at this time.

Dated: September 22, 1992.

Jack W. McGraw,

Acting Regional Administrator, USEPA Region VIII.

40 CFR Part 300

[FRL-4515-8]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List

AGENCY: Environmental Protection Agency.

ACTION: Notice of intent to delete ARRCOM from the National Priorities List: Request for comments.

SUMMARY: The Environmental Protection Agency (EPA) Region 10 announces its intent to delete the ARRCOM site from the National Priorities List (NPL) and requests public comment on this action. The NPL constitutes Appendix B to the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended by the Superfund Amendments and Reauthorization Act of 1986. EPA and the State of Idaho Department of Health and Welfare (IDHW) have determined that the ARRCOM site poses no significant threat to public health or the environment and, therefore, further remedial measures are not appropriate.

DATES: Comments concerning this site may be submitted on or before November 2, 1992.

ADDRESSES: Comments may be mailed to Fran Allans, U.S. EPA Region 10, 422 W. Washington, Boise Idaho 83702.

Comprehensive information on this site is available through the Region 10 Deletion Docket, which is located at EPA's Region 10 office and is available for viewing by appointment only from 9 a.m. to 4 p.m., Monday through Friday, excluding holidays. Appointments for copies of the background information from the Regional public docket should be directed to the EPA Region 10 docket office at the following address: Lynn Williams, United States Environmental Protection Agency, Region 10 Hazardous Waste Division Records Center, 1200 6th Avenue, Seattle, Washington 98101.

The Deletion Docket is also available for viewing at the ARRCOM site information repository at the following location: Rathdrum Library, 1891 Main, Rathdrum, Idaho 83858.

FOR FURTHER INFORMATION CONTACT: Fran Allans, U.S. EPA Region 10, 422 W. Washington, Boise, Idaho 83702. (208) 334-9047.

SUPPLEMENTARY INFORMATION:

I. Introduction.
II. NPL Deletion Criteria.
III. Deletion Procedures.
IV. Basic of Intended Site Deletion.

I. Introduction

The United States Environmental Protection Agency (EPA) Region 10 announces its intent to delete the ARRCOM site from the National Priorities List (NPL), which constitutes Appendix B of the National Oil and Hazardous Substances Contingency Plan ("NCP"), 40 CFR part 300, and requests comments on this proposed deletion. EPA identifies sites on the NPL that appear to present a significant risk to human health or the environment. EPA may delete a site from the NPL if it determines that no further response is required to protect human health and the environment. As described in § 300.425(e)(3) of the NCP, sites deleted from the NPL remain eligible for Fund-financed remedial actions in the unlikely event that conditions at the site are later found to warrant such actions.

The ARRCOM NPL site is an abandoned waste oil recycling facility located 2.5 miles southwest of the City of Rathdrum, in Kootenai County, Idaho. The property consists of approximately 1.2 acres in the central region of Section 10, Township 51 South, Range 5 West. It is situated in a rural residential neighborhood with an estimated eight residences located within a one-half mile radius to the north, east, and west. One residential property is adjacent to the northern edge of the site. The site is

bounded to the southeast by Highway 53, a Northern Pacific Railroad mainline, and agricultural lands used primarily for growing forage crops. Although there are no surface water bodies on or in the near vicinity of the ARRCOM site, the marshy drainage basin of Lost Creek is located 0.3 mile to the north/northeast. The site is not fenced.

The ARRCOM site is located over the Spokane Valley-Rathdrum Prairie Aquifer, the sole source for public and private drinking water for approximately 350,000 people in Idaho and Washington. Approximately 6,300 of these people live in the primarily rural residential area within three miles of the site.

The site was operated as a waste oil recycling facility from the early 1960s until it was abandoned in 1982. During operation, waste oils were transported by truck to the site, underwent processing, and were sold. Waste oil and recycled oil were stored in 27 tanks and 4 truck tanks. Contamination of the environment occurred as a result of oil spills from the operation and from leaking oil storage tanks. Sludge and waste oils were discarded in at least three disposal pits on the property and were spread on an on-site road.

In August 1982, approximately seven months after the ARRCOM facility was abandoned, EPA conducted a preliminary investigation of the site. During this investigation, a number of oil storage tanks were found to be leaking and in general disrepair. Preliminary sampling of the site indicated the waste oils and soils at the facility were contaminated with high levels of solvents, lead and polychlorinated biphenyls (PCBs), and a potential for groundwater contamination existed. Based on this information, the site was proposed for inclusion on the National Priorities List (NPL) in December 1982 and received a final NPL listing in September 1983.

Because of the exceptionally high levels of contaminants and large volumes of waste oils and sludges, emergency response activities were initiated under EPA's removal program in 1983 to stabilize the site. A three phased removal action was performed at the ARRCOM site in 1983, 1987 and in 1990. The removal actions accomplished the following:

1983: Removal of 9,700 gallons of waste oils from tanks and 137 cubic yards of contaminated soils.

1987: Removal of 13,255 gallons of waste oils and sludges from tanks and disposal pits and 2,000 cubic yards of contaminated soils.

1990: Removal of 1,653 tons of contaminated soils.

During the three phases of the removal action, contaminated soils and sludge disposal pits were excavated to depths ranging from 1 to 20 feet below ground surface at different locations of the site. Soils, waste oils, tanks and buildings were removed and shipped to off-site hazardous waste landfill and incinerator facilities. Surface soil and waste oils were sampled prior to the 1983 removal and before and after the 1987 and 1990 removals.

As part of the 1982 preliminary investigation and the 1987 removal action, residential groundwater wells in the immediate vicinity of the site were sampled. Groundwater monitoring wells were installed at the site in 1987 and samples were collected in 1987, 1989, 1990, and 1992.

In 1991, EPA performed a comprehensive assessment of the site data generated during the preliminary investigation and removal actions and conducted a limited sampling effort to fill important data gaps. This information was used to evaluate the nature and extent of contamination and to assess risks to human health and the environment resulting from contaminants remaining on-site after the removal actions. The data suggest that concentrations of contaminants in soils were significantly reduced during the removals and that low levels of organic and inorganic contaminants remain in the soils below excavated areas at depths ranging from 1 foot to 25 feet below ground surface. Because the frequency of occurrence of the contaminants on a sitewide basis is low, and because the majority of contaminants are located 25 feet below ground surface beneath clean fill, EPA has concluded that the remaining soil contaminants do not pose an unacceptable current or future direct contact risk if left in place.

Samples collected from residential groundwater wells in 1982 and 1987, and the samples from on site monitoring wells collected in 1987, 1989, 1990, and 1992, showed no site-related contaminants of concern in the groundwater. Modelling indicated that only one contaminant of concern, 1,1,2,2-tetrachloroethane, could potentially leach from site soils in the future and eventually reach the groundwater. However, the risk assessment indicated that the potential future groundwater concentration would fall within EPA's acceptable cancer risk range for a future residential land use scenario.

As part of the risk assessment, the potential adverse impacts of soil contaminants on local plants and animals were qualitatively assessed. Potential receptors and exposure scenarios were evaluated and it was determined that because areas with contaminants remaining on-site are at significant depth beneath clean fill, the ARRCOM site does not pose a risk to ecological receptors or habitats.

Section II of this notice explains the criteria for deleting sites from the NPL. Section III discusses procedures that EPA is using for this action. Section IV explains how the site meets the deletion criteria.

II. NPL Deletion Criteria

The NCP establishes the criteria that the Agency uses to delete sites from the NPL. In accordance with § 300.425(e) of the NCP, 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. In making a determination to delete a release from the NPL, EPA shall consider, in consultation with the state, whether any of the following criteria have been met:

(1) Responsible parties or other persons have implemented all appropriate response actions required;

(2) All appropriate Fund-financed response under CERCLA has been implemented, and no further action by responsible parties is appropriate, or

(3) The remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, taking of remedial measures is not appropriate.

It is EPA's policy that even if a site is deleted from the NPL, where hazardous substances, pollutants, or contaminants remain at the site above levels that allow for unlimited use and unrestricted exposure, a subsequent review of the site will be conducted at least every five years after the initiation of the remedial action at the site to ensure that the site remains protective of public health and the environment. In the case of ARRCOM, where hazardous substances are not above health based levels and future access does not require restriction, five-year reviews will not be conducted. However, if new information becomes available which indicates a need for further action, EPA may initiate remedial actions. Whenever there is a significant release from a site deleted from the NPL, the site may be restored to the NPL without the application of the Hazard Ranking System.

III. Deletion Procedures

The following procedures were used for the intended deletion of this site: (1) EPA Region 10 issued a Record of Decision dated June 30, 1992, which

found that no remedial action is required at the site because, following a number of removals, it no longer presents a significant threat; (2) IDHW has concurred with the proposed deletion decision; (3) a notice has been published in the local newspapers and has been distributed to appropriate federal, state and local officials and other interested parties announcing the commencement of a 30-day public comment period on EPA's Notice of Intent to Delete, and (4) all relevant documents have been made available in the local site information repositories.

Deletion of the site from the NPL does not itself create, alter, or revoke any individual rights or obligations. The NPL is designed primarily for informational purposes and to assist Agency management. As mentioned in Section II of this Notice, 40 CFR 300.425(e)(3) states that deletion of a site from the NPL does not preclude eligibility for future Fund-financed response actions.

For deletion of this site, EPA's Regional Office will accept and evaluate public comments on EPA's Notice of Intent to Delete before making a final decision to delete. The Agency will prepare a Responsiveness Summary if significant public comments are offered.

A deletion occurs when the Regional Administrator places a final notice in the **Federal Register**. Generally, the NPL will reflect deletions in the final update following the Notice. Public notices and copies of the Responsiveness Summary will be made available to local residents by the Regional office.

IV. Basis for Intended Site Deletion

Based on the results of the comprehensive assessment of the removal data, and the supplemental sampling and risk assessment, EPA determined that the ARRCOM site does not pose a significant threat to public health or the environment. In the Proposed Plan, issued for the site on May 22, 1992, EPA recommended that no remedial action be taken. The State of Idaho concurred with this recommendation.

CERCLA requirements under Sections 113(k)(2)(B)(i–v) and 117, 42 U.S.C. 9613 and 9617 for public participation include releasing the risk assessment report and the Proposed Plan to the public and providing a public comment period to allow for public participation in the decision-making process. EPA met these requirements by releasing these documents to the public in May 1992. These documents were made available by placing them in the information repository in the Rathdrum Public Library and EPA office in Seattle. Notice of a 30 day public comment period on the Proposed Plan was placed in the Statesman Review newspaper. No comments were received during the 30 day public comment period and on June 30, 1992, EPA issued a No Further Action Record of Decision for the ARRCOM site. The no further action decision does not result in hazardous substances, pollutants, or contaminants remaining at the site above health based levels. Accordingly, EPA will not conduct "five-year reviews" at this site.

As previously stated, one of the three criteria for deletion specifies that EPA may delete a site from the NPL if the "remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, taking of remedial measures is not appropriate." EPA, with concurrence of IDHW, believes that this criterion for deletion has been met based on the results of the comprehensive assessment of the removal data, and the supplemental sampling and risk assessment. Therefore, EPA is proposing deletion of the ARRCOM site from the NPL. Documents supporting these actions are available at the designated information repositories.

Dated: September 15, 1992.

Dana Rasmussen,

Regional Administrator, Region 10.

BILLING CODE 6560–50–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 92–217, RM–8069]

Radio Broadcasting Services; Camden, East Camden and Stamps, AR; Minden, LA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition for rule making filed on behalf of Y95 Radio, Inc., licensee of Station KCXY(FM), Channel 237A, Camden, Arkansas, seeking the reallotment of Channel 237A to East Camden, AR, as a Class C1 channel and modification of its license accordingly. Petitioner also requests the substitution of Channel 282A for Channel 238A at Stamps, AR, a vacant allotment for which an application is pending; and the substitution of Channel 239A for Channel 237A at Minden, LA, and modification of the license of Cook Enterprises, Inc. ("Cook") for Station KASO–FM. An Order to Show Cause must be issued to Cook since it has not agreed to the proposed substitution at Minden. Coordinates for Channel 237C1 at East Camden, AR, are 33–30–14 and 92–48–38; for Channel 282A at Stamps, AR, 33–23–20 and 93–37–38; and for Channel 239A at Minden, LA, 32–37–50 and 92–16–56. See **SUPPLEMENTARY INFORMATION**, *infra*.

DATES: Comments must be filed on or before November 19, 1992, and reply comments on or before December 4, 1992.

ADDRESSES: Secretary, Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner's counsel, as follows: Mark E. Fields, Esq., Law Office of Mark E. Fields, 1825 I Street, NW., Suite 400, Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commissioner's Notice of Proposed Rule Making, MM Docket No. 92–217, adopted September 1, 1992, and released September 28, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452–1422, 1990 M St., NW., suite 640, Washington, DC 20036.

Petitioner's modification proposal complies with the provisions of §§ 1.420 (g) and (i) of the Commission's Rules. Therefore, we will not accept competing expressions of interest in the use of Channel 237C1 at East Camden, or require the petitioner to demonstrate the availability of an additional equivalent class channel.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

BILLING CODE 6712-01-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1039

[Ex Parte No. 346 (Sub-No. 28)]

Rail General Exemption Authority: Export Corn and Export Soybeans

AGENCY: Interstate Commerce Commission.

ACTION: Proposed rule; extension of comment due date.

SUMMARY: By decision served July 15, 1992 (57 FR 31489, July 16, 1992), the Commission sought public comment by August 17, 1992, on whether to exempt from regulation the rail transportation of export corn and soybeans. The Commission has concluded, preliminarily, that regulation of rail transport of export corn and export soybeans is not necessary to carry out the rail transportation policy. The proposal is intended to eliminate burdensome regulatory oversight. As discussed more fully in the Supplementary Information section below, the comment due date is being extended to December 15, 1992.

DATES: Comments are due on December 15, 1992.

ADDRESSES: Send an original and 10 copies of comments referring to Ex Parte No. 346 (Sub-No. 28) to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Richard B. Felder, (202) 927-5610, [TDD for the hearing impaired: (202) 927-5721].

SUPPLEMENTARY INFORMATION: The comment due date has been extended a number of times in this proceeding. The Commission granted a 30-day extension request filed by the Association of American Railroads by decision served and published July 29, 1992 (57 FR 33478), extending the comment due date to September 16, 1992. By decision served August 31, 1992 (57 FR 39663, September 1, 1992) the comment due date was extended an additional 30 days to October 16, 1992, at the request of a number of parties, including the U.S. Department of Agriculture (USDA), which had sought a 90-day extension. An August 22, 1992 request filed by the National Grain and Feed Association to postpone the comment due date was denied by a decision served September 9, 1992. In a decision served September 29, 1992, the September 9 decision was upheld on appeal.

On September 22, 1992, USDA filed a petition requesting a further 60-day extension of the current comment due date. USDA indicates additional time is needed to collect and provide to the Commission additional data regarding the effect of the proposed exemption on the domestic farm economy. USDA maintains it is important to evaluate fully the proposal's potential impact on specific export promotion programs and activities administered by USDA, including the export enhancement program, the GMS export credit programs and the market promotion program, which all may be affected by the proposed change in transport regulations. USDA also notes it maintains substantial information, both published and unpublished, on grain marketing and transportation that the Commission relied on extensively in drafting the subject proposal and that should be made available for consideration in this proceeding.

As noted above, USDA was one of the parties previously seeking a 90-day extension, but only a 30-day extension was granted. USDA's prior extension request was very general, however, and did not merit the full 90-day extension sought. By contrast, the instant extension request is specific and compelling and will, therefore, be granted.

Decided: September 28, 1992.

By the Commission, Sidney L. Strickland, Jr., Secretary.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 92-23967 Filed 10-1-92; 8:45 am]

BILLING CODE 7035-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 675

Groundfish Fishery of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of availability of amendment to fishery management plan; request for comments.

SUMMARY: The North Pacific Fishery Management Council (Council) has submitted a revised Amendment 18 to the Fishery Management Plan (FMP) for the Groundfish Fishery of the Bering Sea and Aleutian Islands (BSAI) Area for review by the Secretary of Commerce (Secretary). Comments are requested from the public. Copies of the revised amendment and the regulatory impact review/initial regulatory flexibility analysis (RIR/IRFA) may be obtained from the Council (see "**ADDRESSES**").

DATES: Comments on the amendment should be submitted on or before October 29, 1992.

ADDRESSES: Comments should be sent to Ronald J. Berg, Chief, Fisheries Management Division, Alaska Region, NMFS, P.O. Box 21668, Juneau, Alaska 99802 or delivered to the Federal Building Annex, suite 6, 9109 Mendenhall Mall Road, Juneau, Alaska. Copies of revised Amendment 18 to the FMP and the RIR/IRFA are available on request from the North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510 (telephone 907-271-2809).

FOR FURTHER INFORMATION CONTACT: Jay J.C. Ginter, Fishery Management Biologist, Alaska Region, NMFS at 907-586-7228.

SUPPLEMENTARY INFORMATION: The Magnuson Fishery Conservation and Management Act (Magnuson Act) (16 U.S.C. 1801 *et seq.*) requires that each regional Fishery Management Council submit any fishery management plan or plan amendment it prepares to the Secretary for review and approval, disapproval, or partial disapproval. The Magnuson Act also requires the Secretary, on receiving the plan or amendment, to immediately publish a notice that the plan or amendment is available for public review and comment. The Secretary will consider the public comments received during the comment period in determining whether to approve revised Amendment 18.

If approved, revised Amendment 18 to the BSAI FMP would:

(1) Allocate the pollock total allowable catch (TAC), after subtraction of the reserve, to inshore and offshore components of the fishery as follows:

35 percent for inshore and 65 percent for offshore in 1993; and

37.5 percent for inshore and 62.5 percent for offshore in 1994 and 1995.

(2) Continue the catcher vessel operational area (CVOA) established within the BSAI area (57 FR 23321, June 3, 1992) for the pollock non-roe (or "B") season (June 1-December 31), within which access to pollock is limited to

catcher vessels and motherships only. The CVOA is located in the Bering Sea subarea south of 56°00′ N. latitude and between 163°00′ and 168°00′ W. longitudes. Catcher/processor vessels in the offshore component would not be allowed to conduct fishing operations for pollock in the CVOA during the "B" season.

If implemented, Amendment 18 would cease to have effect at midnight, Alaska local time, December 31, 1995.

Regulations proposed by the Council to implement these amendments are scheduled to be published within 10 days of this notice.

DEPARTMENT OF AGRICULTURE

Types and Quantities of Agricultural Commodities To Be Made Available for Donation Overseas Under Section 416(b) of the Agricultural Act of 1949 in Fiscal Year 1993

AGENCY: Office of the Secretary, USDA.

ACTION: Notice.

SUMMARY: This Notice sets forth the determination of the Secretary of Agriculture of the types and quantities of agricultural commodities to be made available for donation overseas under section 416(b) of the Agricultural Act of 1949, as amended, during fiscal year 1993.

FOR FURTHER INFORMATION CONTACT: Glenn Whiteman, Acting Director, Program Analysis Division, Office of the General Sales Manager, FAS, USDA (202) 720–3573.

Determination

The kinds and quantities of commodities that shall be made available for donation under section 416(b) of the Agricultural Act of 1949 are as follows:

	Commodity	Quantity (metric tons)
Grain	Wheat (feed quality).	1,800,000
	Corn	381,000
Dairy products	Butter/Butteroil *	80,000

* At least 40,000 metric tons must be butter.

Done at Washington, DC, this 25th day of September 1992.

Charles R. Hilty,

Acting Secretary of Agriculture.

[FR Doc. 92–23909 Filed 10–1–92; 8:45 am]
BILLING CODE 3410–01–M

Food and Nutrition Service

The Emergency Food Assistance Program and Soup Kitchens; Availability of Commodities for Fiscal Year 1993

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice.

SUMMARY: This notice announces: (1) The surplus and purchased commodities that will be available for donation to households under the Emergency Food Assistance Program (TEFAP); and (2) the commodities that will be available to soup kitchens and food banks. The commodities made available under this notice shall be directed to needy persons, including unemployed and homeless persons.

EFFECTIVE DATE: October 1, 1992.

FOR FURTHER INFORMATION CONTACT: Philip K. Cohen, Chief, Program Administration Branch, Food Distribution Division, Food and Nutrition Service, U.S. Department of Agriculture, 3101 Park Center Drive, Alexandria, Virginia 22302–1594 or telephone (703) 305–2660.

SUPPLEMENTARY INFORMATION:

Background and Need for Action

Surplus Commodities

Donations of commodities to needy households were initiated in 1981 as part of efforts to reduce stockpiles of government-owned commodities. These donations responded to concern over the costs to taxpayers of storing vast quantities of foods, while at the same time there were persons in need of food assistance. The Emergency Food Assistance Program was codified in Title II of Public Law 98–8, the Emergency Food Assistance Act (EFAA) of 1983, as amended (7 U.S.C. 612c note). Surplus foods made available for distribution under the EFAA are limited to amounts determined by the Secretary to be in excess of the quantities needed to carry out other programs, including Commodity Credit Corporation (CCC) sales obligations and domestic food assistance programs. The Secretary of Agriculture anticipates that the following surplus commodities acquired by the CCC under its price-support activities will be made available in the noted amounts for distribution through TEFAP during Fiscal Year 1993: Butter, 72 million pounds; and cornmeal, 48 million pounds. The actual types and quantities of commodities made available by the Department may differ from the above estimates because of agricultural production, market conditions and the distribution of these donated foods to other domestic outlets.

Purchased Commodities

In recent years, the supply of available surplus commodities has been drastically reduced. These reductions are the result of changes in the agricultural price-support programs which have brought supply and demand into better balance, and accelerated donations and sales. Congress responded to the reduced availability or surplus commodities with section 104 of the Hunger Prevention Act of 1988, Public Law 100–435, which added sections 213 and 214 to the EFAA. Those sections required the Secretary to annually purchase, process, and distribute commodities for household consumption in addition to those surplus commodities otherwise provided under TEFAP. In section 110 of the Hunger Prevention Act, Congress also required the Secretary to purchase, process and distribute commodities for soup kitchens and food banks. USDA purchases commodities for these programs based in part on annual reports completed by State distributing agencies. For soup kitchen and food bank outlets, State agencies have expressed a preference to receive a greater variety of commodities; for TEFAP, State agencies prefer volume to variety.

For Fiscal Year 1993, $120 million has been appropriated for purchasing, processing, and distributing additional commodities for household use. The Department anticipates purchasing for distribution to households through TEFAP during this fiscal year peanut butter, raisins, rice, dry bagged beans, and the following canned foods: peas, green beans, applesauce, orange juice, pork and beef. The amounts of each item purchased will depend on the prices USDA must pay.

For Fiscal Year 1993, $32 million has been appropriated to purchase, process, and distribute commodities for distribution to soup kitchens and food banks. For such outlets, the Department anticipates the purchase of nonfat dry milk, and the following canned foods: Mixed fruit, pineapple, applesauce,

tomato juice, corn, green beans, peas, pork and/or beef, and chicken. The amounts of each item purchased will depend on the prices USDA must pay.

Dated: September 28, 1992.

Phyllis Gault,

Associate Administrator.

BILLING CODE 3410-30-M

Forest Service

Exemption of Genesis New Perspectives Demonstration Timber Sales From Appeal, Malheur National Forest, Oregon

AGENCY: Forest Service, USDA.

ACTION: Notice to exempt decisions from administrative appeal.

SUMMARY: This is a notification that the decision to implement the Genesis new Perspectives Demonstration Timber Sales in the areas of Dixie Mountain on the Malheur National Forest is exempted from appeal. This is in conformance with provisions of 36 CFR 217.4(a)(11) as published January 23, 1989 at Vol. 54, No. 13 pages 3342-3370.

EFFECTIVE DATE: October 2, 1992.

FOR FURTHER INFORMATION CONTACT: Mark A. Boche, Forest Supervisor, Malheur National Forest, 139 NE Dayton Street, John Day, Oregon 97845.

SUPPLEMENTARY INFORMATION: From 1983 to this year an infestation of Western Spruce Budworm have been affecting major portions of the Malheur National Forest. To date, approximately 420,000 acres are affected on the forest. In April 1991, an interdisciplinary team (IDT) surveyed much of the infested area to assess the damage to the resources that had occurred in the Dixie Mountain area. The IDT identified the need to salvage the timber which has died in as short a time as possible so the logs would remain merchantable. Merchantable timber in the area averages 12 inches in diameter at breast height with moderate defect. Rapid drying of insect-killed trees is resulting in cracking or checking, especially of the smaller diameter trees, which will quickly reduce value as sawlogs.

It is also desirable to complete the logging quickly to begin artificial regeneration as soon as possible, establishing new stands more quickly.

The environmental analysis of these actions begun in September 1, 1991. After public meetings, and contacts with individuals and State and Federal agencies, the following major issues were identified: Silvicultural treatments; access management; riparian habitat; soils and watershed values; visual resource; old growth; reintroduction of fire; big game cover; and logging systems and economics.

The Genesis IDT developed five alternatives to analyze, including the No Action Alternative. The effects of these alternatives are disclosed in an Environmental Assessment which was prepared for the proposal. The Proposed Action (Alternative A) would harvest about 2,943 acres of heavily infested land and produce about 13.1 MMBF of timber and 5.1 MMCF of wood fiber.No specified roads will be constructed and less than 1 mile(s) of temporary roads would be constructed. This alternative protects and enhances riparian and aquatic habitat by implementing helicopter yarding of approximately 980 acres to reduce soil and riparian impacts.

Biological evaluations have been completed for all plant, wildlife and fish Proposed, Endangered, Threatened and Sensitive species within both project areas. All Biological Evaluations indicated that projects could proceed as planned.

The sale and accompanying work is designed to accomplish the objectives identified as quickly as possible and minimize the amount of salvage volume lost. To expedite this sale project and the accompanying work, and to prevent delays by appeals, the process according to 36 CFR part 217 is being followed.

Under this Regulation the following is exempt from appeal:

Decisions related to rehabilitation of National Forest System lands and recovery of forest resources resulting from natural disasters or other natural phenomena, such as wildfires * * * when the Regional Forester * * * determines and gives notice in the **Federal Register** that good cause exists to exempt such decisions from review under this part.

This project will not be subject to review under 36 CFR part 217. Upon publication of this notice, the Decision Notice for the Genesis New Perspectives Demonstration Project Timber Sales will be signed by the Forest Supervisor.

Dated: September 24, 1992.

Richard A. Ferraro,

Deputy Regional Forester.

BILLING CODE 3410-KD-M

Soil Conservation Service

Lower Rapid Creek Water Quality Project

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR part 1500); and the Soil Conservation Service Guidelines (7 CFR part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an Environmental Impact Statement is not being prepared for the Lower Rapid Creek Water Quality Hydrologic Unit Area Project in Pennington County, South Dakota.

FOR FURTHER INFORMATION CONTACT: Mr. Ron E. Hendricks, State Conservationist, USDA, Soil Conservation Service, Federal Building, room 203, 200 4th Street, SW., Huron, South Dakota, 57350-2475, telephone (605) 353-1783.

SUPPLEMENTARY INFORMATION: The Environmental Assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Ron E. Hendricks, State Conservationist, has determined that the preparation and review of an Environmental Impact Statement is not needed for this project.

The project concerns a plan for the protection of cropland, pasture and rangeland and other land using conservation practices; the reduction of seepage from the irrigation delivery and distribution system and the proper utilization of animal wastes in the lower Rapid Creek basin in Pennington County, South Dakota.

The Notice of Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI is available to fill single copy requests at the above address. The total Environmental Assessment is on file and may be reviewed by contacting Mr. Ron E. Hendricks, State Conservationist. No administrative action on implementation of the project will be taken until 30 days after the date of this publication in the Federal Register.

Catalog of Federal Domestic Assistance Program No. 10902, Soil and Water Conservation. This program is excluded from coverage under Executive Order 12372.

Dated: August 27, 1992.

Lawrence N. Nieman,

Deputy State Conservationist.

BILLING CODE 3510-07-M

Foreign-Trade Zones Board

[Docket 69-91]

Foreign-Trade Zone 41—Milwaukee, WI; Application for Expansion; Amendment of Application

The pending application of the Foreign-Trade Zone of Wisconsin, Ltd., grantee of FTZ 41, requesting authority to reorganize and expand its zone in Milwaukee, Wisconsin, within the Milwaukee Customs port of entry, (Docket 69-91, filed 10/29/91, 56 FR 57513, 11/12/91), has been amended to retain a site that was to be deleted.

The application initially requested authority to add a new site (Port of Milwaukee complex, 300 acres) to the zone project and to delete existing Sites 1, 3, and 4 from the project. The amendment requests that existing Site 1 not be deleted from the zone project.

The comment period is reopened until November 2, 1992.

The application and amendment material are available for public inspection at the following locations:

U.S. Department of Commerce District Office, 517 East Wisconsin Avenue, room 606, Milwaukee, Wisconsin 53202

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, 14th and Pennsylvania Avenue, NW., room 3716, Washington, DC 20230

Dated: September 25, 1992.

Dennis Puccinelli,

Acting Executive Secretary.

BILLING CODE 3510-DS-M

Bureau of Export Administration

Iran Air: Stay of Final Order

ACTION: Notice.

On August 21, 1992, the Acting Under Secretary for Export Administration, United States Department of Commerce, issued a Final Order in an administrative enforcement proceeding against Iran Air, Mehrabad Airport, Tehran, Iran. 57 FR 39178, August 28, 1992. The Order finds that Iran Air committed a violation of the Export Administration Regulations and imposes as sanctions against Iran Air a civil penalty of $100,000 and a denial of Iran Air's U.S. export privileges for a period of 24 months, 21 months of which will be suspended if the civil penalty is paid within 30 days and provided Iran Air commits no further violations.

Iran Air filed an emergency motion for stay of the Final Order with the U.S. Court of Appeals for the District of Columbia Circuit (Docket No. 92-1389), which entered an order on September 28, 1992, as follows:

Order

Upon consideration of the renewed emergency motion for stay of agency order, the affidavits filed in support thereof, and the opposition thereto, it is

Ordered that the renewed emergency motion for stay be granted. Iran Air has made a substantial case on the merits and has demonstrated the requisite irreparable injury to warrant the issuance of a stay pending appeal. *See Washington Metropolitan Area Transit Commission* v. *Holiday Tours, Inc.*, 559 F.2d 841, 843 (D.C. Cir. 1977); *Virginia Petroleum Jobbers Association* v. *FPC*, 259 F.2d 921 (D.C. Cir. 1958).

Per Curiam

Accordingly, by order of the court, the August 21, 1992, Final Order is stayed pending the court's action on Iran Air's appeal from the Commerce Department's administrative enforcement proceeding that resulted in the imposition of the sanctions.

Dated: September 30, 1992.

Joan M. McEntee,

Acting Under Secretary for Export Administration, Bureau of Export Administration, U.S. Department of Commerce.

BILLING CODE 3510-DT-M

International Trade Administration

[A-588-045]

Carbon Steel Wire Rope From Japan; Intent to Revoke the Antidumping Finding

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice of intent to revoke antidumping finding.

SUMMARY: The Department of Commerce is notifying the public of its intent to revoke the antidumping finding on carbon steel wire rope from Japan. Interested parties who object to this revocation must submit their comments in writing not later than October 31, 1992.

EFFECTIVE DATE: October 2, 1992.

FOR FURTHER INFORMATION CONTACT: Jonathan Freilich or Wendy Frankel, Office of Agreements Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 482-3793.

SUPPLEMENTARY INFORMATION:

Background

On October 15, 1973, the Department of Treasury published an antidumping finding on carbon steel wire rope from Japan (38 FR 28571). The Department of Commerce (the Department) has not received a request to conduct an administrative review of this finding for the most recent five consecutive anniversary months.

The Department may revoke an antidumping duty order or finding if the Secretary of Commerce concludes that it is no longer of interest to interested parties. Accordingly, as required by the Commerce Department's regulations (19 CFR 353.25(d)(4)), the Department is notifying the public of its intent to revoke this antidumping finding.

Opportunity to Object

No later than October 31, 1992, interested parties, as defined in § 353.2(k) of the Department's regulations, may object to the Department's intent to revoke this antidumping finding.

Seven copies of any such objections should be submitted to the following address: U.S. Department of Commerce, Import Administration, Central Records Unit, room B-099, Washington, DC 20230, Attn: Office of Agreements Compliance.

If interested parties do not request an administrative review by October 31, 1992, in accordance with the Department's notice of opportunity to request administrative review, or object to the Department's intent to revoke by October 31, 1992, we shall conclude that the finding is no longer of interest to interested parties and shall proceed with the revocation.

This notice is in accordance with section 19 CFR 353.25(d) of the Department's regulations.

Dated: September 29, 1992.

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

BILLING CODE 3510-DS-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Thailand

September 25, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: October 2, 1992.

FOR FURTHER INFORMATION CONTACT: Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927-6717. For information on embargoes and quota re-openings, call (202) 482-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limit for Categories 338/339 is being increased by the application of special shift. The limit for Categories 638/639 is being decreased to account for the increase.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 56 FR 60101, published on November 27, 1991). Also see 56 FR 58559, published on November 20, 1991.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

September 25, 1992.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on November 15, 1991, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Thailand and exported during the twelve-month period which began on January 1, 1992 and extends through December 31, 1992.

Effective on October 2, 1992, you are directed to amend further the directive dated November 15, 1991 to adjust the limits for the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and Thailand:

Category	Adjusted twelve-month limit [1]
Sublevels in Group II	
338/339	1,728,720 dozen.
638/639	1,561,620 dozen.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1991.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 92-23922 Filed 10-1-92; 8:45 am]

BILLING CODE 3510-DR-F

Adjustment of Import Limits for Certain Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in Bangladesh

September 25, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs increasing limits.

EFFECTIVE DATE: October 2, 1992.

FOR FURTHER INFORMATION CONTACT: Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482-4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927-5850. For information on embargoes and quota re-openings, call (202) 482-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain categories are being increased for carryforward.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 56 FR 60101, published on November 27, 1991). Also see 57 FR 1148, published on January 10, 1992.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

September 25, 1992.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on January 7, 1992, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Bangladesh and exported during the twelve-month period which began on February 1, 1992 and extends through January 31, 1993.

Effective on October 2, 1992, you are directed to amend further the directive dated January 7, 1992 to increase the limits for the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and the People's Republic of Bangladesh:

Category	Adjusted twelve-month limit [1]
340/640	2,208,759 dozen.
347/348	1,646,780 dozen.
847	523,738 dozen.

[1] The limits have not been adjusted to account for any imports exported after January 31, 1992.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List; Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions to Procurement List.

SUMMARY: The Committee has received a proposal to add to the Procurement List commodities to be furnished by a nonprofit agency employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: November 2, 1992.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202-3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed action. If the Committee approves the proposed addition, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodities listed below from a nonprofit agency employing individuals who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organization that will furnish the commodities to the Government.

2. The action will result in authorizing a small entity to furnish the commodities to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the commodities proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

It is proposed to add the following commodities to the Procurement List:

Inking Pad
- 7510-00-231-6531
- 7510-00-526-1740
- 7510-00-526-1742

Nonprofit agency: Cattaraugus County Chapter, NYSARC, Olean, New York.

Cleaning Compound, Rug and Upholstery
- 7930-00-113-1913
- 7930-00-724-9556

Nonprofit agency: The Lighthouse for the Blind, St. Louis, Missouri.

Trousers, Cold Weather
- 8415-01-099-7853
- 8415-01-099-7854
- 8415-01-099-7855
- 8415-01-099-7856
- 8415-01-099-7857
- 8415-01-099-7858
- 8415-01-099-7859
- 8415-01-099-7860
- 8415-01-099-7861
- 8415-01-099-7862

8415-01-100-1977

BILLING CODE 6820-33-M

Procurement List; Proposed Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed addition to procurement list.

SUMMARY: The Committee has received a proposal to add to the Procurement List a commodity to be furnished by a nonprofit agency employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: November 2, 1992.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202-3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 U.S.C. 47(a)(2) and 41 CFR 51-2.3. its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed action. If the Committee approves the proposed addition, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodity listed below from a nonprofit agency employing individuals who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organization that will furnish the commodity to the Government.

2. The action does not appear to have a severe economic impact on the current contractor for the commodity.

3. The action will result in authorizing a small entity to furnish the commodity to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the commodity proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

It is proposed to add the following commodity to the Procurement List:

Curtain, Vehicular
2540-00-402-2157

Nonprofit agency: Caddo County Sheltered Workshop and Activities Center, Inc., Anadarko, Oklahoma.

Beverly L. Milkman,

Executive Director.

BILLING CODE 6820-33-M

COMMODITY FUTURES TRADING COMMISSION

Coffee, Sugar & Cocoa Exchange; Proposed Amendments Relating to the Basis Quality and Quality Price Differentials Applicable to Deliveries for the Brazil Differential Coffee Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of Proposed Contract Market Rule Changes.

SUMMARY: The Coffee, Sugar & Cocoa Exchange ("CSCE") has submitted proposed amendments to its Brazil differential coffee futures contract that would: (1) Change the quality of Brazilian coffee that is deliverable at par ("basis type") and; (2) change the price differentials applicable to the delivery of certain specified non-par qualities of Brazilian coffee. In accordance with section 5a(12) of the Commodity Exchange Act and acting pursuant to the authority delegated by Commission Regulation 140.96, the Director of the Division of Economic Analysis ("Division") of the Commodity Futures Trading Commission ("Commission") has determined, on behalf of the Commission, that the proposed amendments are of major economic significance. On behalf of the Commission, the Division is requesting comment on this proposal.

DATES: Comments must be received on or before November 2, 1992.

ADDRESSES: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Reference should be made to the proposed amendments to the basis type and price differential for the Brazil differential coffee futures contract.

FOR FURTHER INFORMATION CONTACT: Frederick V. Linse, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581, telephone (202) 254-7303.

SUPPLEMENTARY INFORMATION: The existing terms of the Brazil differential futures contract provide for the delivery of three different qualities of Brazilian coffee: Type 1, Type 2 and Type 3.[1] The contract currently specifies that the basis or par grade of coffee deliverable on the contract is Type 2, while Type 1 is deliverable at a premium of 200 points (2 cents) per pound and Type 3 is deliverable at a discount of 400 points (4 cents) per pound.

Under the proposed amendments, Type 3 coffee would be designated as the basis or par grade. Type 2 coffee would be deliverable a premium of 200 points (2 cents) per pound and Type 1 would be deliverable at a premium of 400 points (4 cents) per pound. Accordingly, in addition to changing the par grade to Type 3, the proposed amendments will have the effect of reducing by 200 points (2 cents) per pound the price differential between Type 2 and Type 3 coffee.

The CSCE intends to make the proposed amendments effective within 30 days following its receipt of notice that the amendments have been approved with respect to all delivery months following the last delivery month in which there is an open position at such time and thereafter for any delivery month with open interest on the effective date whose open interest declines to zero after said date.

According to the CSCE, the proposed amendments are intended to re-align the pricing structure of the contract to more accurately reflect the cash market. The CSCE indicates that Type 3 coffee

[1] Type 1 coffee consists of coffee that meets the Santos 2/3 grade standards; Type 2 coffee meets the Santos 4 grade standards and Type 3 coffee meets the Santos 5 grade standards. All three types must originate in Brazil and meet the other requirements of the contract.

recently has been trading in the cash market at prices that are 100 to 200 points under cash prices for Type 2 coffee.

The Commission specifically is requesting comments regarding the extent to which the proposed revised schedule of quality price differentials falls within the range of commonly observed cash market price differences between the three deliverable types of Brazilian coffee.

Copies of the proposed amendments will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Copies of the amended terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by telephone at (202) 254–6314.

The materials submitted by the CSCE in support of the proposed amendments may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR part 145 (1987)). Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Act Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the proposed amendments should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581 by the specified date.

Issued in Washington, DC, on September 28, 1992.

Gerald Gay,

Director.

BILLING CODE 6351–01–M

DEPARTMENT OF DEFENSE

Office of the Secretary

Scientific Advisory Group on Effects (SAGE) Meeting

AGENCY: Defense Nuclear Agency, DoD.

ACTION: Notice of Change in Location of Scientific Advisory Group Meeting.

SUMMARY: The meeting notice for SAGE meeting to be held at Homestead AFB, Florida on October 20–22, 1992, as published in the **Federal Register** on August 27, 1992 (57 FR 38820) is amended to reflect the new location at Sequoia Plaza, Logicon, 2100 Washington Boulevard, Arlington, Virginia. The meeting dates remain unchange.

Dated: September 25, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 92–23899 Filed 10–1–92; 8:45 am]

BILLING CODE 3810–01–M

Office of the Secretary of Defense

Per Diem, Travel and Transportation Allowance Committee

AGENCY: Per Diem, Travel and Transportation Allowance Committee, DoD.

ACTION: Publication of changes in per diem rates.

SUMMARY: The Per Diem, Travel and Transportation Allowance Committee is publishing Civilian Personnel Per Diem Bulletin Number 164. This bulletin lists changes in per diem rates prescribed for U.S. Government employees for official travel in Alaska, Hawaii, Puerto Rico, the Northern Mariana Islands and Possessions of the United States. Bulletin Number 164 is being published in the **Federal Register** to assure that travelers are paid per diem at the most current rates.

EFFECTIVE DATE: October 1, 1992.

SUPPLEMENTARY INFORMATION: This document gives notice of changes in per diem rates prescribed by the Per Diem Travel and Transportation Allowance Committee for non-foreign areas outside the continental United States. Distribution of Civilian Personnel Per Diem Bulletins by mail was discontinued effective 1 June 1979. Per Diem Bulletins published periodically in the **Federal Register** now constitute the only notification of change in per diem rates to agencies and establishments outside the Department of Defense.

The text of the Bulletin follows:

FOOTNOTES

1/ Commercial facilities are not available. The meal and incidental expense rate covers charges for meals in available facilities plus an additional allowance for incidental expenses and will be increased by the amount paid for Government quarters by the traveler.

2/ Commercial facilities are not available. Only Government-owned and contractor operated quarters and mess are available at this locality. This per diem rate is the amount necessary to defray the cost of lodging, meals and incidental expenses.

MAXIMUM PER DIEM RATES FOR OFFICIAL TRAVEL IN ALASKA, HAWAII, THE COMMONWEALTHS OF PUERTO RICO AND THE NORTHERN MARIANA ISLANDS AND POSSESSIONS OF THE UNITED STATES BY FEDERAL GOVERNMENT CIVILIAN EMPLOYEES

3/ On any day when US Government or contractor quarters are available and US Government or contractor messing facilities are used, a meal and incidental expense rate of $16.25 is prescribed to cover meals and incidental expenses at Shemya AFB and the following Air Force Stations: Cape Lisburne, Cape Newenham, Cape Romanzof, Clear, Fort Yukon, Galena, Indian Mountain, King Salmon, Sparrevohn, Tatalina and Tin City. This rate will be increased by the amount paid for US Government or contractor quarters and by $4 for each meal procured at a commercial facility. The rates of per diem prescribed herein apply from 0001 on the day after arrival through 2400 on the day prior to the day of departure.

4/ On any day when US Government or contractor quarters are available and US Government or contractor messing facilities are used, a meal and incidental expense rate of $34 is prescribed to cover meals and incidental expenses at Amchitka Island, Alaska. This rate will be increased by the amount paid for US Government or contractor quarters and by $10 for each meal procured at a commercial facility. The rates of per diem prescribed herein apply from 0001 on the day after arrival through 2400 on the day prior to the day of departure.

5/ On any day when US Government or contractor quarters are available and US Government or contractor messing facilities are used, a meal and incidental expense rate of $25 is prescribed instead of the rate prescribed in the table. This rate will be increased by the amount paid for U.S. government or contractor quarters.

BILLING CODE 3810-01-C

Dated: September 28, 1992.

Department of the Army

U.S. Army Reserve Command Independent Commission Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee meeting:

Name of Committee: U.S. Army Reserve Command Independent Commission.

Date of Meeting: October 15, 1992.

Place: Pentagon, Secretary of the Army Conference Room, 2E687.

Time: 10-11:30 a.m.

Purpose: The Commission was established to assess the progress and effectiveness of the United States Army Reserve Command since its establishment.

Summary of Agenda: This is the final meeting of the Commission. The Commission will present its final report to the Secretary of the Army.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee at the time and in the matter permitted by the committee. Anyone desiring to appear before the committee should contact the staff for procedures.

Ellis L. Pennington,

LTC, FA, U.S. Army Reserve Command, Independent Commission.

BILLING CODE 3710-01-M

Change to the Proposed Test PPSO Sites

AGENCY: Military Traffic Management Command, DOD.

ACTION: Notice.

SUMMARY: The Military Traffic Management Command (MTMC) proposes to modify the PPSO test sites as originally published in the Federal Register (FR 28842), Military Traffic Management Command, Directorate of Personal Property, CONUS Automated Rate System (CARTS) Proposed Changes.

DATES: Comments must be received on or before October 5, 1992.

ADDRESSES: Headquarters, Military Traffic Management Command, ATTN: MTPP-CD, 5611 Columbia Pike, Falls Church, VA 22041-5050.

FOR FURTHER INFORMATION CONTACT: Mrs. Janet Nemier (703) 756-1190.

SUPPLEMENTARY INFORMATION: The proposed test PPSOs are revised as follows:

Location	No change/change
Camp Pendleton, CA	No change.
Fairchild AFB, WA	New versus MacDill AFB, FL.
Fort Benning, GA	No change.
Fort Riley, KS	No change.
Camp Lejeune, NC	No change.
NAU Scotia, NY	New versus NETC Newport, RI.
NSC Charleston, SC	No change.
JPPSO San Antonio, TX	No change.
NAS Pensacola, FL	New versus NAS Corpus Christi, TX.
Shaw AFB, SC	New versus Hill AFB, UT.
JPPSO Lewis, WA	No change.

These changes are based on factors reviewed by the military service to include installation operational considerations and TOPS automation capabilities.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

[FR Doc. 92-24022 Filed 10-1-92; 8:45 am]

BILLING CODE 3710-08-M

DEPARTMENT OF EDUCATION

[Docket Nos. 91-25-R, et al.]

Office of Administrative Law Judges; Intent To Compromise a Claim; Maine Department of Education

AGENCY: Department of Education.

ACTION: Notice of intent to compromise a claim.

SUMMARY: The Department intends to compromise claims against the Maine Department of Education now pending before the Office of Administrative Law Judges (OALJ), Docket Nos. 91-25-R, 91-98-R, and 92-49-R. (20 U.S.C. 1234a(j) (1988)).

DATES: Interested persons may comment on the proposed action by submitting written data, views, or arguments on or before November 16, 1992.

ADDRESSES: All comments concerning this notice should be addressed to Jaime Fernandez, Esq., Office of the General Counsel, U.S. Department of Education, 400 Maryland Avenue, SW., room 4091, FOB-6, Washington, DC 20202-4013.

FOR FURTHER INFORMATION CONTACT: Jaime Fernandez, Esq. Telephone: (202) 401-3690. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1-800-877-8339 (in the Washington, DC 202 area code, telephone 708-9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION: The claims in question arose from audits of the financial affairs and operations of the Maine Department of Education (State) for the fiscal years ending June 30, 1987, June 30, 1988, and June 30, 1989. The audits were performed by the State of Maine Department of Audit to fulfill the requirements of Office of Management and Budget Circular A-128. The audits included an evaluation of the State's internal control systems, including applicable internal administrative controls, used in administering Federal financial assistance programs. Among the systems examined was the State's system of maintaining time distribution records for employees who have multi-program responsibilities. Time distribution records show how an employee's time has been divided among his or her different program responsibilities. During the course of the audits, the auditors discovered that the State maintained no cost allocation plan or any system of time distribution records.

The audit for fiscal year (FY) 1989 also revealed that the State had misspent $5,869 in funds awarded under the Carl D. Perkins Vocational Education Act in that it did not allocate the cost of $5,869 for the installation of carpeting to other programs that had benefited from the expenditure, as required by OMB Circular A-87. Moreover, the State had charged the carpeting costs exclusively to the FY 1989 vocational education grant without demonstrating the allowability of the expenditure to the vocational education grant. Based on these findings, the authorized Department officials issued Program Determination Letters (PDLs) dated March 27, 1991, October 24, 1991, and March 31, 1992, demanding repayment of a total of $213,000 in Federal grant funds.

In failing to maintain time distribution records, the State violated sections 437 and 435(b)(5) of the General Education Provisions Act (GEPA). Section 435(b)(5) of GEPA (20 U.S.C. 1232d(b)(5)) states in relevant part that the State will use fiscal control and fund accounting procedures that will ensure proper disbursement of, and accounting for, Federal funds paid to the State under each program. In addition, the State violated the provisions of 34 CFR 74.61 and 34 CFR part 74, appendix C (OMB Circular A-87), Attachment II, B.10.b., which states in relevant part that salaries and wages of individual employees chargeable to more than one

grant program or other cost objective must be supported by appropriate time distribution records. In failing to support both the allowability and the allocability of the carpeting costs in question to the FY 1989 vocational education grant, the State violated 34 CFR 80.22 and OMB Circular A–87. The State appealed the Department's determination in these matters to the OALJ.

The Department proposes to compromise the full amount of the $213,000 claim or $97,935. In its response to the PDLs, the State gave assurances that it had corrected the systemic deficiencies that resulted in the claim and that the deficiencies will not recur. Future audits will determine whether the remedies instituted by Maine in response to the audit findings are being implemented in accordance with Federal requirements. Given these factors, the percentage of the claim to be repaid, and the risk and cost of litigating the claim through the appeal process, the Department has determined that it would not be practical or in the public interest to continue this proceeding.

The public is invited to comment on the Department's intent to compromise this claim. Additional information may be obtained by writing to Jaime Fernandez, Esq., at the address given at the beginning of this notice.

Program Authority: 20 U.S.C. 1234a(f).

Dated: September 28, 1992.

William D. Hansen,

Assistant Secretary for Management and Budget/Chief Financial Officer.

[FR Doc. 92–23918 Filed 10–01–92; 8:45 am]

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Floodplain Statement of Findings for Characterization Activities at the Department of Energy's Mound Plant

AGENCY: Department of Energy (DOE).

ACTION: Floodplain statement of findings.

SUMMARY: This Statement of Findings is prepared pursuant to Executive Order 11988 and 10 CFR part 1022, Compliance with Floodplain/Wetlands Environmental Review Requirements. On March 3, 1992, DOE published a "Notice of Involvement in Floodplain," 57 FR 7740; DOE has determined that some site characterization activities associated with the Mound Plant Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980 as amended Remedial Investigation/Feasibility Study (RI/FS) will be conducted within the 100-year Floodplain of the Great Miami River. These activities are required to comply with CERCLA. On the basis of the floodplains assessment for the proposed actions prepared pursuant to 10 CFR part 1022, DOE has determined that there is no practicable alternative to the proposed actions and that the proposed actions have been designed to avoid or minimize impacts on the floodplains.

During evaluation of alternatives and effects of these activities, DOE has determined that some property was inadvertently included in the Special Flood Hazard Area (SFHA) as shown on the National Flood Insurance Program (NFIP) map published by the Federal Emergency Management Agency (FEMA) in 1983. Under 44 CFR part 59, a request for a Letter Of Map Amendment has been filed with FEMA to remove the property from the SFHA and to amend the currently effective NFIP map. The property in question (see figure) is protected from the 100-year flood of the Great Miami River by an engineered levee spur that is part of the primary flood protection system constructed by the Miamisburg Conservancy District (MCD) The request is pending.

DATES: Any comments on the proposed floodplain actions must be received by October 19, 1992.

ADDRESSES: Send comments to: Statement of Findings Comments, Arthur Kleinrath, Dayton Area Office, U.S. Department of Energy, Post Office Box 66, Miamisburg, Ohio 45343, (513) 865–3597. Fax comments to (513) 865–4489.

For further information regarding the proposed action contact Arthur Kleinrath, Dayton Area Office.

For further information on DOE's floodplain/wetland review process, contact: Carol M. Borgstrom, Director, Office of NEPA Oversight, U.S. Department of Energy, 1000 Independence Ave., Washington, DC 20585, (202) 586–4600 or (800) 472–2756.

SUPPLEMENTARY INFORMATION: The projects that are part of the floodplain action include installation of piezometers and monitoring wells, drilling of soil boreholes, construction of a river stage gauge, and collection of small sediment and soil samples. In one project, piezometers would be installed to monitor ground-water levels in the underlying Buried Valley aquifer and correlate these with levels of river stage to measure the effects of the river on ground-water flow. This equipment would be installed within the levee structures that currently control the extent of the 100-year flood (see figure) and must be installed at the river's edge to perform properly. Except for the river stage gauge, the new installations would not normally be in contact with the river. Use of existing access roads would minimize effects of construction upon the floodplain. The piezometers would be constructed in accordance with requirements specified by the MCD and would be permitted by the MCD. Surface water and sediment samples would also be collected from the Great Miami River and its tributaries, but these collections would be performed with hand or portable sampling devices and will not require any permanent installations or construction activities.

In another project, piezometers, monitoring wells, and soil boreholes would be installed within the plant boundary along the piece of property that has been petitioned to be removed from the SFHA. This project is essential in order to scope and develop remedial actions that may be necessary to clean up a source of contamination and to monitor ground water for possible contaminant migration outside the plant boundary. The piezometer and monitoring well network is designed to monitor water levels and water quality at multiple depths within the Buried Valley aquifer. Surface and subsurface soil and sediment samples would also be collected in and adjacent to the area of possible contamination and within a small controlled stream, an abandoned segment of the Miami-Erie Canal that borders the floodplain. After sample collection, boreholes would be backfilled with impermeable bentonite clay grout to prevent infiltration. Wells and piezometers would be completed according to approved Environmental Protection Agency methods.

Based upon results of the investigations summarized above, other similar activities associated with the RI/FS may occur within the floodplain (see figure). These activities would include the following:

—Additional sampling based on positive findings;
—Additional monitoring well installations; and
—Geophysical surveys.

None of these activities would have an adverse effect on floodplain values.

As part of the RI/FS, an ecological assessment would be performed that includes a phased investigation of terrestrial and aquatic flora and fauna and habitat identification. The ecological assessment would be performed to evaluate threats to the environment, especially sensitive habitats and critical habitats of species protected under the Endangered Species

Act. The first phase of investigation would include an inventory of species. Later phases may require sampling and analysis of tissues to evaluate the potential accumulation of contaminants. As part of the first phase, a complete wetlands delineation will be performed that would require field verification and sampling of hydric soils. This investigation would have minimal effects on either the floodplain or associated wetlands as it typically involves only hand tools and no new construction. The proposed actions are categorically excluded from the preparation of an environmental assessment or an environmental impact statement under the DOE regulations for implementing the National Environmental Policy Act, 10 CFR part 1021, subpart D, appendix B3.1.

After assessment of the proposed actions, DOE has determined that there are no alternatives to the sampling and construction activities summarized. Sampling activities conducted as part of the RI under CERCLA are required to determine the nature and extent of potential contamination. DOE is obligated to conduct these activities under Section 120 of CERCLA and Executive Order 12580. The suspected source area is located on the eastern margin of the Buried Valley aquifer and construction of new piezometers and monitoring wells is essential to establish water quality and potential contaminant migration. Construction of the river stage gauge and the piezometers along the edge of the Great Miami River is essential to establish the effects of the river on the aquifer. Moreover, the piezometers are part of a larger ground-water monitoring network designed to establish ground-water flow in the Buried Valley aquifer on and adjacent to the plant. The alternatives considered were (1) use of exiting wells, (2) alternate well locations, and (3) no action. All of these alternatives were considered and rejected as the current monitoring network is insufficient to determine either the aquifer characteristic required or the extent of contamination.

The proposed actions would not have any adverse effects on floodplain values. The proposed piezometer and monitoring well installations would be performed in accordance with all applicable Federal, State, and district regulations and guidelines. Disturbances to the floodplain would be limited to the movement of drilling equipment during the installation of piezometers or monitoring wells. Existing roads would be used for access. Piezometers and monitoring wells will be completed with sealed and flushmount castings. Any disturbances to the drill site would be restored to previous conditions. No physical topographic features will be altered or created by any of the assessment activities described above. The proposed actions may indirectly benefit the area in the long-term because they would support the removal of contamination and may improve the habitat value and remediate any potential impacts to plants, animals, or residents in the area. DOE has also prepared a separate wetlands assessment; and, based on that assessment, the proposed action will not have an adverse impact on wetlands.

Prior to implementing the proposed floodplain action, DOE will endeavor to allow at least 15 days of public review after publication of the Statement of Findings.

Paul D. Grimm,

Principal Deputy Assistant Secretary fo Environmental Restoration and Waste Management.

Floodplain Statement of Findings for Site Characterization Activities at Operable Units 1, 2, 5, and 6 at the Rocky Flats Plant Near Golden, CO

AGENCY: Department of Energy (DOE).

ACTION: Statement of findings on floodplain assessment.

SUMMARY: Regulations at 10 CFR part 1022 require DOE to evaluate actions it may take in a floodplain, in order to ensure consideration of protection of the floodplain in decision making. As soon as practicable after a determination that a floodplain may be involved, the regulations require that public notice be published in the **Federal Register**, including a description of the proposed action and its location. DOE proposes to carry out site characterization activities, some of which would be within floodplains, at its Rocky Flats Plant (RFP) north of Golden, Colorado. These activities would be a part of DOE's effort to determine the existence, nature, and extent of any environmental contamination resulting from RFP operations.

DATES: Comments on the proposed action must be received by October 19, 1992.

ADDRESSES: All comments concerning this Statement of Findings or requests for copies of the Floodplain Assessment should be addressed to: Floodplain/Wetland Comments, Beth Brainard, Public Affairs Office, U.S. Department of Energy, Rocky Flats Office, Post Office Box 928, Golden, Colorado 80402–0928, Telephone: (303) 966–5993.

FOR FURTHER INFORMATION: For information on the proposed action, contact the address identified above. For information on floodplain/wetland environmental review requirements contact: Carol M. Borgstrom, Director, Office of NEPA Oversight, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC, Telephone: (202) 586–4600 or (800) 472–2756.

SUPPLEMENTARY INFORMATION: DOE proposes to carry out site characterization activities, some of which would be within floodplains at its RFP north of Golden, Colorado. These activities would be part of DOE's effort to determine the existence, nature, and extent of any environmental contamination resulting from RFP operations. The activities would occur in floodplains of Woman Creek, Walnut Creek and their tributaries. The site characterization activities that may be in floodplains consist of locating sampling stations, drilling wells and boreholes, and soil, soil gas, surface water, ground water and stream sediment sampling.

On April 21, 1992, the DOE published a "Notice of Involvement in Floodplains/Wetlands" (57 FR 14567) regarding its intent to undertake site characterization activities in floodplains and wetlands at its RFP north of Golden, Colorado. No comments were received, and DOE prepared an assessment of the impacts of the proposed action on floodplains and wetlands. This Statement of Findings summarizes the results of that assessment for floodplains. The assessment also shows that there would be no effect on wetland values.

Project Description

The site characterization activities covered in this document are those within a floodplain in operable units 1 (881 Hillside), 2 (903 Area), 5 (Woman Creek), and 6 (Walnut Creek). The activities would consist of (1) locating new surface water and sediment sampling stations, (2) drilling new wells and boreholes, (3) soil and soil gas sampling and (4) collecting surface water, ground water, and stream sediment samples. Each of these activities is described below.

Locating new surface water and sediment sampling stations consists of driving a stake in the ground to mark a spot which can be returned to for future sample collection. Virtually all surface water and stream sediment sampling would take place in a floodplain.

Drilling new water sampling wells involves driving a drilling rig to the designated site and drilling a hole, usually within a day. Wells are typically 4-to-6 inches in diameter. Approximately 24 wells would be drilled within a floodplain.

Soil and soil gas sampling would be accomplished by one of the following procedures. One soil sampling method is to collect a small quantity (2 to 3 tablespoons) of surficial soil by hand using a small instrument. The second soil sampling method is using a backhoe to dig pits that are typically 9 feet long, 5 feet wide, and 4 feet deep which are usually dug and backfilled within a day. Soil sampling pits may be located within a floodplain. Soil gas samples are obtained by inserting a collection device into a hand augered borehole, and sampling gases that escape from the soil.

Collection of water or sediment samples consists of driving or walking to a sampling site or well and collecting up to a few pounds of the desired medium by hand. Sampling may be done on a weekly, monthly, quarterly, or irregular basis.

There is no practicable alternative to locating portions of the proposed action in the floodplain. Surface water and stream sediment samples must by their very nature be obtained from within floodplains. Other proposed drilling, soil pit excavation, and sample collection targets would be chosen so that the resulting data present the clearest and most accurate picture of existing contamination conditions to provide a basis of future remediation activities. Characterization activities must occur in areas where contamination is thought to occur.

Alternatives Considered

Sample collection within floodplains is a part of the site characterization program required under the provisions of Comprehensive Environmental Response, Compensation and Liability Act, Resource Conservation and Recovery Act, and the Interagency Agreement. Both the statutes and the Agreement require cleanup of contaminated sites. This cleanup cannot be reasonably undertaken without field sampling to identify existing conditions. Therefore, the No-Action alternative is dismissed as unreasonable.

Among the highest concerns about contamination at RFP is the possibility of contaminated surface water and/or ground water posing a threat to municipal drinking water supplies. Therefore, sampling water is fundamental to identifying the nature and extent of contamination at RFP. Most surface water at RFP is in a floodplain. Thus it is virtually impossible to sample surface water without being in a floodplain. Similarly, sediments, which are typically in or under bodies of water, can be sampled only in a floodplain. The alternative of not sampling in a floodplain is dismissed as unreasonable, because it would not meet the need that prompted the proposed action.

The drilling program for ground water wells would be carefully designed to identify the characteristics of ground water and aquifers. Some holes are designed to delimit the edge of contaminant plumes, while other holes are needed to better understand the geology and hydrology in certain locations, and still others are needed to identify the contaminants that may exist underground. In each case, locations are carefully chosen to yield the best results by hitting specific targets. Floodplains at RFP can be up to 100- to 200-feet wide. Moving wells to get them out of the floodplain could seriously compromise the characterization program. Wells could be moved out of floodplains where

practicable, but there would still be cases where wells cannot be relocated without undermining the purpose of the characterization project. The alternative of not drilling in a floodplain is dismissed as unreasonable because it would not fulfill the purpose of the site characterization program.

Floodplain Considerations

The activities are consistent with the guidance provided by Section 42 of the Jefferson County, Colorado, zoning regulations. The State of Colorado defers regulation of floodplains to local governments.

Because none of the activities would have a positive or negative effect on the floodplain, few steps are needed to minimize potential harm to or within the floodplain. Travel within floodplains would be restricted to established roads and tracks where they are available.

A map showing the locations of the described activities is available on request from the Rocky Flats Office (see **ADDRESSES**, above).

Paul D. Grimm,

Principal Deputy Assistant Secretary for Environmental Restoration and Waste Management.

Wetland/Floodplain Assessment for Site Characterization Activities for Operable Units 1, 2, 5, and 6

Introduction

Site characterization activities are to be undertaken by the Department of Energy (DOE) at its Rocky Flats Plant (RFP) north of Golden, Colorado. The activities are to be carried out pursuant to requirements of the Comprehensive Environmental Response, Compensation and Liability Act and the Resource Conservation and Recovery Act, and as part of DOE's implementation of the Interagency Agreement between DOE, the Environmental Protection Agency, and the Colorado Department of Health. This site characterization involves sampling of soil, soil gas, stream sediments, surface water, and ground water to identify the presence, nature, and extent of contaminants, if any. The site characterization activities covered in this document are those in a floodplain/wetland in operable units 1 (881 Hillside), 2 (903 Area), 5 (Woman Creek), and 6 (Walnut Creek) and those under the site-wide Geologic Characterization Program.

Project Description

The site characterization activities will be in the floodplains/wetlands of Woman Creek, Walnut Creek, and their tributaries. Figures 1 through 14 of the categorical exclusion (RFO/CX025–91) prepared for this project show the location of surface water, sediment, ground water, soil and soil gas sampling sites, including those in floodplains/wetlands. The arrows on Figures 1, 3, and 6 through 11 show 24 sites where drilling may take place in a floodplain. The site characterization activities consist of (1) locating new surface water and sediment sampling stations, (2) drilling new wells, (3) collecting soil sample and soil gas samples, and (4) collecting surface water, ground water, and stream sediment samples. Each of these activities is described below.

Locating new surface water and sediment sampling stations consists of driving a stake in the ground to mark a spot which can be returned to for future sample collection. Virtually all surface water and sediment sampling will be in a floodplain, and most will also be in a wetland. New and existing surface water and sediment sampling sites are shown in the figures, noted by SW-xx and SED-xx respectively.

Drilling new wells involves driving a drilling rig to the designated site and drilling the hole, usually within a day. Wells are typically 4–6 inches in diameter. As the drill bit advances, drill cuttings are brought to the surface and shoveled into 55-gallon drums for analysis of contaminants, storage and ultimate disposal. When drilling is completed, surface evidence of the activity includes downed vegetation around the immediate site and an 8-inch metal pipe sticking 2–3 feet above the ground. Approximately 24 wells will be drilled within a floodplain. It is possible, but unlikely, that some of those could be in wetlands.

Soil and soil gas sampling can be accomplished by the following procedures. One soil sampling method is to collect a small quantity (2 to 3 tablespoons) of surficial soil using a hand-held sampling device. The second soil sampling method is to use a backhoe to dig pits that are typically 9 feet long, 5 feet wide, and 4 feet deep. These pits are generally dug and backfilled within a day. Soil sampling pits may be located within a floodplain but are typically not located in wetland areas. Soil samples will be collected from within some of the square plots shown in Figure 2 of the Categorical Exclusion. Therefore, soil samples taken from these plots have the potential to be taken from that part of the plot within a floodplain. Exact locations of soil sampling sites have not yet been determined. Surficial soil sampling sites may be located anywhere there is soil. Soil gas samples are obtained by dropping a sensing device down a hand augered borehole and sampling the gases released from the soil.

Collection of water or sediment samples consists of driving or walking to a sampling site or well and collecting up to a few pounds of the desired medium.

Floodplain/Wetlands Effects

Activities within floodplains/wetlands are of five types: Staking surface water and stream sediment sampling locations and taking samples; drilling new ground water sampling wells; collecting soil samples by hand; collecting soil samples using a backhoe; and collecting soil gas samples from a shallow auger hole. None of these activities will have a positive or negative, direct or indirect, long-term or short-term effect on the wetlands or floodplains. The activities will not affect lives or property and will not change the existing floodplain values. Activities that take place within wetlands will not have an effect on the survival, quality, or natural and beneficial values of the wetlands.

Alternatives

No-Action Alternative

Sample collection within floodplains and wetlands is part of the site characterization program required under the provisions of CERCLA, RCRA, and the IAG. Both the statutes and the Agreement require cleanup of contaminated sites. This cleanup cannot be reasonably undertaken without field sampling to identify existing conditions. Therefore, the No-Action alternative is dismissed as unreasonable.

No Sampling in Floodplains or Wetlands

Among the highest concerns about contamination at RFP is the possibility of contaminated surface water and/or ground water posing a threat to municipal drinking water supplies. Therefore, sampling water is fundamental to identifying the nature and extent of contamination at RFP. Most surface water at RFP is in a floodplain and also in wetland areas. Thus, it is virtually impossible to sample surface water without being in a floodplain and a wetland. Similarly sediments, which are typically in or under bodies of water, can be sampled only in a floodplain and most often a wetland. This alternative is dismissed as unreasonable because it will not meet the need that prompted the proposed action.

No Drilling in Floodplains or Wetlands

The drilling program for ground water wells will be carefully designed to identify the characteristics of ground water and aquifers. Some holes are designed to delimit the edge of contaminant plumes, while other holes are needed to better understand the geology and hydrology in certain locations, and still others are needed to identify the contaminants that may exist underground. In each case, locations are carefully chosen to yield the best results by hitting specific targets. Because most of the wetlands at RFP tend to be either linear or very small, moving a well a few feet can avoid a wetland without compromising the integrity of the program or affecting the results. Well locations will be moved outside wetlands where possible. There will be cases where a well cannot be relocated or not relocated far enough to avoid a wetland, and, in such cases, the well will be completed in the wetland. The drilling program is expected to result in no adverse impacts to wetlands at RFP. Floodplains at RFP tend to be much larger than wetlands: generally 100- to 200-feet wide. Moving wells to get them out of the floodplain could seriously compromise the characterization program. Wells will be moved out of floodplains where practicable, but there will be cases where wells cannot be relocated without undermining the purpose of the characterization project. This alternative is dismissed as unreasonable because it would not fulfill the purpose of the site characterization program.

BILLING CODE 6450-01-M

Floodplain Statement of Findings for the Proposed Resource Conservation and Recovery Act and Comprehensive Environmental Response, Compensation, and Liability Act Characterization and Remediation Studies in Operable Units 3, 4, 7, and 9 at the Rocky Flats Plant, Golden, Colorado

AGENCY: Department of Energy (DOE).

ACTION: Floodplain statement of findings.

SUMMARY: The U.S. Department of Energy (DOE) presents this Statement of Findings of Floodplain Assessment prepared pursuant to Executive Order 11988 and 10 CFR 1022, Compliance with Floodplain/Wetlands Environmental Review Requirements. DOE has determined that some activities associated with the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA) Remedial Investigation/Feasibility Study and the Resource Conservation and Recovery Act of 1976 (RCRA) Facility Investigation/Corrective Measures Study processes for Operable Units 3, 4, 7, and 9 are proposed to be within the 100-year floodplains of North and South Walnut Creeks. On the basis of the Floodplain/Wetlands Assessment for the proposed actions prepared pursuant to 10 CFR 1022, DOE expects that the project would have no positive or negative effects on the floodplain. There is no practicable alternative to the proposed actions, and the proposed actions have been designed to avoid or minimize on the floodplains.

DATES: Comments on the Statement of Findings must be postmarked by October 19, 1992.

ADDRESSES: All comments concerning this Statement of Findings or requests for copies of the Floodplain Assessment should be addressed to: Beth Brainard, Public Affairs Office, U.S. Department of Energy, Rocky Flats Office, Post Office Box 928, Golden, Colorado 80402-0928, Telephone: (303) 966-5993.

FOR FURTHER INFORMATION: For information on the proposed action, contact the address identified above. For information on floodplain/wetland environmental review requirements contact: Carol M. Borgstrom, Director, Office of NEPA Oversight, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone: (202) 586-4600 or (800) 472-2756.

SUPPLEMENTARY INFORMATION: On May 8, 1992, DOE published (57 FR 19890) a Notice of Floodplain Involvement and opportunity to comment on the proposed action. No comments were received, and DOE proceeded to assess the impacts of the proposed action. No comments were received, and DOE proceeded to assess the impacts of the proposed action during and after its implementation.

The proposed action is to perform site characterization activities for four operable units in floodplains at Rocky Flats Plant north of Golden, Colorado. This work is being undertaken as part of cleanup actions under CERCLA and RCRA. The site characterization activities covered in this document are those within a floodplain in Operable Units 3 (Off-Site Areas), 4 (Solar Evaporation Ponds), 7 (Present Landfill), and 9 (Original Process Waste Lines). The work is described in detail in the work plans for the operable units.

The site characterization involves sampling of soil, sediments, surface water, ground water, air, flora, and fauna to establish the presence and identify the nature and extent of contaminants that have been released to the environment. These characterization activities are briefly described as follows:

Soil Sampling.—Soil samples would be collected by hand either from the upper 3 inches of the ground surface or from sampling pits excavated by backhoe. Soil sample cores would also be obtained from soil boreholes drilled to collect the samples.

Surface Water and Sediment Sampling.—Surface water and sediment samples are proposed to be collected using hand-held instruments from streams, lakes, ditches, and impoundments on the plant site.

Ground Water Sampling.—Ground water samples would be obtained from existing water sampling wells, and new wells drilled to support characterization.

Air Sampling and Meteorological Monitoring.—Meteorological towers and air sampling stations would be installed to track patterns and sample air quality. Portable wind tunnels would be used to test the susceptibility of the lake bed sediments to wind transportation.

Sampling of Flora and Fauna.—Vegetation would be sampled by clipping vegetation to document the plant populations present and provide samples for analysis. Fauna would be sampled by live trapping to establish population numbers and provide tissue samples for analysis.

Some of the activities that constitute the proposed action, including sediment and surface water sampling and the wind tunnel tests, must be undertaken in a floodplain. The locations of other activities are dictated by the scientific needs of the project. Sampling, including drilling wells and boreholes and digging soil sample pits, must take place in locations that would provide the information about contaminant location, direction of movement, terrain, geology, subsurface hydrology, locations of surface water bodies, and other factors.

The no-action alternative, where no characterization within the floodplains occurs, is not viable because Remedial Investigation and RCRA Facility Investigation are required under CERCLA, RCRA, and the Interagency Agreement with the Environmental Protection Agency and the Colorado Department of Health.

The activities are consistent with the guidelines provided by section 42 of the Jefferson County, Colorado, zoning regulations. The State of Colorado defers regulations of floodplains to local governments.

Because the proposed action is not expected to have a positive or negative effect on floodplains, few steps are

needed to minimize potential harm to or within the floodplain. Travel within floodplains during characterization activities would be restricted to established roads and tracks where they are available. Activities would be scheduled to the extent possible to avoid high soil moisture conditions when vehicles might cause excessive damage to the terrain.

Maps showing the locations of the described activities are available on request from the Rocky Flats Office (see **ADDRESSES** above).

Paul D. Grimm,

Principal Deputy Assistant Secretary for Environmental Restoration and Waste Management.

Floodplain Assessment for Site Characterization Field Work in Operable Units 3, 4, 7, and 9 at the Rocky Flats Plant near Golden, Colorado

The Department of Energy (DOE) proposes a project at the Rocky Flats Plant (RFP), located north of Golden, Colorado, portions of which would take place within 100-year floodplains. The location of RFP is shown in Figure 1. The project is the collection of surface water, ground water, soil, sediment, and air samples to identify the nature and extent of contamination. In addition, field surveys and sampling of terrestrial and aquatic biota would be conducted. The site characterization work would be located in Operable Unit (OU) 3 (Off-Site Areas), OU 4 (Solar Evaporation Ponds), OU 9 (Original Process Waste Lines), and OU 7 (Present Landfill) and would start in 1992. Most of the work is expected to occur during 1992, through some would continue into 1993 and later.

Project Description

OU 3

OU 3 is located on lands adjacent to the RFP site immediately to the east of the Plant's buffer zone as shown in Figure 2. Vertical soil profile trenches, measuring approximately 9 feet long, 5 feet wide and 4 feet deep, would be dug by a backhoe. Exact locations of the trenches have not been determined, but six trenches are proposed in the general locations shown in Figure 3 which could place them in a floodplain. Eleven samples would be collected from various depths in each trench. A trench can usually be dug and backfilled within a day. The soil removed from the trench would be used to backfill it.

Surficial soil samples would be collected within approximately 12 miles of RFP as shown in Figure 4. Surface soil scrapes would be taken with a small, hand-held device which collects 2 to 3 tablespoons of soil from the top one-quarter inch of the ground. Twenty-five soil scrapes would be taken from each of 60 10-acre areas on or adjacent to RFP. Virtually any of the soil scrapes has the potential to be taken from within a floodplain.

Sediment samples would be obtained in OU 3 from the sites indicated in Figure 5. Sediment sampling involves single or repeated visits to sampling stations to collect up to a few pounds of sediments manually. Both new and existing sediment sampling stations would be used. A new sediment sampling station is established by driving a metal fence post into the ground to mark a site which can be returned to in the future. Some of the sediment sampling stations are, or would be, located on streams or ditches while other would be located on the shores or under the waters of ponds, lakes, or reservoirs. Vertical sediment profile samples would be taken from reservoir bottoms by dropping a tube through the water into the sediment. The bottom of the tube closes and up to 3 feet of sediment can be withdrawn for analysis. Sediment grab samples would also be taken from the top 2 to 3 inches of reservoir bottoms. By their nature, all sediment sampling stations and sediment sample collection activities would be in floodplains.

Surface water would be sampled at the locations shown in Figure 6. Surface water sampling involves single or repeated visits to sampling locations to gather up to a few gallons of water. Both new and existing surface water sampling stations would be used. A new surface water sampling station is established by driving a metal fence post into the ground to mark a site which can be returned to in the future. Some of the surface water sampling stations are, or would be, located on streams or ditches while other would be located on the shores or waters of ponds, lakes, or reservoirs. By their nature, virtually all surface water sampling stations and sample collection activities would be in floodplains.

Four new ground water monitoring wells would be drilled within OU 3. Two would be immediately below the dams of both Great Western Reservoir and Standley Lake as shown in Figure 7. These locations are in the floodplains of Walnut and Big Dry Creeks respectively. In well drilling, the advancing drill bit produces cuttings which are shoveled into drums pending analysis for contaminants, storage, treatment, and ultimate disposal. Wells are characteristically on the order of 6 inches in diameter and 15 to 60 feet deep, though some may be deeper. Once the well is in place, a casing is installed to ensure the integrity of the well and enable the well to draw water from the intended depths. When they have served their purpose, the wells would be abandoned in accordance with RFP standard operating procedures (plugging and capping). To collect water samples from ground water monitoring wells, a collection device is lowered into a well where it fills with water. The device is then pulled back to the surface, and the water is poured into another container.

Site characterization work at OU 3 would include establishment and operation of air and meteorological monitoring stations. Three types of air sampling and meteorological monitoring would occur at OU 3. The locations of all three activities are shown in Figure 7. The first activity would be installation of three new, high-volume air samplers. Two of the samplers would be located at Standley Lake while the third would be at a site to be selected in a residential area near the lake. An air sampler is a piece of equipment housed in a stainless steel box approximately 2 feet on each side. Installation of an air sampler involves pouring a concrete pad on which the air sampler is mounted and bringing electric power to the site. The concrete pads and the samplers would be removed when the study is completed. One of the samplers would be located in or near the southwestern floodplain of Standley Lake but in an area unlikely to be inundated by anything other than a large (50 to 100 year) storm event.

The second activity is installation of two new meteorological monitoring stations. Each of the stations consists of a 6-meter tower on a small concrete pad. The towers may be fenced for protection if necessary. Each tower would hold instruments to measure meteorological characteristics and may be supported by guy wires. One of the meteorological towers would be located at a terrestrial site approximately a mile east of the eastern RFP, south of Great Western Reservoir. The second meteorological tower would be co-located with the air sampler that is in or near the southwestern floodplain of Standley Lake.

The third activity in the OU 3 air sampling program is use of small and medium-sized portable wind tunnels to characterize and measure the ability of winds at various speeds to move sediments on the exposed areas of the Standley Lake bed. The wind tunnels would be mounted on a small trailer and have an open-floored test section which would be placed over the surface of the lake bed to be tested. Air would be drawn through the test section at controlled velocities. The air stream would pass through a duct fitted with a filter which would collect particulates raised from the lake bed by the wind. The particulate samples would be sent to a laboratory to identify their volume and constituents. Six tests would be conducted at each of three sites in late summer when soil moisture is generally at its lowest level. Each of the tests would take about 1 day. One site would be on the bed of Standley Lake, the second on the bed of Great Western Reservoir, and the third on an unidentified upland site south of Great Western Reservoir.

Terrestrial and aquatic biota sampling in OU 3 are presented in Figure 8. The samples would be gathered using standard collection techniques such as vegetative clipping, live animal trapping, and field surveys to make population counts. These activities would continue for a year. Flora and fauna samples would be collected from floodplains.

OU 4

The location of OU 4 is shown in Figure 9. Site characterization work at OU 4 would include three types of field work that would take place within floodplains. There are approximately 35 surficial soil sample locations within OU 4 shown in Figure 11. At each location, two 1-meter square areas would be staked out 1 meter apart. Samples would be collected from within each square from a depth of up to 1 inch with either a plug-type collector or a scoop. Three of the surficial soil sample locations are located in the Walnut Creek floodplain.

Borehole drilling in unconsolidated material is the third type of activity that would take place in the North Walnut Creek floodplain at OU 4. Four boreholes would be drilled in the floodplain on the south side of North Walnut Creek at the locations presented in Figure 14. A drill rig would be driven to the site and used to drill the boreholes. Boreholes are characteristically 8 inches in diameter and 15 to 60 feet deep, though some may be deeper. Each borehole can usually be drilled within a day. During drilling, the advancing drill bit produces a core of soil and/or rock, which is preserved for analysis, and drill cuttings which are shoveled into drums pending analysis for contaminants, storage, treatment, and disposal. When drilling is completed, surface evidence of the activity is downed vegetation around the immediate site and a 6-inch pipe extending 2 to 3 feet above the ground. Some boreholes may be completed as wells by installing a well casing and screen. When they have served their purpose, boreholes and wells would be abandoned in accordance with RFP standard operating procedures (plugging and capping).

Finally, samples of flora and fauna would be taken at selected sites in OU 4, some in the floodplain. Representative locations are shown in Figure 15.

OU 9

The location of OU 9 is shown in Figure 16. The OU consists of a system of underground pipelines, shown as dashed lines in the Figure. Field work at OU 9 that would be in a floodplain is limited to flora and fauna sampling and the possibility of some excavation at the extreme eastern end of the OU in the headwaters of South Walnut Creek as indicated in Figure 17. Flora and fauna sampling activities would be the same as those undertaken in OU 3 (shown in Figure 18).

Certain portions of OU 9 extend east of the Protected Area (PA). The high security area of RFP, and may enter the floodplain of Walnut Creek or South Walnut Creek. It is not clear from existing documents whether the pipeline system in this area has already been removed, so field work may be undertaken along the length of the two eastern ends of the lines to determine if they still exist. One of these lines is believed to terminate near South Walnut Creek between the two security fences and may be in the floodplain in that area. The second line may extend along the top of the ridge for a distance of approximately 2,000–2,500 feet east of the PA fence, possibly as far as Pond B–3. If it still exists, a portion of this line could also be in a floodplain. Field work along both lines would consist of backhoe excavations on 200-foot centers approximately 4 feet wide by 10 feet long by up to 11 feet deep to determine how far the pipeline extends. Soil samples would be taken from the excavations where a pipeline is found.

OU 7

OU 7, the Present Landfill is located approximately 1,300 feet north-northwest of the parking lot on the northern edge of the Plant's PA on a ridge above Walnut Creek. The site is shown in Figure 19. Field work at OU 7 during 1992–1993 would be limited to two types of sampling. At the locations indicated by the letter "V" on Figure 19, vegetation and soil samples would be collected. Approximately four of those locations are in or near a floodplain. Soil samples would be collected with a hand held device from the top 2 to 3 inches of the ground. The sites indicated by an "A" are aquatic sites, all of which are in a floodplain. Water, flora, fauna, and sediment samples would be collected at each of these sites. Water and sediment samples would be up to a few quarts of water and a few pounds of sediments and would be collected by hand.

Effects

Because of the non-invasive character and short duration of the floodplain activities of this project, it is expected that the project would have no positive or negative, direct or indirect, or long-term effects on floodplains. Short-term effects would include the crushing or clipping of small areas of vegetation and the disturbance of small areas of soil from the excavation of soil test pits. None of the site characterization activities would have any affect on lives or properly or on the natural and beneficial values of the floodplains.

Alternatives

DOE is required by statute (Comprehensive Environmental Response, Compensation and Liability Act and Resource Conservation and Recovery Act) and by Agreement (Interagency Agreement with the Environmental Protection Agency and the Colorado Department of Health) to clean up contaminated areas at RFP. Cleanup activities cannot be initiated until the sites to be cleaned have been characterized to identify the nature and extent of the contamination and the physical characteristics of the site. The activities that constitute this project are designed to accomplish this end. Developing alternatives to the site characterization must take place in the areas that are thought to be contaminated. Sampling activities have been located outside floodplains to the maximum extent possible. Therefore no alternative to the proposed sampling within floodplains is practicable.

Standard operating procedures that would be employed to avoid impacts to the floodplains during this project are:

1. All vehicles would stay on established roads or tracks to the maximum extent feasible.

2. Activities would be scheduled to the extent possible to avoid high soil moisture condition when vehicles might cause excessive damage to the terrain.

[FR Doc. 92–23867 Filed 10–1–92; 8:45 am]
BILLING CODE 6450–01–M

Floodplain Statement of Findings for the Sitewide Treatability Study Rocky Flats Plant, Golden, Colorado

AGENCY: Department of Energy (DOE).

ACTION: Floodplain statement of findings.

SUMMARY: This is a Statement of Findings prepared pursuant to Executive Order 11988 and 10 CFR Part 1022, Compliance with Floodplain/Wetlands Environmental Review Requirements. The Site-Wide Treatability Study (the proposed action) would evaluate 10 technologies for cleaning up soil, ground water, and surface water at sites at which hazardous and/or radioactive material has been released to the natural environment at the Rocky Flats Plant (RFP). Some activities associated with this study would occur in floodplains. DOE does not expect any of the activities to have a positive or negative effect on any floodplain.

Doe is presently engaged in a program to clean up each contaminated location under an Interagency Agreement (IAG) with the U.S. Environmental Protection Agency and the Colorado Department of Health. Cleanup actions must be undertaken pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) or the Resource Conservation and Recovery Act (RCRA). The purpose of the Site-Wide Treatability Study is to identify treatment technologies that can be applied to cleaning up RFP as specified in the IAG. A Site-Wide Treatability Study is being undertaken to avoid the duplication of performing separate treatability studies for each cleanup action in the IAG.

Sixteen Operable Units (OUs) have been established at RFP. OUs are administrative groupings of individual hazardous substance sites that have been identified at RFP. Each OU will be studied to characterize the nature and extent of contamination present to determine the present risk to the environment and human health. Where those risks are unacceptably high, technologies suitable for remediating the OUs to a level that is acceptable will be identified. The Proposed Action will help DOE identify the most effective, efficient, and appropriate technologies for use at the OUs. Without a comprehensive site-wide study, treatability tests would have to be repeated at each OU, adding significant time and expense to the program without any offsetting benefits.

DATES: Comments on the Statement of Findings must be postmarked by October 19, 1992.

ADDRESSES: All comments concerning this Statement of Findings or requests for copies of the Floodplain/Wetland Assessment should be addressed to: Floodplain/Wetland Comments, Ms. Beth Brainard, Public Affairs Office, U.S.

Department of Energy, Rocky Flats Plant, Post Office Box 928, Golden, CO 80402–0928, Telephone 303–966–5993.

FOR FURTHER INFORMATION CONTACT: For information on the proposed action, contact the address above. For information on floodplain/wetland environmental review requirements contact: Carol M. Borgstrom, Director, Office of NEPA Oversight (EH–25), U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone 202–586–4600 or (800) 472–2756.

SUPPLEMENTARY INFORMATION: On March 30, 1992, DOE published in the Federal Register (57 FR 10754) a Notice of Floodplain/Wetland Involvement an opportunity to comment on the Site-Wide Treatability Study. No comments were received, and DOE proceeded to assess the impacts of the proposed action during and after its implementation. On the basis of the Floodplains/Wetlands Assessment for the proposed activity, prepared pursuant to 10 CFR 1022.12, the DOE has determined that there is no practicable alternative to the proposed alternative and that the proposed activities have been designed to avoid or minimize impacts on the floodplains.

The Proposed Action consists of the laboratory testing of 10 remediation technologies for use on water and soil. The rationale for selection of individual technologies and general methods for performing the Site-Wide Treatability Study are described in the "Final Site-Wide Treatability Study Plan" dated June 3, 1991. Only the portion of the study which would involve floodplains, such as soil and water sampling, is described in this Statement.

The total volume of water samples to be collected is approximately 300 gallons. These water samples will be collected from existing wells and surface water sampling locations. It may be necessary to drill new wells if water samples of adequate size and quality cannot be obtained from the existing wells. All of the surface water sample locations and some of the existing water wells will be located within 100-year floodplains along Woman and Walnut Creeks.

Soil samples may be taken within floodplains. Soil samples will typically be gathered by hand with shovels from the top 10–20 centimeters of soil. A backhoe may be used if the appropriate quality of soil samples cannot be obtained by shovel. Total volume of soil samples to be collected is approximately 1,650 gallons or 30 55-gallon drums.

Alternatives Considered

The No-Action alternative would consist of not performing any treatability tests and, therefore, no sampling. This alternative is not considered acceptable because remediation of a site cannot reasonably be pursued without identifying and testing the technologies to be used to effect the cleanup. In addition, RCRA and CERCLA require the cleanup of contaminated sites, and this alternative would not be consistent with the IAG among DOE, the State of Colorado, and the Environmental Protection Agency to remediate the 16 OUs at RFP. Thus, the No-Action alternative is not acceptable.

Another alternative would have excluded sampling of any kind from the floodplains. Such an alternative would have made the collection of surface water and sediment samples impracticable. Drilling of new wells or boreholes would also have been precluded from the floodplain, thus compromising the integrity of the sampling. This alternative was eliminated as unreasonable.

A third alternative would have allowed all sampling except the drilling of new wells or boreholes since that element would be the most invasive. As in the above alternative, the integrity of the sampling would have been compromised so this alternative was likewise eliminated.

Floodplain Considerations

Acquisition of water samples and conduct of the Site-Wide Treatability Study is anticipated to have no significant effect on floodplains where samples are collected. Samples will be collected from existing sampling locations to the greatest extent possible. It may be necessary to drill additional wells if the existing sampling locations are not able to provide the necessary ground water samples, but this is not expected. The quantities of water to be taken (approximately 300 gallons from different locations at different times) are very small and their withdrawal will not have a measurable effect on water resources. All sample acquisitions will follow RFP procedures.

Hand sample gathering is likely to occur within the floodplains of Woman and/or Walnut Creek. Such sampling will not impact the present or future condition of those floodplains.

The activities are consistent with the guidelines provided by Section 42 of the Jefferson County, Colorado, zoning regulations. The State of Colorado defers regulations of floodplains to local governments.

Maps showing the locations of this proposed work are available from the Rocky Flats Office (see **ADDRESSES**, above.)

Paul D. Grimm,

Principal Deputy Assistant Secretary for Environmental Restoration and Waste Management.

Floodplain/Wetland Assessment Implementation of the Site-Wide Treatability Study

Introduction

A Site-wide treatability Study is to be undertaken by the Department of Energy (DOE) at its Rocky Flats Plant (RFP) north of Golden, Colorado. This study is being undertaken in support of activities that are being carried out under the requirements of the Comprehensive Environmental Response, Compensation and Liability Act and the Resource Conservation and Recovery Act, and as part of the implementation of the Interagency Agreement among DOE, the Environmental Protection Agency, and the Colorado Department of Health. The study involves collection of samples of contaminated ground water, surface water, sediments, and soil which will be taken to on- and off-site laboratories. In the laboratories, various technologies will be applied to the samples to test their ability to remove or neutralize the contaminants. All tests will be indoors and will be conducted as small-scale jar/beaker or bench-scale tests.

Project Description

The proposed action is a 3-year program consisting of the laboratory testing of approximately 10 remediation technologies. "Laboratory testing" means that tests will be conducted inside laboratories using quantities of sample material and agents that will fit in laboratory-scale or bench-scale studies, as distinguished from pilot-scale or full-scale studies involving much larger samples, larger equipment, and testing in the field. Pilot- and full-scale studies are not part of the proposed action.

The portion of the proposed action that will occur in floodplains and/or wetlands is the obtaining of samples of surface water and sediments. In addition, some ground water and soil samples may also be taken from within floodplains and/or wetlands.

Water samples will be collected from existing boreholes and surface water sampling locations on Operable Units 1 (881 Hillside Area), 2 (903 Pad Area), 3 (Off-Site Areas), 4 (Solar Evaporation Ponds), 5 (Woman Creek), 6 (Walnut Creek), and/or 7 (Present Landfill) and the South Interceptor Ditch.

It may be necessary to drill new boreholes if samples of adequate size and quality cannot be obtained from existing boreholes. It is possible, but not expected, that up to 10 new boreholes or wells could be drilled, some of which might be in a floodplain or wetland. Drilling a new borehole or well involves driving a drilling rig to the selected site and drilling the hole, usually within a day. Wells are typically 20 to 60 feet deep. As the drill bit advances, drill cuttings are brought to the

surface where they are shoveled into metal drums. The drums of cuttings are either saved as samples to be tested or are stored pending analysis and appropriate disposal. The surface signs of a new well or borehole are downed vegetation in the immediate areas of the hole and a pipe sticking 2 to 3 feet above the ground.

Drilling of wells and boreholes is the most invasive element of the proposed action. It is expected that the necessary soil and ground water samples can be obtained from existing holes; but, if this proves not to be case, additional holes will be drilled. No specific locations have been identified at this time, since the action not expected. If such holes do prove necessary, every effort will be made to site such holes outside of floodplains and wetlands. Because most wetlands at RFP tend to be either linear or very small, moving a well a few feet can avoid a wetland, usually without compromising the integrity of the program or affecting the results. Based on the description of drilling presented above, drilling in wetlands is not expected to have a negative effect on the wetland beyond the temporary downing of vegetation.

Floodplains at RFP tend to be much larger than the wetlands: often 100 to 200 feet wide. Consequently, moving a well out of the floodplain may be more difficult. Wells will be located out of floodplains where practicable, but there may be cases where a well is drilled in a floodplain. Based on the description of drilling presented above, drilling in floodplains is not expected to have a negative affect on the floodplain beyond the temporary downing of vegetation.

Individual samples of surface water are expected to average about 2 liters. Individual ground water samples will be somewhat larger. Total volume of water samples planned to be collected during the study is approximately 1,200 liters. Samples will be taken at various times during the study and from various locations at wells, seeps, and ponds. Appropriate RFP standard operation procedures for obtaining soil samples will be used, regardless of the sample gathering method used.

After collection, all samples will be appropriately packaged and sent to the on- or off-site laboratory where the relevant test is to take place.

None of the activities are expected to have a positive or negative, direct or indirect, long- or short-term effect on any floodplain or wetlands. The activities will not affect lives or property and will not change existing floodplain values. Activities that take place within wetlands will not have any effect on the survival, quality, or natural and beneficial values of the wetlands.

Alternatives

No-Action Alternatives

The No-Action alternative is to not undertake the Site-Wide Treatability Study. Such studies form the basis for identifying techniques for remediating contaminated sites, and failure to undertake such studies is likely to result in failure to identify a workable, or the optimum, remediation technology for use in various conditions. The negative environmental consequences of such a situation are very likely to be far greater than the minimal environmental effects of the proposed action.

No Sampling in Floodplains or Wetlands

Implementation of this alternative would necessarily preclude the gathering of surface water and sediment samples, making impossible the testing of means to clean these two types of environmental media. This alternative is dismissed as unreasonable on this account.

No Drilling in Floodplains or Wetlands

The possible drilling of new wells/boreholes is the most invasive element of the proposed action. The proposed action will minimize the number of new holes drilled and will attempt to locate any new holes outside of wetlands/floodplains. Drilling no new holes in wetlands/floodplains may occur under the proposed action, but committing to drilling no new holes in wetlands/floodplains could compromise the integrity of the study in the unlikely case that the only suitable sample of contaminated media happened to be located in a wetland/floodplain. Such a commitment would accomplish little, anyway, since the effects of drilling in a wetland/floodplain are considered to be negligible and temporary.

Williams Natural Gas Co.; Tariff Sheet Filing

September 28, 1992

Take notice that on September 15, 1992, Williams Natural Gas Company (Williams), P.O. Box 3288, Tulsa, Oklahoma 74101, filed revised tariff sheets to become effective November 1, 1992, pursuant to § 281.204(b)(2) of the Commission's Regulations which requires interstate pipelines to update their respective index of entitlements annually to reflect changes in priority 2 entitlements (Essential Agricultural Users).

Pipeline, Docket No. and Tariff Sheets

Williams Natural Gas Company	Second Revised Sheet
TC92-13-000	Nos. 265-269
Filed: September 15, 1992	

Any person desiring to be heard or to make any protest with reference to said tariff sheet filing should on or before October 8, 1992, file with the Federal Energy Regulatory Commission, Washington DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

[FE Docket No. 92–100–NG]

Orange and Rockland Utilities, Inc., Application for Long-Term Authorization to Import Natural Gas From Canada

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of application.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt of an application filed by Orange and Rockland Utilities, Inc. (Orange and Rockland), on July 31, 1992, as supplemented August 24, 1992, for authorization to import up to 25,000 Mcf of natural gas per day from Canada. The gas would be imported from KannGaz Producers, Ltd. (KannGaz), at Niagara Falls, New York, under a gas purchase agreement with an initial term beginning December 1, 1992, and extending to October 31, 2002. The proposed authorization would enable Orange and Rockland, a sales customer of Tennessee Gas Pipeline Company (Tennessee), to import this gas directly from Tennessee's Canadian supplier.

The application is filed under section 3 of the Natural Gas Act (NGA) and DOE Delegation Order Nos. 0204–111 and 0204–127. Protests, motions to intervene, notices of intervention and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., eastern time November 2, 1992.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–056, FE–50, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9478.

FOR FURTHER INFORMATION CONTACT:

Thomas Dukes, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–094, FE–53, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9590

Lot Cooke, Office of Assistant General Counsel for Fossil Energy, U.S. Department of Energy, Forrestal Building, room 6E–042, GC–14, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–0503

SUPPLEMENTARY INFORMATION: Orange and Rockland is a combination electric utility and natural gas distribution company operating in the States of New York and New Jersey with executive offices in Pearl River, New York. The proposed natural gas imports would be used by Orange and Rockland for its system supply for resale to residential, industrial, and commercial end-users, including non-utility electric generators, and for use in Orange and Rockland's own retail electric generation facilities. The imports proposed in this application are volumes Tennessee previously purchased from KannGaz and resold to Orange and Rockland under Tennessee's existing import authorization granted in DOE/FE Opinion and Order No. 195–B. See 1 FE ¶ 70,551 (October 31, 1989). As before, Tennessee would deliver the imported gas from Niagara Falls using its Niagara Spur interconnection with the pipeline system of TransCanada PipeLines Limited (TransCanada). The transportation service to be provided Orange and Rockland would not require any new pipeline facilities.

Orange and Rockland has executed a gas purchase and sales agreement with KannGaz dated June 15, 1992. The maximum daily quantity (MDQ) in the agreement is 25,000 Mcf. Purchases would be arranged on a monthly basis with Orange and Rockland notifying KannGaz by a specified date of the amount it desires to import up to the MDQ. If Orange and Rockland's nominations average less than 80 percent of the MDQ for the winter period of November through March, or 90 percent in the summer, April through October, then it must make a deficiency payment to KannGaz. The deficiency payment is calculated as the difference between the actual nominations and either 80 or 90 percent of the MDQ, as applicable, multiplied by seven percent of the applicable average commodity charge under the contract's pricing provisions. If less than full MDQ is nominated at any time, KannGaz would have the right to use Orange and Rockland's unutilized transportation capacity on TransCanada or NOVA to market such gas itself. In addition to the deficiency payment, if Orange and Rockland on any day nominates less than the monthly nomination estimate in effect on that day, it will be obligated to pay a nomination adjustment fee. That fee would be 4% of the commodity price times the difference in the monthly nomination estimate and the actual nomination.

The price paid by Orange and Rockland for gas purchased from KannGaz would consist of a monthly demand charge, commodity charge, and reservation charge. The demand charge is comprised of the demand charges paid by KannGaz in that month for transportation on NOVA and TransCanada to Niagara Falls. The commodity charge is the product of the amount of gas delivered and 90 percent of the commodity price. The commodity price is the average of the monthly index prices for spot natural gas delivered to ANR Pipeline Company, Texas Eastern Transmission Company, and Tennessee in the State of Louisiana and TransContinental Gas Pipeline Corporation in Texas, as published in *Inside F.E.R.C.'s Gas Market Report.* The reservation charge is equal to the product of 10 percent of the commodity price and the MDQ. Further, the agreement stipulates that the demand charge must be paid by Orange and Rockland each month regardless of the quantity of gas purchased.

Based on the supplemental information filed by Orange and Rockland on August 24, 1992, the commodity and reservation charges that would have been paid if the gas were flowing in August 1992 would have been $1.3095 (U.S) per MMBtu and $0.1455 (U.S.) per MMBtu, respectively.

Any time Orange and Rockland's takes are less than the MDQ and KannGaz is able to sell this gas to a third party at Niagara Falls at a price higher than the monthly commodity price in effect for Orange and Rockland, then such sales would be credited to Orange and Rockland's demand charges. The amount to be credited by KannGaz for each Mcf sold elsewhere is one-half of the difference between the third party sales price and Orange and Rockland's commodity price.

The contract contains a provision for renegotiation every two years with respect to the method to be used for determining the monthly commodity price. If agreement is not reached, binding arbitration could be invoked. Also, there are provisions to ensure that sufficient gas will be available to satisfy the Orange and Rockland commitment.

In support of the application, Orange and Rockland states that the gas proposed to be imported will be priced competitively and the volumes are needed to meet its long-term system demand. In addition, Orange and Rockland asserts that KannGaz has established itself over a number of years as a reliable Canadian supplier.

The decision on Orange and Rockland's application for import authority will be made consistent with DOE's natural gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). In the case of a long-term arrangement such as this, other matters will be considered in making a public interest determination include need for the natural gas and security of the long-term supply. Parties that may oppose this application should comment in their responses on the issues of competitiveness, need for the gas, and security of supply as they relate to the requested import authorization. Orange and Rockland asserts that this import arrangement is in the public interest. Parties opposing the proposed import arrangement bear the burden of overcoming this assertion.

NEPA Compliance

The National Environmental Policy Act (NEPA), 42 U.S.C., 4321 *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have their written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the above address.

It is intended that a decisional record will be developed on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any requests to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision to the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party request additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to the notice, in accordance with 10 CFR 590.316.

A copy of Orange and Rockland's application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, September 28, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared September 14, 1992 Through September 18, 1992 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 260-5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 10, 1992 (57 FR 12499).

Draft EISs

ERP No. D-AFS-K53005-AZ Rating LO, Grand Canyon Airport to Maswik Transportation Area, Grand Canyon Village Passenger Rail Service Construction and Operation, Approval and Special Use Permit, Coconino County, AZ.

Summary: EPA expressed a lack of objections with the proposed action but requested that the Final EIS address several issues, including air quality impacts from increased intrapark bus service; any necessary mitigation for impacts to waters of the United States; and plans to discharge stormwater from the airport parking lot.

ERP No. D-AFS-L60096-ID Rating EC2, Moyer Salt Timber Sale, Timber Harvest and Road Construction/ Reconstruction, Implementation, Salmon

National Forest, Cobalt Ranger District, Lemhi County, ID.

Summary: EPA expressed environmental concerns based on the potential for adverse water quality effects. Documentation of consultation requirements of Section 7 of the Endangered Species Act is also needed.

ERP No. D–BLM–K06017–00 Rating EC2, Southwest Intertie Project, Construction and Operation, 500kV Transmission Line from the existing Midpoint substation near Shoshone, ID to a new substation site in the Dry Lake Valley of Las Vegas, NV area to a point near Delta, UT, Permits Approval and COE Section 10 and 404 Permits, several Counties, NV, ID, UT.

Summary: EPA expressed environmental concerns regarding potential project impacts to water quality, wetlands and biodiversity. EPA requested additional information in the Final EIS regarding impact minimization, mitigation, and the monitoring of impacts.

ERP No. D–COE–D01000–VA Rating E02, Norfolk and Western Railway Ground Coal Storage Facility, Construction and Operation, COE 404 Permit, Isle of Wright County, VA.

Summary: EPA expressed objections to the proposed project based on the magnitude of potential impacts of coal dust emissions and periodic waste water discharge to 98 acres of wetlands. In addition, alternatives were not presented in a comparative format and some alternatives were eliminated from further consideration without adequate justification.

ERP No. D–COE–K69007–CA Rating EC2, Arts Park LA Development and Construction, Approval, Lake Balboa Park, Sepulveda Flood Control Basin, San Fernando Valley, City of Los Angeles, Los Angeles County, CA.

Summary: EPA expressed concern that the Draft EIS did not provide adequate information on alternative sites and that, as proposed, the project might be incompatible with applicable floodplain management guidelines. Water quality and noise impacts incident to construction were also of concern. EPA recommended that the Corps reexamine the need for the project and then explore sites for it outside the flood control basin.

ERP No. D–FHW–K40189–CA Rating E02, CA–126 Extension, I–5 to CA–14, Funding and Possible COE Section 404 Permit, City of Santa Clarita, Los Angeles County, CA.

Summary: EPA expressed objections to the acreage of wetlands that could be affected by the proposed build alternatives (54 acres vs. 39 acres) and stated that other less-damaging alternatives may have been prematurely eliminated from detailed analysis. EPA stated that the DEIS did not discuss the No Project Alternative in enough detail to compare the merits of action versus no action, especially with respect to air quality impacts.

ERP No. D–GSA–F81017–MN Rating EC2, Minneapolis Federal Building and U.S. Courthouse Improvement and Expansion or New Construction, Implementation , Hennepin County, MN.

Summary: EPA expressed concerns regarding the Draft EIS indoor air quality and use of appropriate building materials. EPA does not believe that the Draft EIS has addressed removal of existing structures containing asbestos, five underground storage tanks, and an above-ground storage tank.

ERP No. D–UAF–G11021–AR Rating EC2, Eaker Air Force Base Disposal and Reuse, Implementation, Mississippi County, AR.

Summary: EPA recommended that additional information and analysis be provided in the Final EIS on the following areas: the possible need for DPDES Permits for storm water discharges associated with possible industrial activities during reuse activities; pollution prevention activities related to the disposal and reuse plan; relationship of the proposed action to the closure of Blytheville Municipal Airport; and implementation of proposed mitigation measures for each reuse option by reuse recipients.

ERP No. D–UAF–G11022–LA Rating EC2, England Air Force Base Disposal and Reuse, Implementation, Rapides Parish, LA.

Summary: EPA recommended that additional information and analysis be provided in the final EIS on the following areas: the possible need for NPDES Permits for storm water discharges associated with possible industrial activities during reuse activities; pollution prevention activities related to the disposal and reuse plan; relationship of the proposed action to the closure of Alexandria Esler Regional Municipal Airport; and implementation of proposed mitigation measures for each reuse option by reuse recipients

ERP No. D1–FAA–F51037–MI Rating EC2, Detroit Metropolitan Wayne County Airport, Air Traffic Control Noise Abatement Procedures, Permanent Implementation and Completion of the Master Plan Development, Wayne County, MI.

Summary: EPA's concerns will be adequately addressed if satisfactory mitigation as described in the DEIS is subsequently provided, and if appropriate steps are taken as necessary to minimize the project's potential for resulting in neighborhood disruption.

Final EISs

ERP NO. F–BOP–G81005–TX Jefferson County Federal Correctional Complex, Construction and Operation, Site Selection, City of Beaumont, Jefferson County, TX.

Summary: EPA had no objections to the proposed project.

Dated: September 29, 1992.

State FIFRA Issues Research and Evaluation Group (SFIREG) Working Committee on Ground Water Protection and Pesticide Disposal; Open Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The State FIFRA Issues Research and Evaluation Group (SFIREG) Working Committee on Ground Water Protection and Pesticide Disposal will hold a 2–day meeting, beginning on October 8, 1992, and ending on October 9, 1992. This notice announces the location and times for the meeting and sets forth tentative agenda topics.

DATES: The SFIREG Working Committee on Ground Water Protection and Pesticide Disposal will meet on Thursday, October 8, 1992, from 8:30 a.m. to 5 p.m. and on Friday, October 9, 1992, beginning at 8:30 a.m. and adjourning at approximately noon.

ADDRESSES: The meeting will be held at: DoubleTree Hotel National Airport - Crystal City, 300 Army-Navy Drive, Arlington, Virginia, (703) 892–4100.

FOR FURTHER INFORMATION CONTACT: By mail: Shirley M. Howard, Office of Pesticide Programs (H7506C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Room 1109, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, Virginia, (703) 305–7371.

SUPPLEMENTARY INFORMATION: The tentative agenda of the SFIREG Working Committee includes the following:

1. Reports from the SFIREG Working Committee Members on State Ground Water Protection Pesticide Disposal projects.
2. Status Report on Ground Water State Management Plans.
3. Briefing on 40 CFR part 165.
4. Update on FIFRA section 19(f).
5. Discussion of Amber Registration.
6. Discussion on the Bulk Containment Policy.
7. Other topics as appropriate.

Dated: September 25, 1992.

Douglas D. Campt,

Director, Office of Pesticide Programs.

FEDERAL DEPOSIT INSURANCE CORPORATION

Determination to Provide Assistance

Pursuant to the provisions of section 13(c)(8) of the Federal Deposit Insurance Act (the FDI Act) (12 U.S.C. 1823(c)(8), as amended by the Federal Deposit Insurance Corporation Improvement Act of 1991), notice is hereby given that at its closed meeting held at 10:30 a.m. on September 1, 1992, the Federal Deposit Insurance Corporation's (the Corporation's) Board of Directors determined to provide assistance to The Peoples State Bank, Clyde, Texas (Peoples), in order to facilitate the merger of Freedom Bank, Ranger, Texas (Freedom Bank), with and into Peoples before the appointment of a conservator or receiver for Freedom Bank.

Subject to the least-cost provisions of section 13(c)(4) of the FDI Act (12 U.S.C. 1823(c)(4)), the Corporation, pursuant to section 13(c)(8), determined to provide direct financial assistance after: (1) The Corporation determined that grounds for the appointment of a conservator or receiver exist or likely will exist in the future unless Freedom Bank's capital levels are increased; (2) the Corporation determined that it is unlikely that Freedom Bank can meet all currently applicable capital standards without assistance; (3) based on information currently available to the Corporation, the Corporation determined that Peoples' management, as reconstituted in the course of the transaction, is competent and has complied with applicable laws, rules, and supervisory directives and orders; and (4) based on information currently available to the Corporation, the Corporation determined that Peoples' management, as reconstituted in the course of the transaction, has not engaged in any insider dealing, speculative practice or other abusive activity. The determinations described under (3) and (4) above are based on information that could be obtained in the time available. The determinations shall not prejudice future action if subsequent information indicates that such action is appropriate.

Additional information on this notice can be obtained by contacting Christopher Curtis, Senior Counsel, Legal Division, FDIC, 550 17th Street, NW., Washington, DC 20429. Telephone: (202) 898–3728.

By direction of the Board of Directors.

Dated this 1st day of September, 1992.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

FEDERAL MARITIME COMMISSION

[Docket No. 92–47]

Hugh Symington v. Euro Car Transport, Inc.; Filing of Complaint and Assignment

Notice is given that a complaint filed by Hugh Symington ("Complainant") against Euro Car Transport, Inc. ("Respondent") was served September 29, 1992. Complainant alleges that Respondent engaged in violations of sections 10(b)(6), (b)(12) and (d)(1) of the Shipping Act of 1984, 46 U.S.C. 1709(b)(6), (b)(12) and (d)(1), by obtaining the funds from Complainant to purchase a car on behalf of Complainant and pay for its transportation and insurance, and failing and refusing to deliver the car or return the funds to Complainant.

This proceeding has been assigned to Administrative Law Judge Norman D. Kline ("Presiding Officer"). Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the Presiding Officer in this proceeding shall be issued by September

29, 1993, and the final decision of the Commission shall be issued by January 27, 1994.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

[Docket No. 89-27]

Martyn Merritt, AMG Services, Inc.; Possible Violations of Sections 10(a)(1) and 10(b)(1) of the Shipping Act of 1984

Order on Remand

This proceeding is on a remand to the Commission from the United States Court of Appeals for the Second Circuit. The proceeding originated as a Commission investigation into possible violations of the Shipping Act of 1984 ("1984 Act"), 46 U.S.C. app. 1701, *et seq.*, by Martyn Merritt ("Merritt") and AMG Services, Inc. ("AMG" or "Ariel"), Oasis Express Line ("Oasis"), Javelin Line ("Javelin"), Trans Africa Line ("Trans Africa"), Coast Container Line ("Coast"), Buccaneer Line ("Buccaneer"), and Union Exportadora Lines ("Union"). Subsequently, the Commission, in its Order Adopting Initial Decision and Remanding In Part, served May 20, 1991, _____ F.M.C. _____, 25 S.R.R. 1495 (1991) ("1991 Order"), found a pattern of persistent and willful activity in violation of sections 10(a)(1) and 10(b)(1) of the 1984 Act, 46 U.S.C. 1709(a)(1) and 1709(b)(1), including unauthorized use of a connecting carrier agreement and the failure of the six carriers (Javelin, Oasis, Trans Africa, Buccaneer, Union and Coast) to charge the rates applicable in filed tariffs on 64 shipments, as well as attempts to conceal these activities. The Commission further found that the activities of all of the corporations involved in these violations were directed and controlled by Martyn Merritt. The Commission assessed civil penalties totalling $1.4 million, ordered Merritt and the corporate respondents to cease and desist from further violations of the 1984 Act, suspended the tariffs of the respondent carriers, and prohibited the filing replacement tariffs by Merritt, the respondent corporations or any agency or successor.

Althouth neither Merritt nor the other respondents had appeared in the proceeding below until after the close of the record, Merritt appealed the Commission's assessment of penalties totalling $395,000 against him individually to the Second Circuit, arguing that the Commission had failed to consider his ability to pay the civil penalties assessed.

The court vacated the penalty on grounds that the Commission had not produced or considered evidence of Merritt's ability to pay the penalties imposed. The court held that the burden of producing evidence of a respondent's ability to pay any penalty assessed is on the agency. The court concluded that "the Commission erred by failing to require production of evidence (in the proceeding before the administrative law judge ("ALJ") going to Merritt's ability to pay a fine and by failing to make specific findings on that issue." However, the court also ruled that the Commission was not obliged to grant a hearing to a respondent who refused to accept service of process and failed to appear or respond to Commission orders until after the close of the record. Specifically, the court directed that:

> (o)n remand, the Commission should make specific findings on Merritt's ability to pay a fine should it decide to reinstate one. Should the Commission decide on remand that a hearing would be helpful, it of course may order one * * *. We express no view on whether the amount of the penalty originally assessed is excessive.

Merritt v. *United States*, 960 F.2d 15, 18-19 (2nd Cir. 1992). The case was remanded to the Commission for further proceedings in accordance with the court's opinion.

Background

Docket No. 89-27 is the second proceeding in which the Commission has found violations by Merritt, his associates, and companies he created and operated. In the first of these proceedings, Docket 84-38, *Ariel Maritime Group, Inc., et al.* ("Docket No. 84-38"), the Commission found violations of section 16, Initial Paragraph, and section 18(b)(3) of the Shipping Act, 1916 ("1916 Act"), 46 U.S.C. 815, Initial Paragraph and 817(b)(3) (1982) committed by and through the corporations established and operated by Merritt.[1] The Commission further determined that Merritt was the moving force in this pattern of violations and that he directed and controlled the corporate respondents in conducting and attempting to conceal the unlawful activities. The Commission pierced the corporate veil, finding the corporations to be alter egos of Merritt, or shams created to avoid liability for unlawful acts. *Ariel Maritime Group, Inc., et al, Order Adopting In Part, Reversing In Part, and Supplementing the Initial Decision,* _____ F.M.C. _____, 24 S.R.R. 517 (1987) ("1987 Order"). The Commission directed Merritt and the corporate respondents to cease and desist from violations of the 1984 Act and assessed civil penalties totalling $335,000 against Merritt and the corporate respondents, jointly and severally.[2]

Discussion

Although the court on review of the Commission's decision in Docket No. 89-27 vacated the penalty imposed on Merritt individually, it left standing the findings of violations made by the ALJ in his Initial Decision and adopted by the Commission, both as to Merritt and the corporation.[3] The Commission's findings of violations by Merritt and the corporations, and its imposition of civil penalties on the corporations, were neither appealed nor disturbed on appeal. Thus, the sole issues for determination in this proceeding on remand is the amount of civil penalty against Merritt and Merritt's ability to pay the penalty.

This Commission continues to be of the opinion that civil penalties in an amount suitable to penalize Merritt individually, as well as the corporations created and controlled by him and his associate, are appropriate. Such monetary penalties appear to be the only means within the power of this agency of effectively sanctioning the past violations found in this proceeding and deterring future violations by Merritt and his enterprises. This

---

[1] The sections of the 1916 Act dealing with foreign commerce were repealed and replaced by corresponding sections of the Shipping Act of 1984, which prohibited the same acts. Compare the Shipping Act, 1916, section 16, initial paragraph and section 18(b)(3) with, respectively, the 1984 Act, section 10(a)(1) and section 10(b)(1), 46 U.S.C. app. 1709(a)(2) and section 1709(b)(1) (Supp. III, 1985). The 1984 Act, effective June 18, 1984, superseded those provisions of the 1916 Act relating to foreign commerce. 1984 Act, Pub. L. No. 78-237, section 20, 98 Stat. 67, 88.

In Docket No. 89-27 the Commission charged Merritt and the corporations with violations of sections of the 1984 Act which prohibit the same acts, *i.e.*, sections 10(a)(1) and 10(b)(1), 46 U.S.C. app. 1709(a)(1) and 1709(b)(1) (Supp. III, 1985), as were charged and found under the 1916 Act in Docket No. 84-38, sections 16, initial paragraph, and 18(b)(3), 46 (815, initial paragraph and 817(b)(3) (1982).

[2] None of these penalties has been paid, despite entry of an order in 1990 by the U.S. District Court for the Southern District of New York enforcing the Commission's 1987 Order. *United States and Federal Maritime Commission* v. *Martyn G. Merritt, et al.*, No. 88 Civ. 6253 (TPG). Review of the district court's order has recently been sought in the U.S. Court of Appeals for the Second Circuit, No. 92-6123.

[3] The Commission's findings with respect to Merritt's control over the corporations, and their status as alter egos for Merritt also were unaffected on appeal.

proceeding is therefore re-opened and remanded to presiding Chief Administrative Law Judge Norman D. Kline for further hearings limited to the issues discussed above.

In determining the amount of penalties to be imposed, it is expected that the ALJ will give due regard to the gravity and extent of the violations, Merritt's history of prior offenses and individual culpability, as established in the record below, and the Congressional purpose to deter violations by imposing greater civil penalties in the 1984 Act.[4] Any evidence adduced by Merritt should be examined with care in light of Merritt's past business activities and use of corporate assets.

As the Commission noted in the course of the proceeding below, the history of the two proceedings against Merritt before this agency indicates that Merritt has been less than truthful with respect to issues relating not only to his personal involvement in and liability for the violations found, but also as to his ownership and control of the corporations and their assets through which these activities were carried out. See, *e.g.*, 1987 Order, 24 S.R.R. at 522–24, 527–528–31.[5] Merritt's control of these corporations and of their financial dealings, including the corporations' common banking arrangements, was documented in Docket No. 84–38. For example, of the officers and directors of the companies, only Merritt had authority to sign checks and make withdrawals or undertake financial obligations on his sole signature. See 1987 Order, 24 S.R.R. at 522–23.

On remand the ALJ may also give such consideration and weight as he determines to be appropriate to findings of the U.S. District Court for the Southern District of New York in a recent criminal proceeding against Merritt. In the spring of 1991, Merritt was indicted for, and pleaded guilty to, a conspiracy to defraud the U.S. Government, specifically the Agency for International Development, of more than $1 million in connection with a shipment of powdered milk for famine relief in the Sudan. In the course of that proceeding, the district court had occasion to examine information concerning Merritt's past practices, corporate creations, and concealment of assets, including the proceeds of sale of his home.[6] In sentencing Merritt to five years imprisonment, fines and restitution of the proceeds of the fraud, the court made certain findings of fact and conclusions of law. In addition to finding that Merritt had engaged in obstruction of justice prior to indictment, the court concluded that Merritt had attempted to retain the proceeds of his fraud by secreting at least $670,000 in * * *

> * * * accounts controlled by Mrs. Merritt who was her husband's business associate. The paper trail ends with a $670,000 deposit in Bank Worms on the Island of Jersey. * * * (T)he Island of Jersey is also the location of Broadview, which defendant and his wife controlled.

Findings of Fact and Conclusions of Law, at 7, *U.S.A.* v. *Martyn Merritt*, _____ F. Supp. _____ (S.D.N.Y., October 8, 1991), 1991 WL 335511 (S.D.N.Y.). More specifically, the court found "that Mr. Merritt continues to have control over $670,000 of the proceeds, which he is attempting to hide * * *." With respect to Merritt's receipt of the proceeds from the sale of the house, the court stated that:

> In view of the overwhelming evidence presented by the Government that Broadview was in fact a corporation controlled by the Merritts, the Court finds that Mr. Merritt deliberately attempted to mislead the Probation Department concerning Broadview and provided false and fraudulent information to the Probation Department concerning his financial condition by not reflecting the proceeds that Broadview received from the sale of the house.

Id., at 9. It may be proper to give preclusive effect to these findings with respect to assets under the control of Martin Merritt and his "business associate" in the enterprises subject to the Commission's order under the doctrine of collateral estoppel. *Parklane Hosiery Co.* v. *Shore*, 439 U.S. 322 (1979); *Commissioner* v. *Sunnen*, 333 U.S. 591, 601–602 (1948); *Yates* v. *United States*, 354 U.S. 298 (1957).

Finally, in considering evidence of Merritt's ability to pay whatever penalties appear appropriate, the ALJ shall also give due regard to the contract law doctrine, relating to damages, that one need not undertake futile acts to prove their inefficacy. This doctrine has been applied to the obligations of common carriers, *Atlantic Coast R. Co.* v. *Geraty*, 166 F. 10, 16 (4th Cir. 1908), and to FMC consideration of arbitration clauses in agreements, *A/S Ivarans Rederi* v. *U.S.*, 938 F. 2d 1365, 1368 (D.C. Cir. 1991) (FMC correct in not deferring to arbitration in determining disputed

---

[4] The legislative history of the 1984 Act indicates that Congress meant to enhance the deterrent effect of penalties for activities prohibited under section 10:

> Experience with the penalties imposed by the 1916 Shipping Act led the Committee to conclude that they provided no apparent deterrent to the commission of prohibited acts. Civil penalties of the type and amount available under the current law could be absorbed as part of the cost of doing business * * *. The Committee included in H.R. 1878 sanctions and penalties *designed to deter the commission of prohibited acts.* (Italics supplied).

H.R. Rep. No. 53, (Part. 1), 98th Cong., 1st Sess. 19 (1983). 1984 U.S. Code Cong. and Admin. News 167, 184.

[5] For example, through documents and Merritt's testimony in the first hearing held in Docket No. 84–38, it was represented that the President of Ariel Maritime Group, Inc. was "J.A. Mott." It was shown in the second hearing, however, that "J.A." should have been "J.E." and that "J.E. Mott" was the brother-in-law of Martyn Merritt's wife, Mary Anne Merritt, and had no connection with any of Merritt's companies or the shipping business. Mrs. Merritt's name also appeared as an officer or director on numerous company documents presented in the course of the proceedings, both as Mary Anne Merritt and as Mary Anne Pawlowski, her maiden name. In addition, many of the documents relating to the companies reflected the names of Florence Pawlowski and Florence Wiezen, respectively the married and maiden names of Mary Anne Merritt's mother, who also denied having participated in operation of the companies or the shipping business at any time.

Mrs. Merritt (Mary Ann Pawlowski) and Mrs. Pawlowski (Florence Wiezen) were, nevertheless, listed as the Directors of Charles Klaus & Company, the corporation of which Javelin, Oasis, Trans Africa, Buccaneer and Union were all said to be divisions. Among the evidence relied on by the Commission in Docket No. 84–38 was the testimony of Merritt's former partner, Peter K. Shauer, that Charles Klaus & Company was a company created by them in Hong Kong, and the letter, signed by Merritt, directing the accounting firm in Hong Kong as to the recording and distribution of shares to be made in incorporating Charles Klaus & Company. See, 1987 Order, *supra.*, 24 S.R.R. at 522–523.

All of the carriers were represented by Ariel Maritime Group, Inc. as agent. Ariel Maritime Group, Inc. is the former name of AMG Services, Inc. Merritt testified in Docket No. 84–38 that ASA Development, identified as an English company, was the majority owner of Ariel Maritime Group, Inc. He said that he was unable to enlighten the Commission, however, as to the owners of ASA Development. Nevertheless, in Docket No. 89–27 it was shown that ASA Development Company, created by chartered accountants in the Jersey Islands in 1983, had changed its name to Sterling Maritime, Ltd. on March 5, 1985, six weeks prior to Merritt's testimony in Docket No. 84–38 concerning ownership of Ariel. Sterling Maritime Ltd.'s address is that of the firm of chartered accountants whose partners were shown as incorporators. See 1991 Order, 25 S.R.R. at 1499.

[6] In the district court action to enforce the 1987 Order, Merritt represented that he could not afford to pay the civil penalties. Among the indicia of his inability to pay Merritt cited the fact that he and his wife "live in a modest house in Westchester which we do not own." Affidavit of Martyn C. Merritt In Support of Motion To Dismiss The Complaint, November 9, 1988, at 6. The residence in question was the house occupied by Merritt from 1980 until its sale in 1990, at 87 Broadview Avenue, New Rochelle, New York. However, as the Government showed in its response to the motion, the house was purchased by Martyn and Mary Merritt in December 1980 for $155,000 and transferred to the Broadview Development Company, Ltd. in February, 1982 for $150,000. Further evidence adduced in the criminal fraud case showed that the house sold in 1990 for $520,000. Broadview Development Company, Ltd. is a company registered in the Jersey Islands of Great Britain. The annual reports filed with the Registrar of Companies are signed by Florence Pawlowski, Merritt's mother-in-law, on behalf of the company. The incorporators are the same chartered accountants reflected on the records of the ASA Development Company/Sterling Maritime, Ltd.

meaning of an agreement "when arbitration would be a waste of time"). *See also Port Authority of New York and New Jersey* v. *New York Shipping Association*, 22 S.R.R. 1329, 1343–44 (I.D.), *aff'd*, 23 S.R.R. 21 (1985).

Therefore, it is ordered, That the proceeding in *Martyn Merritt, AMG Services, Inc. d/b/a Ariel Maritime Group and Ariel Maritime, Oasis Express Line, Javelin Line, Trans Africa Line, Coast Container Line, Buccaneer Line, and Union Exportadora Lines—Possible Violations of Sections 10(a)(1) and 10(b)(1) of the Shipping Act of 1984*, Docket No. 89–27, is re-opened and remanded to the Chief Administrative Law Judge for the limited purpose of determining the amount of penalty to be assessed against Martyn Merritt individually and jointly and severally with the corporations, and Martyn Merritt's ability to pay such penalties;

It is further ordered, That such hearing as the Chief Administrative Law Judge determines to be necessary be held in this proceeding, at a date and place to be determined hereafter by the Chief Administrative Law Judge in compliance with rule 61 of the Commission's Rules of Practice and Procedure, 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the Chief Administrative Law Judge only upon a proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matters in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record;

It is further ordered, That notice of this Order be published in the **Federal Register**, and a copy be served on parties of record;

It is further ordered, That in accordance with Rule 61 of the Commission's Rules of Practice and Procedure, the initial decision of the Chief Administrative Law Judge shall be issued by August 31, 1993, and the final decision of the Commission shall be issued by December 31, 1993.

By the Commission.

Joseph C. Polking,
Secretary.

FEDERAL RESERVE SYSTEM

Elmer Lamar Anderson, et al.; Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than October 16, 1992.

A. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. Elmer Lamar Anderson, Swainsboro, Georgia; to acquire an additional 1.36 percent of the voting shares of Swainsboro Bankshares, Inc., Swainsboro, Georgia, for a total of 10.85 percent, and thereby indirectly acquire The Citizens Bank of Swainsboro, Swainsboro, Georgia.

B. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. John G. Schmid, Carson, North Dakota; to acquire an additional 9.34 percent of the voting shares of Grant County Bancorporation, Inc., Carson, North Dakota, for a total of 33.20 percent, and thereby indirectly acquire Grant County State Bank, Carson, North Dakota.

C. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Director, Bank Holding Company) 101 Market Street, San Francisco, California 94105:

1. Rosa Leong, Los Angeles, California; to acquire an additional 73.15 percent of the voting shares of Wilshire Center Bancorp, Los Angeles, California, for a total of 98.05 percent, and thereby indirectly acquire Wilshire Center Bank, N.A., Los Angeles, California.

Board of Governors of the Federal Reserve System, September 28, 1992.

Jennifer J. Johnson,
Associate Secretary of the Board.

BILLING CODE 6210–01–F

First Commerce Bancorp, Inc., et al.; Applications to Engage de novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than October 26, 1992.

A. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. First Commerce Bancorp, Inc., Commerce, Georgia; to engage *de novo* through its subsidiary, Bankline

Systems, Inc., Commerce, Georgia, in data processing and transmission services pursuant to § 225.25(b)(7) of the Board's Regulation Y.

B. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. National Commerce Bancorporation, Memphis, Tennessee; to engage *de novo* through its subsidiary, National Commerce Finance Company, Germantown, Tennessee, in making, acquiring, or servicing consumer loans as a nondepository lender pursuant to § 225.25(b)(1); acting as principal, agent, or broker with respect to the sale of credit life, disability, and involuntary unemployment insurance, directly related to extensions of credit by National Commerce Finance Company, and limited to ensuring the repayment of the outstanding balance due on said extensions of credit pursuant to § 225.25(b)(8)(i)(A) & (B); and acting as agent or broker with respect to the sale of property hazard and casualty insurance, directly related to extensions of credit by National Commerce Finance Company, and limited to ensuring the repayment of the outstanding balance on such extensions of credit in the event of loss or damage to any property used as collateral, and said extensions will not exceed $10,000 or $25,000 if it is to finance the purchase of a residential manufactured home and the credit is secured by said home pursuant to § 225.25(b)(8)(ii)(A) & (B) of the Board's Regulation Y. These activities will be conducted throughout the State of Tennessee and those states which are contiguous to the State of Tennessee.

Board of Governors of the Federal Reserve System, September 28, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

Norwest Corporation; Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than October 26, 1992.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Norwest Corporation, Minneapolis, Minnesota; to merge with Lincoln Financial Corporation, Fort Wayne, Indiana, and thereby indirectly acquire Angola State Bank, Angola, Indiana; Farmers and Merchants Bank, Bluffton, Indiana; First Bank, Rochester, Indiana; The First National Bank in Wabash, Wabash, Indiana; The First State Bank of Decatur, Decatur, Indiana; Harbor Country Banking Company, Three Oaks, Michigan; Lincoln National Bank and Trust Company of Fort Wayne, Fort Wayne, Indiana; The Peoples Bank and Trust Company, Van Wert, Ohio; The Peru Trust Company, Peru, Indiana; First Bank, Rushville, Indiana; Shipshewana State Bank, Shipshewana, Indiana; and State and Savings Bank, Monticello, Indiana.

In connection with this application, Applicant also proposes to acquire Shipshewana Insurance Agency, LaGrange, Indiana, and thereby engage in general insurance agency activities in LaGrange, Indiana, pursuant to § 225.25(b)(8)(vii); Midwest Credit Life Insurance Company, Fort Wayne, Indiana, and thereby engage in underwriting, as insurer and reinsurer, credit life, accident and health insurance pursuant to § 225.25(b)(8)(vii); Norwest Mortgage, Inc., Minneapolis, Minnesota, and thereby engage in consolidating the mortgage banking business of the banking subsidiaries of Lincoln Financial Corporation in existing Norwest Corporation subsidiaries pursuant to § 225.25(b)(1); and acquire through Norwest Investment Services, Inc., Minneapolis, Minnesota, the discount brokerage business of Lincoln National Bank and Trust Company of Fort Wayne pursuant to § 225.25(b)(15) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, September 28, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

Random Lake Bancorp, Limited, et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications

must be received not later than October 26, 1992.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Random Lake Bancorp, Limited, Random Lake, Wisconsin; to become a bank holding company by acquiring 80 percent of the voting shares of State Bank of Random Lake, Random Lake, Wisconsin.

B. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. Liberty National Bancorp, Inc., Louisville, Kentucky, and its wholly-owned subsidiary, LNB Acquisition Corp., Louisville, Kentucky; to acquire 100 percent of the voting shares of Financial Dominion of Kentucky Corporation, Radcliff, Kentucky, and thereby indirectly acquire Hardin County Bank and Trust, Inc., Radcliff, Kentucky, and Farmers Deposit Bank of Brandenburg, Brandenburg, Kentucky. In connection with this application, LNB Acquisition Corp. has applied to become a bank holding company.

3. Trans Financial Bancorp, Inc., Bowling Green, Kentucky; to merge with Dawson Springs Bancorp, Inc., Maysville, Kentucky, and thereby indirectly acquire Commercial Bank of Dawson, Dawson Springs, Kentucky, and Kentucky State Bank of Scottsville, Scottsville, Kentucky.

C. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Phillips Holdings, Inc., Stuttgart, Kansas; to become a bank holding company by acquiring 100 percent of the voting shares of Farmers State Bank, Stuttgart, Kansas.

D. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. American Capital Corporation, Katy, Texas; to acquire 90.1 percent of the voting shares of Gulf Coast Bancshares, Inc., Alvin, Texas, and thereby indirectly acquire First National Bank of Alvin, Alvin, Texas.

Board of Governors of the Federal Reserve System, September 28, 1992.

BILLING CODE 6210-01-F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

Current List of Laboratories Which Meet Minimum Standards To Engage in Urine Drug Testing for Federal Agencies and Laboratories That Have Withdrawn From the Program

AGENCY: National Institute on Drug Abuse, ADAMHA, HHS.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services notifies Federal agencies of the laboratories currently certified to meet standards of Subpart C of Mandatory Guidelines for Federal Workplace Drug Testing Programs (53 FR 11979, 11986). A similar notice listing all currently certified laboratories will be published during the first week of each month, and updated to include laboratories which subsequently apply for and complete the certification process. If any listed laboratory's certification is totally suspended or revoked, the laboratory will be omitted from updated lists until such time as it is restored to full certification under the Guidelines.

If any laboratory has withdrawn from the National Laboratory Certification Program during the past month, it will be identified as such at the end of the current list of certified laboratories, and will be omitted from the monthly listing thereafter.

FOR FURTHER INFORMATION CONTACT: Denise L. Goss, Program Assistant, Drug Testing Section, Division of Applied Research, National Institute on Drug Abuse, room 9-A-53, 5600 Fishers Lane, Rockville, Maryland 20857; tel.: (301) 443-6014.

SUPPLEMENTARY INFORMATION: Mandatory Guidelines for Federal Workplace Drug Testing were developed in accordance with Executive Order 12564 and section 503 of Public Law 100-71. Subpart C of the Guidelines, "Certification of Laboratories Engaged in Urine Drug Testing for Federal Agencies," sets strict standards which laboratories must meet in order to conduct urine drug testing for Federal agencies. To become certified an applicant laboratory must undergo three rounds of performance testing plus an on-site inspection. To maintain that certification a laboratory must participate in an every-other-month performance testing program plus periodic, on-site inspections.

Laboratories which claim to be in the applicant stage of NIDA certification are not to be considered as meeting the minimum requirements expressed in the NIDA Guidelines. A laboratory must have its letter of certification from HHS/NIDA which attests that it has met minimum standards.

In accordance with Subpart C of the Guidelines, the following laboratories meet the minimum standards set forth in the Guidelines:

AccuTox Analytical Laboratories, 427 Fifth Avenue, N.W., P.O. Box 770, Attalla, AL 35954-0770, 205-538-0012/800-247-3893.

Aegis Analytical Laboratories, Inc., 624 Grassmere Park Road, Suite 21, Nashville, TN 37211, 615-331-5300.

Alabama Reference Laboratories, Inc., 543 South Hull Street, Montgomery, AL 36103, 800-541-4931/205-263-5745.

Allied Clinical Laboratories, 201 Plaza Boulevard, Hurst, TX 76053, 817-282-2257.

American Medical Laboratories, Inc., 14225 Newbrook Drive, Chantilly, VA 22021, 703-802-6900.

Associated Pathologists Laboratories, Inc., 4230 South Burnham Avenue, Suite 250, Las Vegas, NV 89119-5412, 702-733-7866.

Associated Regional and University Pathologists, Inc. (ARUP), 500 Chipeta Way, Salt Lake City, UT 84108, 801-583-2787.

Baptist Medical Center—Toxicology Laboratory, 9601 I-630, Exit 7, Little Rock, AR 72205-7299, 501-227-2783 (formerly: Forensic Toxicology Laboratory Baptist Medical Center).

Bayshore Clinical Laboratory, 4555 W. Schroeder Drive, Brown Deer, WI 53223, 414-355-4444/800-877-7016.

Bellin Hospital—Toxicology Laboratory, 215 N. Webster Ave., Green Bay, WI 54301, 414-433-7485.

Bioran Medical Laboratory, 415 Massachusetts Avenue, Cambridge, MA 02139, 617-547-8900.

California Toxicology Services, 1925 East Dakota Avenue, Suite 206, Fresno, CA 93726, 209-221-5655/800-448-7600.

Cedars Medical Center, Department of Pathology, 1400 Northwest 12th Avenue, Miami, FL 33136, 305-325-5810.

Public Health Service

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Public Health Service (PHS) publishes a list of information collection requests it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). The following requests have been submitted to OMB since the list was last published on Friday, September 18, 1992. (Call PHS Reports Clearance Officer on 202–690–7100 for copies of requests)

1. National Donor Research and Education Study—New—This is a mail survey of a random sample of 180,000 blood donors from 5 blood centers participating in the NHLBI "Retrovirus Epidemiology Donor Study" Program. Data will be used to monitor the safety of the U.S. blood supply and facilitate the development, evaluation, and refinement of donor education and recruitment strategies. Respondents: Individuals or households; Number of Respondents: 72,000; Number of Responses Per Respondent: 1; Average Burden Per Response: .3333 hours; Estimated Annual Burden: 24,000 hours.

2. The Feasibility Study for the Household Component of the National Medical Expenditure Survey (NMES): Rounds 2 and 3—New—Rounds 2 and 3 of this methodological study will continue to test methods for enhancing the quality of data on medical care and expenditures, for improving the efficiency of data collection and for assessing the willingness of potential respondents to participate. Respondents: Individuals or households; Number of Respondents: 825; Number of Responses Per Respondent: 2; Average Burden Per Response: 1.37 hours; Estimated Annual Burden: 2,264 hours.

Desk Officer: Shannah Koss.

Written comments and recommendations for the proposed information collections should be sent within 30 days of this notice directly to the OMB Desk Officer designated above at the following address: Human Resources and Housing Branch, New Executive Office Building, room 3002, Washington, DC 20503.

Dated: September 28, 1992.

Melanie Timberlake,

Acting Director, Office of Health Planning and Evaluation.

BILLING CODE 4160–17–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

[Docket No. N–92–1917; FR–2934–N–98]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

ADDRESSES: For further information, contact James N. Forsberg, room 7262, Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410; telephone (202) 708–4300; TDD number for the hearing- and speech-impaired (202) 708–2565 (these telephone numbers are not toll-free), or call the toll-free Title V information line at 1–800–927–7588.

SUPPLEMENTARY INFORMATION: In accordance with 56 FR 23789 (May 24, 1991); and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless* v. *Veterans Administration*, No. 88–2503–OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Judy Breitman, Division of Health Facilities Planning, U.S. Public Health Service, HHS, room 17A–10, 5600 Fishers Lane, Rockville, MD 20857; (301) 443–2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 56 FR 23789 (May 24, 1991).

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a

Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1–800–927–7588 for detailed instructions or write a letter to James N. Forsberg at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: U.S. Navy: John J. Kane, Deputy Division Director, Dept. of Navy, Real Estate Operations, Naval Facilities Engineering Command, 200 Stovall Street, Alexandria, VA 22332–2300; (703) 325–0474; GSA: Ronald Rice, Federal Property Resources Services, GSA, 18th and F Streets NW., Washington, DC 20405; (202) 501–0067; (These are not toll-free numbers).

Correction: Property Number 619140004, Yunker House, Redwood National Park, Hiouchi, California was inadvertently published as suitable/available. The property is no longer available for homeless assistance use.

Dated: September 25, 1992.

Randall H. Erben,

Acting Assistant Secretary.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AZ–020–2–4212–12; AZA 27245]

Arizona; Exchange of Public Lands

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Exchange of Public Lands in Maricopa, Navajo and Apache Counties, Arizona.

BLM proposes to exchange public land in order to achieve more efficient management of the public land through consolidation of ownership.

The following described public lands and minerals are being considered for disposal by exchange pursuant to section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C 1716:

Gila and Salt River Meridian, Arizona

T. 5 N., R. 2 E.,
Sec. 31, lots 3 and 4. (Mineral estate only)
T. 8 N., R. 28 E.,
Sec. 17, W½SW¼;
Sec. 18, SE¼SE¼.
T. 8 N., R. 29 E.,
Sec. 10, SE¼SW¼.
T. 12 N., R. 20 E.,
Sec. 6, lots 1 to 3 incl.
T. 13 N., R. 18 E.,
Sec. 12, E½E½.
T. 13 N., R. 23 E.
Sec. 22, NW¼SE¼, SE¼SE¼.
T. 14 N., R. 17 E.,
Sec. 8, SE¼;
Sec. 22, NE¼, N½NW¼, SW¼NW¼, NW¼SW¼, S½S½;
Sec. 24, NE¼.
T. 14 N., R. 19 E.,
Sec. 4, lots 1 to 4 incl., S½N½, S½;
Sec. 10, NE¼, N½SE¼, SE¼SE¼;
Sec. 12, N½;
Sec. 28, SE¼SE¼.
T. 15 N., R. 16 E.,
Sec. 6, lots 1 to 4 incl., lot 8.
Sec. 14, NE¼.
T. 15 N., R. 19 E.,
Sec. 12, lots 1 to 3 incl., N½, SW¼;
Sec. 14, NE¼.
T. 16 N., R. 16 E.,
Sec. 28, all.
T. 16 N., R. 17 E.,
Sec. 6, lots 4 and 5.
T. 17 N., R. 15 E.,
Sec. 22, W½NW¼, NW¼SW¼.
T. 17 N., R. 16 E.,
Sec. 24, lots 1 to 4, incl., W½E½, W½.
T. 17 N., R. 18 E.,
Sec. 4, lots 1 to 4, incl., S½N½, S½.
T. 18 N., R. 16 E.,
Sec. 4, lot 1, SE¼NE¼, E½SE¼.
T. 18 N., R. 24 E.,
Sec. 31, lots 3 and 4, E½SW¼.
Containing 5,811.13 acres, more or less.

Final determination on disposal will await completion of an environmental analysis.

In accordance with the regulations of 43 CFR 2201.1(b), publication of this Notice will segregate the public lands, as described in this Notice, from appropriation under the public land laws and the mining laws, but not the mineral leasing laws or Geothermal Steam Act.

This segregation of the above-described lands shall terminate upon issuance of a document conveying such lands or upon publication in the **Federal Register** of a notice of termination of the segregation; or the expiration of two years from the date of publication, whichever occurs first.

For a period of forty-five (45) days, interested parties may submit comments to the District Manager, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

Dated: September 25, 1992.
David J. Miller,
Associate District Manager.

BILLING CODE 4310-33-M

[CO-930-4214-10; COC-54072]

Proposed Withdrawal; Opportunity for Public Meeting; Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Agriculture, Forest Service, proposes to withdraw approximately 2,360.78 acres of National Forest System land for 40 years. This withdrawal would protect existing recreational facilities and high resource values at the Purgatory Ski Area near Durango, Colorado. This notice closes this land to location and entry under the mining laws of up to two years. The land remains open to mineral leasing and such forms of disposition as may by law be made of National Forest System land.

DATES: Comments on this proposed withdrawal or requests for public meeting must be received on or before December 31, 1992.

ADDRESSES: Comments and requests for a meeting should be sent to the Colorado State Director, BLM, 2850 Youngfield Street, Lakewood, Colorado 80215-7076.

FOR FURTHER INFORMATION CONTACT: Bob Barbour, 303-239-3708.

SUPPLEMENTARY INFORMATION: On August 24, 1992, the Department of Agriculture, Forest Service, filed an application to withdraw the following described National Forest System land from location and entry under the United States mining laws (30 U.S.C. ch 2):

New Mexico Principal Meridan

San Juan National Forest

T. 39 N., R. 9W.,
Sec. 22, lots 1, 2, 3, 4, S½NW¼ and S½;
Sec. 23, lots 1 through 16, inclusive;
Sec. 24, W½E½NE¼NW¼, W½E½NW¼, and W½NW¼;
Sec. 25, lot 10;

A parcel described by metes and bounds within section 24, beginning at corner No. 1, being the southwest corner of section 24.

T. 39 N., R. 9W.,
From Corner No. 2, by metes and bounds.
S. 89°25' E., 661.98 ft;
N. 1°03'05" W., 65.84 ft;
N. 89°24'28" W., 661.86 ft;
S. 1°00'37' E., 65.84 ft. to corner No. 1, the place of beginning.

A parcel described by metes and bounds within sections 21, 26, 27 and 28: Beginning at corner No. 1, being the ¼-corner of sections 21 and 22,

T. 39 N., R. 9 W.
From Corner No. 1, by metes and bounds.
S.88°50'23" W., 2481.30 ft., on the E-W centerline of section 21;
S. 0°07' W., 1282.19 ft.;
S. 32°10' E., 3131.00 ft.;
S. 68°17' E., 2585.31 ft.;
N. 80°12' E., 2343.21 ft.;
S. 82°04' E., 1723.00 ft.;
S. 60°04' E., 1939.00 ft.;
S. 82°45' E., 2070.00 ft.;
N. 41°04' E., 3350.00 ft.;
N. 0°53' W., 1903.12 ft., to the northeast corner of section 26;
S. 84°27' W. 5782.26 ft., to the northwest corner of section 26;
S. 85°33' W. 5767.74 ft., to the northwest corner of section 27;
N. 0°05' W. 2583.90 ft., to corner No. 1, the place of beginning.

The area described contains approximately 2,360.78 acres in La Plata County.

The purpose of this withdrawal is to protect existing recreational facilities and high resource values at the Purgatory Ski Resort.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with this proposal, or to request a public meeting, may present their views in writing to the Colorado State Director. If the authorized officer determines that a meeting should be held, the meeting will be scheduled and conducted in accordance with the Bureau of Land Management Manual, section 2351.16B.

This application will be processed in accordance with the regulations set forth in 43 CFR part 2310.

For a period of two years from the date of publication of this notice in the **Federal Register**, the land will be segregated from the mining laws as specified above; unless the application is denied, or cancelled, or the withdrawal is approved prior to that date. During this period the Forest Service will continue to manage this land.

Dated: September 24, 1992.
Robert S. Schmidt,
Chief, Branch of Realty Programs.
[FR Doc. 92-23882 Filed 10-1-92; 8:45 am]
BILLING CODE 4310-JB-M

Bureau of Reclamation

Central Valley Project, California; Scoping Meetings

AGENCY: Bureau of Reclamation (Interior).

ACTION: Notice of scoping meetings.

SUMMARY: On May 12, 1992, the Bureau of Reclamation announced in the **Federal Register** (57 FR 20288) its intent to prepare a draft environmental impact statement (EIS) on interim regulations to implement the Reclamation Reform Act of 1982 in California's Central Valley Project. Public scoping meetings have now been scheduled to obtain public input on the issues and alternatives to be addressed in this EIS.

DATES AND LOCATIONS: The scoping meetings will be held as indicated below:

Session 1: October 19, 1992, at 4 p.m., at the Blue Gum Restaurant, Route 2, Box 171, Willows CA 95988.

Session 2: October 20, 1992, at 1 p.m. at the Bureau of Reclamation, room W-1140, 2800 Cottage Way, Sacramento CA 95825.

Session 3: October 21, 1992, at 9 a.m. at the Merced County Spring Fair, 4th and 5th Streets, Germino Building, Los Banos CA 93635.

Session 4: October 21, 1992, at 4 p.m. at the Holiday Inn Central Plaza, Salon C, 2233 Ventura Street, Fresno CA 93721.

ADDRESSES: The public may also provide written input on information that should be included in the EIS. Comments should be submitted to: J. William McDonald, Assistant Commissioner—Resources Management, Bureau of Reclamation, Attention: D-5613, PO Box 25007, Denver CO 80225. Comments must be submitted on or before November 10, 1992.

FOR FURTHER INFORMATION CONTACT: Robert Shaffer, Mid-Pacific Regional Office, Bureau of Reclamation, 2800 Cottage Way, Sacramento CA 95825; telephone: (916) 978-5487.

SUPPLEMENTARY INFORMATION: The RRA restricts owned acreage that is eligible for delivery of irrigation water from Federal Reclamation projects. For most landowners, the ownership limitation is 960 acres. The RRA also requires the payment of "full cost" for project water delivered to land leased over and above certain acreage thresholds. In most cases, that threshold also is 960 acres.

Other provisions of the RRA address water conservation, payment of full operation and maintenance charges, Reclamation water contract requirements, and declaration of landholdings by irrigators.

On July 26, 1991, the United States District Court for the Eastern District of California granted the Natural Resources Defense Council's (NRDC) partial motion for summary judgment (*NRDC* v. *Duvall, No. Civ. S-88-375 LKK*). The court ruled that the Bureau of Reclamation had not complied with the requirements of the National Environmental Policy Act in preparing an environmental assessment with a "finding of no significant impact" in the

promulgation of its 1987 regulations for the RRA (43 CFR part 426, Rules and Regulations for Projects Governed by Federal Reclamation Law). After a briefing on the issue of relief on March 10, 1992, the court issued an order declaring that:

(1) The issuance of the 1987 Acreage Limitation Rules and Regulations was a major Federal action affecting the quality of the environment, thus requiring the preparation of an environmental impact statement and that not preparing an EIS had violated the Administrative Procedures Act;

(2) Within 30½ months, Reclamation must issue final rules to implement the RRA, including the preparation of an EIS that would apply to all Reclamation projects;

(3) Within 35 months, Reclamation must issue interim rules to implement the RRA in the Central Valley Project, including the preparation of an EIS;

(4) Reclamation must meet a court-ordered schedule of compliance; and

(5) The existing rules will remain in effect until new rules are prepared.

Information materials can be obtained from the contact identified in this notice.

Dated: September 28, 1992.

Joe D. Hall,

Deputy Commissioner.

[FR Doc. 92-23872 Filed 10-1-92; 8:45 am]

BILLING CODE 4310-09-M

Fish and Wildlife Service

Record of Decision on Land Acquisition and Management of Cokeville Meadows National Wildlife Refuge, Lincoln County, WY

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: This notice makes available to the public the Record of Decision (ROD) on the proposed land acquisition and subsequent management of Cokeville Meadows National Wildlife Refuge, located near Cokeville, Lincoln County, Wyoming. The ROD was prepared in accordance with Council on Environmental Quality regulations at 40 CFR 1505.2. The ROD reflects the recommendations of Fish and Wildlife Service staff to the Regional Director, Region 6, for establishment and incorporation of the proposed Cokeville Meadows National Wildlife Refuge as part of the National Wildlife Refuge System. The recommendations by staff were based on the information contained in the Final Environmental Impact Statement which was filed with the Environmental Protection Agency as published in the **Federal Register** on June 26, 1992, at Page 28664. The ROD selects Alternative A, The Optimum Management Alternative, as the best strategy for protection and management of the wildlife resources and habitats along the Bear River for the future. The ROD becomes part of the Decision Document transmitted to the Director, Fish and Wildlife Service. The Decision Document contains technical reports on the project in addition to the Final Environmental Impact Statement. The total document completes the preacquisition planning process for the agency.

DATES: ROD by the Regional Director, Region 6, Fish and Wildlife Service, becomes effective October 2, 1992.

ADDRESSES: Written comments on this Notice should be addressed to: Ralph Morgenweck, Regional Director, Region 6, U.S. Fish and Wildlife Service (RW), P.O. Box 25486, DFC, Denver, Colorado 80225.

FOR FURTHER INFORMATION CONTACT: David E. Janes, Wildlife Biologist, U.S. Fish and Wildlife Service (RW), P.O. Box 25486, DFC, Denver, Colorado 80225.

SUPPLEMENTAL INFORMATION: The Record of Decision follows:

This Record of Decision is based on the Proposed Cokeville Meadows National Wildlife Refuge Final Environmental Impact Statement (EIS) dated January 1992. The Record also considers comments received from Federal and State agencies, private organizations, and the public during the public review period. The environmental statement describes four alternatives for acquisition and management of the Cokeville Meadows National Wildlife Refuge, and the effects of implementing each of these alternatives. A No Action alternative reflects the effects of maintaining the current status of the proposal area. The other alternatives reflect the various scenarios of acquisition and management by the Fish and Wildlife Service.

It is my decision to select Alternative A, the Optimum Management Alternative, as described in the Final EIS for the acquisition and management of the Cokeville Meadows National Wildlife Refuge. This alternative provides the best strategy for protection and management of the wildlife resources and habitats along the Bear River for the future.

The Optimum Management Alternative, as the selected alternative, was presented for review in the document titled Proposed Cokeville Meadows National Wildlife Refuge Final Environmental Impact Statement (January 1992). It provided an optimum level of management through a mix of management activities which would require both fee purchase and easement purchases of lands. In acquisition, water rights and mineral rights would also be purchased. All purchases would be negotiated. No condemnation of land would occur. In addition to private lands, State lands and Bureau of Land Management (BLM) lands would be secured for management by the Service. The BLM has been designated as a Cooperating Agency under National Environmental Policy Act (NEPA) guidelines because of future actions within the proposal area that may involve withdrawal of public domain lands currently administered by BLM. Implementation of some of the refuge management aspects of this Record of Decision may require the Service to prepare an analysis of the effects of management actions in accordance with NEPA procedures. If this is found to be necessary, the proposed management actions will be presented to the public as environmental documents, and meetings will be held locally to solicit public comment prior to implementation of the management actions.

Dated: September 18, 1992.

Ralph O. Morgenweck,

Regional Director.

BILLING CODE 4310-55-M

INTERSTATE COMMERCE COMMISSION

Agricultural Cooperative; the Commission of Intent To Perform Interstate Transportation for Certain Nonmembers

Dated: September 29, 1992.

The following Notices were filed in accordance with section 10526(a)(5) of the Interstate Commerce Act. These rules provide that agricultural cooperatives intending to perform nonmember, nonexempt, interstate transportation must file the notice, Form BOP 102, with the Commission within 30 days of its annual meeting each year. Any subsequent change concerning officers, directors, and location of transportation records shall require the filing of a supplemental Notice within 30 days of such change.

The name and address of the agricultural cooperative (1) and (2), the location of the records (3), and the name and address of the person to whom inquiries and correspondence should be addressed (4), are published here for interested persons. Submission of

information which could have bearing upon the propriety of a filing should be directed to the Commission's Office of Compliance and Consumer Assistance, Washington, DC 20423. The notices are in a central file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, DC.

(1)–(2) MFA Incorporated, 615 Locust Street, Columbia, MO 65201
(3) 615 Locust Street, Columbia, MO 65201
(4) Ann Simpson, 615 Locust Street, Columbia MO 65201

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035–01–M

DEPARTMENT OF LABOR

Office of the Secretary

Glass Ceiling Commission, Appointment of Members

This is to announce the appointment of members to the Glass Ceiling Commission established by title II of the Civil Rights Act of 1991 (Pub. L. 102–166) and in conformance with the Federal Advisory Committee Act (5 U.S.C. app.). Set forth below is a list of Commission members together with their respective appointing authorities.

(1) Honorable Lynn Martin—Chairperson, Secretary of labor (Designated by statute)
(2) Patricia V. Asip, National Manager, Special Segment Marketing, J.C. Penney Company, Inc. (Appointed by the President)
(3) J. Alphonso Brown, Founder, Brown Consulting Groups (Appointed by the President)
(4) Joanne M. Collins, Assistance Vice President, United Missouri Bank of Kansas City (Appointed by the President)
(5) Joanne D'Arcangelo, Independent Consultant, (Appointed by the Majority Leader of the Senate)
(6) Earl G. Graves, Publisher, Black Enterprise Magazine (Appointed jointly by the Speaker of the House of Representatives and the Majority Leader of the Senate)
(7) Beverly A. King, President, King and Wright Consulting, Inc. (Appointed jointly by the Speaker of the House of Representatives and the Majority Leader of the Senate)
(8) Jean Ledwith King, Attorney (Appointed jointly by the Speaker of the House of Representatives and the Majority Leader of the Senate)
(9) Judith L. Lichtman, President, Women's Legal Defense Fund (Appointed jointly by the Speaker of the House of Representatives and the Majority Leader of the Senate)
(10) Honorable Nita M. Lowey, Member of Congress, New York (Appointed by the Majority and Minority Leaders of the House of Representatives)
(11) Honorable Barbara Mikulski, United States Senator, Maryland (Appointed jointly by the Majority and Minority Leaders of the Senate)
(12) Honorable Susan Molinari, Member of Congress, New York (Appointed by the Majority and Minority Leaders of the House of Representatives)
(13) Lynn O'Shea, Vice President/Business Development, Gannett Company, Inc. (Appointed by the Minority Leader of the House of Representatives)
(14) Marilyn Pauly, Executive Vice President, Wichita Trust Div. of Bank IV Kansas (Appointed by the Minority Leader of the Senate)
(15) Delia M. Reyes, President, Adrian Research Group (Appointed by the President)
16) Marion O. Sandler, Founder, World Savings and Golden West Financial Corp. (Appointed jointly by the Speaker of the House of Representatives and the Majority Leader of the Senate)
(17) Honorable John Seymour, United States Senator, California (Appointed jointly by the Majority and Minority Leaders of the Senate)
(18) Maria Contreras Sweet, Vice President of Public Affairs, Seven-Up/Royal Crown Bottling Co. of Southern California (Appointed jointly by the Speaker of the House of Representatives and the Majority Leader of the Senate)
(19) Henry Tang, Vice President, Salomon Brothers (Appointed by the President)
(20) Carol Cox Wait, President, Committee for a Responsible Federal Budget (Appointed by the President)
(21) Judith Wierciak, Director of Special Programs, Anheuser-Busch Companies, Inc. (Appointed by the Majority Leader of the House of Representatives)

The members were selected as representatives of either organizations that represent women and minorities and other related interest groups, or corporate or other business entities which are recognized as leaders on issues relating to equal employment opportunity. These appointments expire on November 20, 1995.

Signed at Washington this 28th day of September, 1992.

Lynn Martin,

Secretary of Labor.

BILLING CODE 4510–23–M

Employment Standards Administration

Wage and Hour Division; Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency have an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division Of Wage Determinations, 200 Constitution Avenue, NW., room S-3014, Washington, DC 20210.

New General Wage Determination Decisions

The numbers of the decisions added to the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" are listed by Volume, State, and page number(s).

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing

Office, Washington, DC 20402, (202) 783–3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC this 25th day of September 1992.

Alan L. Moss,

Director, Division of Wage Determinations.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Agency Information Collection Activities Under OMB Review

AGENCY: National Endowment for the Arts.

ACTION: Notice.

SUMMARY: The National Endowment for the Arts (NEA) has sent to the Office of Management and Budget (OMB) a request for clearance of the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

DATES: Comments on this information collection must be submitted by November 2, 1992.

ADDRESSES: Send comments to Mr. Steve Semenuk, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., room 3002, Washington, DC 20503; (202–395–7316). In addition, copies of such comments may be sent to Ms. Roberta Dunn, National Endowment for the Arts, Congressional Liaison Office, room 525, 1100 Pennsylvania Avenue, NW., Washington, DC, 20506; (202–682–5434).

FOR FURTHER INFORMATION CONTACT: Ms. Judith O'Brien, National Endowment for the Arts, Administrative Services Division, room 203, 1100 Pennsylvania Avenue, NW., Washington, DC 20506; (202–682–5401) from whom copies of the documents are available.

SUPPLEMENTARY INFORMATION: The Endowment requests the review of a new collection of information. This entry is issued by the Endowment and contains the following information:

(1) The title of the form; (2) how often the required information must be reported; (3) who will be required or asked to report; (4) what the form will be used for; (5) an estimate of the number of responses; (6) the average burden hours per response; (7) an estimate of the total number of hours needed to prepare the form. This entry is not subject to 44 U.S.C. 3504(h).

Title: FY 93 Expansion Arts Program "Capstone Project" Application Guidelines

Frequency of Collection: One-time.

Respondents: Non-profit institutions.

Use: Guideline instructions and applications elicit relevant information from non-profit arts organizations that apply for funding under the Expansion Arts' Capstone Project initiative. This information is necessary for the accurate, fair and thorough consideration of competing proposals in the peer review process.

Estimated Number of Respondents: 60.

Average Burden Hours per Response: 16.

Total Estimated Burden: 960.

Roberta Dunn,

Congressional Liaison, National Endowment for the Arts.

BILLING CODE 7537–01–M

NUCLEAR REGULATORY COMMISSION

Systematic Assessment of License Performance (SALP)

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed changes to the SALP program; extension of comment period.

SUMMARY: On August 28, 1992, (57 FR 39249) the Nuclear Regulatory Commission (NRC) published its plans to conduct a public meeting to discuss proposed changes to the SALP program on September 29, 1992, and to solicit public comment. The public comment period was to have expired on September 29, 1992. In view of the importance of the proposed changes, the NRC has decided to extend the comment period for an additional ten days to allow interested parties the opportunity to comment on issues discussed at the public meeting on September 29, 1992. The extended comment period now expires on October 9, 1992.

DATES: The comment period has been extended and now expires October 9, 1992. Comments received after this date will be considered if it is practical to do so but the Commission is able to assure consideration only for comments received before this date.

ADDRESSES: Submit written comments to: Chief, Rules and Directives Review Branch, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

FOR FURTHER INFORMATION CONTACT: Cornelius Holden, M/S 10–A–19, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Telephone (301) 504–1037.

Dated at Rockville, Maryland this 28th day of September, 1992.

For the Nuclear Regulatory Commission.

Cornelius Holden,

Senior Operations Engineer, Office of Nuclear Reactor Regulation.

[FR Doc. 92–23934 Filed 10–1–92; 8:45 am]

BILLING CODE 7590–01–M

[Docket Nos. 50–498 and 50–499]

Houston Lighting and Power Co.; City Public Service Board of San Antonio; Central Power and Light Co.; City of Austin, TX; Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. NPF–76 and NPF–80 issued to Houston Lighting & Power Company, et al., (the licensee) for operation of the South Texas Project, located in Matagorda County, Texas. The original application dated August 30, 1991, was previously published in the **Federal Register** on October 16, 1991 (56 FR 51926). That application was superseded in its entirety by application dated June 2, 1992.

The proposed amendments would change the technical specifications to reflect a change in the actuation logic which would accompany the replacement of the two original toxic gas monitoring channels with three state-of-the-art toxic gas monitoring channels. The actuation logic would be revised to provide a two-out-of-three (⅔) logic for a high toxic gas actuation signal and monitor failure actuation logic, as opposed to the current one-out-of-two (½) and two-out-of-two (⅔) logic respectively. In the June 2, 1992, submittal, the licensee requested approval of an interim technical specification in September 1992 followed by a final technical specification to be effective in February 1993. This would allow adequate time for hardware and procedural changes to

support installation of the third toxic gas monitoring channel during the Unit 1 refueling outage (fall 1992) and Unit 2 refueling outage (spring 1993).

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The addition of a third channel of toxic gas monitoring would not increase the probability of a previously evaluated accident because the toxic gas analyzers have no role in the initiation of an accident. Consequences of a previously evaluated accident would not increase because a third monitor would provide additional redundancy and reliability to the current monitoring system. Therefore, a more credible toxic gas monitoring system would be in place, and the probability or consequences of a accident previously evaluated would not be significantly increased.

(2) The proposed change does not create the possibility of a new or different kind of accident from any previously evaluated.

The proposed change would not require the toxic gas monitoring system to perform any safety function for which it is not already designed or required to perform. Adding a third analyzer to the monitoring system for each Unit would provide additional redundancy in the detection of toxic gas release. For these reasons, the proposed change would not create the possibility of a new or different kind of accident from any previously evaluated.

(3) The proposed change does not involve a significant reduction in a margin of safety.

The decrease in probability of actuation when required for the high toxic gas actuation signal and increase in probability of spurious actuation for the loss of power/malfunction actuation signal are slight and do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within thirty (30) days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Rules and Directives Review Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this Federal Register notice. Written comments may also be delivered to room P-223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By November 2, 1992, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at Wharton County Junior College, J. M. Hodges Learning Center, 911 Boling Highway, Wharton, Texas 77488. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the mater. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to reply in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The

contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 325–6000 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to Suzanne C. Black: Petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Jack R. Newman, Esq., Newman & Holtzinger, P.C., 1615 L Street, NW., Washington, DC 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendments dated June 2, 1992, which is available for public inspection at the Commission's Public Document room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at Wharton County Junior College, J.M. Hodges Learning Center, 911 Boling Highway, Wharton, Texas 77488.

Dated at Rockville, Maryland, this 28th day of September 1992.

For the Nuclear Regulatory Commission.

George F. Dick, Jr.,

Senior Project Manager, Project Directorate IV-2, Division of Reactor Projects III/IV/V, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket Nos. 50–327 and 50–328]

Tennessee Valley Authority, Sequoyah Nuclear Plant, Units 1 and 2; Partial Denial of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) has denied a portion of a request by the Tennessee Valley Authority (TVA or the licensee) for an amendment to Facility Operating License Nos. DPR–77 and DPR–79 issued to the licensee for operation of the Sequoyah Nuclear Plant, Units 1 and 2, located in Soddy Daisy, Tennessee. Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration and Determination and Opportunity for Hearing was published in the **Federal Register** on July 8, 1992 (57 FR 30262) and renoticed on August 5, 1992 (57 FR 34591).

The purpose of the licensee's amendment request was to revise the Technical Specifications (TS) to reflect a restructuring within TVA's Nuclear Power Organization affecting the Independent Safety Engineering manager, change the reference document that contains the facility staff qualification and training requirements, and update Plant Operations Review Committee membership.

The staff has determined that the proposed change to substitute the references to ANSI N18.1–1971, the March 28, 1980 NRC letter, and Regulatory Guide 1.8, with a reference to the TVA Nuclear Quality Assurance Plan in Specification 6.3.1 cannot be granted. Similarly, the proposed substitution of the references to ANSI N18.1–1971 in Specification 6.4.1 with a reference to the TVA Quality Assurance Plan cannot be granted. The licensee was notified of the Commission's denial by letter dated.

By November 2, 1992, the licensee may demand a hearing with respect to the denial described above. Any person whose interest may be affected by this proceeding may file a written petition for leave to intervene.

A request for hearing or petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC, 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC, by the above date.

A copy of any petitions should also be sent to the Office of the General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, E11 B33, Knoxville, Tennessee 37902, attorney for the licensee.

For further details with respect to this action, see (1) the application for amendment dated May 28, 1992, which was modified by letter dated July 14, 1992, and (2) the Commission's letter to the licensee dated.

These documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the

Chattanooga-Hamilton County Library, 1001 Broad Street, Chattanooga, Tennessee 37402. A copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC, 20555, Attention: Document Control Desk.

Dated at Rockville, Maryland, this 28th day of September, 1992

For the Nuclear Regulatory Commission.

Frederick J. Hebdon,

Director, Project Directorate II-4, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

OFFICE OF PERSONNEL MANAGEMENT

Federal Salary Council; Meeting

AGENCY: Office of Personnel Management.

ACTION: Cancellation of meeting.

SUMMARY: According to the provisions of section 10 of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that the previously scheduled October 5th meeting of the Federal Salary Council is canceled. The next meeting of the Federal Salary Council will be held at the time and place shown below. The agenda for this meeting will be the discussion of issues relating to the new locality-based comparability payments authorized by the Federal Employees Pay Comparability Act of 1990 (FEPCA). The meeting will be open.

DATES: The October 5, 1992, meeting is canceled. The next meeting is scheduled for October 28, 1992, beginning at 10 a.m.

ADDRESSES: Office of Personnel Management, 1900 E Street, NW., room 7B09, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ruth O'Donnell, Chief, Salary Systems Division, Office of Personnel Management, 1900 E Street, NW., room 6H31, Washington, DC 20415-0001. Telephone number: (202) 606-2838.

For the President's Pay Agent.

Douglas A. Brook,

Acting Director.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-31241; File No. SR-NASD-92-37]

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to Transaction Reporting Procedures

September 25, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on August 31, 1992, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The purpose of the proposed rule change is to effect various technical changes in the rules governing real-time transaction reporting. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD hereby files this proposed rule change, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and rule 19b-4 thereunder, to effect various technical changes in the rules governing real-time transaction reporting in Nasdaq/National Market System ("Nasdaq/NMS") securities, Nasdaq Small-Cap securities, and exchange-listed securities. The affected provisions of the NASD rules are contained in Parts XII and XIII of Schedule D, and in Schedule G to the NASD By-Laws. The text of the proposed changes is set forth below; new language is italicized while deleted language is bracketed.

Part XII—Reporting Transactions in NASDAQ National Market System Designated Securities

This part has been adopted pursuant to Article VII of the Corporation's By-Laws and applies to the reporting by all members of transactions in Nasdaq/National Market System securities ("designated securities") through the [Transaction Reporting System] *Automated Confirmation Transaction Service ("ACT").*

* * * * *

Section 1—Definitions

* * * * *

[(b) ["Transaction Reporting System" means the transaction reporting system for the reporting and dissemination of last sale reports in designated securities.] *"Automated Confirmation Transaction Service" or "ACT" is the service that, among other things, accommodates reporting and dissemination of last sale reports in designated securities.*

* * * * *

Section 2—Transaction Reporting

(a) When and How Transactions *are* Reported

(1) Registered Reporting Market Makers shall, [transmit through the Transaction Reporting System] within 90 seconds after execution, *transmit through ACT* last sale reports of transactions in designated securities executed during [the] *normal market* hours. [of the Transaction Reporting System] Transactions not reported within 90 seconds after execution shall be designated as late.

(2) Non-Registered Reporting Members shall, *within 90 seconds after execution, transmit through ACT or the ACT Service Desk (if qualified pursuant to Part IX of Schedule D to the By-Laws), or if ACT is unavailable due to system or transmission failure, by telephone to the Market Operations Department in New York City, last sale reports of transactions in designated securities executed during normal market hours.* [transmit through the Transaction Reporting System, or if such System is unavailable, via Telex, TWX or telephone to the Nasdaq Operations Department in New York City, within 90 seconds after execution, last sale reports of transactions in designated securities executed during the trading hours of the Transaction Reporting System unless all of the following criteria are met:]

[(A) The aggregate number of shares of designated securities which the member executed and is required to report during the trading days does not exceed 1,000 shares; and]

[(B) The total dollar amount of shares of designated securities which the member executed and is required to report during the trading day does not exceed $25,000; and]

[(C) The member's transactions in designated securities have not exceeded the limits of (A) or (B) above on five or more of the previous ten trading days.]

Transactions not reported within 90 seconds after execution shall be designated as late. [If the member has reason to believe its transactions in a given day will exceed the above limits, it shall report all transactions in

designated securities within 90 seconds after execution; in addition, if the member exceeds the above limits at any time during the trading day, it shall immediately report and designate as late any unreported transactions in designated securities executed earlier that day.]

(3) Non-Registered Reporting Members shall report weekly to the *Market* [Nasdaq] Operations Department in New York City, on a form designated by the Board of Governors, last sale reports of transactions in designated securities which are not required *to be reported under paragraph (2) or (4).* [by paragraph (2) to be reported within 90 seconds after execution].

(4) Last sale reports of transactions in designated securities executed between the hours of 4 p.m. and [5:00] *5:15* p.m. Eastern Time shall be transmitted through [the Transaction Reporting System no later than 5 p.m. Eastern Time] *ACT within 90 seconds after execution; trades executed and reported after 4 p.m. Eastern Time shall be designated as ".T" or after hours trades.*

(5) All members shall report weekly to the [Nasdaq] *Market* Operations Department in New York City, on a form designated by the Board of Governors, last sale reports of transactions in designated securities executed outside the hours of 9:30 a.m. and *5:15* [5:00] *p.m. Eastern Time.*

* * * * * *

Part XIII—Reporting Transactions in NASDAQ Small-Cap Securities

This part has been adopted pursuant to Article VII of the Corporation's By-Laws and sets forth the applicable reporting requirements for transactions in Nasdaq *Small-Cap* securities ("designated securities"). [that are not classified as Nasdaq/National Market System securities.] Members shall utilize the Automated Confirmation Transaction Service ("ACT") for transaction reporting.

* * * * *

Section 2—Transaction Reporting

(a) When and How Transactions are Reported

* * * * *

(2) Non-Registered Reporting Members shall, within 90 seconds after execution, transmit through ACT or the ACT service desk (if qualified pursuant to Part IX of Schedule D to the By-Laws), or if ACT is unavailable due to system or transmission failure, by telephone to the Market Operations Department in New York City, last sale reports of transactions in designated securities executed during normal market hours. [unless all of the following criteria are met:]

[(A) The aggregate number of shares of designated securities which the member executed and is required to report during the trading day does not exceed 1,000 shares; and]

[(B) The total dollar amount of shares of designated securities which the member executed and is required to report during the trading day does not exceed $25,000; and]

[(C) The member's transactions in designated securities have not exceeded the limits of (A) or (B) above on five or more of the previous ten trading days.]

Transactions not reported within 90 seconds after execution shall be designated as late. [If the member has reason to believe its transactions in a given day will exceed the above limits, it shall report all transactions in designated securities within 90 seconds after execution; in addition, if the member exceeds the above limits at any time during the trading day, it shall immediately report and designate as late any unreported transactions in designated securities executed earlier that day.]

(3) Non-Registered Reporting members shall report weekly to the [Nasdaq] *Market* Operations Department in New York City, on a form designated by the Board of Governors, last sale reports of transactions in *designated* securities which are not *required to be reported under paragraph (2) or (4).* [required by paragraph (2) to be reported within 90 seconds after execution.]

(4) Last sale reports of transactions in designated securities executed between the hours of 4 p.m. and *5:15* [5:00] p.m. Eastern Time shall be transmitted through [the] ACT [System] within 90 seconds after execution; trades *executed and* reported after [4:10] 4 p.m. Eastern Time shall be designated as ".T" or after hours trades.

(5) All members shall report weekly to the [Nasdaq] *Market* Operations Department in New York City, on a form designated by the Board of Governors, last sale reports of transactions in designated securities executed outside the hours of 9:30 a.m. and *5:15* [5:00] p.m. Eastern Time.

* * * * *

Schedule G

REPORTING TRANSACTIONS IN LISTED SECURITIES

* * * * *

Section 1—Definitions

* * * * *

(c) "*Registered* [Designated] Reporting Member" means a member of the Association that is registered as a CQS market maker, pursuant to Part VII of Schedule D of the Association's By-Laws, *in a particular eligible security. A member is a Registered Reporting Market Maker in only those eligible securities for which it has registered as a CQS market maker. A member shall cease being a Registered Reporting Market Maker in an eligible security when it has withdrawn or voluntarily terminated its quotations in that security or when its quotations have been suspended or terminated by action of the Corporation.*

* * * * *

(e) "Non-*Registered* [Designated] Reporting Member" means [all] *a* member[s] of the Association *that* [which are] is not a *Registered* [Designated] Reporting Member[s].

(f) "Automated Confirmation Transaction Service" or "ACT" is the service that, among other things, accommodates reporting and dissemination of last sale reports in eligible securities.

Section 2—Transaction Reporting

(a) When and How Transactions *are* Reported

(1) *Registered* [Designated] Reporting Members shall transmit through *ACT*, [the NASDAQ Transaction Reporting system,] within 90 seconds after execution, last sale reports of transactions in eligible securities *executed* during the trading hours of the Consolidated Tape otherwise than on a national securities exchange. *Registered* [Designated] Reporting members shall *also* transmit through [the NASDAQ] Transaction Reporting System.] *ACT*, within 90 seconds after execution, last sale reports of transactions in eligible securities executed in the United States otherwise than on a national securities exchange between 4 p.m. and 5:15 p.m. Eastern Time. Transactions not reported within 90 seconds after execution shall be designated as late.

(2) Non-*Registered* [Designated] Reporting Members shall, *within 90 seconds after execution,* transmit through ACT or the ACT Service Desk (if qualified pursuant to Part IX of Schedule D to the NASD By-Laws), or if ACT is unavailable due to system or transmission failure by telephone to the Market Operations Department in New York City, [the Transactions Reporting System, or if such System is unavailable, via Telex, TWX or telephone, to the NASDAQ Department in New York City, within 90 seconds after execution,] last sale reports of transactions in

eligible securities executed during the trading hours of the Consolidated Tape otherwise than on a national securities exchange. [unless all of the following criteria are met:]

[(A) The aggregate number of shares of eligible securities which the member executed and is required to report does not exceed 1,000 shares in any one trading day; and]

[(B) The total dollar amount of shares of eligible securities which the member executed and is required to report does not exceed $25,000 in any one trading day; and]

[(C) The member's transaction in eligible securities have not exceeded the limits of (A) or (B) above on five or more of the previous ten trading days.]

Non-*Registered* [Designated] Reporting Members shall [transmit through the NASDAQ Reporting System, or if such System is unavailable, via Telex, TWX or telephone, to the NASDAQ Department in New York City], within 90 seconds after execution, *transmit through ACT or the ACT service desk (if qualified pursuant to Part IX of Schedule D to the By-Laws), or if ACT is unavailable due to system or transmission failure, by telephone to the Market Operations Department in New York City,* last sale reports of transactions in eligible securities executed in the United States otherwise than on a national securities exchange between the hours of 4 p.m. and 5:15 p.m. Eastern Time. [unless all of the criteria specified in paragraphs (A), (B) and (C) above are met.]

Transactions not reported within 90 seconds after execution shall be designated as late. [If the member has reason to believe its transactions in a given day will exceed the above limits, it shall report all transactions in eligible securities within 90 seconds after execution; in addition, if the member exceeds the above limits at any time during the trading day, it shall immediately report and designate as late any unreported transactions in eligible securities executed earlier that day.]

(3) Non-*Registered* [Designated] Reporting Members shall report weekly to the [Nasdaq] *Market* Operations Department in New York City, on Form T, last sale reports of transactions in eligible securities *that* [which] are not required [by paragraph (2)] to be reported [within 90 seconds after execution] *under paragraph (2).*

* * * * *

(b) Which Party Reports Transactions

* * * * *

(2) In transactions between two *Registered* [Designated] Reporting Members, only the member representing the sell side shall report.

(3) In transactions between a *Registered* [Designated] Reporting Member and Non-*Registered* [Designated] Reporting Member, only the *Registered* [Designated] Reporting Member shall report.

(4) In transactions between [the] Non-*Registered* [Designated] Reporting Member, only the member representing the sell side shall report.

* * * * *

II. Self-Regulatory Organization's Statements of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in Section (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Through the instant filing, the NASD is seeking the SEC's approval of a series of technical changes to those NASD rules that govern transaction reporting by member firms. Overall, these modifications are intended to make the language of the affected rules more consistent and thereby facilitate compliance by member firms. For example, the amended rules delete outmoded references to reporting systems that have been supplanted by the Automated Confirmation Transaction Service ("ACT") and support facilities offered by the ACT service desk in New York City. Further, the proposed amendments would delete the *de minimis* thresholds for real-time trade reporting in Nasdaq and exchange-listed securities that have existed for many years.[1] This will result in reduced usage of Form T as a reporting vehicle for transactions effected between 9:30 a.m. and 5:15 p.m. Eastern Time. Hence, the NASD will capture additional transaction data electronically, for purposes of public dissemination as well as integration into the regulatory audit trail.

The NASD believes that this proposed rule change is consistent with section 11A(a)(1) and 15A(b)(6) of the Act. More specifically, section 11A(a)(1) articulates the Congressional findings that expanded use of automation is important to ensure broad dissemination of market data (including last sale information), and the efficient operation of the nation's securities markets. Section 15A(b)(6) provides, *inter alia,* that the NASD's rules be designed to prevent fraudulent/manipulative practices, promote just and equitable principles of trade, and facilitate securities transactions. The NASD posits that the proposed amendments to the trade reporting rules are fully consistent with these statutory provisions and that their implementation will enhance market efficiency as well as the NASD's automated surveillance capabilities.

B. Self-Regulatory Organization's Statement on the Burden on Competition

The NASD believes that the rule change will not result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change; or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the

[1] These thresholds apply exclusively to transactions effected by a member firm that is not a registered market maker in the particular reportable security and that effects transactions in such security with other non-market makers or public customers.

submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available, for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by October 23, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority. 17 CFR 200.30-3(a)(12).

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 92-23904 Filed 10-1-92; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-31242; International Series Release No. 462; File No. SR-OCC-92-25]

Self-Regulatory Organization; The Options Clearing Corporation; Notice of Filing and Order Granting Accelerated Approval of a Proposed Rule Change Relating to the Expiration Date of End-of-Month Foreign Currency Options and End-of-Month Cross-Rate Foreign Currency Options.

September 25, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on September 11, 1992, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been primarily prepared by OCC. The Commission is publishing this notice and order to solicit comments from interested persons and to grant accelerated approval of the proposed rule change.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would modify the expiration date for certain end-of-month foreign currency options and end-of-month cross-rate foreign currency options (collectively hereinafter referred to as "EMOs") to address the possibility of a lack of liquidity for these instruments during certain holidays celebrated throughout the world.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, OCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. OCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to conform OCC's expiration date for EMOs traded on the Philadelphia Stock Exchange ("PHLX") to the expiration date proposed in PHLX's File No. SR-PHLX-92-25. On July 21, 1992, the Commission approved a rule change proposed by PHLX which allows PHLX to list foreign currency options and cross-rate foreign currency options with an expiration date that is the Saturday following the last Friday of the expiration month.[2] On July 13, 1992, the Commission approved OCC's corresponding filing which allows OCC to issue, clear, and guarantee EMOs.[3]

As presently defined by both OCC's Rules [4] and PHLX's Rules,[5] the December 1992 series of EMOs will expire on the day after Christmas in 1992, and the December 1993 series will expire on New Year's Day in 1994. The last trading days for these EMOs will be Thursday, December 24, 1992, and Thursday, December 30, 1993, respectively.[6] PHLX notes that the day before the Christmas holiday and the day before the New Year's Day holiday are typically characterized by light trading and relatively low levels of liquidity. As more fully explained in its filing, PHLX believes that these liquidity concerns can be obviated by changing the expiration date of these series of EMOs to the Saturday immediately preceding December 25th. OCC therefore proposes the corresponding change in its Rules.

OCC believes the proposed rule change is consistent with Section 17A of the Act, as amended,[7] because it applies the same systems, procedures, and safeguards to the clearance and settlement of EMOs that are presently used successfully by OCC with all foreign currency and cross-rate foreign currency options. The rule change will therefore facilitate the prompt and accurate clearance and settlement of such options while addressing the liquidity concerns.

B. Self-Regulatory Organization's Statement on Burden on Competition

OCC does not believe that the proposed rule change will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members Participants or Other

Written comments were not and are not intended to be solicited with respect to this proposed rule change, and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Commission finds that OCC's proposal is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies and, in particular, with the requirements of section 17A(b) (3) (A) and (F).[8] Those sections require that a clearing agency be organized, have the capacity to facilitate, and have rules designed to safeguard securities and funds in its custody or control or for which it is responsible. The Commission believes that the changes embodied in OCC's proposal will better enable OCC to meet this statutory requirement by addressing the possibility of lack of liquidity for certain options during certain holidays celebrated throughout the world.

As discussed above, the day before the Christmas holiday and the day before the New Year's Day holiday historically lack liquidity. PHLX has noted that liquid markets in foreign exchange instruments are negatively impacted on these dates because these holidays are observed worldwide. The liquidity concern is compounded by the fact that the last trading day before the expiration date of these EMO's is the day before the holiday and participants

---

[2] Securities Exchange Act Release No. 30945 (July 21, 1992), 57 FR 33381 (File No. SR-PHLX-92-13).

[3] Securities Exchange Act Release No. 30919 (July 13, 1992), 57 FR 32036 (File No. SR-OCC-92-16).

[4] OCC By-Laws, Art. XV, section 1(h) and Art. XX, section 1(i).

[5] PHLX Option Rule 1000 (b)21.

[6] PHLX will close on Friday December 31, 1993, in observance of the New Years Day Holiday.

[7] 15 U.S.C. 78q-1.

[8] 15 U.S.C. 78q-1(b) (3) (A) and (F).

generally are active on their last trading day before an expiration date. By changing the expiration date to the Saturday immediately preceding December 25th when the last Friday of the expiration month is either December 25th or December 31st, the liquidity concerns should be addressed because the last trading day before the expiration date will not be the day before a globally celebrated holiday.

OCC has requested that the Commission find good cause for approving this proposed rule change prior to the thirtieth day after the date of publication of the notice of filing in the **Federal Register** in order that OCC's proposed rule change may become effective concurrently with PHLX's proposed rule change and in time for PHLX to disclose the modification to the December EMOs month-end expiration prior to the listing of such series on September 28, 1992. OCC believes that even if SR–PHLX–92–25 is approved, PHLX will not be able to list series with the new December expiration date until this proposed rule change has also become effective. The Commission finds good cause for so approving because by granting accelerated approval OCC will be able to avoid issuing EMOs with expiration dates that fall on days with light trading and relatively low levels of liquidity and PHLX will be able to notify in a timely manner its members participants, and customers of the modification to the December EMOs.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of OCC. All submissions should refer to the file number SR–OCC–92–25 and should be submitted by October 23, 1992.

V. Conclusion

On the basis of the foregoing, the Commission finds that OCC's proposed rule change is consistent with the Act and in particular with section 17A of the Act.[9]

It is therefore ordered, under section 19(b)(2) [10] of the Act, that the proposed rule change [File No. SR–OCC–92–25] be and hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[11]

Margaret H. McFarland,

Deputy Secretary.

Federal Aviation Administration

[Summary Notice No. PE–92–28]

Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before October 22, 1992.

ADDRESSES: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rule Docket (AGC–10), Petition Docket No. _____, 800 Independence Avenue, SW., Washington, DC 20591.

The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC–10), room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–3132.

FOR FURTHER INFORMATION CONTACT: Mr. C. Nick Spithas, Office of Rulemaking (ARM–1), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–9704.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of part 11 of the Federal Aviation Regulations (14 CFR part 11).

Issued in Washington, DC, on September 24, 1992.

Denise D. Castaldo,

Manager, Program Management Staff.

Petitions for Exemption

Docket No.: 109CE.
Petitioner: Fairchild Aircraft.
Sections of the FAR Affected: 14 CFR 23.201, 23.203, 23.207 and 23.1545.
Description of Relief Sought: To permit type certification of a commuter category airplane with certain stall characteristics and airspeed indicator markings that are appropriate to SA227–CC, SA227–DC, and all subsequent commuter category airplanes approved on Type Certificate A18SW aircraft.

Docket No.: 22441.
Petitioner: United Airlines.
Sections of the FAR Affected: 14 CFR 121.440
Description of Relief Sought: To amend Exemption No. 3451, as amended, to permit United Airline captains to serve as police in command without having passed a line check within the previous 12 months

Docket No.: 26738.
Petitioner: Ramsey County Sheriff's Air Patrol.
Sections of the FAR Affected: 14 CFR 61.118.
Description of Relief Sought: To permit members of the Ramsey County Sheriff's Air Patrol to be reimbursed for fuel, oil, and maintenance costs while performing official duties involving airborne search and rescue, drug surveillance and interdiction, and prisoner transport missions.

Docket No.: 26920.
Petitioner: City of Department of Aviation.
Sections of the FAR Affected: 14 CFR 107.17.

---

[9] 15 U.S.C. 78q–1.

[10] 15 U.S.C. 78s(b)(2).

[11] 17 CFR 200.30–3(a)(12) (1991).

Description of Relief Sought: To allow City of Chicago, Department of Aviation security officers to bypass terminal checkpoint security screening when responding to emergency situations in sterile airport areas.

Docket No.: 26949.
Petitioner: KaiserAir, Inc.
Sections of the FAR Affected: 14 CFR 135.247(a)(2).
Description of Relief Sought: To consider a Gulfstream 1159 and a Gulfstream IV one type of aircraft for the purpose of allowing any combination of 3 takeoffs and 3 landings in the preceding 90 days in either aircraft to satisfy § 135.247(a)(2).

Docket No.: 26961.
Petitioner: Regional Airline Association.
Sections of the FAR Affected: 14 CFR 91.205(b)(11).
Description of Relief Sought: To relieve members of the Regional Airline Association from the requirement to equip multi-engine turboprop airplanes, operated under part 135, with pyrotechnic signaling devices when operated over water beyond power-off gliding distance from shore.

Docket No.: 26964.
Petitioner: L R Services.
Sections of the FAR Affected: 14 CFR 91.191 (a)(5) and 135.165(b)(6) and (b)(7)
Description of Relief Sought: To allow L R Services to operate certain extended overwater flights with only one HF communications system.

Docket No.: 26966.
Petitioner: Airman Flight School, Inc.
Sections of the FAR Affected: 14 CFR 141.65
Description of Relief Sought: To permit Airman Flight School, Inc. to recommend graduates of the school's approved certification courses for flight instructor and airline transport pilot ratings without having taken the FAA written or flight test.

Docket No.: 26967.
Petitioner: Mr. William W. Niendorff.
Sections of the FAR Affected: 14 CFR 121.383(c).
Description of Relief Sought: To allow Mr. Willaim W. Niendorff to serve as a pilot in part 121 air carrier operations after his 60th birthday.

Dispositions of Petitions

Docket No.: 23465.
Petitioner: Everts Air Fuel, Inc.
Sections of the FAR Affected: 14 CFR 91.31(a).
Description of Relief Sought/ Disposition: To amend Exemption No. 4296, as amended, from § 91.31(a) to add Mcdonnell Douglas DC–6 aircraft, registration numbers N351CE, N451CE, and N4390F, to the original listing of exempted aircraft. In addition, to extend the termination date of Exemption No. 4296, as amended, which enables Everts Air Fuel, Inc., to operate its McDonnell Douglas DC–6 aircraft, registration numbers N351CE, N451CE, and N4390F, and its McDonnell Douglas DC–6B aircraft, registration numbers N151 and N251CE, at a 5 percent increased zero fuel and landing weight.
Grant, September 16, 1992, Exemption No. 4296D

Docket No.: 26695.
Petitioner: Comair Aviation Academy.
Sections of the FAR Affected: 14 CFR 141.65.
Description of Relief Sought/ Disposition: To allow Comair Aviation Academy to hold examining authority for flight instructor and airline transport pilot written tests.
Partial Grant, September 21, 1992, Exemption No. 5523

Docket No.: 26746.
Petitioner: Pacific States Aviation Incorporated.
Sections of the FAR Affected: 14 CFR 135.181(a)(1).
Description of Relief Sought/ Disposition: To permit Pacific States Aviation Incorporated and Jet Charter to provide passenger-carrying, on-demand air taxi operations during instrument flight rule and over-the-top conditions in the TBM 700 single-engine turbopropeller airplane.
Denial, September 18, 1992, Exemption No. 5510

Docket No.: 26849.
Petitioner: Captain Scott Ferris.
Sections of the FAR Affected: 14 CFR 61.197(a) and (b).
Description of Relief Sought/ Disposition: To allow Captain Scott Ferris to be exempt from the flight instructor certificate renewal requirements.
Denial, September 16, 1992, Exemption No. 5522

Deadline Extension for Solicitation of Aviation Research Grants Proposal

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces that the deadline for submitting proposals in response to Solicitation 91.1, *Grants for Aviation Research*, which was issued pursuant to Public Law 101–508 and Public Law 101–604, is hereby extended from September 30, 1992 to November 30, 1992. The notice announcing the availability of the Solicitations was originally published at 56 FR 61271.

FOR FURTHER INFORMATION CONTACT: William E. Reilly Jr., Office of Research and Technology Applications, ACL–1 FAA Technical Center, Atlantic City International Airport, NJ 08405. Telephone: (609) 484–4761.

Dated: September 22, 1992.

Gilbert B. Davey, Jr.,

Acting Deputy Director, Federal Aviation Administration, Technical Center.

Research, Engineering, and Development Advisory Committee; Meeting

Pursuant to section 10(A) (2) of the Federal Advisory Committee Act (Pub. L. 92–362; 5 U.S.C. app. I), notice is hereby given of a meeting of the Federal Aviation Administration (FAA) Research, Engineering, and Development (R, E&D) Advisory Committee to be held Tuesday, October 27, at 10 a.m. The meeting will take place at the Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC, in the MacCracken Room on the tenth floor.

The agenda for this meeting will include brief updates from the committee on current tasks in the areas of Capacity Technology, Runway Incursions, and Human Factors. In addition, the committee will receive an overview of the FAA R, E&D Program, highlighting the thrusts for the up-coming year, as well as updates on FAA initiatives in the areas of Automation and Satellites.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present oral statements, obtain information, or plan to access the building to attend the meeting should contact Ms. Jan Peters, Special Assistant to the Executive Director of the R, E&D Advisory Committee, ASD–6, 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267–3096.

Any member of the public may present a written statement to the Committee at any time.

Issued in Washington, DC, on September 24, 1992.

Martin T. Pozesky,

Executive Director, Research, Engineering, and Development Advisory Committee.

[FR Doc. 92-23987 Filed 10-1-92; 8:45 am]

BILLING CODE 4910-13-M

Passenger Facility Charge (PFC) Approvals and Disapprovals

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Monthly Notice of PFC Approvals and Disapprovals. In August 1992, there were seven applications approved and one supplemental decision.

SUMMARY: The FAA publishes a monthly notice, as appropriate, of PFC approvals and disapprovals under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101-508) and part 158 of the Federal Aviation Regulations (14 CFR part 158). This notice is published pursuant to paragraph d of § 158.29.

PFC Applications Approved

Public Agency: City and County of Twin Falls, Twin Falls, Idaho.

Application Type: Impose and Use PFC Revenue.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $270,000.

Earliest Permissible Charge Effective Date: November 1, 1992.

Duration of Authority to Impose: May 1, 1998.

Class of Air Carriers Not Required to Collect PFC's: Part 135 on-demand air taxi/commercial operators.

Determination: Approved. The FAA has determined that the proposed class accounts for less than 1 percent of the airport's total annual enplanements.

Brief Description of Project Approved to Impose and Use: Construction of terminal building.

Decision Date: August 12, 1992.

FOR FURTHER INFORMATION CONTACT: Ms. Suzanne Lee-Pang, Federal Aviation Administration, Seattle Airports District Office, 1601 Lind Avenue, SW., suite 205, Renton, Washington 98055-4056, (206) 227-2654.

Public Agency: Port of Seattle, Seattle, Washington.

Application Type: Impose and Use PFC Revenue.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $28,847,488.

Earliest Permissible Charge Effective Date: November 1, 1992.

Duration of Authority to Impose: January 1, 1994.

Class of Air Carriers Not Required to Collect PFC's: Commercial operators of small aircraft, comprising less than 1 percent of the total enplanements at the airport.

Determination: Approved. The FAA has determined that the proposed class accounts for less than 1 percent of the airport's total annual enplanements.

Brief Description of Projects Approved:

Noise remedy program,
Airfield taxiways,
Runway incursion improvements,
Runway 16L/34R structural overlay and safety area improvements,
Design for the Runway 16R/34L rehabilitation project,
South airport support area planning/environmental impact statement,
Fire response vehicles,
Security improvements,
Satellite transit system improvements.

Decision Date: August 21, 1992.

SUPPLEMENTARY INFORMATION: Mr. Paul Johnson, Federal Aviation Administration, Seattle Airports District Office, 1601 Lind Avenue, SW., suite 205, Renton, Washington 98055-4056, (206) 227-2655.

Public Agency: City of Meridian, Meridian, Mississippi.

Application Type: Impose and Use PFC Revenue.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $122,500.

Earliest Permissible Charge Effective Date: November 1, 1992.

Duration of Authority to Impose: June 1, 1994.

Class of Air Carriers not Required to Collect PFC's: None.

Brief Description of Projects Approved:

Medium intensity runway lights on Runway 4/22,
Parallel taxiway lighting along a portion of Runway 4/22,
Fire truck,
Proximity suits,
Construct new taxiway south of the control tower,
Install new automatic gate actuators and gate hangars on four gates,
Overlay T-hangar taxiway and improve drainage,
Seal concrete joints on general aviation parking apron,
Update airport master plan,
Pavement sweeper,
Storm sewer repairs.

Brief Description of Projects Disapproved: Repave Runway 4/22.

Determination: The disapproved amount, $120,000, represents the City's request for PFC revenues to fund the local match of a proposed Airport Improvement Program (AIP) project. The total project cost is $1,200,000. The City requests AIP funding of $1,080,000 of which $1,050,000 is discretionary funding and $30,000 is entitlement funding. The FAA cannot commit to this level of AIP discretionary funding at this time, a critical consideration on an impose and use application.

Decision Date: August 21, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Elton E. Jay, FAA Airports District Office, 120 North Hangar Drive, suite B, Jackson, Mississippi, 39208-2306, (601) 965-4628.

Public Agency: Lehigh-Northampton Airport Authority, Allentown, Pennsylvania.

Application Type: Impose PFC Revenue.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $3,778,111.

Earliest Permissible Charge Effective Date: November 1, 1992..

Duration of Authority to Impose: April 1, 1995.

Class of Air Carriers not Required to Collect PFC's: Air taxi/commercial operators.

Determination: Approved. The FAA has determined that the proposed class accounts for less than 1 percent of the airport's total annual enplanements

Brief Description of Project Approved: Expand existing terminal.

Decision Date: August 28, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. L.W. Walsh, Federal 3911 Hartzdale Drive, Suite 1, Camp Hill, Pennsylvania, 17011, (717) 782-4548.

Public Agency: The Pennsylvania State University and Centre County Airport Authority, State College, Pennsylvania..

Application Type: Impose and Use PFC Revenue.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $1,495,974.

Earliest Permissible Charge Effective Date: November 1, 1992.

Duration of Authority to Impose: July 1, 1997.

Class of Air Carriers not Required to Collect PFC's: Air taxi and charter carriers.

Determination: Approved. The FAA has determined that each proposed class accounts for less than 1 percent of the airport's total annual enplanements.

Brief Description of Project Approved:

Terminal apron expansion,
Land acquisition,
Upgrade and renovate Taxiway B,

Signage update,
Emergency generator,
Obstruction removal and general aviation ramp renovation.

Brief Description of Projects Approved in Part: Terminal expansion—phase I, Terminal expansion—phase II.

Brief Description of Projects Withdrawn:

Stormwater management,
Runway extension,
Runway friction tester,
Runway condition sensors,
Maintenance building and grit storage,
Snow removal equipment—plow,
Aircraft rescue and firefighting vehicle,
Expand Taxiway B,
Recondition existing broom,
Master plan update,
Security control and access improvements,
Automated weather observation systems IV,
Land acquisition,
Snow removal equipment—blower,
Renovate runway lighting,
Terminal building expansion.

Determination: The University and Authority withdrew these projects from its application by letter to the FAA dated August 3, 1992.

Decision Date: August 28, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. L.W. Walsh, Federal Aviation Administration, Harrisburg Airports District Office, 3911 Hartzdale Drive, suite 1, Camp Hills, Pennsylvania, 17011, (717) 782–4548.

Public Agency: Great Falls International Airport Authority, Great Falls, Montana.

Application Type: Impose and Use PFC Revenue.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $3,010,900.

Earliest Permissible Charge Effective Date: November 1, 1992.

Duration of Authority to Impose: July 1, 2002.

Class of Air Carriers not Required to Collect PFC's: Air taxi and charter carriers operating only as on demand carriers which do not provide regularly scheduled air transportation service.

Determination: Approved. The FAA determined that the proposed class accounts for less than 1 percent of the airport's total annual enplanements.

Brief Description of Project Approved to Impose: Airport fire station.

Brief Description of Projects Approved to Impose and Use:

Taxiway between Taxiways Delta and Foxtrot,
Airfield electrical system renovation,
Reconstruct Runway 16/34,
Resurface Runway 3/21,
Erosion control,
Land acquisition: Runway 21 protection zone,
Security access system installation,
Phase 2 of perimeter road,
Master plan update.

Decision Date: August 28, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Dave Gabbert, Manager, Montana Airports District Office, Federal Aviation Administration, Helena Regional Airport, FAA Building, room 2, Helena, Montana, 59601, (406) 449–5271.

Public Agency: Lee County Port Authority (LCPA), Fort Myers, Florida.

Application Type: Impose and Use PFC Revenue.

PFC Level: $3.00.

Total Approved Net PFC Revenue: $257,673,262.

Earliest Permissible Charge Effective Date: November 1, 1992.

Duration of Authority to Impose: June 1, 2015.

Class of Air Carriers not Required to Collect PFC's: Air taxi/commercial operators.

Determination: Approved. The proposed class accounts for less than 1 percent of the airport's total annual enplanements.

Brief Description of Projects Approved to Impose and Use at Southwest Florida Regional Airport (RSW):

Landside: Modify and expand terminal,
Landside: Midfield terminal planning,
Landside: Professional services,
Land acquisition: Professional services,
Airport support: Master plan update,
Airport support: Noise study.

Brief Description of Projects Approved to Impose Only at RSW:

Landside: Gate and related terminal facilities.

Landside: Commuter terminal facilities,

Airside: Runway 6/24 expansion,

Airside: Terminal ramp expansion,

Airside: Commuter aircraft ramp,

Land acquisition: Airfield and future terminal, phase I.

Brief Description of Project Approved to Impose Only at a Proposed New General Aviation Airport: Land acquisition: Master planning/site selection.

Brief Description of Projects Approved in Part for Concurrent Authority to Impose and Use at RSW:

Airside: Professional services,
Airport support: Airport support equipment,
Airport support: PFC general formulation costs,
Airport support: 2010 "development of regional impact" application,
PFC debt financing costs,
PFC debt service payments.

Brief Description of Projects Disapproved at RSW: Landside: Project work under contract, *Airside:* Project work under contract.

Determination: While the LCPA was asking for PFC revenue to be used to fund only those costs incurred for these projects since November 5, 1990, the FAA has determined that if a notice to proceed or start of physical construction for a proposed PFC project occurred prior to November 5, 1990, the project is not eligible under § 158.3

Airport support: Wastewater treatment and reuse.

Determination: The FAA has determined that this project does not preserve or enhance safety, security, or capacity, mitigate noise impacts or furnish opportunities for enhanced competition between or among carriers.

Airport support: Maintenance building expansion.

Determination: FAA has determined that this project does not meet the criteria included in § 158.15(b).

Airport support: Professional services.

Determination: FAA has determined that this project does not meet the allowable cost criteria in section 158.3.

Airport support: Development impact fees.

Determination: FAA has determined that fees would be used on non-eligible Lee County infrastructure; therefore, this project does not meet the requirements of § 158.15(b).

Brief Description of Project Disapproved at Page Field: Airport support: Professional services.

Determination: The FAA does not view these professional services as a "project" under AIP definitions and are not tied to any development projects approved in this PFC application.

Decision Date: August 31, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Bart Vernace, Federal Aviation Administration, Orlando Airports District Office, 9677 Tradeport Drive, suite 130, Orlando, Florida, 32827, (305) 420–6582.

PFC Application Supplement Approved

Public Agency: Clark County Department of Aviation, Las Vegas, Nevada.

Application Type: Impose and Use PFC Revenue.

Total Net Approved PFC Revenue in the Supplemental Record of Decision: $189,836,000.

Duration of Authority to Impose: September 1, 2014.

Class of Air Carriers Not Required to Collect PFC's: Air taxi/commercial

operators as previously addressed in the decision dated February 24, 1992.

Brief Description of Projects Approved:

Airport connector—Tunnel portion,
Airport connector—Southern access roadway,
Airport connector—Paradise road portion,
Land acquisition: Airport connector—Southern access roadway right-of-way,

Decision Date: August 21, 1992.

FOR FURTHER INFORMATION CONTACT: Joseph R. Rodriquez, Federal Aviation Administration, San Francisco Airports District Office, 831 Mitten Road, room 210, Burlingame, California, 94010–1303, (415) 876–2805.

Issued in Washington, DC, on September 23, 1992.

Leonard L. Griggs, Jr.,

Assistant Administrator for Airports.

BILLING CODE 4910-13-M

Federal Transit Administration

FTA Sections 3 and 9 Grant Obligations

AGENCY: Federal Transit Administration (FTA), DOT.

ACTION: Notice.

SUMMARY: The Department of Transportation and Related Agencies Appropriations Act, 1992, Public Law 102-143, signed into law by President George Bush on October 28, 1991, contained a provision requiring the Federal Transit Administration (FTA) to publish an announcement in the Federal Register every 30 days of grants obligated pursuant to sections 3 and 9 of the Federal Transit Act, as amended. The statute requires that the announcement include the grant number, the grant amount, and the transit property receiving each grant. This notice provides the information as required by statute.

FOR FURTHER INFORMATION CONTACT: Janet Lynn Sahaj, Chief, Resource Management and State Programs Division, Office of Capital and Formula Assistance, Department of Transportation, Federal Transit Administration, Office of Grants Management, 400 Seventh Street, SW., room 9305, Washington, DC 20590, (202) 366-2053.

SUPPLEMENTARY INFORMATION: The Section 3 program provides capital assistance to eligible recipients in three categories: Fixed guideway modernization, construction of new fixed guideway systems and extensions, and bus purchases and construction of bus related facilities. The Section 9 program apportions funds on a formula basis to provide capital and operating assistance in urbanized areas. Section 9 grants reported may include flexible funds transferred from the Federal Highway Administration to the FTA for use in transit projects in urbanized areas. These flexible funds are authorized under the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) to be used for highway or transit purposes. Pursuant to the statute FTA reports the following grant information.

SECTION 3 GRANTS

Transit property	Grant No.	Grant amount	Obligation date
Birmingham-Jefferson County Transit Authority, Birmingham, AL	AL-03-0012-00	$2,899,200	08/03/92
Georgia Dept. of Transportation—Office of Intermodal Programs, Georgia	GA-03-0038-00	265,708	08/03/92
City and County of Honolulu, Honolulu, HI	HI-03-0014-01	20,925,000	08/31/92
Commuter Rail Division of the Regional Transportation Authority, Chicago, IL—Northwestern IN	IL-03-0131-02	18,362,500	08/05/92
Commuter Rail Division of the Regional Transportation Authority, Chicago, IL—Northwestern IN	IL-03-0162-00	16,185,500	08/05/92
City of Chicago, Chicago, IL—Northwestern IN	IL-03-0163-00	17,067,000	08/05/92
Metropolitan Transit Authority of Harris County, Houston, TX	TX-03-0150-00	6,400,000	08/14/92
Metropolitan Transit Authority of Harris County, Houston, TX	TX-03-3500-00	262,500	08/17/92

SECTION 9 GRANTS

Transit property	Grant No.	Grant amount	Obligation date
City of Fresno, Fresno, CA	CA-90-X485-00	$1,837,777	08/20/92
Connecticut Department of Transportation, Connecticut	CT-90-X210-00	14,173,600	08/27/92
City of Tyler, Tyler, TX	TX-90-X226-00	181,200	08/27/92
Intercity Transit, Olympia, WA	WA-90-X130-00	1,479,840	08/13/92

Issued on: September 28, 1992.

Brian W. Clymer,

Administrator.

BILLING CODE 4910-57-M

Research and Special Programs Administration

[Docket No. P-87-7W; Notice 2]

Transportation of Hazardous Liquids By Pipeline; Grant of Waiver, Exxon Pipeline Co.

The Exxon Pipeline Company (Exxon) petitioned the Research and Special Programs Administration (RSPA) for a waiver from compliance with the hydrostatic test requirements of 49 CFR 195.302 and the record retention requirements of 49 CFR 195.310. The petition pertains to two tie-in segments (totaling 80-feet) in an 18.39 mile pipeline in Harris County, Texas. The 8-inch pipeline transports liquid ethylene, a highly volatile liquid (HVL), between the Shell Deer Park Plant, located south of the Houston Ship Channel, and the Exxon Mont Belvieu Plant, located north of the Houston Ship Channel. Construction of the pipeline was completed in 1969; it was placed in HVL service that same year, and is operated as an interstate pipeline connected to an out-of-state system. The pipeline is owned by Exxon, leased by Shell Chemical Company and operated by Shell Pipe Line Corporation.

In 1987, Exxon discovered that the hydrostatic test records required by § 195.310 were available for all but 0.08 percent of the 18.39 mile pipeline. Records for the 53-foot and 27-foot tie-ins, located just north and south of the Houston Ship Channel, could not be located. Subsequently, Exxon petitioned RSPA for a waiver of the two short tie-in segments from the hydrostatic test and records retention requirements of §§ 195.302 and 195.310.

Accompanying Exxon's petition for waiver was information to support their position that granting a waiver would be in the best interest of pipeline safety. That information, presented in more detail in the RSPA response to Exxon's petition [Notice 1] [56 FR 46461; September 12, 1991], is summarized as:

1. The two segments are to continue operating at low hoop stress.

2. There are no indications of internal or external corrosion in the two segments.

3. The two segments are not near homes or occupied buildings.

4. No known failures have occurred in the two segments.

5. There is a strong probability that the two segments were properly pretested and that those test records cannot be located.

In response to the petition, and the justification contained therein, RSPA stated in Notice 1 (above) that it accepted the argument that the two segments were properly hydrostatically tested and found no need to grant the requested waiver from the hydrostatic testing requirements of § 192.302. Instead RSPA proposed to grant a waiver from compliance with the record retention requirements of § 195.310.

A supporting letter was received from the operator of the 8-inch pipeline at the time of submission of Exxon's request for waiver. Also, RSPA received only one response to Notice 1. That respondent, a gas pipeline company in Houston, Texas, agreed with the RSPA assessment and the proposed granting of the waiver.

In accordance with the foregoing, RSPA, by this order, finds that Exxon's compliance with § 195.310, for the two tie-ins, is unnecessary for the reasons stated in the Notice of Petition for Waiver [Notice 1] [56 FR 46461; September 12, 1991], and that the requested waiver would not be inconsistent with pipeline safety. Accordingly, the Exxon Pipeline Company's petition for waiver from compliance with § 195.310 for the two short tie-in segments is granted.

Authority: 49 App. U.S.C. 2002; and 49 CFR 1.53.

Issued in Washington, DC on September 28, 1992.

George W. Tenley, Jr.,

Associate Administrator for Pipeline Safety

UNITED STATES INFORMATION AGENCY

Performance Review Board Members

AGENCY: United States Information Agency.

ACTION: Notice.

SUMMARY: This notice is issued to revise the membership of the United States Information Agency (USIA) Performance Review Board.

DATES: The board membership change is effective as of October 2, 1992.

FOR FURTHER INFORMATION CONTACT:

Mr. John S. Welch (Co-Executive Secretary), Chief of Operations Division of Personnel, Office of Personnel, Bureau of Broadcasting, U.S. Information Agency, 330 Independence Avenue, SW., Washington, DC 20547. Telephone (202) 619-7545;

or

Ms. Patricia H. Noble (Co-Executive Secretary), Chief, Domestic Personnel Division, Office of Personnel, U.S. Information Agency, 301 4th Street, SW., Washington, DC 20547. Telephone (202) 619-4617.

SUPPLEMENTARY INFORMATION: In accordance with Section 4314(c)(1) through (5) of the Civil Service Reform Act of 1978 (Pub. L. 95454), the following list supersedes the U.S. Information Agency Notice (56 FR 56688, November 6, 1991).

Chairperson: Associate Director for Management—John Condayan (Presidential Appointee)

Deputy Chairperson: Associate Director for Broadcasting—Chase G. Untermeyer (Presidential Appointee)

Career SES Members: Daniel S. Campbell, Director, Office of Technology, Bureau of Management. Alan L. Heil, Deputy Director of Programs, Bureau of Broadcasting. Ronald Linz, Deputy for Systems Engineering, Bureau of Broadcasting. Steven C. Munson, Director, Office of Policy, Bureau of Broadcasting. Rick A. Ruth, Deputy Chief of Staff, Office of the Director. Stanley M. Silverman, Director, Office of the Comptroller.

Alternate Career SES Members: Eileen K. Binns, Director, Office of Administration, Bureau of Management. Janice H. Brambilla, Director, Office of Personnel, Bureau of Broadcasting.

This supersedes the previous U.S. Information Agency Notice (56 FR 56688, November 6, 1991).

Dated: September 28, 1992.

John Condayan,

Associate Director for Management, U.S. Information Agency.

Part II

Department of Transportation

Coast Guard

33 CFR Part 164 and 46 CFR Part 35

Unattended Machinery Spaces: Operating Requirements; Second Officer on the Bridge; and Use of Automatic Pilot: Area Restrictions and Performance Requirements; Proposed Rulemakings

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 164

[CGD 91-203]

RIN 2115-AE12

Unattended Machinery Spaces: Operating Requirements

AGENCY: Coast Guard, DOT.

ACTION: Supplemental notice of proposed rulemaking.

SUMMARY: On April 9, 1992, the Coast Guard published a notice of proposed rulemaking that would have allowed highly automated tank vessels to navigate with unattended machinery spaces in the navigable waters of the United States. This supplemental notice of proposed rulemaking completely revises the April 9 proposal by requiring the machinery spaces of integrated tug/barge combinations and tankers over 1,600 gross tons to be attended when underway in the navigable waters of the United States. Requiring a licensed engineer on watch in the machinery spaces will ensure that faults in the engineering systems will be noticed and addressed without delay. Consequently, this proposed rule should decrease the likelihood of casualties.

DATES: Comments must be received on or before December 1, 1992.

ADDRESSES: Comments may be mailed to the Executive Secretary, Marine Safety Council (G-LRA/3406) (CGD 91-203), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001, or may be delivered to room 3406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267-1477.

The Executive Secretary maintains the public docket for this rulemaking. Comments will become part of this docket and will be available for inspection and copying at room 3406, U.S. Coast Guard Headquarters.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Paul Jewell, Project Manager, Oil Pollution Act (OPA 90) Staff, (202) 267-6746, between 7 a.m. and 3:30 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written data, views, or arguments. Persons submitting comments should include their names and addresses, identify this rulemaking (CGD 91-203) and the specific section of this proposal to which each comment applies, and give the reason for each comment. Persons wanting acknowledgment of receipt of comments should enclose a stamped, self-addressed postcard or envelope.

The Coast Guard will consider all comments received during the comment period. It may change this proposal in view of the comments.

The Coast Guard plans no public hearing. Persons may request a public hearing by writing to the Marine Safety Council at the address under "**ADDRESSES**." If it determines that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by a later notice in the **Federal Register**.

Drafting Information

The principal persons involved in drafting this document are Lieutenant Commander Paul Jewell, Project Manager, and Joan Tilghman, Project Counsel, OPA 90 staff.

Related Rulemakings

This rulemaking is a companion rulemaking to "Second Officer on the Bridge" (CGD 91-222) and "Use of Automatic Pilot: Area Restrictions and Performance Requirements" (CGD 91-204). Those proposed rules are published elsewhere in this issue of the **Federal Register**. If these three proposed rules are adopted, they will be combined in a new section, 33 CFR 164.13 "Navigation underway: Tankers and ITBs." In this rulemaking, proposed paragraph (a) of new § 164.13 defines "tanker" as a self propelled tank vessel constructed or adapted primarily to carry oil or hazardous material in bulk in the cargo spaces, and "integrated tug barge" or "ITB" as a combination of a pushing vessel and a vessel being pushed ahead which are rigidly connected in a composite unit and are required by rule 24(b) of the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS) (App. A to 33 CFR part 81) to exhibit the lights prescribed in rule 23 for a "Power Driven Vessel Underway." In this rulemaking (CGD 91-203), proposed paragraph (b) of new § 164.13 requires the machinery spaces of these vessels to be attended when underway in the navigable waters of the United States. In CGD 91-222, proposed paragraph (c), designates all internal waters of the United States as waters where seagoing tankers of 1,600 gross tons or more will be required to navigate with at least two licensed officers on the bridge. In CGD 91-204, proposed paragraphs (d) and (e) of new § 164.13 will establish restrictions and exemptions for the use of auto pilots in U.S. navigable waters.

Background and Purpose

Section 4114(a) of OPA 90 requires the Coast Guard to define the conditions under which, and designate the waters upon which, tank vessels subject to 46 U.S.C. 3703 may operate in U.S. navigable waters with an unattended engine room. A "tank vessel" to which 46 U.S.C. 3703 applies is defined in 46 U.S.C. 2101(39) as—

> A vessel that is constructed or adapted to carry, or that carries, oil or hazardous material in bulk as cargo or cargo residue, and that—
>
> (A) is a vessel of the United States;
>
> (B) operates on the navigable waters of the United States; or
>
> (C) transfers oil or hazardous material in a port or place subject to the jurisdiction of the United States.

Section 4114(a) specifies that this rule apply only on the navigable waters of the United States. As defined in 33 U.S.C. 2701, navigable waters are the waters of the United States, including the territorial sea. This definition does not encompass the waters of the Exclusive Economic Zone (EEZ). Further, under 46 U.S.C. 3702 and 3703, foreign vessels on innocent passage on the navigable waters of the United States are exempt from rules issued under section 4114(a).

On April 9, 1992, the Coast Guard published a notice of proposed rulemaking (NPRM) in the **Federal Register** (57 FR 12378) entitled "Unattended Machinery Spaces: Operating Requirements." In the NPRM the Coast Guard proposed to allow tank vessels with automated vital systems, possessing documents attesting to their suitability for operation with periodically unattended machinery spaces and meeting other conditions, to operate with unattended machinery spaces in the navigable waters of the United States. Almost all of the 159 comments objected to the NPRM. Although a public hearing was requested, one was not held because of the Coast Guard's decision to revise the proposed rule.

Discussion of Comments and Changes

Most of the comments had similar objections to the proposed rule. Generally, the comments stated that engineering systems are subject to the greatest stresses when the vessel is maneuvering in near shore waters, and consequently, these systems are most likely to malfunction when the vessel is maneuvering. An engineering casualty

on a tanker in near shore waters increases the risk that a spill will occur because these waters are generally shallow and congested, giving little time for vessel operators to address an error or emergency before the vessel is endangered. Many comments stated that even highly sophisticated automated systems are not likely to detect all engine faults in sufficient time for the engineer to correct the problem if the engineer is not immediately available to respond to the alarm.

A number of the comments cited occasions of engineering system failures when vessels were maneuvering in near shore waters. These comments noted that serious incidents were averted because the machinery spaces were manned during these incidents and because the engineer could quickly diagnose and correct these failures.

Most comments recommended that a tanker's machinery spaces be manned constantly when the vessel is in the navigable waters of the United States. Many comments expressed concern that the proposed rule would encourage shipping companies to reduce costs by pressuring masters to operate without a licensed engineer in the machinery spaces, resulting in an increased risk of vessel casualties and oil spills.

Several comments stated that tanker masters and chief engineers already ensure that the machinery spaces are manned when the vessel is underway in the navigable waters of the United States. These comments suggested that the Coast Guard codify this practice by requiring a licensed engineer to be on watch when a tanker is underway in the navigable waters of the United States.

After considering these comments, the Coast Guard decided to revise the original proposal. The public response to the NPRM indicates that even tankers certified to operate with periodically unattended machinery spaces normally operate with a licensed engineer monitoring the automated systems in the machinery spaces when the vessel is underway in the navigable waters of the United States. The good safety record of vessels certified to operate with periodically unattended machinery spaces may reflect this practice.

The Coast Guard sees merit in the points made by the comments and has determined that a more conservative approach than proposed in the NPRM would better serve the public interest. Therefore, the Coast Guard is now proposing that integrated tug and tank barge combinations certificated as tankships and tankers of 1,600 gross tons or more have a licensed engineer attending the machinery spaces when the vessel is underway in the navigable waters of the United States out to 3 nautical miles seaward from the territorial sea baseline.

This approach is consistent with International Maritime Organization (IMO) guidance contained in Resolution 2 adopted by the International Conference on Training and Certification of Seafarers, 1978 (Operational Guidance for Engineer Officers in Charge of an Engineering Watch). Paragraph 22 of the Annex to the resolution discusses "Navigation in Congested Waters" and states:

> The engineer officer in charge of the watch should ensure that all machinery involved with the maneuvering of the ship can immediately be placed in manual modes of operation when notified that the ship is in congested waters. * * * Emergency steering and other auxiliary equipment should be ready for immediate operation.

There were only a few comments that agreed with the NPRM, and most of those suggested eliminating the proposed requirement for a licensed engineer to continually attend the machinery spaces if an alarm condition had occurred within the previous 12 hours. The Coast Guard is revising this proposed rule to require that the machinery spaces be continually attended when in the navigable waters of the U.S., irrespective of any previous alarm condition. To permit the machinery spaces to be unattended when there has been a recent alarm condition would be contrary to the present proposal.

One comment recommended that the applicability of the proposed rule be made explicitly clear because a definition of a tank vessel is not included in 33 CFR part 164 where the Coast Guard proposed to codify this rule.

OPA 90 states that this rule should apply to tank vessels subject to 46 U.S.C. 3703. These "tank vessels" include self-propelled ships and barges. However, as a practical matter this rule should not apply to tank barges because tank barges have neither propulsion machinery nor a separate crew. The Coast Guard has also adopted the position that tank vessels that carry oil as a secondary cargo should not be subject to this rule because they do not pose the same threat to the environment as tank vessels designed to carry oil as a primary cargo. The Coast Guard is proposing to narrow the applicability of this rule to tankers of 1,600 gross tons and more and ITBs certificated as a tankship on its Certificate of Inspection. The Coast Guard is proposing that this rule should apply to ITBs certificated as a tankship because ITBs are navigated in the same manner as a tanker and ITBs pose a threat to the environment similar to tankers.

Under 33 CFR part 164, vessels which are less than 1,600 gross tons are excluded from the Navigation Safety regulations of that part. The Coast Guard's position is that it is also appropriate to exempt vessels less than 1,600 gross tons from this rulemaking. These vessels pose less of a safety risk than larger tankers because they have shallow drafts and are more maneuverable than larger tankers. The size and maneuverability of vessels less than 1,600 gross tons allows them to avoid navigational hazards more easily than larger tankers.

The Coast Guard is also proposing that this rule apply when in the navigable waters of the U.S. out to 3 nautical miles seaward from the territorial sea baseline. The Coast Guard is proposing to limit this rule to within 3 nautical miles of the baseline to clearly specify where this rule will apply. Because the U.S. has declared that the territorial sea extends to 12 nautical miles for some purposes and 3 nautical miles for others, the specific language in this proposed rule should resolve any question mariners may have about the waters where the rule applies and limit its application to nearshore waters.

One comment stated that vessels on the St. Lawrence Seaway should not be excluded from this rule.

The St. Lawrence Seaway Authority has already promulgated separated regulations in 33 CFR 401.35 designating certain portions of the St. Lawrence Seaway where propulsion machinery, including the main engine control station, must be attended.

Regulatory Evaluation

This proposal is not major under Executive Order 12291 and not significant under the Department of Transportation Regulatory Policies and Procedures for Simplification Analysis and Review of Regulations (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this proposal to be so minimal that a separate full Regulatory Evaluation is unnecessary.

This rule will primarily affect tankers that are certificated to operate with periodically unattended machinery spaces. Tankers and ITBs must comply with this proposed rule only when the vessel is underway in the navigable waters of the United States out to 3 nautical miles seaward from the territorial sea baseline. During the course of a voyage, most tankers spend only a limited time in these waters. The comments received to the original

NPRM indicate the tanker masters already ensure that a licensed engineer is attending the machinery spaces when underway in the navigable waters of the United States. Consequently, their proposed rule would add no costs to the operation of most tankers.

The Coast Guard is aware of only one tanker certificated to operate with periodically unattended machinery spaces that does not leave the navigable waters of the United States. This tanker will be required to keep a licensed engineer on watch in the machinery spaces continually when underway. This tanker is already required by its certificate of inspection to operate with three licensed engineers. Consequently, this tanker already has a sufficient number of licensed engineers to comply with this rule without hiring additional personnel.

Similarly, there are seven U.S. flag ITBs certificated as tankships that may spend more time than tankers in the navigable waters of the U.S. out to 3 nautical miles. These vessels also are required to carry at least three licensed engineers and should be able to comply with this rule without hiring additional personnel.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). "Small entities" also include small not-for-profit organizations and small governmental jurisdictions. Because it expects the impact of this proposal to be minimal, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This proposal contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this proposal in accordance with the principles and criteria contained in Executive Order 12612 and has determined that this proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. This proposed rulemaking prohibits the operation of tankers and affected ITBs in the navigable waters of the United States with unattended machinery spaces. It is a well settled principle that regulations concerning manning of commercial vessels in U.S. waters are an exclusive domain of the Coast Guard. Further, standardizing vessel manning requirements is necessary because vessels move from port to port in the national marketplace, and variation of manning requirements would be unreasonably burdensome. Therefore, if this rule becomes final, the Coast Guard intends it to preempt State action addressing the same subject matter.

Environment

The Coast Guard considered the environmental impact of this proposal and concluded that preparation of an environmental impact statement is not necessary. A preliminary Environmental Assessment is available in the docket for inspection or copying where indicated under "**ADDRESSES**."

This proposal is not expected to result in significant impact of the quality of the human environment, as defined by the National Environmental Policy Act. In evaluating the environmental impact of the proposed action, the following points were considered:

(1) Environmental benefits of requiring a licensed engineer in machinery spaces cannot be quantified in isolation, due to the complementary effects of other OPA 90-related regulatory changes. For example, regulations dealing with improved crew training, manning standards, vessel traffic control, and other OPA 90 initiatives should result in reduced casualties and reduced numbers and volumes of spills;

(2) The proposed action involves the navigable waters of the U.S. and should contribute toward the prevention of spills especially when vessels are maneuvering near shorelines and/or in congested waterways.

List of Subjects in 33 CFR Part 164

Incorporation by reference, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Seamen, Security measures, Waterways.

For the reasons set out in the preamble, the Coast Guard proposes to amend 33 CFR part 164 as follows:

PART 164—NAVIGATION SAFETY REGULATIONS

1. The authority citation for part 164 is revised to read as follows:

Authority: 33 U.S.C. 1231; 46 U.S.C. 2103, 3703; 49 CFR 1.46. Sec. 164.13 also issued under 46 U.S.C. 8502, 8503; sec. 4114(a), Pub. L. 101–380, 104 Stat. 517 (46 U.S.C. 3703 note). Sec. 164.61 also issued under 46 U.S.C. 6101.

2. Section 164.13 is added to read as follows:

§ 164.13 Navigation underway: Tankers and ITBs.

(a) As used in this section—

Integrated tug barge or *ITB* means a combination of a pushing vessel and vessel being pushed ahead which are rigidly connected in a composite unit and are required by rule 24(b) of the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS) (Appendix A to part 81 of this chapter) to exhibit the lights prescribed in rule 23 for a "Power Driven Vessel Underway."

Tanker means a self-propelled tank vessel constructed or adapted primarily to carry oil or hazardous material in bulk in the cargo spaces.

(b) All tankers, and ITBs certificated to operate as a tankship, underway in the navigable waters of the United States out to 3 nautical miles seaward from the territorial sea baseline, must have an adequate engineering watch, including a licensed engineer, physically present in the machinery spaces such that the watch is able to monitor the propulsion system, communicate with the bridge, and implement manual control measures immediately when necessary.

Dated: September 24, 1992.

W.J. Ecker,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation Safety and Waterway Services.

33 CFR Part 164

[CGD 91–222]

RIN 2115–AE03

Second Officer on the Bridge

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Oil Pollution Act of 1990 (OPA 90) requires the Coast Guard To designate U.S. waters where a second licensed officer must be on the bridge of a coastwise seagoing tanker over 1,600 gross tons. Under the Ports and Waterways Safety Act, the Coast Guard also is proposing to require the second officer on foreign flag tankers over 1,600 gross tons and U.S. registered tankers over 1,600 gross tons. The majority of tanker casualties are a result of personnel error. This rule would increase protection for U.S. shores and

adjacent waters by ensuring that an officer other than the required pilot is available to minimize the risk of casualty in conditions that create a need for navigational care.

DATE: Comments must be received on or before December 1, 1992.

ADDRESSES: Comments may be mailed to the Executive Secretary, Marine Safety Council (G–LRA/3406) (CGD 91–222), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593–0001, or may be delivered to room 3406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267–1477.

The Executive Secretary maintains the public docket for this rulemaking. Comments will become part of this docket and will be available for inspection or copying at Room 3406, U.S. Coast Guard Headquarters.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Paul Jewell, Project Manager, Oil Pollution Act (OPA 90) Staff, (202) 267–6746, between 7 a.m and 3 p.m. Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written data, views, or arguments. Persons submitting comments should include their names and addresses, identify this rulemaking (CGD 91–222) and the specific section of this proposal to which each comment applies, and give a reason for each comment. Persons wanting acknowledgement of receipt of comments should enclose a stamped, self-addressed postcard or envelope.

The Coast Guard will consider all comments received during the comment period. It may change the proposal in view of the comments.

The Coast Guard plans no public hearing. Persons may request a public hearing by writing to the Marine Safety Council at the address under "**ADDRESSES.**" If it determines that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by a later notice in the **Federal Register.**

Drafting Information

The principal persons involved in drafting this document are Lieutenant Commander Paul Jewell, Project Manager, and Joan Tilghman, Project Counsel, OPA 90 Staff.

Related Rulemakings

This rulemaking is a companion rulemaking to "Unattended Machinery Spaces" (CGD 91–203) and "Use of Automatic Pilot: Area Restrictions and Performance Requirements" (CGD 91–204). Those proposed rules are published elsewhere in this issue of the **Federal Register.** If these three proposed rules are adopted, they will be combined in a new section, 33 CFR 164.13 "Navigation underway: Tankers and ITBs." In CGD 91–203, proposed paragraph (a) of new § 164.13 defines "tanker" as a self-propelled tank vessel constructed or adapted primarily to carry oil or hazardous material in bulk in the cargo spaces, and "integrated tug barge" or "ITB" as a combination of a pushing vessel and a vessel being pushed ahead which are rigidly connected in a composite unit and are required by rule 24(b) of the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS) (App. A to 33 CFR part 81) to exhibit the lights prescribed in rule 23 for a "Power Driven Vessel Underway." In CGD 91–203, proposed paragraph (b) of new § 164.13 requires the machinery spaces of these vessels to be attended when underway in the navigable waters of the United States. In this rulemaking (CGD 91–222), proposed paragraph (c), designates all internal waters of the United States as waters where seagoing tankers of 1,600 gross tons or more will be required to navigate with at least two licensed officers on the bridge. In CGD 91–204, proposed paragraphs (d) and (e) of new § 164.13 will establish restrictions and exemptions for the use of auto pilots in U.S. navigable waters.

Background and Purpose

To reduce the risk of a casualty, 46 U.S.C. 8502(h), as added by section 4116(b) of OPA 90, directs the Secretary to designate U.S. waters where a second officer must be on the bridge of coastwise seagoing tankers over 1,600 gross tons. Under the statute, the second licensed officer is in addition to a required Federal pilot.

The statutory second officer requirement applies to coastwise seagoing tankers over 1,600 gross tons. "Tanker" is defined in 46 U.S.C. 2101 as a "self-propelled tank vessel constructed or adapted primarily to carry oil or hazardous material in bulk in the cargo spaces." Tank barges are not included under section 4116(b) because they are not "self-propelled" vessels.

By framing the second officer requirement as an amendment to 46 U.S.C. 8502, Congress chose not to capture foreign flag tankers or U.S. tankers sailing on registry within the scope of section 4116(b) of OPA 90. This may have been because most States already require those tankers to board a pilot in State pilotage waters. Further, 33 U.S.C. 1228 requires a vessel, while underway in U.S. navigable waters, to have at least one licensed deck officer on the navigation bridge who is capable of clearly understanding English. The effect of these two conditions would seem to be that a foreign flag tanker will have two licensed officers (a State pilot and an English-speaking officer) on the bridge while the vessel is transiting most internal waters of the United States. In practice, however, this may not be the case.

In fifteen States, a foreign flag or U.S. registered vessel is required only to pay a pilotage fee in the States' pilotage waters; there is no requirement that a State pilot actually board the vessel. On the other hand, coastwise seagoing vessels not sailing on register are required to carry a pilot whenever these vessels are in the navigable waters of the U.S.

If coastwise seagoing tankers were the only tankers subject to this second officer rule, differences in State and Federal rules would subject coastwise seagoing tankers to more stringent navigational requirements than foreign flag tankers, U.S. registered tankers, and U.S. tankers operating exclusively on the Great Lakes or on a Lakes, Bays, and Sounds route. More importantly, these disparate requirements mean that the marine environment is subject to a risk of casualty which Congress has found unacceptable for a class of vessels, (i.e., coastwise seagoing tankers), whose officers are more likely to be familiar with the waters being traversed than are the officers of foreign flag tankers or U.S. tankers sailing on registry.

Although the Coast Guard cannot apply a second officer rule to foreign flag tankers and U.S. tankers sailing on registry under 46 U.S.C. 8502, as amended, the Coast Guard is proposing to resolve the disparity under section 12 of the Ports and Waterways Safety Act (33 U.S.C. 1231). Therefore, under the authority of these two provisions, all seagoing tankers of 1,600 gross tons or more, when navigating in the internal waters of the United States, will be required to comply with the rule.

The Coast Guard does not intend to include tankers that operate solely on the Great Lakes or are limited to Lakes, Bays, and Sounds routes. These tankers (presently two on the Great Lakes and three in Long Island Sound) operate repeatedly on the same limited routes, and therefore their licensed deck officers are thoroughly familiar with the

routes they transit. In addition these tankers are small (from 1,698 gross tons to 5,853 gross tons), maneuverable, and have shallow drafts. Because they are small, they carry less cargo than larger ocean going tankers. Consequently, they are able to navigate the internal waters of the U.S. with less risk than the larger coastwise seagoing and international trade tankers. Requiring a second officer on the bridge of these vessels would have minimal impact on their safe operation and, because increased manning would be required whenever the vessels are underway, would have a disproportionate adverse effect on the cost of operating these vessels.

The Coast Guard considered a number of approaches to implement 46 U.S.C. 8502(h) as alternatives to the approach proposed. (To take no action would let stand a status quo which Congress has found unacceptable.) One was to require an officer in addition to the required Federal pilot on all U.S. coastwise seagoing tankers in all U.S. waters. Although this approach creates a single standard which would facilitate both enforcement and compliance, it subjects U.S. coastwise seagoing tankers to more stringent navigational requirements than foreign tankers or U.S. tankers sailing on registry.

Another approach was to delegate to District Commanders the authority to designate those areas in their District where a tanker subject to 46 U.S.C. 8502(h) must have a second officer. This approach recognizes that District Commanders have a special knowledge of ports and the surrounding environments in their district. On the other hand, it also creates a high potential for inconsistency from port to port, complicating both enforcement and compliance.

Discussion of Proposed Amendments

In this rulemaking, new paragraph (c) would designate all internal waters of the United States as waters where seagoing tankers of 1,600 gross tons or more will be required to navigate with at least two licensed officers on the bridge. Because part 164 only applies to vessels of 1,600 gross tons or more, specific language discussing the size applicability is not included in the new section.

Because internal waters are generally congested, shallow, and hazardous, vessels must take an extra measure of caution when navigating these waters. Most mariners and Coast Guard personnel know the location of "internal waters," which are defined in 33 CFR 2.05–20 as the waters shoreward of the territorial sea baseline. Consequently, this proposed rule should cause little or no difficulty for those who must comply with or enforce the rule.

Not only does this proposal recognize that tankers over 1,600 gross tons must navigate in internal U.S. waters with an extra measure of caution; but it also gives mariners a rule that facilitates compliance, decreases the risk of tanker casualties in internal waters, and minimizes inconsistencies in rules governing foreign flag and U.S. tanker navigation safety.

The Coast Guard requests comments on this proposed rule, the merits of each approach presented in this notice, and is particularly interested in comments regarding the waters where this rule should apply.

Regulatory Evaluation

This proposal is not major under Executive Order 12291 and not significant under the Department of Transportation Regulatory Policies and Procedures (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this proposal to be so minimal that a full Regulatory Evaluation is unnecessary.

The overall potential benefit of these proposed rules is that they will provide increased protection from oil spills for U.S. shores and adjacent waters. The National Transportation Safety Board found that the T/V EXXON VALDEZ grounding was caused primarily by an error of the sole licensed deck officer on the navigational bridge. Coast Guard casualty data indicates that in 121 tank ship groundings or collisions which occurred in the internal waters of the U.S. in 1989 and 1990, personnel error was cited as the primary cause. For tankers, the additional precaution of a second licensed officer should reduce the risk of casualties caused by personnel error and, therefore, the occurrence of oil spills.

This approach requires tanker crews to provide increased protection for U.S. shores and adjacent waters. Requiring two licensed officers on the bridge of tankers reduces the likelihood that a serious navigational error will occur or go unnoticed.

The potential costs of these rules depend on the individual tanker's route. If every owner of a coastwise seagoing tanker over 1,600 gross tons finds it necessary to hire two additional third mates to comply with this rule, the approximate total annual cost would be about $12.2 million (worst case). That total cost assumes an annual wage rate for a licensed third mate of $42,000. However, the Coast Guard does not expect that a cost of this magnitude will be required. The actual cost of this rule is expected to be less than $1 million annually.

Tankers must comply with this rule only when the vessel is navigating in the internal waters of the United States. During the course of a voyage, seagoing tankers spend only a limited time in these internal waters—generally less than 4 hours. A review of the general orders issued by most tanker companies and interviews with licensed tanker officers reveal that a second licensed officer is on the bridge when the vessel is transiting most internal waters.

On voyages through Prince William Sound, Puget Sound, and the Chesapeake Bay, a second licensed officer will be required on the bridge for transits which may take up to 8 hours. However, a literature review and interviews with tanker officers indicate that without hiring additional personnel, U.S. tankers that routinely transit those areas sail with a sufficient number of licensed mates to comply with this rule. United States tanker owners may incur some overtime costs, but these costs should be minimal. The number of licensed crew members should be sufficient to avoid most overtime.

Foreign tanker crews already must have an English-speaking licensed deck officer on the bridge when in U.S. waters. When in most State pilotage waters, a foreign tanker also must navigate with a State pilot. Consequently, for foreign flag vessels, this rule may add costs only in internal waters that are not State pilotage waters (most notably the Strait of Juan de Fuca). In all but 15 States, foreign and U.S. registered tankers transiting State pilotage waters are required to carry a State pilot. In those 15 States, a tanker owner or operator must pay all, or a portion, of a pilotage fee irrespective of whether a pilot boards. In practice, virtually all of these tankers actually employ a pilot. Therefore, this rule should result in a minimal increase in costs to foreign and U.S. registered tankers.

The Coast Guard encourages public comment regarding any potential compliance cost which the Coast Guard has not anticipated.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of

the Small Business Act (15 U.S.C. 632). "Small entities" also include small not-for-profit organizations and small governmental jurisdictions. Because it expects the impact of this proposal to be minimal, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This proposal contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this proposal in accordance with the principles and criteria contained in Executive Order 12612 and has determined that this proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. This proposed rule would require a second licensed officer on the bridge of all seagoing tankers of 1,600 gross tons or more transiting the internal waters of the Unites States, irrespective of the vessel's flag status. Generally, for foreign flag vessels and United States vessels sailing on registry in U.S. internal waters, States set pilotage requirements, and the Federal government may act only when the State has not exercised its authority. Once a State establishes a pilotage requirement for foreign flag and U.S. vessels sailing on registry, any Federal pilotage requirement is terminated. This proposed rule does not alter the State-Federal relationship regarding pilotage requirements, and does not preempt the States authority to establish a requirement for a State pilot under 46 U.S.C. 8501.

For manning requirements other than pilotage, it is a well-settled principle that regulations concerning manning of U.S. commercial vessels are an exclusive domain of the Coast Guard. Further, standardizing vessel manning requirements is necessary because vessels move from port to port in the national marketplace, and variation of manning requirements would unreasonably burden vessel owners and operators. Therefore, if this rule becomes final, the Coast Guard intends it to preempt State action addressing the same subject matter.

Environment

The Coast Guard considered the environmental impact of this proposal and concluded that preparation of an environmental impact statement is not necessary. An Environmental Assessment (EA) is available in the docket for inspection or copying where indicated under "**ADDRESSES**." The EA discusses the environmental consequences of the proposed actions and alternatives, including a no-action alternative. This proposed action is not expected to result in significant impact on the quality of the human environment, as defined by the National Environmental Policy Act.

List of Subjects in 33 CFR Part 164

Incorporation by reference, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Seamen, Security measures, Waterways.

For the reasons set out in the preamble, the Coast Guard proposes to amend 33 CFR part 164 as follows:

PART 164—NAVIGATION SAFETY REGULATIONS

1. The authority citation for part 164 is revised to read as follows:

Authority: 33 U.S.C. 1231; 46 U.S.C. 2103, 3703; 49 CFR 1.46. Sec. 164.13 also issued under 46 U.S.C. 8502, 8503; sec. 4144(a), Pub. L. 101–380, 104 Stat. 517 (46 U.S.C. 3703 note). Sec. 164.61 also issued under 46 U.S.C. 6101.

2. In § 164.13, paragraph (c) is added to read as follows:

§ 164.13 Navigation underway: Tankers and ITBs.

* * * * *

(c) All tankers, when underway in the internal waters of the United States as defined in § 2.05–20 of this chapter, except those operating with a certificate of inspection endorsed only for Great Lakes service or only for Lakes, Bays, and Sounds service, must navigate with at least two licensed officers on the bridge. One of those licensed officers may be a Federal or State licensed pilot.

Dated: September 24, 1992.

W.J. Ecker,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation Safety and Waterway Services.

RIN 2115–AE00

Use of Automatic Pilot: Area Restrictions and Performance Requirements

AGENCY: Coast Guard, DOT.

ACTION: Supplemental notice of proposed rulemaking.

SUMMARY: On January 6, 1992, the Coast Guard published a notice of proposed rulemaking that would have allowed tank vessels to use automatic pilots in certain areas within the navigable waters of the U.S. provided that the automatic pilot met certain standards and that a qualified helmsman was present. This supplemental notice of proposed rulemaking revises the January 6 proposal by changing the applicability provisions, allowing highly sophisticated systems to be used in some areas, and deleting Regulated Navigation Areas from the list of Areas where automatic pilots must not be used. This proposed rule should promote the safe operation of tankers and integrated tug barge combinations in U.S. waters.

DATES: Comments must be received on or before December 1, 1992.

ADDRESSES: Comments may be mailed to the Executive Secretary, Marine Safety Council (G–LRA/3406) (CGD 91–204), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593–0001, or may be delivered to room 3406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267–1477.

The Executive Secretary maintains the public docket for this rulemaking. Comments will become part of this docket and will be available for inspection and copying at room 3406, U.S. Coast Guard Headquarters. A copy of the material listed in "Incorporation by Reference" of this preamble is available for inspection at room B–615, U.S. Coast Guard Headquarters.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Paul Jewell, Project Manager, Oil Pollution Act (OPA 90) Staff, (202) 267–6746, between 7 a.m. and 3:30 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written data, views, or arguments. Persons submitting comments should include their names and addresses, identify this rulemaking (CGD 91–204) and the specific section of this proposal to which each comment applies, and give the reason for each comment. Persons wanting acknowledgment of receipt of comments should enclose a stamped, self-addressed postcard or envelope.

The Coast Guard will consider all comments received during the comment period. It may change this proposal in view of the comments.

The Coast Guard plans no public hearing. Persons may request a public hearing by writing to the Marine Safety Council at the address under "ADDRESSES." If it determines that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by a later notice in the Federal Register.

Drafting Information

The principal persons involved in drafting this document are Lieutenant Commander Paul Jewell, Project Manager, and Joan Tilghman, Project Counsel, OPA 90 staff.

Related Rulemakings

This rulemaking is a companion rulemaking to "Second Officer on the Bridge" (CGD 91-222) and "Unattended Machinery Spaces: Operating Requirements" (CGD 91-203). Those proposed rules are published elsewhere in this issue of the Federal Register. If these three proposed rules are adopted, they will be combined in a new section, 33 CFR 164.13 "Navigation underway: Tankers and ITBs." In CGD 91-203, proposed paragraph (a) of new § 164.13 defines "tanker" as a self-propelled tank vessel constructed or adapted primarily to carry oil or hazardous material in bulk in the cargo spaces, and "integrated tug barge" or "ITB" as a combination of a pushing vessel and a vessel being pushed ahead which are rigidly connected in a composite unit and are required by rule 24(b) of the International Regulations for Preventing Collisons at Sea, 1972 (72 COLREGS) (App. A to 33 CFR part 81) to exhibit the lights prescribed in Rule 23 for a "Power Driven Vessel Underway." In CGD 91-203, proposed paragraph (b) of new § 164.13 requires the machinery spaces of these vessels to be attended when underway in the navigable waters of the United States. In CGD 91-222, proposed paragraph (c), designates all internal waters of the United States as waters where seagoing tankers of 1,600 gross tons or more will be required to navigate with at least two licensed officers on the bridge. In this rulemaking (CGD91-204), proposed paragraphs (d) and (e) of new § 164.13 will establish restrictions and exemptions for the use of auto pilots in U.S. navigable waters.

Regulatory History

On January 6, 1992, the Coast Guard published a notice of proposed rulemaking (NPRM) in the Federal Register (57 FR 514) entitled "Use of Automatic Pilot: Area Restrictions and Performance Standards." The Coast Guard received 25 letters commenting on the proposal. A public hearing was not requested and one was not held.

Background and Purpose

Section 4114(a) of OPA 90 requires the Coast Guard to define the conditions under which, and designate the waters upon which, tank vessels subject to 46 U.S.C. 3703 may operate in U.S. navigable waters with the automatic pilot (auto pilot) engaged. A "tank vessel" to which 46 U.S.C. 3703 applies is defined in 46 U.S.C. 2101(3) as—

> A vessel that is constructed or adapted to carry, or that carries, oil or hazardous material in bulk as cargo or cargo residue, and that—
>
> (A) is a vessel of the United States;
>
> (B) operates on the navigable waters of the United States; or
>
> (C) transfers oil or hazardous material in a port or place subject to the jurisdiction of the United States.

Section 4114(a) specifies that this rule apply only on the navigable waters of the United States. As defined in 33 U.S.C. 2701, navigable waters are the waters of the United States, including the territorial sea. This definition does not encompass the waters of the Exclusive Economic Zone (EEZ). Further, under 46 U.S.C. 3702 and 3703, foreign vessels on innocent passage on the navigable waters of the United States are exempt from rules issued under section 4114(a).

In the NPRM published on January 6, the Coast Guard proposed that an auto pilot could be engaged in all U.S. waters except traffic separation schemes, regulated navigation areas, shipping safety fairways, anchorage areas, vessel traffic service areas, or any area within one-half nautical mile of any U.S. shore; that any auto pilot used must conform with the standards recommended by International Maritime Organization (IMO) Resolution A.342(IX) adopted on November 12, 1975; and that an able seaman or licensed deck officer be at the helm of a tank vessel in all U.S. waters when the auto pilot is engaged.

Discussion of Comments and Changes

A total of 25 comment letters were received. The comments generally addressed the applicability of the rule, the waters where the prohibition on the use of an auto pilot will apply, and integrated navigation systems.

Applicability

One comment indicated that this rulemaking should apply to vessels that carry hazardous material in bulk, because these materials pose a greater threat than oil to public safety and the environment. The comment noted that placing this rule in 46 CFR subchapter D would inadvertently omit vessels carrying non-flammable hazardous material in bulk. The comment stated that 46 CFR subchapter D only applies to vessels carrying combustible or flammable liquids in bulk. Another comment letter noted the same omission and suggested that the Coast Guard also amend 46 CFR 30.01-5 to make it clear that foreign flag vessels fall under the proposed rule.

The Coast Guard proposes that this rule apply to all tankers 1,600 gross tons or more, irrespective of the vessel's flag or specific cargo. To eliminate any confusion about the applicability, the Coast Guard is proposing to include the rule as part of the navigation safety regulations in 33 CFR part 164 and define the vessels to which this rule applies.

Another comment suggested that the Coast Guard define "tank vessels" for this rulemaking to include only "self-propelled tankships greater than 1,600 gross tons." The comment letter stated that this definition would identify clearly the vessels targeted by this rule.

Under 46 CFR 30.10-67, a "tankship" means "any tank vessel propelled by power or sail." OPA 90 states that this rule should apply to tank vessels subject to 46 U.S.C. 3703. These "tank vessels" include self-propelled ships and barges. However, as a practical matter this rule should not apply to tank barges because they are not self propelled and they are not equipped with auto pilots. The Coast Guard has also adopted the position that tank vessels that carry oil as a secondary cargo should not be subject to this rule because they do not pose the same threat to the environment as tank vessels designed to carry oil as a primary cargo. The rule should more appropriately apply to "tankers" defined as "a self-propelled tank vessel constructed or adapted primarily to carry oil or hazardous material in bulk in the cargo spaces." Therefore, the Coast Guard has added a provision in this supplemental notice to identify clearly the type of vessel subject to the proposed rule.

Under 33 CFR part 164, vessels that are less than 1,600 gross tons are excluded from the Navigation Safety regulations of that part. The Coast Guard's position is that it is also appropriate to exclude tankers less than 1,600 gross tons from this rulemaking. These vessels pose less of a safety risk than larger tankers because they have shallow drafts and are more

maneuverable than larger tankers. The size and maneuverability of vessels less than 1,600 gross tons allows them to avoid navigational hazards more easily than larger tankers.

One comment insisted that the Coast Guard had incorrectly interpreted section 4114(a) by failing to include vessels towing tank barges in the proposed rule. The comment stated that the rule should apply to these vessels because tank barges have the same potential to harm the environment as do other tank vessels. Another comment stated that the Coast Guard should specifically exempt vessels towing tank barges, because a vessel on auto pilot while towing a barge greatly reduces the risk of casualty. This comment stated that the auto pilot can maintain a straighter course than a helmsman, reducing the side-to-side movement of the two and giving the operator of the towing vessel better control of the tank barge.

The Coast Guard considered these comments and is proposing that this rule should also apply to towing vessels only when they are part of an integrated tug/barge (ITB) certificated as a tankship. An operator navigates these ITBs in the same manner as a tanker, and ITBs pose a threat to the environment similar to tankers.

The Coast Guard does not agree that this rule should extend to all towing vessels. External forces affect a towing vessel and its tow differently than they affect a tankship. Using an auto pilot may give the towing vessel operator better control of a barge.

Two comment letters suggested that this rule should apply to all vessels because any vessel using an auto pilot may be in an accident and may discharge oil into the water. The Coast Guard does not agree. OPA 90 specifies that this rule should apply only to tank vessels, and the Coast Guard has no casualty or other data that support extending the applicability to all other vessels. In fact, Coast Guard casualty data indicate that most vessel casualties result from personnel error rather than mechanical error. Using an auto pilot does not relieve the mariner of the duty to exercise navigational caution.

One comment did not agree that foreign vessels on innocent passage should be exempt from this rule. This comment stated that foreign vessels face the same navigational hazards as U.S. vessels and, therefore, should be subject to the same rules.

Section 4114(a) applies only to a vessel subject to 46 U.S.C. 3703. A foreign vessel on innocent passage is not subject to 46 U.S.C. 3703. A foreign vessel is on "innocent passage" when it passes through another country's waters engaging only in activities having a direct bearing on passage. A foreign tanker entering U.S. waters to transfer "oil or hazardous material in a port or place subject to the jurisdiction of the United States" is not on innocent passage and, therefore, is subject to this rule.

Two comments understood the proposed rule to mean that the licensed deck officer navigating the tanker must be different from any licensed deck officer who may steer the vessel. These comments suggested that the Coast Guard revise the proposed rule to exempt tankers that normally operate with the licensed deck officer of the watch at the helm rather than a separate helmsman steering the vessel. The bridge configuration on these tankers is apparently similar to a towing vessel, which has only one steering station in the pilothouse. On vessels with this configuration, the licensed deck officer of the watch must steer, direct, and control the movement of the vessel. The comment letters stated that exempting these vessels from the rule is safer because allowing the licensed deck officer of the watch to steer reduces the likelihood that helm commands will be misunderstood. Further, if the rule is applied to tankers without a helmsman required by the Certificate of Inspection, operating costs for the owners of these tankers would increase because the owners would have to hire additional personnel to serve as dedicated helmsmen to comply with the rule. Consequently, the costs of imposing such a requirement would outweigh the benefits because the safety record of those kinds of tankers demonstrate that hiring additional personnel as helmsmen would be an unnecessary burden.

The Coast Guard does not intend to prohibit the licensed deck offficer of the watch from steering a tanker when necessary. A licensed deck officer often steers a vessel when the vessel is docking or passing in a restricted channel. The intent of the proposed provision was to require a qualified individual to be at the helm in U.S. waters in case an immediate course change is required. Rather than exempting vessels that operate with the licensed deck officer of the watch as the helmsman, we have reorganized the section of the proposed rule requiring a qualified individual to be at the helm to clarify who is allowed to steer the vessel.

Although the Coast Guard recognizes the need for the licensed deck officer of the watch to steer a tanker on occasion, the Coast Guard is concerned that continuous manual steering by the licensed deck officer of the watch may detract the licensed officer from other duties associated with safe navigation. In a separate rulemaking (CGD 91-222) to implement another provision of OPA 90, the Coast Guard is designating waters where a second licensed officer must be on the bridge of certain tankers to assist with navigating. Having two licensed deck officers on the bridge will ensure that when one officer is manually steering, another licensed deck officer will be available to assist with the navigation of the tanker.

One comment requested that the Coast Guard specifically state that "oil spill response vessels" (OSRVs) are excluded from the definition of "tank vessels." The comment rationalized that although OSRVs are constructed to carry oil, the oil carried is not cargo but incidental to an oil spill recovery operation. Consequently, these vessels are not "vessels * * * constructed or adapted to carry oil in bulk as cargo."

This rulemaking does not apply to OSRVs. The Coast Guard is proposing to limit this rule only to ITBs certificated as tankships and tankers 1,600 gross tons or more.

Waters Where Use of an Auto Pilot is Prohibited.

Two comments stated it is inappropriate to include Regulated Navigation Areas (RNAs) as areas where the auto pilot should be disengaged. The comments pointed out that there may not be a navigational circumstance in an RNA that would warrant the restriction on the use of the auto pilot, and the comments cited RNAs restricting navigation near ice bridges as an example of an RNA where application of the restriction would be unjustified.

The Coast Guard agrees that auto pilot restrictions may not be suitable in many RNAs. Consequently, the Coast Guard has deleted RNAs as areas where the use of auto pilots is restricted.

Six comments suggested that allowing tankers to navigate on auto pilot as close as one-half mile off shore was too permissive, with most of these comments suggesting that 3 miles was a more reasonable standard. Generally, these comments indicated that any tanker within one-half mile of shore would be unable to respond to an auto pilot failure in a timely manner.

Prohibiting the use of auto pilots within 3 miles of shore effectively prohibits the use of an auto pilot in most U.S. waters and is unwarranted. The Coast Guard has determined that this restriction is unnecessarily burdensome. An auto pilot, used in the proper

situations and with reasonable monitoring by the licensed deck officer of the watch, is a valuable navigation safety tool. However, there are areas where tankers should refrain from using an auto pilot, because rapid helm response may be necessary. The Coast Guard has identified these areas in the supplemental notice and included any area one-half mile from shore.

One comment suggested that the Coast Guard prohibit engaging an auto pilot within 3 miles of any shore, shoal, reef, or other navigational obstacle. The navigable waters of the U.S. only extend to 3 nautical miles from the territorial sea baseline. The Coast Guard cannot extend the applicability of this rule beyond these waters under section 4114(a) of OPA 90.

Another comment stated that setting operating restrictions based on "distance-from-shore criteria" was inappropriate because channel width, limiting draft, and other tanker maneuvering restrictions are more important.

The Coast Guard's intent in including the one-half mile from shore restriction was to ensure that tankers not operate in narrow rivers and confined ports while on auto pilot. A rule basing operating conditions on the draft of a vessel, channel width, and other maneuvering restrictions would make both compliance and enforcement difficult. Such a rule would be subject to continual variation and individual interpretation depending on vessel characteristics, tidal fluctuations, the natural shifting of channels, and other factors. The supplemental notice as constructed should ensure national consistency. The Coast Guard would be unable to maintain this consistency if it based operating restrictions on the factors suggested in the comment letter.

Integrated Navigation Systems

Six comments objected to the proposed rule stating that the approach proposed by the Coast Guard would increase the risk of casualty for tankers underway. Most of these comments noted that a modern auto pilot that is part of an integrated navigation system is far more capable and reliable than the older auto pilots described in the IMO standards. These comments gave a variety of reasons why operation with an auto pilot, particularly one that is part of an integrated navigation system, is far safer than operation with a helmsman and should be unregulated.

First, helmsmen are demonstrably more prone to error than are modern auto pilots. Second, restricting the use of auto pilots hinders the rapid technological development of integrated navigation systems. In low visibility, auto pilots integrated with electronic charts and positioning systems can take a vessel through complex waterways more easily and safely than the deck watch officer and helmsman combination.

Third, using an auto pilot greatly reduces the opportunity for misunderstood commands between the deck officer of the watch and the helmsman and, consequently, aids the vessel's safer operation. Fourth, integrated navigation systems are better than manual vessel control for track-keeping accuracy and are more precise than manual steering in turning a vessel.

One comment stated that one European country requires vessels to use a certain type of automatic steering device when the vessel is transiting the Rhine River in fog.

The Coast Guard recognizes that integrated navigation systems may improve navigation safety. These modern devices have accuracies and capabilities that were unavailable in 1974 when the IMO developed Resolution A.342[IX], "Recommendations on Performance Standards for Automatic Pilots." Currently, the Coast Guard and the Maritime Administration are studying and testing these advanced systems. There is evidence that integrated navigation systems may be superior to helmsmen in many situations because these advanced systems are significantly less prone to mechanical malfunctions than helmsmen are prone to error. However, the Coast Guard also recognizes that although a modern auto pilot can maintain a straighter course than a helmsman and may be more dependable over longer distances, those advantages do not necessarily improve navigation safety in all situations. Despite how well an auto pilot can perform, it cannot anticipate an emergency situation or cope with a dilemma.

In the interest of reducing the risk of casualties involving tankers, the Coast Guard wants to encourage the use and further development of these systems. Consequently, the Coast Guard is proposing to exempt any tanker or ITB from some of the area restrictions in this supplemental notice if that tanker or ITB is equipped with an auto pilot that meets certain performance standards. To be exempt from some of the area restrictions, the tanker master must be able to provide, upon request, documentation that the vessel's integrated navigation system can maintain trackline steering with a cross track error of less than 10 meters; can provide accurate position data within 20 meters; and has an immediate override control. While any tanker is transiting the navigable waters of the United States with the integrated navigation system engaged, the Coast Guard will require that a qualified individual be available immediately to override the system and to take manual control of the vessel. This exemption will apply only to tankers in those portions of traffic separation schemes and shipping safety fairways that are in the navigable waters of the United States. Tankers in anchorage grounds or within one-half mile of any U.S. shore must be under manual control.

Other Comments

One comment stated that the Coast Guard cannot enforce this rule unless there is some way for an enforcement officer to observe compliance while that vessel is underway. The comment suggested that the Coast Guard require a vessel to have a bright flashing light immediately below the steaming light when the auto pilot is engaged.

The Coast Guard notes that mariners and tanker owners expose themselves to significant enforcement consequences and liability if a casualty investigation reveals that the vessel was operating in violation of this or any other rule. This potential exposure should provide ample incentive for mariners and tanker owners to comply with the rule. Further, installing a light would violate international agreements on vessel lighting, and it may actually increase the risk of vessel casualties because mariners expect a flashing light to indicate an aid to navigation. Therefore, such a light installed on a ship most likely would cause confusion.

The same comment also stated that the Coast Guard should require locating auto pilot controls where a helmsman can quickly disengage the auto pilot without leaving the helm or relying on another crewmember.

The IMO resolution on the performance standards for auto pilots, which the Coast Guard is incorporating by reference in the supplemental notice, states that "change-over controls should be located close to each other in the immediate vicinity of the main steering position." The Coast Guard's position is that any further regulation of the location of these controls is unnecessary.

One comment expressed the thought that the Coast Guard was requiring a tug escort for vessels operating with the auto pilot engaged. There is nothing in the proposed rule that requires a tanker with the auto pilot engaged to have a towing vessel escort. The Coast Guard

is developing towing escort regulations separately. (See "Escort Vessels for Certain Oil Tankers" NPRM (CGD 91–202), 57 FR 30058, July 7, 1992.) In the auto pilot NPRM, the Coast Guard did state that after designating areas where tankships must have towing vessel escorts, it may restrict the use of auto pilots on those tankships in the designated areas.

One comment letter noted that the conditions under which the auto pilot may be used are not specified in the proposed rule. This comment letter further questioned if the Coast Guard interprets 46 U.S.C. 8702(d) as prohibiting the use of auto pilot under certain conditions.

Previously, 46 CFR 35.20–45 required a tankship master to ensure that, when a vessel crewmember engaged an auto pilot in conditions of restricted visibility, high traffic density, or other hazardous navigational situations, it was possible to establish immediate control of the steering; a competent person was ready to take over the helm; and the changeover from one steering mode to the other was made under the supervision of the licensed deck officer of the watch. This supplemental notice requires more stringent precautions (i.e., a qualified helmsman is always at the helm, the auto pilot conforms to IMO standards, and the auto pilot is allowed to be used only in certain areas) under all conditions while the vessel is in the navigable waters of the United States.

The Coast Guard does not interpret 46 U.S.C. 8702(d) to prohibit the use of an auto pilot. Specifically, 46 U.S.C. 8702(d) states that "an individual having a rating of less than able seaman may not be permitted at the wheel in ports, harbors, and other waters subject to congested vessel traffic, or under conditions of reduced visibility, adverse weather, or other hazardous circumstances." This section prevents a trainee from steering a vessel during certain conditions and does not address or prohibit the use of an auto pilot under those conditions.

Two comments expressed opinions regarding what it means for an able seaman or licensed deck officer to be "present at the helm" in the context of the proposed rule. One of those comments stated that the qualified helmsman should be physically at the helm to change from automatic to manual steering in the shortest possible time. This comment noted that the Coast Guard should discourage the practice of having the helmsman engaged elsewhere on the vessel and reporting to the bridge only when summoned. The second comment noted that a requirement for off-course alarms eliminates any need to have a helmsman physically at the helm and that the qualified helmsman should simply be in proximity to the helm at all times.

One of the purposes of this supplemental notice is to ensure that tankers and ITBs have a qualified individual immediately present to take manual control of the steering in an emergency. The Coast Guard agrees that a helmsman or licensed deck officer should be at the helm while a tanker or ITB is operating in the navigable waters of the United States. Having a qualified individual "in proximity of the helm" is ambiguous and may allow a liberal interpretation, which would defeat the purpose of the proposed rule. The Coast Guard has determined that to be "present at the helm," someone must be available immediately to override an auto pilot system while an auto pilot is used in the navigable waters of the United States.

The final comment objected to prohibiting the use of the auto pilot in traffic separation schemes and shipping safety fairways because many of these areas are many hours from the nearest port, and requiring manual steering in these areas will increase the fatigue of tanker crew members. This comment also expressed concerns that had been raised in other comments.

The supplemental notice applies only to tankers and ITBs in the navigable waters of the United States out to 3 nautical miles from the territorial sea baseline. The Coast Guard is proposing to limit the rule to within 3 nautical miles of the baseline to clearly specify where the rule will apply. Because the U.S. has declared that the territorial sea extends to 12 nautical miles for some purposes and 3 nautical miles for others, the specific language in this supplemental notice should resolve any question mariners may have about the waters where the proposed rule applies. Many traffic separation schemes and shipping safety fairways are not within the navigable waters of the United States. This supplemental notice does not prohibit tankers or ITBs from engaging the auto pilot when in traffic separation schemes or shipping safety fairways that are beyond the navigable waters of the United States.

The NPRM referred to "traffic separation schemes specified in 33 CFR part 167." There are also traffic separation schemes specified in 33 CFR part 161 that are part of Vessel Traffic Service (VTS) areas. The NPRM proposed to prohibit the use of auto pilots in the VTS areas, but it did not specifically refer to the traffic separation schemes in 33 CFR part 161. To clarify that auto pilots may not be used in traffic separation schemes, the wording has been amended to include those parts of all traffic separation schemes in 33 CFR subchapter P (parts 160–167) which are in the navigable waters of the United States. The reference to Vessel Traffic Service areas will be deleted to eliminate duplication and confusion.

Incorporation by Reference

The following material would be incorporated by reference in § 164.03: IMO Resolution A.342(IX), Recommendation on Performance Standards for Automatic Pilots, adopted November 12, 1975. Copies of the material are available for inspection where indicated under "**ADDRESSES**." Copies of the material are available at the addresses in § 164.03.

Before publishing a final rule, the Coast Guard will submit this material to the Director of the Federal Register for approval of the incorporation by reference.

Regulatory Evaluation

The Coast Guard has determined that this proposal is not major under Executive Order 12291. This proposal is not significant under the Department of Transportation Regulatory Policies and Procedures for Simplification Analysis and Review of Regulations (Order 2100.5) because its cost is expected to be minimal and it does not meet any of the criteria listed in paragraph 6(a)(2) of the Order. There will be no cost to vessel owners in complying with this rule because the proposal is permissive. Rather than requiring or prohibiting the use of auto pilot technology, the Coast Guard informs vessel owners or operators who choose this technology when their crews may employ it. The proposal neither requires equipment nor increases crew size. Consequently, this proposal will not result in annual costs of $100 million; will have no significant adverse effects on competition, employment, or other aspects of the economy; and will not result in a major increase in costs and prices.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). "Small entities" also include small not-

for-profit organizations and small governmental jurisdictions. Because there are no new costs associated with implementing this rule, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities.

Collection of Information

This proposal contains no collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this rule in accordance with the principles and criteria contained in Executive Order 12612, and has determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Section 4114(a) of OPA 90 requires the Secretary to do a rulemaking to define the conditions under which, and designate the waters upon which, subject tank vessels can operate in the navigable waters of the U.S. with an auto pilot. A State regulation more permissive of more restrictive would conflict with the Federal requirements. Further, because vessels move from port to port in the national marketplace, a variation of auto pilot operating requirements would unreasonably burden vessel owners and operators. Therefore, if this rule becomes final, the Coast Guard intends it to preempt State action addressing the same subject matter.

Environment

The Coast Guard considered the environmental impact of this proposal and concluded that preparation of an environmental impact statement is not necessary. A preliminary Environmental Assessment is available in the docket for inspection or copying where indicated under "**ADDRESSES.**"

This proposal is not expected to result in significant impact of the quality of the human environment, as defined by the National Environmental Policy Act. In evaluating the environmental impact of the proposed action, the following points were considered:

(1) Environmental benefits of regulating the use of auto pilots cannot be quantified in isolation, due to the complementary effects of other OPA 90-related regulatory changes. For example, regulations dealing with improved crew training, manning standards, vessel traffic control, and other OPA 90 initiatives should result in reduced casualties and reduced numbers and volumes of spills;

(2) The proposed action involves the navigable waters of the U.S. and should contribute toward the prevention of spills especially when vessels are maneuvering near shorelines and/or in congested waterways.

List of Subjects

33 CFR Part 164

Incorporation by reference, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Seamen, Security measures, Waterways.

46 CFR Part 35

Cargo vessels, Marine safety, Navigation (water), Occupational safety and health, Reporting and recordkeeping requirements, Seamen.

For the reasons set out in the preamble, the Coast Guard proposes to amend 33 CFR part 164 and 46 CFR part 35 as follows:

TITLE 33 CFR—[AMENDED]

PART 164—NAVIGATION SAFETY REGULATIONS

1. The authority citation for part 164 is revised to read as follows:

Authority: 33 U.S.C. 1231; 46 U.S.C. 2103, 3703; 49 CFR 1.46. Sec. 164.13 also issued under 46 U.S.C. 8502, 8503; sec. 4114(a), Pub. L. 101–380, 104 Stat. 517 (46 U.S.C. 3703 note). Sec. 164.61 also issued under 46 U.S.C. 6101.

2. Section 164.03 is revised to read as follows:

§ 164.03 Incorporation by reference.

(a) Certain materials are incorporated by reference into this part with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. To enforce any edition other than that specified in paragraph (b) of this section, the Coast Guard must publish notice of change in the **Federal Register** and the material must be available to the public. All approved material is on file at the Office of the Federal Register, 800 North Capitol Street NW., suite 700, Washington, DC, and at the U.S. Coast Guard, Marine Environmental Protection Division (G-MEP), room 2100, 2100 Second Street, SW., Washington, DC, 20593–0001 and is available from the sources identified in paragraph (b) of this section.

(b) The material approved for incorporation by reference in this part and the sections affected are as follows:

Radio Technical Commission for Maritime Services (RTCM)

P.O. Box 19087, Washington, DC 20036

Paper 12–78/DO–100, Minimum Performance Standards, Loran C Receiving Equipment, 12/20/77.....164.41

International Maritime Organization (IMO)

4 Albert Embankment, London SE1 7SR, U.K.

IMO Resolution A.342(IX), Recommendation on Performance Standards for Automatic Pilots, adopted November 12, 1975.....164.13

3. In § 164.13, paragraphs (d) and (e) are added to read as follows:

§ 164.13 Navigation underway: Tankers and ITBs.

* * * * *

(d) Except as provided in paragraph (e) of this section, a tanker of ITB certificated as a tankship, when underway in the navigable waters of the United States out to 3 nautical miles seaward from the territorial sea baseline, may engage the automatic pilot only if all of the following conditions exist:

(1) The operation and performance of the automatic pilot conforms with the standards recommended by the IMO in Resolution A.342(IX).

(2) A qualified helmsman is present at the helm and prepared at all times to assume manual control.

(3) The vessel is not operating in any of the following—

(i) The areas of the traffic separation schemes specified in subchapter P of this chapter (parts 160–167);

(ii) Those portions of a shipping safety fairway specified in part 166 of this chapter.

(iii) An anchorage ground specified in part 110 of this chapter; or

(iv) An area within one-half nautical mile of any U.S. shore.

(e) A tanker or ITB certificated as a tankship equipped with an integrated navigation system, and complying with paragraph (d)(2) of this section, may engage that system while in the areas described in paragraph (d)(3) (i) or (ii) of this section. The master must be able to provide, upon request, documentation showing that the integrated navigation system—

(1) Can maintain a predetermined trackline with a cross track error of less than 10 meters 95 percent of the time;

(2) Provides continuous position data accurate to within 20 meters 95 percent of the time; and

(3) Has an immediate override control.

TITLE 46 CFR—[AMENDED]

PART 35—OPERATIONS

4. The authority citation for part 35 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 3306, 3703, 6101; 49 U.S.C. App. 1804; E.O. 11735, 38 FR 21243, 3 CFR, 1971–1975 Comp., p. 793; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

§ 35.20–45 [Removed]

5. Section 35.20–45 is removed.

Dated: September 24, 1992.

W.J. Ecker,
